

## ... to our Annual Sale ...

Our family continues to operate M.C. Quantock Livestock as a family ranch. We have worked darn hard to earn the trust, confidence, loyalty and respect of the people we deal with... today 73% of our bulls sell to repeat customers - many of them, second generation.

Our bull program sets the standard for the industry and while imitation is the greatest form of flattery, remember, we are the originators. We stand behind every bull we sell. We give you the service you deserve and we appreciate your business.

We've built a good big cowherd over time producing bulls strictly for commercial cowmen. Unlike a lot of bull producers, we've paid for our ranch and cows with our cows. Traditional purebred guys sell dreams... we sell reality. In 30+ years our cowherd has produced in excess of 31 million dollars worth of bulls... no "smoke and mirrors," no "trendy numbers," no unproven sires, just the real deal. We produce durable, high quality bulls that sire those "fancy" high quality calves the order buyers love, and we produce lots of them, but best of all, they are affordable. We've sold nearly 13,500 bulls, staged 52 bull sales and our family has been in the bull business for over 100 years. Buying the right bulls is an important part of your success. Our sale is an experience. A bull sells every 50 seconds for nearly 6 hours... hundreds of good, solid uniform bulls in 8 bull lines, quality bulls at everyday prices.

"Free DVD, Free Bull Book, Free Delivery, Great Bulls" Call Today!

Mac & Pat

"This is your personal 'Bull Book' our complete DVD is available to download from our website or call 1-800-561-2855 (BULL) and we'll mail you one! Enjoy it and show it to your neighbors."

## Why our sight unseen is so successful and easy to use!

# Sight Unseen Purchase Plan...

## Mac Creech, DVM

## The most successful in the industry and here's why... SATISFIED CUSTOMERS!

"I'm not a big cow operation, have bought all my bulls Sight Unseen and were put on Bull Development and grow like weeds. Only 1 problem... I drive my wife crazy replaying the sale DVD!"

- K. Kosheluk, SK

"There were five bulls that came off the trailer. I picked the one I liked best in my head. Not knowing which one was mine. Once they sorted them the one I picked ended up in my trailer. Thanks a lot. You guys got me the bull I would have picked myself and you did it sight unseen."

- C. Tonneson, AB

"Mac & the video reassured me that I was making a good decision buying sight unseen. When I finally received my bull I never knew that kind of quality was around for a reasonable cost. Perhaps the best bull I've bought. Look forward to doing business again."

- K. Victoor, AB

"We bought two hereford bulls sight unseen. The whole process of getting such good quality bulls was absolutely painless, right from the first conversation to delivery. The bulls were everything we expected and more. Easy fleshing they maintained their weight through breeding."

- G.&S. Clark, AB

"The Sight Unseen Purchase Program you offer, coupled with a rock solid reputation, unquestioned convenience and a large battery of quality, affordable sale bulls has again made bull buying from your ranch a pleasure."

"Being able to buy a bull over the phone is great peace of mine, and Mac was very easy to talk to and is very knowledgeable about his bulls. The bulls I got were perfect. It was as if I was at the sale. I am 100% satisfied and will buy again from M.C. Quantock."

- M. Arnold, SK

# It may be your best way to buy this year...

While we will do our best to stage a near normal live auction and we certainly encourage our customers to come view the bulls anytime before the sale, remember sight unseen is a foolproof option.

- I will personally visit with each and every customer, discuss your requirements and talk through bull choices.
- I know these bulls. My men and I have calved them, watched them grow, fed them and handled them. You deal with us not a third party.
- We guarantee your complete satisfaction. While we seldom deliver an unsatisfactory bull, it is entirely your choice to accept him on arrival...SIMPLY PUT YOU MUST LIKE HIM WHEN DELIVERED OR WE TAKE HIM HOME, NO PROBLEM.
- When you have viewed the bull book, the DVD and the photos, you and I will make a short list of your choices and discuss your budget.
- We sell our bulls best bulls to lesser bulls within each breed. We will always try to buy the best bull available within your budget.
- We will absolutely never bid on or buy a bull that you and I have not carefully pre-selected as being suitable.
- We will absolutely never exceed your budget. In fact, most times we deliver under budget.
- Most important...WE DON'T WANT YOU TO PAY FOR THE BULL UNTIL YOU HAVE SEEN HIM YOURSELF in the flesh at your ranch. Then and only then do you make settlement.
- You can call anytime at your convenience to talk bulls.

1-800-561-BULL (2855)

Thanks, Mac

NEW THIS YEAR

Call for your complete DVD of the bulls.

1-800-561-BULL (2855)

Our complete Bull Book will not include a DVD. It's downloadable from our website. But if you would like one - just call, we'll send one right away!

## M.c. Quantock Bull Sale "canada's Bulls" \*

## "whew! ...fhaf was a close one..."

Our sale theme is inspired by our 4 year old grandson Grayson, who when he survives a tough spot always says "whew!... that was a close one!" Well the year 2020 was a "close-one." Cattlemen and agriculture in general are surviving the COVID pandemic in pretty good shape. The world learned pretty fast who was important; cowmen, farmers, truckers, basic store workers and healthcare providers were essential. No one thought very much about technology, vegan diets or the climate crisis. The world gained a new respect for where their food comes from... lets hope they keep it!

We have been at this for 50+ years. We have developed 8 lines of cattle that simply make more money for our customers. The cattle don't make many mistakes... they "walk what we talk." Our simplistic everyday, practical management, the integrity of our program and bulls that "deliver the goods" have made our program a leader in the industry. We are Canada's Bull Supplier and these are "Canada's Bulls."

Our simplistic program "flies in the face" of a purebred industry that increasingly wants to breed cattle just for numbers on paper. I believe there is an art to breeding cattle, as well as the science. It takes the instinct and talent of "cattle people" to make the good ones. I just believe if you keep it simple, cull the open ones, the problem ones and the ugly ones, you'll be making as much progress as is possible, after all, the auction mart does not ask you to send in a list of EPDs. They buy your calves because "they're big, stout, hairy calves" that look the part and because of your good reputation.

A well-designed cow operation is very profitable at today's price levels. Survive and prosper by remembering that a cow is a "low tech machine." She hates diesel fuel, technology and expensive feed; she harvests grass, stores solar energy and turns it all into high quality protein. Her value to the world can only increase.

Many politicians and "so called" scientists have never been close to nature and have a fundamental misunderstanding of reality. People cannot digest grass, cows can and 70% of the earth's surface can only grow forage not crops. For agricultural folks with a good "BS detector" it's all pretty simple.

It is now the evening of December 15 and as I sit down to write this, I am struck by the fact that for most of us in agriculture it has been a pretty good year.

In Northeast Alberta our growing season was pretty good after a long, cold start to spring. Grass conditions and crops were very good and for the first year in four our grain farming neighbours had a warm, dry harvest and there is no crop under the snow. Corn crops lack maturity and cows won't graze there as long as we would like but like always, we will adapt and make it work.

Fall was beautiful weather here but came to a crashing halt about the first week of November with 12" to 18" of snow. We rode and gathered cows in snow so deep the cows had to break trail for their calves and the horses tired quickly.

The cattle side is pretty solid; calf prices were up and down a bit but pretty good really, the bred female market and early bull sales have been remarkably strong. This business is still darn awful good and nicely profitable for everyone.

At press time we still have 400 cows 75 miles from home on bale graze, the rest are near home on standing corn graze.

We bred nearly 1400 females this summer. I tell people we are "road ranchers," nearly every cow gets on a truck going somewhere to summer grass. "Show our old cows a chute and they'll load themselves...they know they're goin' to a better spot." Our pastures are spread out over 150 miles end to end, with us in the middle.

Our cow herd is big; every sort, every job, a big one, but it has its rewards. You can make real selection progress with "whole herd" selection and culling and our bulls show it. The uniformity unequaled; the quality, impressive. We don't just have a few "pretty cows," we've got pastures full of "beautiful" ones. Beautiful because they're functional and they work for a living.

Our cow herd, at the home ranch, now calves in May and June on stockpile grass. They go from the calving pastures to summer grazing and breeding, make a short stop at the home ranch for weaning, then on to the standing corn. Corn to grass, grass to corn and on it goes, with no supplement feeding and no hauling feed or manure. I just believe that as soon as you put machinery or diesel fuel between a cow's mouth and what she eats, it does nothing but cost money.

On the personal side, Pat and I, our family and crew and their families have remained healthy through it all.

We are thankful everyday for the business we are in, where we live and the people we have around us.

As COVID caused the world to pause and our 'busy' complicated life slowed, I found myself reflecting on the sacrifice and incredible hard work and accomplishement of our parents and grandparents. Pat and I ranch on parts of both family

homesteads established by our grandparents in the very early 1900's. We are third generation, our kids are the fouth. The sacrifice, courage, grit and ability it took to start in a new country, and to build a farm from nothing, makes our sacrifices seem trivial.

When we were all in COVID lockdown last spring, our daughter Robin put it in perspective when she said, "All we have to do is sit on our butts on the couch and avoid people - two generations ago people our age had to go to war."

Our family are all involved in the ranch. Cody is with the ranch full time and has established his own yard site on the Saskatchewan side of the ranch. He purchased the Murphy Charolais cows a few years ago to add homebred, white bulls to our program. Cody's ability as a real cowman is showing in how good and uniform he has made this bull offering in just a few years, he just doesn't have enough of them yet to meet demand.

Lee completed his Masters in Ranch Management from Texas A&M a few years ago and now works for Leachman Cattle of Colorado as the General Manager of Rocky Mountain Sire Service. He was instrumental in developing our website and pushing to utilize a little more social media than an old cowboy was comfortable with. We have appreciated his help.

Our daughter, Robin and son in law, Mark and two busy grandkids, Hannah and Grayson, live in Calgary! Mark is the Director, Energy and Industrial Property Tax for Altus Group. Robin handles all our cattle records, registrations, etc. She does more and more each year and generally tries to keep her Dad and crew organized on the cattle record side. She now also handles our internet work. I cannot tell you how much I appreciate her. She adds a lot on the records and promotional side and takes a load off both Pat and I.

Pat and I joke that our journey in building our ranch can be summed up in three country songs. When we started on our own in the 90's we felt like it was Tanya Tucker's, "Two Sparrows in a Hurricane." As we raised our family and built our ranch, Garth Brooks, "We Might Have Done It Different, But We'd Have Had To Miss The Dance" seemed appropriate. And now Toby Keith's, "Don't Let The Old Man In." has particular meaning for me. We've been a pretty good team. I'm the "big picture guy" and she's the "detail lady." I cannot thank her enough for her contribution and for weathering the storm.

Our ranch staff are a huge asset to us. In many cases now, I ask them how we should handle the work, they've always got it figured out. Our foreman, Rick Knorr, takes on increasing responsibility as the ranch grows. He and his wife, Dom, now have a beautiful daughter, Sadie, to keep them busy. Ross Maxwell has been with us nearly 10 years, he just handles everything. He and wife Lacey have two sweet daughters, Eveline and Elizabeth (cool names eh!). Carter Sidoryk is a key member of our team, having been here nearly three years. He's a real cowman and we're fortunate to have him. Anton MacMillan joined us last spring, his mechanical talent is a nice compliment to a bunch of cowboys, but the bonus is he's capable on the cattle side as well. Son, Cody, rounds out the day to day ranch staff. I want to acknowledge the contribution Jason Whiting makes to our sale effort. Jason has built and edited our video and handles all the "techy" stuff sale week. He is a pleasure to work with and is pretty tolerant of an old cowboy.

A special thanks to Deb Lundquist who helps in the office and is Pat's "right arm" at sale time.

Our thanks to our friends who have given their help, advice and assistance all year and to all the fine people who help Pat and I during the sale week; our thanks in advance. We really do appreciate everything you do to help us and nothing would be possible without you. Our sale is an "experience" and we'd love to have you come. We'll be ready with lots of fellowship, good food and lots of great cattle. See you on Saturday, January 30, 2021.

Please come up and introduce yourselves sale day -we would like to meet you

## General Information

#### Location:

The sale will be held the Dick Jones Sales Pavillion Exhibition Grounds, 5521 - 49th Avenue, Lloydminster, Saskatchewan. This is one of the finest sales facilities in Western Canada. All cattle are under cover in heated facilities.

#### Time:

The sale will commence at 12 noon, Saturday, January 30, 2021. Lunch will be served at 11:00 a.m.

#### Health:

Purchases may be taken right out from the sale to any point of Canada. Cattle may travel anywhere in Canada without test. All sale bulls have been semen tested. All sale cattle have been treated with Ivomec. Consult with M.C. Quantock for complete vaccination protocol. See page 22 for details.

#### US Health

All bulls are guaranteed exportable. We will do all neccessary tests and deliver the bulls to the nearest port of entry to Western Canada. A fee of \$250/bull will be added to the purchase price to cover these export costs.

#### Guarantee

The cattle will be sold under the terms of the Standard Breeding Guarantee of the Canadian Hereford, Angus and Charolais Associations. Breeders Guarantee, Bulls... Should any bull fourteen (14) months of age or over fail to prove a breeder after being used on females known to be breeders, the matter shall be reported in writing to the seller within six (6) months following the date of purchase or six (6) months after the bull has reached fourteen (14) months of age. The seller will have the right and privilege of six (6) months to prove the bull a breeder. Pedigrees will be transferred as soon as possible. All animals are guaranteed breeders. Refer to terms inside back cover.

#### Delivery:

All purchases are at the buyer's risk as soon as sold; however, every reasonable care and attention will be given while shipping is arranged. M.C. Quantock will provide delivery to central ranch locations anywhere in the Western Provinces absolutely free. Generally we have cattle going into all provinces such that we can arrange our load so that delivery will be convenient. On cattle going longer distances - M.C. Quantock will cost share deliver. M.C. Quantock guarantees that delivery will be no inconvenience or financial burden to any customer. Take advantage of our "Haul Yer Own" discount of \$75/bull picked up on sale day!

#### oliciting:

It is unethical for anyone to promote, advertise or arrange the sale of any cattle, other than those in the sale, on the sale premises.

#### Phone or Mail Bids:

Any of our Sale Representatives can be relied on to act on your behalf. Phone numbers are as listed. Better still, call us at 1-800-561-2855 to arrange Sight Unseen Purchases.

#### Insurance

Agents will be on hand to insure purchases the day of the sale. They are very knowledgeable and can handle any type of coverage. We recommend coverage of bulls for loss of use as bull values have increased. We would like you to insure your bulls left with us on bull development. All hybrids can be insured, they all have a permanent tattoo.

#### Accommodations:

The Hampton Inn, Lloydminster is our official host hotel 8288 44th Street. They offer a Special M.C. Quantock Sale Rate. Please call early, 1-780-874-1118, for reservations and ask for your M.C. Quantock Sale Discount. All rooms are \$109. Group Code: MCQ. PLEASE CALL AS SOON AS YOU CAN

#### Cradit

Credit terms are available in some cases. Contact M.C. Quantock prior to the sale for more information.

#### Payment

All bulls purchased by buyers in attendance must be settled for on sale day unless prior arrangements have been made with Mac.

#### Liability:

The owners, the employees, the sale staff and representatives accept no liability for accidents that occur, although these are rare at cattle sales and therefore any persons who attend this sale do so at their own risk.

# Please Bring this Catalogue to the sale!

Directions to Farm: 10 km North on Hwy. 17, 1/2 km West on Township Road 510

## Sale Team

"The success of any endeavour is largely influenced by the people you have around you." A sale of our magnitude takes the team work of a lot of competent people. I have included on this page some of our key people. With their help and co-operation we will stage Canada's largest private bull sale. It'll run like a well-oiled machine, putting everything through the ring in 6 hours. Feel free to call on any of them to help at any time.

## How will we deal with COVID issues?

We will do our best to stage as near normal a sale as possible. All pandemic protocols will be observed. Our two large heated buildings (an acre and a bit in space) plus ample outdoor space will let us host a near normal crowd for a live auction.

We have ample room to socially distance in both the cattle pens and other areas.

We do encourage any customers that are able to visit the ranch ahead of sale day to view the bulls. They're ready, look great and await your visit.

Our popular, successful SIGHT UNSEEN PURCHASE PLAN is always used by 30-40% of our customers. We have done it for years with great success and customer satisfaction. This year, you may want to <u>consider sight unseen</u>. Full details and customer comments are on page 1. Call and visit with Mac..."its just that easy."

We will have our normal availability of ringside phones and good people to help you. In short, we will do everything possible to make our sale safe, effective and enjoyable. We trust in the "down to earth" common sense and good judgement of the cattle people who are our customers to help us all stay safe and still enjoy our business.

WATCH OUR WEBSITE FOR ANY LATE BREAKING INFORMATION AS THINGS ARE CONSTANTLY CHANGING.

"I have been happy with the information and the whole bull buying experience. Sight Unseen works, I live too far away to get to the sale."

- C. Baglole, SK

"Sight Unseen bull showed up in good flesh, quiet enough to curry comb the day he walked off the trailer, after breeding bull is still in tremendous shape!"

- R. Glover, ON

"I'm 100% satisfied with the quality of bulls I've bought with your Sight Unseen system. When taking delivery I've gotten more value than I paid for. Your integrity is appreciated."

- M. Carr, ON

"I called Mac and and told him what I was looking for, never had such a good looking quiet heifer bull before, thanks to Mac. We call him "rolly-polly."

- J. Dreidger

"Bought Sight Unseen. I was suprised" at how good he looked when Mac delivered him. Stayed in good shape through breeding, travelled great."

- D., Rutz, BC

"Our bull had a problem, you handled it fairly, we look forward to coming back. We enjoy making a family trip of it and looking over so many good bulls. Thanks for treating us fairly."

- T. Pletz, AB

"Very happy with service and very pleased with sight unseen. I like that the bull is of good nature and calm to pass on to his replacement daughters."

- R. Dymond, MB

## Common Sense Data Practical, Fair and Honest on every bull and... in your language!

Mac Creech, DVM

"Fairly, honestly and accurately presented on every bull" about describes my philosophy on the use of performance data. Over the many years I have tried to provide all and any objective information that I felt would help my customers select, analyze and fit our bulls into their various programs. Now, with 8 bull lines working within our own program, we have all the necessary genetics within the M.C. Quantock Livestock gene pool to completely service the crossbreeding needs of the industry. We can build and develop programs through one or a combination of our bull lines to maximize net profit on your ranches, recognizing that each farm or ranch is a unique situation with different advantages, disadvantages and needs.

The data presented varies by bull line and the state of our on-ranch records with each line. I still subscribe to some extent to the old saying, "If you give a good cowboy a bull's birthday and his weight, he'll tell you if the bull's got performance." Now with the technology available, we have developed new ways of analyzing cattle. However, simple rates of gain and adjusted weights are still very meaningful and easy to interpret by our customers. Birth weights are always taken within 24 hours of birth and presented as actual unadjusted weights. Current Breed Association EPD's lack accuracy on young bulls and are no help in selection for many cattlemen. We use current EPDs to select our herd bulls. We look for high accuracy data, Genomics is helping. That's our job as seedstock breeders. As a commercial cattleman, you need not worry about EPDs – just depend on us. The auction mart doesn't ask you to send in a list of your EPDs. He buys your calves because they're "big, stout hairy calves" that look the part and because of your good reputation. Keep it simple, cull the open ones, the problem ones and the ugly ones and you will make as much progress as is possible. Our bulls will help you get it done.

Tom Lasater who developed "Beefmaster" cattle once said that "Breeding cattle is a relatively simple task – the challenge is to keep it simple", and that statement has a lot of truth. Don't try to select for so many things that you go nowhere. Work slowly at improving the "weak links" in the cattle you have at home, through careful selection of sires.

#### 1) Selecting your Bull(s):

Because the bulls in this sale are from the top of our production, most are above average for all traits in our herds and in most cases the line. We work with large numbers and select only the best. Please don't make the mistake of trying to find the perfect bull, in our experience he does not exist. Select bulls to improve on the weak traits in your cows by purchasing bulls that are strong in those traits.

2) Calving Traits: You will find very few bulls who are assisted at birth in our low maintenance grass calving program.

We have included here the age of the bull's mother, the calving ease code U – unassisted, E – easy pull, H – hard pull, MP – malpresentation, S – surgical. Also listed is the birth weight. The issue of birth weights is a controversial one. There is a high genetic correlation between frame, weight per day of age, daily gain, mature weight and birth weight. As you increase any one by selection they all increase. Our objective is to find those rare bulls, who have "TRAIT BALANCE." Those that balance the antagonistic traits of birth weight with post weaning size and gain. We are now uncovering bulls in our program in all breeds capable of doing this and utilizing them extensively as herdsires. It is perfectly reasonable to expect a mature cow to calve a calf at 7% of her body weight so a 1500 lb cow can easily calve 105-107 lb calves, a 1300 lb cow, 90-95 lb calves and so on. Don't overcompensate by going too small on birth weight, it will mean less weaning weight. The birth weights are actual weights taken within 24 hours of birth and not adjusted for age of dam. Level of nutrition and management difference may decrease birth weight by as much as 10%. The reality is they are probably accurate within 5% depending on whether the calf has nursed or not and whether it is slightly overdue or premature. Use them as a guide, but allow some flexability.

#### 3) Maternal Traits:

The performance of his mother with regard to fertility measured by her calving interval (a good beef cow should calve every 365 days under adequate management) – also the weaning data, a measure of the milking ability of the mother and the genetics of the calf. For improvements in weaning performance, select high ratios and high adjusted 205 day weights as well as weaning weight per day of age (W.D.A.).

Our Hereford, H-2, Red Angus, Black Angus, Red and Black Angus x Simmental and Red Angus x Gelbvieh hybrid lines all are focused on improving maternal and mainstream performance in your cow herds. Our Charolais, while used predominantly in a terminal role, nevertheless are still selected from good milk genetics within that breed to assure that they are not "one track" cattle.

To improve milk and maternal ability select a bull with a high maternal rating. If you sell your calves at weaning then you'll need a bull with high weaning data and weaning WDA, as well as good growth traits. To maintain a good reproductive and breed back percentage weaning, data should be closer to average levels. Too much milk can adversely effect reproduction if nutrition gets restricted.

4) Growth Traits:

#### A measure of the animal's ability to grow:

On All bulls of all breeds: We present adjusted weaning weights and on yearling bulls W.D.A as well. This measures both the bull's own genetic ability to grow and his mother's milking ability. (It can, however, be greatly influenced by management and environment). We present a test gain which indicates his feedlot performance, but our test period is short and this can be quite variable.

We present a projected yearling weight which is based on the bull's 205 day weight and a formula we have developed using W.W.D.A. and Test Gain to estimate his 365 day weight on yearlings. The 18 month weights are just a simple adjustment for age based on their weight at processing time. This is variable, however, and is an estimate only. (We consider it to be plus or minus 75 lbs.) It is useful however because it closely relates to slaughter age and weight for most cattle.

Pelvic measures can be supplied on request should any customer require it.

#### 5) Fertility:

We have measured all the Two-Year-Olds' scrotal circumferences and then presented the data as actual circumferences. As testicle size is very highly inherited and reflects the bull's breeding capacity, the measurements will allow you to compare the bulls for this characteristic. It should be emphasized that all the bulls in this sale are much more than adequate in this department with many being excellent. Testicle size has a high correlation with early puberty in half sisters and daughters and hence is a trait very important to your profit. Our management and culling practices put pressure on our herd to be very fertile even though fertility is a trait of low heritability. All our Two-Year-Old bulls are semen tested.

#### 6) Carcass Traits:

While carcass is not our primary focus on our maternal mainstream lines, we do want as much muscularity as possible as long as it does not adversely affect reproductive capacity.

#### 7) Frame Size:

We have discontinued providing frame size information. The only commodity any of us get paid for is weight. Most cattle in the industry at the present time have enough frame, some in fact have too much. My Dad always said; "It's not how big they get, but how quick they get big that counts."

Perhaps the best breeding decision a commercial producer will ever make is the choice of a seedstock provider. Find someone whose breeding objectives mirror your own, who operates in an environment similar to yours, who can help you benefit from heterosis and can understand your objectives and help you select the right bull.

Burke Teichert Retired General Manager, Deseret Land & Cattle

## Polled vs Horned vs Scurred

There are some misconceptions or misunderstandings with regards to polled cattle. I will try to simplify and clarify this with a few simple points.

- 1. The polled gene is dominant to the horned gene.
- 2. Homozygous polled means all offspring will be polled regardless of breeding.
- 3. Double polled means both parents are polled; this increases the likelihood of the offspring being homozygous.
- 4. Scurs are the result of an independent gene unrelated to either the horn gene or polled gene. For the most part scurs are loosely attached to the head.
- 5. Scurs is sex linked being dominant in bulls and recessive in heifers. That's why if you think about it we see a lot of scurred bulls but very few scurred females. It is also the reason why scurs do not present a problem in your cowherds. Scurs are not a big concern as they seldom show up at weaning time and don't affect your calf sales.
- 6. A horned animal may carry the gene for scurs but it is masked by the horned gene, making the scurred gene hard to eliminate from a population.

## How our bulls are developed...

We sell all summer born two year old bulls. We believe they are the ideal age and we develop them to maintain soundness and longevity.

- Calves are born mid-May until the first week of July grass calved checked, tagged and weighed only once per day. No night checks, cameras or calving barn. (with this system problems eliminate themselves.)
- We wean in November, bull calves are backgrounded in big groups till spring on a silage based growing ration.
- By spring our bulls are well grown up but not fleshy... just perfect to take advantage of our grass.
- Bulls are sorted by breed and size into groups of 30-50 bulls.
- Bulls go to our management intensive grassing paddocks from late May or June until late October.
- Water is provided by solar systems or surface piped fresh water.
- We move bulls to fresh grass every two days all summer long.
- The pasture is good quality, everyday, it ensures they grow well all summer. A real bonus here is that they are used to a man on foot and constant checking.
- As summer progresses we supplement the bulls with a low energy, high protein pellet made specifically to our specs and made of pea and lentil hulls. No starch, high fibre with added minerals and vitamins. (about the nutrient content of good alfalfa hay)
- In late fall the bulls are brought to our bull lots and placed on our silage based bull development TMR (total mixed ration.) This is ideal because every mouthful the bull takes he has the right proportion of all nutrients, no bingeing on just grain. No barley or coarse grain is fed, just our bull development pellets.
- Our rations and protocols have been developed over years of experience to bring you the best, most durable bulls possible.

## What you really need All the good old Angus traits and "no darn trouble." Our Red Angus are

developed from mainstream maternal lineage. We've stared birthweight in the eye and backed it down.

Our Red Angus herd was established in the 60's, we are one of Canada's Pioneer Breeders. Our bulls have introduced the red influence to countless commercial operations across the country.

Our disciplined program has for 48 years never compromised birthweight, thriftiness or vigor. We've bred moderate frames, good cow traits, easy keeping and light to moderate birthweights into each and every bull we sell. Ours are reliable, predictable bulls; ideal for cross breeding with volumes of bulls for heifers and bigger stouter bulls for cows.

The offering features as many older bulls as anywhere in the country. 65 Summer Two Year Old Bulls.

Use our red bulls to easily calve heifers and still get a "darn good calf" to sell or keep. Raise your own Red Angus cross replacements with the good maternal quality our bulls offer. If your cows have too much exotic, use our Angus to moderate frame, make 'em easier to feed and increase carcass quality and feeder demand.

Share and benefit from our experience and 48 years of selection, volumes of records, predictable birth weights and performance uniformity. Ranch raised Red Angus that'll do the job, never complain, and give you no grief. 65 plus solid bulls, buy one or you can select uniform half brothers in volume. Great red bull value from Canada's Bull Supplier.

Papers transferred on all purebreds ~

Mammas like this! Deepsided, high volume, easy-keeping females with trouble-free udders and ample milk.

> Why buy yearlings when you can have these at no more money!

Herdbulls with volume, length and ample testicle.

Two Year Old sale bulls with volume, thickness but still calving ease... like peas in a pod.

Red Bieber Rollin Deep Y118

Red Ted Kinchen Sagebrush 74R

#### **RED LWNBRG ROLLIN DEEP 90B**

Birthdate: January 31, 2014

Red Bieber Roosevelt W384 Red Bieber Tilly 399W Red Kinchen Sagebrush 487

Red Ted Glacier Marias 26L

Rollie' as we call him was added in the spring of 2015. He was bought to bring the mass and body of a bull I long admired, "Bieber Rollin Deep" to our program. He is long bodied, fleshy (and keeps it year round). He was sidelined through part of breeding season so less sons. We simply "love him." He's real "Angusey," moderate birthed, wide bodied and deep, just like his name. Now using 3 sons.

> Progeny Profile: Avg. BW 75.7 lbs. • Wide Bodied • Deep Deep • Fleshy • Moderate Frame

## **RED QLC QUANTOCK RD 2374D**

Birthdate: May 26, 2016

Possibly the most pleasing phenotype sire our red program has ever produced. "Tootsie Roll" as we called him, left a powerful set of sons in 2019, the only crop we have, he suffered an injury and we lost him fall 2018. These beefy sons are impressive. We used three of them in our purebred program last summer to incorporate all the good he brought to the table.

> Progeny Profile: Avg. BW 76.6 lbs. • Bulky • Big Bodied • Structurally Flawless

## **RED QLC QUANTOCK RD 2484E**

Birthdate: May 30, 2017

Red LWNBRG Rollin Deep 90B

Red OLC Quantock 908 Ms 2272Y

Red Bieber Rollin Deep Y118 Red Ted Kinchen Sagebrush 74R Red OLC Quantock 908S Red OLC Quantock LT Miss 792T

We selected 2484E (or Rollie 2.0 as we call him) to use as just a yearling after his sire, Rollin Deep, went down. He did a great job, left a lot of bulky, big middled cattle. You will appreciate his sons. He saw heavy use this summer on our second calvers. So more great sons are in the "pipeline."

Insufficient Progeny to Report

## **RED QLC QUANTOCK RD 2461D**

Birthdate: June 12, 2016

Red LWNBRG Rollin Deep 90B

Red QLC Quantock Lew Ms 2067Y

Red Bieber Rollin Deep Y118 Red Ted Kinchen Sagebrush 74R Red LFE Lewis 802S Red QLC Quantock Co Miss 648P

2461 or "Home Rollie" as we call him is out of one of our most impressive cows. She has put bull after bull in the top end of our sale. Beautifully put together and always fat, always a full udder "IDEAL." Home Rollie was used on second calvers. These "middle road" power bulls are his sons. His birth weights are so light we put him on virgin heifers last year with great results.

Insufficient Progeny to Report

## Red Angus Reference Sires

## RED QLC QUANTOCK MB 2539C

This is "Buttercup" selected for in herd use on primarily heifers. Where he worked magnificently so well, in fact we may move him to cows and keep some sons. Very light birth weights but very respectable performance. "Strong sons sell." Like all the bulls we keep and use, his mother is a standout.

Progeny Profile: Avg. BW 67.8 lbs. • Length • Balance • Goodness

#### To Mac and Crew,

Been meaning to contact you folks. I have never been to a sale that moved that many animals through a ring in that short a period! I really want to know who your auctioneer was. That man is an "Ironman" when it comes to auctioneering.

Your staff was absolutely the friendliest I've ever come across. The sale was the smoothest and most organized I have ever had the pleasure of being at and I was impressed with the quality and demeanour of your bulls.

I bought three black angus and I was sleeping and should have had a fourth one. Anyway I know I will be back and I'll be a little quicker on the draw when these bulls come by!

Spoke to Mac on the phone for a few minutes before the sale and things were exactly the way he said they would be.

Anyway we are very happy with our experience of the first one of your sales and I'm sure we will be back to many more. Thanks again.

- Dale and Joanne McQueen, AB

Just a note thanking you for your honesty over the years selecting our bulls and delivering them, never got a bad one.

- A. Brown, AB

Red Blair's Ruba 26W Red Nordal Aviator 389X

Red Nordal 259W Bridget 259Z

Red LLB Bridget 259W

Red Ringstead Kargo 215U

This is Kargo. We purchased him as an outcross from Nordal in 2018. You can appreciate the depth and massiveness from the photo. A limited number of sons on offer but you can appreciate the burliness and masculinity.

Insufficient Progeny to Report

We calve April - sell in October. This is our third year of Mac's bulls. Our steer calf weight was our heaviest at 581 lbs., that's a 31 lb. gain.

> C. & K. Lee Big Muddy Cattle Co.

## Red Angus Bulls 💳

## - Red Angus Data Profile -

	CALVING		MATERNAL		GROWTH	1	FERTILITY
Age of Dam	Calving Ease	Birth Weight	Adjusted Weaning Weight	Composite of Grass Gain an Combinat	d Test Gain	Adjusted18 Month Weight	Scrotal Size
documents productivity	U - unassisted E - easy pull M - malpresented	actual wt. taken within 24 hrs. of birth	adj. for age of calf & dam	gain on pasture with late season supplement	gain per day while in our bull test	a good reflection of overall performance	in cm
5 yrs.	U	89 lbs.	603 lbs.	3.2		1518 lbs.	38

The data we have presented is as comprehensive as possible and will enable you to select bulls to ideally suit your needs. We have listed each bull's Age of Dam (A.O.D.), Calving Ease (C.E.), Birth Weight (B.W.), Adjusted Weaning Weight (A.W.W.) (composite of grass gain and test gain). Projected 18 Month Weight and Scrotal Size. The bulls have been fed a silage, pellet ration designed to provide a modest gain. The bulls were weighed in late November and a gain calculated from grass turnout till late November. We have provided photos to give you an impression of the excellent quality and performance on offer. They are backed by our unconditional guarantee. All are guaranteed breeders. Your attention is directed to the bull development option which you may wish to consider. All bulls are semen tested.

## You will receive a transferred pedigree on all our Red Angus purebred bulls.

#### ONE GAIN FIGURE

Our bulls now spend longer on grass so our test gain in lot was too short to be significant. The one figure encompasses both periods. To help give more accurate gain data, we have presented "ONE GAIN FIGURE" only. It takes into account Summer Gain on Grass plus the first month in our bull test, from grass turnout to late November.

They're bigger, stouter and tougher than the yearlings you'll buy other places. They'll breed more cows (even the big ones), hold their condition, take less management and be less worry and trouble. They've been gently and slowly developed on grass, so they last a long time in your herd. They'll breed circles around a yearling and they're not the "leftovers" like most 2 year olds you'll find. They really are the answer. "Perfect Age" bulls - 22-26 months old at breeding time. WHY BUY A YEARLING WHEN YOU CAN HAVE THESE AT NO MORE MONEY?

RA-2270

This age group of bulls are the best there is from a function stand point. These are grass-calved bulls from a "swath grazing," "corn stalk chewing," low input cowherd which never gets close to a corral. These bulls are 2-3 months younger than most two year olds. The bulls are weaned in late Nov.-Dec. backgrounded then put on grass the second summer. A little extra age always helps. We now have our whole cow herd calving in May/June. It allows us to "low input, low maintenance, grass calve with minimal attention." We ride these cows once per day at calving to weigh and tag. We check the heifers twice per day but never after 5 pm! Calving is what our cows do, not what we do. These bulls are from cattle that know how to be successful on their own. They're low maintenance and trouble free, but still industry leading in terms of conformation, performance, pay weights and power. They'll compete with the best. These bulls were in fact born on grass 75 miles from Ranch Headquarters. No calving barns or cameras neccessary. The genetics here are uniquely our own. We have worked away for years to build these cattle starting in the late 60's. At that time I would not have believed that we could create cattle with this much payweight and power, with such minimal birth weight and convenience.

## one Bull At A Time

Although we sell 400 bulls in one afternoon, we sell only one bull in the ring at a time. I have never been comfortable being forced to bid when two bulls are sold "choice." We just don't think it's fair to our customers. So while we sell more bulls than anyone in the country, we do it "one at a time."

## LET US FEED HIM 'TIL YOU NEED HIM! \$125 BULL DEVELOPMENT PROGRAM

We have established a widely accepted program to develop all 2 year old bulls here at the ranch to better serve our customers. We will take the bulls home after the sale and feed them until early April on a silage based ration to gain about 2 1/2 lbs. per day. Delivery will be throughout the month of April, area by area. The price for this service is \$125, payable at sale time. It's a real value as it includes board, a semen test and central point delivery.

Trent Wirstuk, Rick Knorr, Cody Creech, Mac Creech

We recommend that you insure the bulls on development. Good rates are available from our agents.

## Herd Health Program

We maintain a practical, effective herd health and vaccination program for our own and our customers protection. Calves receive a vaccination for blackleg at two months of age (spring turnout). They receive a second blackleg plus vaccinations for hemophilus and pasteurella at weaning time (about 5 months of age). Prior to puberty, before reaching a year, they are vaccinated for IBR, PI3, BVD, BRSV with a live virus vaccine and they receive the last booster for blackleg (this should provide life long immunity).

The cowherd receives annual prebreeding vaccinations with a live virus vaccine, generally Bovishield Gold for BVD, IBR, PI3 and BRSV. All cattle are treated with an Ivomec product annually, the sale bulls generally twice prior to sale.

We do not vaccinate for foot rot becuase we have not found it to be effective enough, but should you require it we can do it before delivery. We recommend vaccinationg your new bulls with the products you use at your first opportunity.

We've harnessed the best of both breeds. Incredibly beefy, thick bulls, they pack awesome payweight on disciplined moderate frames. They have all the convenience of Red Angus; moderate consistent birthweights (85-95 lbs. almost without exception), "easy fleshing" (they'll hold their condition in the tough going) and on feed they're "quick fleshers" with bold hybrid performance (4-5 lb. gains are common place). The Simmental blood gives them that essential "touch of continental muscle" you need today, as well as adding milk and growth to the blend.

Our "Super Baldie Bulls" are an industry success story, over nearly 30 years. They add milk and muscle and are "right sized" to give you no calving problems or management nightmares.

Best of all, they'll give you Red Baldie females for replacements you'll want and need to keep. Too much exotic — they'll beef 'em up.

You can find a few Red Angus X Simmental bulls other places... but what you cannot find is the volume, uniformity, quality, and selection potential available from M.C. Quantock. You can spend a lifetime infusing that blend of Red Angus Simmental or you can do it "one shot" using our Super Baldies. You'll get beautiful "Angus Type" calves with "muscle and snap." Your steers will top the market. Your heifers will be the envy of your neighbours.

...the oldest and most successful hybrid program in the industry...
Unrivaled in numbers sold and customer satisfaction.

SB-2364

Here is more production from our May-June calving red cow herd. Our customers asked for them and here they are. Big bodied, soggy, deep, hairy, powerful bulls. Weaned late, backgrounded then summered on grass. It doesn't get any better. These bulls are an industry success story. They make believers out of skeptics and real cattlemen real money everyday.

Last year these bulls highlighted our sale. Bull after bull, incredibly uniform, they sold "all day" to our cowmen customers because for over 25 years, they have just worked. They do exactly what we say and sell year after year to our repeat customers. Sired by the best Fleckvieh Simmental bulls money can buy. Grass calved with minimal attention from our own purebred red angus cows. Powerful genetics on both sides of the pedigree. We move our seedstock red cows back and forth between our purebred and hybrid programs. We're using some of our best cows year after year in this program and it shows.

"Just got home with my bull, great head, real good feet and legs, clean in the shoulder and thick butt. I was nervous about this Sight Unseen Purchase thing, never done it before, I am impressed with the bull and the way you do business."

We bought a bull who didn't work out. We told Mac, he said he would replace him...and he did, no questions asked. Got a bull from the top pen at the next sale. Thanks Mac.

"Our ranch has been using M.C. Quantock Livestock bulls for years. We presently have over 50 Red Angus, Super Baldies and Black Super Baldies in our bull pen. Our Baldie April calves sold September at Dawson Creek at the top of the market. We sold 1300 calves in 1 hour and could have sold more if we had them. Thanks Mac and family, your great line of bulls makes a difference in our herd."

## "Super Guppies" Red Angus & Gelbvieh Bulls

**Super Maternal!** 

"you'll love a little
Gelbvieh on the
cow side"

Our "Guppie" bulls are all summer two year olds!

"Super Guppie" bulls are a great crossbreeding option. A blended composite of Gelbvieh and Red Angus. Super Guppies have a little more "exotic muscle" than our Super Baldies but are still built from all maternal cattle. Gelbvieh have the carcass, the early sexual maturity and the growth. The Red Angus blood provides the hair, thriftiness and fleshing ability, while moderating birth weight and makes them "smooth Polled."

Use our Gelbvieh x Red Angus bulls as the third option in any crossing program and maximize your hybrid vigor. They're cowmen's Gelbvieh that will work the big range country and fit your management.

Our customers love a little Gelbvieh on the cow side. Our Super Guppie bulls have really found their stride in the past few years as our customers calve their daughters and recognize how well these bulls fit their crossing programs. Gelbvieh hybrids with hair, moderation and uniformity.

They've gone "mainstream," the industry now calls them "Balancers" but we've been making them for 25 years!!

## Summer Two-Year-old Super Guppies

GV-2472

Our "Super Guppie" bulls continue to be cowmen's favorites. Hairy, thick, red hided bulls, they're incredibly uniform. Our new sires have made these some of our best "Guppies" ever. These bulls will fit your crossbreeding programs, sire daughters that will amaze you and steer calves to push the scales. Consider this option... it works. Last year's big "hairy" Guppies were a sale highlight. This hybrid line continues to be our best kept secret. The customers that "use'em - love'em" and they continue to top our "Super Sister" bred heifer sale every December. If you want Red Angus Hybrids - these bulls cost less than our Super Baldies and can get it all done every bit as well. I personally just love this hybrid option.

# Broad fopped, deep Herefords...

# - Don't overlook the breed that built the industry -

Established in 1951, our Hereford herd benefits from 60 years of experience, volumes of performance records (since the 60's), the school of "hard knocks" and the instincts of a cow man. Our Hereford bulls are "just right" to deliver what you need and expect. Broad topped, deepsided bulls packed full of natural thickness on moderate frame sizes. We offer balance and goodness in all the money making traits. Our bulls deliver moderate, predictable consistent birthweights and have been selected over a very long time for large testicles and early maturity. Trouble free... "you bet," our Herefords have been selected for years for good udders you never have to touch, because you don't have the time and you don't need the hassle.

Use our Hereford bulls to add the good Hereford traits your dad took for granted. Deep, thick hair coats, easy keepers that'll get by without the barley bin and dispositions that make cows a pleasure to handle - not an ordeal.

Use Herefords to add British blood to those exotic cows and be ahead of the game as the packing industry demands the British/Continental blend. Our bulls are durable, long living and tough; managed like your commercial cattle, then grown out on grass.

You won't find any "big fat ton bulls" here, but what you will find are bulls that have never seen "hot feed" and pampering. Bulls that will last and last and be bigger not smaller at 4 years than the day you bought him.

"Durable Deep-Bodied Broad-Topped Wide Bodied Bulls" All our Herefords sell as Summer Two Year Old bulls in their working clothes. We are a leading source of reasonable priced bulls, available individually or as uniform groups of half brothers.

Rediscover what your dad knew! Herefords work and are a pleasure to own.

The Hereford breed does not get the credit it so richly deserves for its contribution to Canada's crossbreeding mix. Half of almost everything is Hereford. Whether it be Char X, Simmental X, Limo X, Black or Red Baldies, an important half is the Hereford half.

 $\sim$  All Hereford bulls purebred and papers transferred  $\sim$   $\sim$  All our bulls are now dehorned  $\sim$ 

"To add British blood use Herefords"

dehorned

This linebred, long bodied bull was a July calf who just got better and better. He is a big, impressive Hereford sire. The one the visitors pick.

"Mac and his staff are a pleasure to work with. I enjoy Mac's comments about the bulls on my 'wish list'." - B. Bieman, ON

# Summer Two-Year-old Hereford Bulls

#### Hereford Summer Bulls

Most Herefords are sold as big fat two year olds. They've spent way too long at the feed bunk, 500-550 days of hard feed in most cases. (Incredible when we only feed steers for 100-150 days to slaughter.) If you're tired of two year olds that are too big and too fat or yearlings that are barely big enough, our summer bulls are the answer. Gently and slowly developed on pasture, easy keeping, they'll hold their condition for life. Our summer bulls will be 22-26 months old at breeding, just the perfect age. They're mature and will do everything an older Two-Year-Old can and a darn sight more than a yearling will and best of all they'll last and last. They're the answer to the "Hereford Dilemma."

These "Meat Wagons" sold in the last few sales...

# Summer Two-Year-old Hereford Bulls - Registered Purebreds -

Some of our best Herefords. Our Herefords are all May-June "Summer Twos." They are thick, low set bulls. These bulls are fleshy, quick gainers, they're low set like all Herefords should be. These will really work in your crossing or straight bred programs and as a PLUS will be full two year olds going to your cows next summer.

THESE BULLS REALLY ARE DIFFERENT FROM THE COMPETITION. They are "soggy," smaller in frame (just right in fact) and will not get too tall like many Herefords today. These will not sire 1600 lb. giant Hereford cows. They're built to "cross" in fact, Herefords are the new crossing machines unrelated to most cow herds. Our numbers are very minimal this year as we bred all our hereford heifers red angus for their first calf and the fact that we use many of our hereford cows in our H2 production program.

For 25 years, customers have told us "the best Simmentals I ever used were the first part-bloods."

Here is our Hereford/Fleckvieh 2-breed composite line. Real beefmakers, loaded maternally but bred to simplify and sustain the Hereford/Semi influence in our customers' herds.

Produced on the home ranch using mid-aged proven Hereford cows and beefy, low set, pigmented Fleckvieh sires; these bulls really offer something unique. Enough age to breed a lot of cows, solid maternal genetics and bottom line performance. We call them "H-2's" - They're hummers.

These potent composite bulls are being used on Hereford x Simmental cows, as well as black and black and red baldie cows with great success. Anyway you fit them in your program, they'll make money.

These bulls just work so well, they make repeat customers out of everyone who buys one.

These bulls really work...

...past year's customers are coming back for more. "Our Hereford and H-2 udders are as good as Angus."

" OUR H-2'S ARE THE BEST WAY TO ADD THE WHITE FACE TO BLACKS...
THEY ARE ALL DILUTER FREE, SO NO GREY CALVES"

# Summer Two-Year-old H-z's

H2-4056

H2-1652

These bulls come from our home ranch May-June calving Purebred Hereford H2 production cows. The cows are run a "little rough"... swath grazing, corn stalk chewing, low input, never close to a corral. These bulls are weaned in November-December, background fed, then back to grass. The performance of this pen of bulls is solid. As a group they are as good as it gets. We are in the process of adding new "semi" sires each year. This offering is convincing. Think about how they might work for you. If you were considering Herefords, pay attention to these bulls. They can do everything a Hereford will and more. More muscle, more weight, more maternal, more pigment. Ideal for black base cows. All sired by non-diluter Simmental sires (no smokies or rat-tails).

# Beefy, big bodied, Black Angus...

# All Summer 2 year old bulls!

#### - Papers transferred on all purebred bulls -

All the good old-time Angus traits - volume, beefiness, quick fleshing, dependable and durable. Add the Black option to your program with no surprises with our traditional solid real Black Angus. Broad, deep, and beefy two year olds. Black heifer bulls. Black cow bulls. They're black bulls like black bulls should be and they're as good as you'll find. We've had a "love affair" with Black cows since the 60's when we used Blacks to establish our highly successful Red herd.

Ours are easy fleshing Black genetics, yet they still have frame and length. Just like our Red Angus, our Blacks are light at birth, then really grow when it counts. Angus convenience, the black color and no darn trouble. We're your best Black bull opportunity. All older bulls, bigger, stouter and tougher than yearlings. Why go anywhere else?

- Herdbulls like these -

#### Easy fleshers

# M.c. Quantock Distinctive Black Angus Program

We began a search for the right opportunity to enter the black business 23 years ago. I have had a "love affair" with black cows since the late 60's when we used blacks to establish our highly successful red herd.

We looked at a lot of black programs and were fortunate to have had the opportunity to purchase a cross-section of the Angus Acres producing cow herd in 1998. We have taken the Angus Acres base cows and moved forward as we build our own distinctive blacks. Like all our other projects, these black cattle are built for our commercial customers.

We methodically use high maternal bulls of the type we like (easy keeping, deep bodied, high milk moderated blacks) to create volumes of half sisters which are now producing our best cattle. Using the same selection priorities as our Red Angus and driven by the advice of our commercial customers, we are now producing uniform, high quality, black bulls in volume. As a seedstock breeder, it is rewarding to now see our 23 years of work result in bulls like this offering. The commercial industry will appreciate them.

#### Progeny Profile: Avg. BW 75.6 lbs.

#### Light Birth • Sweet Conformation • Bulky • Well Balanced

"Four Seasons" is a grandson of S A V Four Seasons. We have used him for many seasons on heifers. His birth weights are light, making heifer calving easy, but they give no ground on growth after. He's a good conformation heifer bull with thickness and "body bulk" to boot. He descends from some of the best old black cows we have ever owned. Our lead off bull is a son from a first calver.

QLC Qunatock 5137 MS 5514A

Progeny Profile: Avg. BW 63.6 lbs.

This is a bull we call "New Guy" for some unknown reason. He is used on heifers primarily. He was a standout bull with a 61 lb. birth weight and "sweet" productive mom you just love. He has bred nearly 50 heifers a year by himself.

"The sight unseen purchase program you offer, coupled with the rock solid reputation, unquestioned convenience and a large battery of quality affordable sale bulls, has again made bull buying from your ranch a pleasure. Thanks again."

—J. Comrie, MB

5663 was an elite Double Deep son used in our 2018 breeding season - sold in 2019 sale to Peter King's Prospector Holdings, Fort St. John, BC. These sons are so good we should have kept him.

5609 is another top end Double Deep son used in out 2018 program as we use and roll our best freshest genetics. He's now working for Aaron Hortons 7H Ranch in Maple Creek.

"We've run a lot of trailers over the years and these Eby's are as good as it gets. Ross was a pleasure to deal with."

- Mac

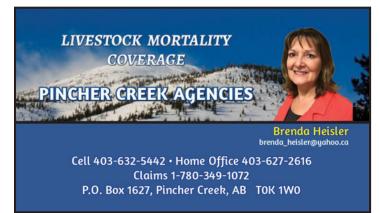

STINGRAY
ALL GOOD VIBES

"Both bulls I have purchased are good tempered and easy to work with, good solid bulls."

- N. Berkholtz, AB

Videre Images Jason Whiting 306-830-2316

"Jason produced our great bull video"

"Hauling Home"

BA-5498

Our summer two year old black bulls will create an impression sale day. Big bodied, broad and deep about says it all. Our black program has really "come of age." This set of bulls offer everything you need in blacks. Moderate birth weights, moderate frames, breed leading weight per day of age, fertility and uncompromising maternal genetics. These blacks just keep raising the bar "in every category." The ranch now runs as many blacks as reds. Another solid set of blacks, same reliable genetics as in the past. Fault free, bull after bull, they look like they were shot from a gun.

# Black "Super Baldie" Bulls...

#### May two year olds and "more than ever"

The same great crossbreeding machines as our Red Super Baldies... but Black. A perfect option on Black base cows or Herefords. Blacks with a touch of exotic muscle, growth and milk. All you really need to sell those market-topping Blacks. These bulls have been carving out a "niche" and carving up the competition for years. You just can't find 'em anywhere else. Sired by the best semi bulls money can buy.

"Keep 'em or turn 'em black and beef 'em up in one shot"

"Man, despite his artistic pretensions, his sophistication and his many accomplishments, owes his existence to a six-inch layer of topsoil and the fact that it rains."

- Unknown Author

**Identical** "but black" to our highly

successful reds.

Balance, muscle, milk and a whole lot more!

BB-5418

BB-5467

This is an incredibly strong offering of two year olds; it contains some of the most appealing bulls in the sale. Big, broad and black, big gutted, deep bodied beef bulls. Our customers continue to appreciate these older bulls. These bulls work well anywhere siring black baldies with a touch more muscle and hair. This is, maybe, our best offering of black summer twos. They are all produced from our best "Simmental" sires and our seedstock purebred black cows. Cowmen of every breed will appreciate these bulls. "So darn good." You can't sort just a few good ones. Where do you start?

# Chunky but smooth 2 year olds

We're cowmen first and these are cowmen's bulls. Our objective in Charolais bulls is to provide our customers bulls that maximize the Char cross advantage in feeder calves and minimize any problems. Our bulls are thick bulls but they are still smooth bulls. The bulls have rapid early growth which you need and the two year olds will not be too big. Our Charolais are built for the ranch trade with very moderate birth weights and unquestionable soundness - white bulls that will last and last. We deliver what you asked for: lots of hair, so you can sell those "deep coated, good doin'" tan or silver calves and top the market; good dispositions because we've all got families that help; unquestionable soundness, because some other Charolais bulls don't last; moderate frames because some others get too big.

Our Charolais pack lots of muscle, are long bodied, smooth and not real tall. Gently grown out and sold in perfect working condition.

Charolais are still the best terminal sire for a British cross cow and the char cross premium at market is not to be denied.

 $\sim$  All Charolais bulls purebred and papers transferred  $\sim$ 

"We deliver the Charolais bulls you asked for."

"Two year olds that are thick and heavy but not too tall."

"Solid, smooth bulls."

# Charolais Reference Sires

Hank (2012) Cypriot 632

We have been a reliable source of Charolais bulls for nearly 30 years. Because our roots run deep in the commercial industry, you can depend on us to continue to be your reliable source of mainstream Charolais bulls in volume. Our Charolais are now grass calved in May-June and are younger than previously. They are real "ranch" bulls calving on their own with only once per day checks. In fact these bulls were calved 75 miles from home. They are the kind of cowman's Charolais we can all use. Our Charolais "Summer Twos" are younger than ever. They run out on grass all summer to assure soundness. This marks the fourth year we will sell white bulls born and raised on the home ranch. Cody bought the cream of the old Ray Murphy FMX cowherd to add to the mix here at MC Quantock. This set of bulls are as good as any we have ever sold, one look over the fence sale day and you will agree. "Hairy, meat wagons" raised here along with our other lines. We've made 'em uniform, we've made 'em hairy and we've made em convenient. You will only be able to tell them apart by the ear tags. Cody knows his bulls and this little cowherd "inside out" so talk to him sale day.

**Cody** 780-871-8116

"Amazing customer service, fantastic quiet bull, we were worried he would be high strung, but is the very opposite. He is a laid back, gentle smooth thick hipped bull."

- K & R McRae, ON

"We are very impressed with your customer service, we lost a bull and it was nobody's fault and you offered great help. We appreciate that!"

- G. Marsh, SK

# our cows can't Read!

Our cows can't read... they don't know they're purebreds but in fact they are... ALL OF THEM. All our purebred lines are registered purebreds, the bulls are registered and the papers transferred. We use many of our cows to produce Hybrid bulls but we still register more purebred cattle than most anyone in the country. As we said our cows can't read, no-one told them a purebred cow should be treated different than a commercial cow AND THEY'RE NOT!... NO PAMPERING HERE!

# Our sight unseen program is...the most successful in the industry and here's why... SATISFIED CUSTOMERS!

"We bought 2 Hereford bulls sight unseen. The whole process of getting such good quality bulls was absolutely painless, right from the first conversation to delivery. These bulls were everything we expected and more. Easy fleshing, they maintained their weight through breeding." – G&S Clark, AB "I'm not a big cow operation, have bought all my bulls Sight Unseen and were put on bull development and grow like weeds. Only 1 problem... I drive my wife crazy replaying the sales DVD." – K. Kosheluk, SK

"There were 5 bulls that came off the trailer, I picked the one I liked best in my head. Not knowing which one was mine. Once they sorted them the one I picked ended up in my trailer. Thanks a lot. You guys got me the bull I would have picked myself and you did it Sight Unseen." - C. Tonneson, AB "Mac and the video reassured me that I was making a good decision buying Site Unseen. When I finally received my bull I never knew that kind of quality was around for a resonable cost. Perhaps the best bull I bought. Look forward to doing business again." – K. Victoor, AB

"Sight unseen program and bull were exactly as described, easier than travelling a lot of places looking for the right bull for our herd." – J. & B. Tripp, ON "Very satisfied with my sight unseen bull and very satisfied with the service. I will look to your bulls when I need another one." – C. Robertson

"I bought sight unseen and was very satisfied. The video was very helpful." - D. Wray, ON

"All the bulls we have bought from you have served us well with no calving problems." - I. Tuttle, NS

"Very impressed with sight unseen. Both bulls I bought were what Mac told me they would be. Easy to handle and work with and throw good calves. I am 100% satisfied and will be buying again." – R. Morrow, MB

"Extremely pleased with our sight unseen purchase and would not hesitate to buy this way again. Our local vet remarked "That's one heck of a nice bull." – D. Parkin, SK

"The sight unseen purchase program you offer, coupled with a rock solid reputation, unquestioned convenience and a large battery of quality affordable sale bulls has again made bull buying from your ranch a pleasure. Thanks again!"—J. Comrie, MB

"The sight unseen bulls seem to be easy fleshing and quiet. The Hereford bull was extremely good."

– J. Mizen, ON

"We have used your sight unseen purchase program for many years and have always been satisfied with the quality of the bulls and the performance. Thank You!"

– G. Morrel, AB

# "Super Sisters" Bred Heifer Sale

# **EVERY DECEMBER**

These are the sisters of all our industry leading hybrid bulls. SUPER BALDIES (Red Angus x Simmental) BLACK SUPER BALDIES (Black Angus x Simmental) SUPER GUPPIES (Red Angus/Black Angus x Gelbvieh) H-2's (Hereford x Simmental). No where else can you buy true first generation F-1 crossbreds produced from our purebred cows and the best Fleckvieh Simmental and Gelbvieh bulls money can buy. One third are big older "30 Month" extra age heifers. Maximum hybrid vigor and uniformity. These heifers are the real deal and what you really need. They're bred to our reliable calving ease red and black angus and hereford bulls for a trouble free first calf. Groups of half sisters "one-iron" unique genetics.

We now sell all these "reputation heifers" by auction every December. Watch our website for hundreds of pictures as sale time approaches.

# Mac's Marketplace

Purchase our bulls today and take advantage of this opportunity, free to our customers. Let us list your sale cattle on our website on what we now call Mac's Marketplace. Potential

buyers refer to our site 12 months a year. Customers with listings report interest in their cattle year around. It's free and a big "plus" for our customers.

We hope to develop and expand on this and help our customers merchandise thousands of cattle not just a few hundred on sale day. RANCH TO RANCH... "it makes sense."

# **Our Guarantee**

# - Preffy Darn Simple -

In the unlikely event you have trouble... rest assured I'll look after it right away... no hassles or disputes. If you purchase our bulls, you'll have a bull to breed your cows no matter what happens. We semen test all older bulls and guarantee young bulls to pass at one year. Simply put... they're guaranteed to work or they'll be replaced. We always have loaners available to help out if needed. If you have a bull down, we'll meet you halfway anywhere in

Western Canada, 24 hours a day with a replacement, because when you have trouble and you've got cows to breed... you need bulls, not excuses and time wasted. (We recommend insurance coverage for breeding or physical injury, especially since bull values have increased. This can be purchased sale day). All warranty and responsibility is limited to replacement of the bull in question.
