 DLMS Purebred Team 780.991.3025

HOTEL ACCOMMODATIONS:

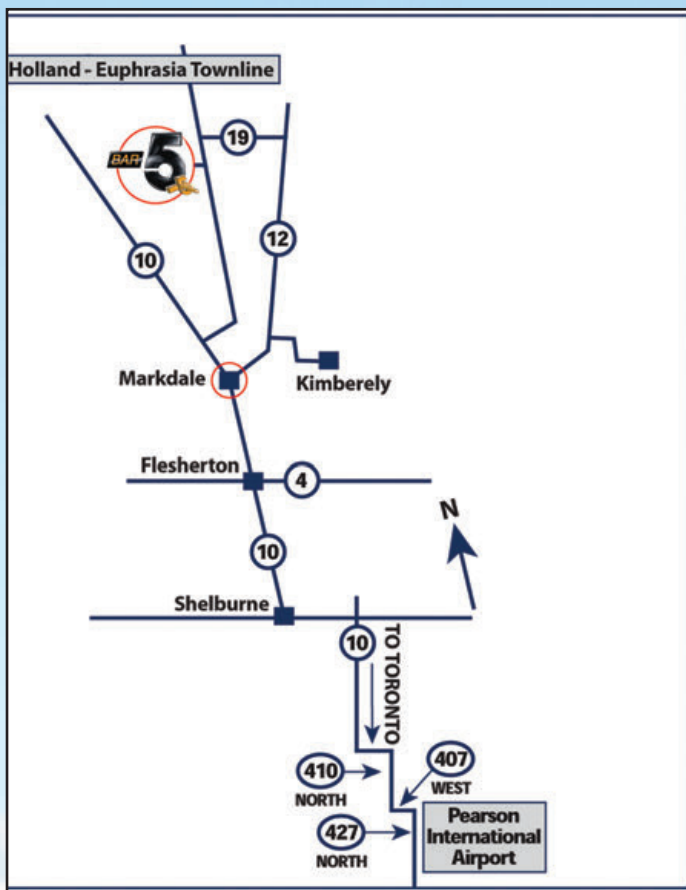

We have a block of rooms set aside for Bar 5. Rooms are limited; please call Sean at Bar 5 647-922-6013 to reserve your room.

TRAVEL ARRANGEMENTS:

Bar 5 Farms is located approximately 2 hours north of Pearson International Airport. At Pearson International Airport all major rental car companies are available to rent from. Grey Bruce Airport Shuttle (www.greybruceairbus.com) is a shuttle service that operates from the Toronto airport to Markdale and back. Their schedule can be found on their website to arrange transportation to Markdale. We will need to be notified in advance to pick you up at the depot. From there you can either arrange a car pool with others or we can arrange for you to get to your hotel.

WELCOME FROM RON & CARLA...

Well, this is it Carla and I are finally retiring from the Purebred Cattle Industry, so it is with regret but fond memories that we are preparing our final sale catalogue. After 44 years of being in the purebred business, it is time to slow down as we are in our early eighties and our family does not have the time to carry on. We did disperse the Bar 5 Fulblood Simmental herd in the fall of 2016, but then took advantage of the opportunity to work with Casa Branca on a Black Angus Project for Brazil, one of the leading Angus and Simmental breeders in the world.

Casa Branca purchased some of the top Genetics in North America from the Sinclair Cattle Company (N Bar origin) and the Schaff Angus Valley herd and asked if we could board/manage them in order to send embryos to Brazil. We did this from 2015 to 2019; and then early 2020, we bred all the donor cows back naturally with the intentions of moving forward with them. Not many calves born in Canada has effected the EPDs of the donor cows & herd bulls, as ALL the embryos went to Brazil, but we used S A V power bulls on them so the calves, pregnancies and embryos in the sale have great EPDs! It was an honour to have these genetics on the farm and help promote the Angus breed. The end result was the very successful introduction of these powerful genetics to Brazil and South America. When we finished this program Bar 5 managed to purchase the remaining herd and we think developed a very successful breeding program that we are now making available to North America.

All the cattle are registered or registerable to the U.S. and Canada, please ensure you let the Bar 5 office know if you want the U.S. pedigrees and we will do so. T Bar C will be transferring the cattle in Canada only.

Please join us at the farm for a reception and viewing of the cattle on Sunday October 10th as well as Sale Day October 11th to make this a fun time on retirement. Carla and I have enjoyed many years in the cattle industry, and we have met many friends and because of Covid we haven't been getting together and I hope this is an opportunity to once more renew friendships and spend some time with cattle folks on our farm one last time.

There are so many people to thank, and we would like to take this opportunity to thank all those who helped us over the years and decades, and in particular the Buschbeck family, Andreas , Sam , Matt and Chris and now Shea O'Neill and Sean Whitton, as well as all those within our family including Greg, Joanne, Mitch and Brooke in particular who helped so much on the farm with the cattle over the years.

Thank you all again, and please let us know how the cattle work for you as we have not lost our interest in raising purebred cattle. Please call myself at 905 330-5299, Shea at 519 373-6599, or T Bar C for any assistance.

Ron & Carla Nolan

FROM THE DESK AT T BAR...

Welcome to the final time we will all gather at the world famous Bar 5 Sale Barn in Markdale, Ontario for Ron's retirement sale. When you think or hear of Bar 5 you automatically think of quality livestock with a long line of history back to the legendary Douglas, Manitoba days where Bar 5 was founded. I remember growing up as a kid and always waiting for Simmental Country to come in the mail and read those neat ads that Bar 5 always had in the inside cover. Then furthermore reading the sale results from their incredible bull sales. The history of this farm name is unmatched to any in Canada. Of course, now located in Markdale, no one will ever forget those early 2000s sales with the South African influence Simmentals and people attending literally from around the globe.

The Nolan's in the last 10 years have been aggressive in pursuing Angus genetics and have assembled quite an offering of proven popular genetics in volume. Of course many tracing back to the famed S A V herd in North Dakota, that aren't available very often. Many carry exciting services that will enhance your program going forward. Also included in the offering is a select group of Simmental cattle that are headlined by a beauty of two year from the Barberalla cow family that is destined to be a donor candidate. Also we have quite a selection of frozen genetics to go through, including some very interesting pregnancies that will be an excellent decision moving your program ahead.

For all us from T Bar C please join us at Bar 5 one last time for their well known hospitality and great cattle. I never would have thought I'd have the honor to write the final welcome for the Bar 5 name and Ron's final sale. Ron & Carla are first class people and all of us as purebred breeders owe them so much for their dedication to both breeds over all these years. Thank you Ron & Carla! As always if you need any assistance please don't hesitate to call any of our cells!

SCHAFF ANGUS VALLEY AND SINCLAIR CATTLE COMPANY COW FAMILIES

We are great believers in cow families as we find consistent breeding animals come out of a family that was started by a matriarch and continued along these strong maternal breeding lines. Below is listed our sixteen (16) cows families that we were working with on the Casa Branca Brazil Project – S A V & N Bar legacy cow families. We have also added in cow families with our sire lines, Cudlobe Eline and Thomas Patricia, and other families have worked well in our herd, NP Barbara 011, Galten Lucy, Harprey Middlebrook, and Paradise Anne as well.

Below are the Lot Listings of the S A V and Sinclair Cattle Company (N Bar) maternal families. All of the S A V foundation cows can be found on Schaffs Angus Valley's website. Cows with production in this sale on the S A V site include Erica 3188, Blackcap May 0356, Elba 7447, Dora 6407, Abigale 6696, Bessie Queen 4106, Blackbird 2122, and of course Blackcap May 4136. We encourage you to review the S A V site and the Sinclair site for further research on the S A V & N Bar legacy (Sinclair) cow families.

AngusGS tested. EPDs – WW 6%, YW 10%, CW 35%, Marbling 20%, CBI 45%.
 Cow Family – S A V Abigale.

The work horse of our herd bulls who has been very successful here at Bar 5 and only coming six years old, has years left in his prime. He looks at a cow, and she is bred, and he has never been pulled during breeding season to miss a day of breeding. Sired by under used and misunderstood

S A V Harvester 0338 son, S A V Hesston 2217, his dam being Emblynette 3301 herself, and 3303D is out of one of the very best cow families from the Schaff Angus Valley herd, and Bismark's maternal sister, in S AV Abigale 6696. He is pictured in his working clothes, as we pulled him from the pasture on August 1, 2021. Solid performance and marbling EPD's, should make him a solid addition to any Angus herd as again he is Top 6% WW, 10% YW, 35% CW and 20% for Marbling.

AngusGS tested. EPDs – CE 30%, WW 25%, YW 25%, SC 7%, Doc 10%, Fat 15%, CBI 15%. Cow Family – Champion Hill Lady 703. Plucked out of the Norfolk herd, after falling in love with his dam, and her rockstar pedigree, back to Champion Hill Lady 703 twice, both on the bottom side AND the top side back in Unanimous. This young herd bull has done a great job for us and will very well work for some progressive breeder. SUPER easy calving ... Just look up some of his offspring in the sale. They come easy, and grow long bodied calves, just right for the meat industry. He is very docile and easy to work with which is something we really appreciate. He has a very bright future as a breeding bull for any program. Just three years old, he has a bright future. His EPDs are Top 25% for both WW & YW, Top 10% for Scrotal and Docility and 15% for Fat.

 Cow Family - Cudlobe Eline.
 Super carcass values for our S A V & N Bar/Sinclair based program. Poss Maverick x Cudlobe Eline 7E. We are very proud of these two embryo calves, not only do they have some of the best EPD's I have seen in calving ease, top 1% in weaning and yearling weights, top 1% in marbling, 10% for Carcass weight, 7% for Ribeye, top 2% in scrotal, and top 9% in docility, but they are very easy to look at with great body confirmation. When we purchased these embryos in June 2019 at the CAA Foundation sale from Cudlobe, the dam Eline 7E was THE top female in the CAA registry for marbling, so we started bidding on these embryos and we weren't stopping until we owned them, and in the end we got these two bull calves. Line them up and make sure you evaluate which one of these two can do for your herd and improve your EPD profile.

AngusGS tested. CE 9%, BW 9%, YW 2%, SC 1%, Doc 10%, CW 10%, Marbling 1%, REA 55%, and CBI 10%.
 Cow Family - Cudlobe Eline.
 We purchased these embryos primarily to use on our power S A V cattle, because of the great EPD values of Cudlobe Eline 7E and bred to Poss Maverick, which should produce something elite and it certainly was a success. This spring we needed a bull to turn out with the yearlings and we couldn't agree which one that we should turn out and which one we should sell, so we turned them both out and kept them both for the sale. We ran them both with the yearling heifers. The EPDs are driven by AngusGS, so the guesswork is taken out.

FALL BULL CALVES This a good set of bull calves that are weaned, vaccinated and on test. They are natural calves out of the S A V/Sinclair cow families that we have been flushing in our embryo program and were born in the fall which should give them an advantage next year when you want to put them to pasture or if you want to draw semen this winter.

 Cow Family - S A V Madame Pride.
 Here's the youngest bull calf in the group. There are two reasons we have put him in the sale. 1) He looks really good and 2) He is out of a great cow- S A V Madame Pride 8588. Sired by S A V Territory 7225, he has the potential to grow into a great herd sire and his EPDs say he should!

Cow Family – N Bar Kinochtry Beauty 2414

A bull born from one of the original flush cows from the Sinclair herd, Sinclair K Bty 5S1 E013 and sired by Norfolk Foundation 1740, the bull who has done such a good job for us. This calf isn't huge but really put together well and could be a good bet as a breeding bull when he matures. His dam is still here at 16 and a half years old at catalogue time. We choose not to catalogue her as we thought she was too old for the sale, so she will retire to the Angus beef program. Her photo here, shows the incredible maternal abilities.

Sinclair K Bty 5S1 E013-
 Dam of Lot 10

Swanbeck ©

ORIGINAL HERD These cows represent what's left of the S A V / Sinclair Donor Herd that was brought to Bar 5 by Casa Branca. There is some age on some of them, but they are all producing and what is left will flush well. With the state of the industry and it being hard to get enough feed, maybe selling off some of the ones less productive and adding a small number of these Proven Donors would be profitable.

 Cow Family – S A V Erica

A larger framed, nice uddered cow still producing well. She had twin heifers this year and both are doing well and are in the sale (well worth looking at). She was and still is a very attractive part of the Erica cow family. Both dam and granddam were donors in the S A V herd. This one is for a progressive breeder who would like to flush her in the future and send a signal to the world that they are breeding the best.

Al'd to S A V Bloodline 9578 April 13, 2021 and exposed to S A V Purebred 7896 from May 3 to May 31, 2021 and then Casa Branca Hesston 3303D from May 31 to August 1, 2021. Checked safe in calf to an approximate breeding date of mid June to Hesston.

Cow Family – S A V Blackcap May.

Here is the dam of many of the ET calves, pregnancies, and embryos, the Bloodline and Territory are the special ones. She is a very special lady, a direct daughter of S A V Blackcap May 4136, the \$18 Million Dollar cow, one of two full sisters of 4136 in Canada. We sold her bred in the Autumn Angus Classic last year to Ridge Creek/Vissers & Blue Mountains. She has three bull calves in this sale. We bought half of her back and flushed her to Bloodline in March 2021, there are five (5) pregnancies in the sale from this flush and then re-bred her.

Exposed to S A V Purebred 4896 from May 3 to May 31, 2021 and to Casa Branca Hesston 3303D from May 31 to August 1, 2021. Ultrasound safe to Hesston with an approximate breeding date of June 15, 2021.

Ben Wright had me sell this cow in Autumn Angus Classic 2019, Greg Nolan bought her and her bull calf. He sold the cow to Mitch Whitton, and looking at her carcass EPDs, I bought her back. Greg used the bull. This is one of the younger cows in our initial group of flush cows from Schaff Angus Valley and is now breeding and producing. This year's heifer calf is a real beauty with lots of growth and style, definitely one of the best calves in the sale. 4266 certainly heads up the Blackbird cow family in our herd and someone is going to be happy with this purchase.

AI'd to S A V Bloodline 9578 on March 24, 2021. She was exposed to S A V Purebred 4896 from May 3 to August 1, 2021. Ultrasound checked safe to AI breeding

Cow Family - SAV Blackcap May.

This lady is one of our SAV Blackcap May 0356 daughters and a good representative of this family. She had lost her calf but I know there is more to come!

Exposed to Casa Branca Hesston 3303D from May 13 to August 1, 2021 and checked safe to an approximate breeding date of mid May.

TWO-YEAR-OLD FIRST CALVERS We have a great group of young females that we purchased as bred yearlings including nine (9) that we purchased in the Schaff Angus Valley sale last year and the rest were purchased at sales largely here in Ontario. Our criteria in Spring 2020 at SAV & Brown was WW & YW in top 10%, and Carcass EPDs = 50+ for CW, .50 for Marbling and .50 in REA. Again, we tilted to S A V genetics the last two years, as the EPDs for CW & REA on the S A V cow families are second to none, and SAV has been adding Marbling; and with our SAV Donor herd foundation, we wanted to keep building this direction – S A V performance and carcass value.

AngusGS EPDs - CE 10%, WW 4%, YW 10%, CW 25%, REA 30%.

Cow Family - NP Barbara 232T.

She is a Barbara, and meant to be AI'd, but got gate cut to the recip pen, as this young female is showing the effects of raising a calf at such a young age but with the period of rest coming up and a little groceries, she will grow into a big volume cow. Just look at her growth numbers. She also was very liberal with her milk and we caught 3 or 4 calves feeding at one time.

Implanted with an embryo,
 S A V Madame Pride 8588 X S A Territory 7225 sexed semen on April 14, 2021 and exposed to KCF Bennett Immense D662 from May 4 to May 24, 2021 and Norfolk Foundation 1740 from May 24 to August 1, 2021. Checked favourably to the embryo implant.

 This is one I would like to keep if we weren't retiring. This young lady really has that look of greatness. Out of S A V Elba 7447, probably the largest cow we have had at Bar 5 but really well put together and a super S A V producer whose daughters were averaging \$11,600 USD at S A V sales. This heifer lost her mother at one month of age. She has done a great job fending for herself and I'm sure will do well in the future.

AI'd to S A V Bloodline 9578 April 7, 2021 with exposure to the Maverick sons (The Maverick & Top Gun) from May 21 to August 1, 2021. Preg checked favourable to the AI breeding.

SIMMENTALS

After dispersing our Simmental herd in 2016 and later found the farm with these terrific Angus genetics to flush for Casa Branca to send to Brazil, I found we still had some frozen Simmental genetics left in the tanks so I couldn't help but plant some of them and also buy some good genetics in sales to go with them. We are going to try again to disperse our Simmental Genetics and sell the frozen genetics we have left over so I'm not tempted again.

This cross heifer calf sure shows what SimmAngus crosses can do, she is awesome. Black with a white face which is prized in some regions, but calves like her are prized in all regions.

A young cow we purchased at the Ontario Autumn Simmental Classic from the Hortons, long time customers of ours. Elaine is a Full Fleckvieh fullblood with some excellent genetics on her maternal side and sired by a full South African bull, Bar 5 Hammer 203B.

AI bred to the full South African bull Bar 5 SA Harrach 801P on March 24, 2021. Pasture exposed to Bar 5 PSA Essential from May 24 to August 1, 2021. Checked favourable to the AI breeding.

This polled embryo calf is out of Bar 5 SA MS LARA 808N sired by the homozygous bull Gibbons Expertise 33U. 808N is a cow we sold to the good herd of Roy Philips in Georgia. I was always very pleased with her so when I got the chance to implant some of her embryos we jumped at the opportunity.

AI bred to Bar 5 FF Hexagon 412Y May 23, 2021. Pasture exposed to Bar 5 Essential 3486H from May 24 to August 1, 2021. Preg checked safe to an approximate breeding date of June 1 to the exposure.

This guy's dam was Bar 5 PSA Toshi 305X and sired by Bar 5 PSA Essential 413U. Toshi was one of our favourites that was sold to Brazil and flushed here. Five of these embryos stayed here and I purchased them, Thus the resulting calf from one of these embryos. This bull was a great looking calf when he was on test last year and doing well but injured one of his hips and didn't fair so well after that. We needed a pasture bull so we turned him out and low and behold he did well.

 Cow Family - S A V Elba.
 Elba, once of the few. We had big plans for her, so now you can reap the rewards. Her heifer calf is a superstar. This is another one of those good North Perth females and if you were keeping the herd, it would be one hard to let go. She gave us a really good S A V Extension 6856 heifer calf that is in the sale as Lot 91

AI'd to S A V

AngusGS tested. EPDs - CE 30%, YW 40%, Marbling 20%, REA 10%. Cow Family - S A V Abigale. This two year cow with the nice udder produced a S A V Rainfall 6846 heifer calf this year that is in the sale, selling as Lot 102. She is part of the very productive S A V Abigale family. This cow was purchased as a calf in the North Perth Dispersal for \$7500. Sired by S A V 004 Density 4336, the whole package is very interesting.

Al'd to S A V Bloodline 9578 April 7, 2021 and exposed to Norfolk Foundation 1740 from May 13 to August 1, 2021. Ultrasound safe to the AI breeding.

PUREBREDS WITH EMBRYOS This group of cows can stand on their own as productive purebred cattle but we decided we needed some recipients, so we decided to offer some packages of a purebred cow and a pregnancy of some very selective embryo combinations. You will be getting quite a package in each of these special lots.

Here is a two year old that did a good job of raising a calf this year, and sired by the old Payweight 1682 bull himself. You can see from the picture she is a good looking young cow with a nice udder. Pretty decent numbers also helps.

Carrying an embryo from S A V Madame Pride 8588 X S A V Territory 7225 sexed.
 Implanted April 24, 2021 with exposure to Norfolk Foundation 1740 from May 13 to August 1, 2021. Ultrasound checked safe to embryo implant

This recipient raised a very good calf this year and should do the same with the calf she is carrying.

She is carrying an embryo from S A V Madame Pride 8588 x S A V Emblem 8074, implanted on April 14, 2021. Pasture exposed to KCF Bennett Immense D662 from May 4 to May 24 and exposed to Norfolk Foundation 1740 from May 24 to August 1, 2021. Ultrasound checked favourable to the embryo pregnancy.

FALL HEIFER CALVES The following is our group of registered Angus heifer calves in the sale. In my years in the business, I don't think I've seen a better group of heifers at this age. I know when you buy a calf it's a long time to pay day but in this case I think it will be well worth the wait. We are leading off with our fall calves all out of cows from our original donor cows and are really coming along.

 Here is one I wish I could keep, what a heifer out of SAV Erica 3188 who raised this set of twins and did a great job. Sired by S A V Purebred 4896 certainly adds to the story of this heifer. With looks to burn, I expect

she will develop into a very productive female with her top 1% growth weight EPD's. She will be a yearling by sale date so you should be able to get a good look at this young lady.

EPDS IN THE CATALOGUE

Listed with the herdsires are the following EPDs that we use in our breeding decisions at Bar 5;

CE Calving Ease – In some bull and cows, a higher BW can be tolerated with a good CE number.

BW Birth Weight - We pay attention to BW but again with CE also as a consideration.

WW Weaning Weight – We aim for the highest WW we can find in breeding bulls, given other traits.

YW Yearling Weight - We aim for the highest YW we can find in breeding bulls, subject to other traits.

Milk – We aim for the highest Milk we can find in breeding bulls and females in our program.

CW Carcass Weight - Again, we drifted to SAV genetics for the high CW values, and aim for 50+.

Marbling – We prefer .55+, as Marbling key to Angus breeding. Our goal was to breed for the highest marbling while maintaining above average WW, YW, CW and REA. SAV has moved the dial these last couple years on this.

REA Rib Eye Area - 0.45+ is our goal, to ensure high value meat cuts.

TERMS AND CONDITIONS

TERMS: The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance, unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. Current exchange rates will be announced sale day. All monies are in Canadian funds.

BIDDING: Each animal will sell to the highest bidder... no by-bidding will be permitted. Disputes - Bidding will be reopened between the parties involved in dispute. If no further bidding is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision on all disputes will be final.

ANNOUNCEMENTS: All announcements made from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay close attention to such disclosures.

BREEDER'S GUARANTEE: As this is a dispersal sale, all cattle sell with no further guarantee. Any known defects will be announced before the cattle are sold.

PREGNANCY INFORMATION: All serviceable age females have been pregnancy examined by an accredited veterinarian, giving an estimated length of gestation. This estimated gestation period shall be used only as a guideline to calving and is not a guarantee of actual service.

CERTIFICATE OF REGISTRATION: Each animal will carry papers issued by the Canadian Angus Association or Canadian Simmental Association. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

PEDIGREE ESTIMATES: Pedigree Estimates (PE) are created on the projected mating of the animal's sire and dam based on averages of the two, creating estimated values that do not hold the same accuracy of actual EPDs issued from the association and should be used as such.

LIABILITIES: All persons attend the sale at their own risk. The seller, facility owner and sale manager assume no liability, legal or otherwise, for any accidents that occur. It is understood that T Bar C Cattle Co. (2013) Ltd. is acting only as a medium between buyer and seller and is not responsible for any failure on the part of either party to live up to his obligations. Neither does T Bar C Cattle Co. (2013) Ltd. assume any financial obligations to collect or enforce collection of any monies between parties and any legal action that may in exceptional cases be taken must be between the buyer and the seller. T Bar C Cattle Co. (2013) Ltd. assumes no responsibility for any credit extended by the seller to the buyer. The buyer must look to the seller for fulfillment of all guarantees and representations made hereunder.

RIGHTS AND OBLIGATIONS: The above terms and conditions of the sale shall constitute a contract between the buyer and seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

PHONE, MAIL, WIRE BIDS: Bidders unable to attend the sale may phone, mail or wire their bids and instructions to the sale managers, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

DELIVERY: Assistance will be given in getting your purchases home. Each animal becomes the risk of the purchaser as soon as sold.

INSURANCE: Will be available sale day. We strongly recommend that insurance is purchased for full value.

ERRORS: All announcements at sale time, written or oral, supercede any written material in the catalogue.
