

*Complete Herd Dispersal*

**MEADOW ACRES SIMMENTALS**

TUESDAY DEC. 21, 2021 | 11 AM

ON THE RANCH | LAMPMAN, SK

*Invites you...*

**MONDAY DECEMBER 20, 2021**

**CATTLE VIEWING | ALL DAY**

Lunch & supper will be provided

**TUESDAY DECEMBER 21, 2021**

**SALE | 11:00AM CST**

Bagged lunches will be available during the sale

**SOCIAL | AFTER SALE**

**MEADOW ACRES FARM | LAMPMAN, SK**

**DIRECTIONS**

From Estevan - North on highway 47 turn east onto highway 361 we are 8 1/4 miles east of Lampman on the south side of the highway. From Carlyle - Take highway 9 south to the 361 WEST junction towards Lampman. We are 12 3/4 miles west on the south side of the highway. From Northgate, ND - Take highway 9 north turn east and then north on highway 9 again and take the 361 junction towards Lampman. We are 12 3/4 miles west on the south side of the highway.

*Cattle available for viewing anytime at the farm prior to the sale. Cattle will be penned early December.  
We encourage you to come early as there are a lot of animals to get through.*

# Welcome

Dispersal. A word that can pull every single emotion out of a person. A word that takes a lot of time, energy, sweat and tears to get to a point where it becomes a topic of conversation. A word that causes excitement, anxiety, optimism, opportunity, and the opening and closing of doors. I believe we have gone through and felt all of these things as we embarked on this journey. As a family operation between two generations, there comes a time for some change. This is our time. Blair & Laurel have worked hard and are ready to slow down and enjoy more of life. In a mixed operation like ours, as all of us know too well, the cows are what keeps you here and busy everyday. So, it was a logical move to disperse the cows and free up some time over the winter. Like most, a decision like this is never easy, but it is essential. Dustin & I along with our kids look forward to continuing to be a part of the Simmental breed and the Seedstock Industry. It's a passion for us and one we look forward to enjoying with our children on a much smaller scale. We have retained a small group of "A" and older cows and plan to purchase some more females out of the sale to get restarted.

Looking back on how we have gotten to this point, it has been without a doubt worth it. I think the biggest blessing for us is the people. The people are what make this business and way of life the very best. We have been very fortunate to meet so many people throughout the years and have had customers turn

into great friends. That is something we will forever be indebted to these cows and this business for. It has been a part of life for all of us, as well as many generations before us.

Our journey in the Simmental world has not been long in comparison to many. 11 years ago, we started off with a small group of cows purchased privately from Brian McCarthy that are influential in this offering. Those females were a great start to our Simmental herd. Our next purchase was LFE Dreamlady 79W, purchased out of the Checkers sale in 2010. Her first bull calf MAF Horizon 7Y was exciting to say the least and got us hooked on the breed, the people, and the desire to pursue this further. We were able to make that happen with the acquisition of 170 cows from LaBatte Simmentals in 2013. Barry's cows gave us a very strong, uniform foundation to build upon. We have strived to produce Simmental cattle that are maternal, high performing, easy fleshing and structurally sound, while maintaining eye appeal and character, with a focus on udders and feet being a key component. I believe you will find this well reflected throughout the offering. It's been a journey with some ups and downs, but we feel our depth of quality has never been as good as it is right now.

Compiling this book has been a process and something that we have never done before on this size and scale! We were very fortunate to have worked with a group of extremely talented people to make this book be what we envisioned. From the 13 days of photos to the clipping, videos and the final product in your hands, the extra help we had did not go unnoticed

and we cannot thank you all enough. We are excited to share with you what our program is all about. Whether you are looking for donor females, hard working production females, show ring worthy cattle or a herd sire that will excel in your program, there are many great options to fit your needs throughout the entire catalogue. We have always believed strongly in cow families, and they will be highlighted throughout. Some are large in numbers, others small but they have all worked hard and been an important part of the puzzle. The oldest cows in the offering are the "B's" and they are a great set of highly productive females. We have had a strict culling policy in place (even when its hard) and we feel every cow in the sale has proven to be capable of raising a high-quality calf for the industry. The group of two-year-old females are without a doubt the best overall group of first calving females we have had to date, with near perfect udders and big calves beside them. It was easy to lose track of time in the spring and summer admiring them! We had made the decision to breed the heifers to Angus bulls in 2020, so you will find many of these females have half-blood calves, a group that should make excellent replacement females and bulls that are a great balance of both breeds and provide something a bit different for our bull customers. The bred heifer group this year is another excellent set that we expect to be fantastic females as well. The open heifers are without a doubt the most consistent and impressive set we have ever had. The quality runs deep throughout the pen and you will find females that are attractive, well constructed, easy

doing and have cow written all over them. It makes us proud to see how much things have really progressed within our herd and that we can offer them to our customers. An important note is that every cow that is a "B" or younger is being sold. We are not retaining anything!

My hope is that you find some cows that can go to work for you and be strong additions to your herd. We feel that this is a consistent cowherd that presents great opportunity and there are many options to suit all kinds of operations. We are pleased to offer many breedings to exciting sires, including our newest herd bull acquisition, SVS Rancher 42H. You will find more than 50 services to Rancher. He was a little slow collecting semen so these will be the only services available for this year. We used Rancher's very consistent sire Tycoon in his place while we were waiting on him to collect. Rip and Rolex will have some very exciting matings as well as we feel these two bulls have huge breeding potential. The very good Trailblazer bull was used on many black cows as well in hopes he will throw some white faces. Other AI sires include Epic, MAF MR 95G, KWA Slider, Betts, and Proclamation. You will also find proven matings to our walking herd sires, Springcreek Launch and Crossroads Red Stone. These bulls as well as our cleanup bulls will continue to sire impressive and highly marketable cattle. Another addition to the sale will be 200 units of Canadian Qualified semen on KCC1 Exclusive 116E. His progeny are highlighted in this offering and he has done an excellent job with many sale highlights throughout.

We did our preg checking early on July 12th to assist in a higher accuracy in calving dates and then again on October 19th. The bulls were left out until August 25th. We did encounter an issue with Red Stone breeding and there are some cows that are calving later through no fault of their own. Breeding information supplied within the catalogue is based on our Vet's opinion. Our herd health and nutrition has always been the number one priority. We work closely with a team of veterinarians including Dr David Hamilton, Dr Clarke Hill, and Dr Christine Ewert as well as nutritionist, Doug Allison to ensure the health and well being of all our animals is the best it can possibly be. The calves have all been vaccinated in the spring with Pyramid and Blackleg and again at weaning with Express 5 and Blackleg. Calves were also given Safeguard & Ivermectin for parasite control. The cows and bred heifers have had Express 10 before breeding and have been given Scour boss and Blackleg as well as Ivermectin this fall. Herd Bulls have had Express 10 in the spring and have been given Ivermectin and Blackleg this fall.

Selling the bull calves in December seems different for us but it is also a unique opportunity to secure your herd bull needs early. The set of bull calves include some fresh genetic options and a set of bulls that is very strong. This is the deepest set of bulls we have had. There is a lot of variety with most of the focus on power and performance but always with high maternal value. A lot of the bull's dams are selling beside them, so it eliminates guess work and helps you make decisions based on what is best for your operation. We are pleased to offer a bull development program for these

bulls. The details are included within the sale information of this catalogue. If you have questions, please contact us.

We want to thank everyone who has purchased from us throughout the years. To the friends and family that have also given so much time to assist us along the way, we are forever thankful to you. We are blessed with many wonderful things these cattle have provided for all of us. We hope you can make it to tour through the offering anytime and join us sale day. We do encourage you to come prior to sale day, as there is a lot to sort through and it will take some time. Please feel free to drop in or give us a call anytime. From all of us, thank you for your interest and support of our program today and over the past 11 years. It's been a pleasure. Wishing you all the best with your new purchases and a Merry Christmas & prosperous 2022.

Sincerely,

*Kirsten*

**U.S. BUYERS INFORMATION** All purchases made that are going to the States will be charged \$150/animal to cover the cost of export testing and paperwork to have animals ready to export. Trucking, U.S. Customs and Veterinarian charges will be the expense of the buyer. Buyers are welcome to pick up their purchases at the farm if they prefer. Please contact us for up-to-date travel information, as it changes often. As of now, United States Residents are permitted to enter Canada by ground or air with proof of double COVID vaccination and a negative PCR COVID test taken a maximum of 72 hours prior to entry into Canada. U.S. funds will be accepted at the current rate of exchange announced sale day.

**TERMS** The terms of this sale are cash, cheque, E-Transfer or wire transfer.

**BREEDERS GUARANTEE** As this is a dispersal sale, all cattle sell with no further guarantee. Bull calves that are purchased and left at Meadow Acres under the bull development program will carry a guarantee as mentioned in the details of the program.

**ANNOUNCEMENTS** All Announcements from the auction block will take precedence over the printed matter in this catalogue. Buyers are urged to stay attentive for such announcements throughout the sale.

**ACCIDENTS** Although every precaution will be taken to protect the safety and comfort of people in attendance, neither the Sales Management or Meadow Acres Simmentals assume any responsibility in this matter and disclaims any liability, legal or otherwise in the event of accidents or loss of property.

**DELIVERY** Full settlement must be made before cattle will be released. Cattle are to be picked up at the farm or trucking arranged. All purchases must be picked up prior to December 31, 2021.

**BUYERS RISK** All purchases become the responsibility of the buyer once the sale is over. We strongly encourage you to protect your investment by insuring your purchases.

**LOAD OUT** All cattle will be available for load out as soon as settlement has been made. All cattle must be picked up by December 31, 2021.

**PHOTOS & VIDEOS** Cows were pictured at the end of June. Bred Heifers, Calves and Herd Bulls were pictured at the beginning of October and all videos were taken in November.

**VIDEOGRAPHER** by Golden Thread Livestock Images. Videos of all lots will be available on DV Auctions and DLMS. Pregnant Recips were not videoed

**CATALOGUE DESIGN** The information printed has been supplied by the seller and believed to be accurate. Updated sheets and announcements from the block will take precedence over any incorrect printed material.

**POLL AND COLOUR TESTING** We have only tested bull calves in the offering for polled and colour. Results are listed with their individual lot information.

**SEMEN/EMBRYOS** All semen and embryos are stored at Alta Genetics unless otherwise noted in individual lots and will be released after settlement is received. Shipping costs are assumed by the purchaser. Exportability is noted accordingly within the lot information.

### BULL CALF WINTERING PROGRAM

We understand that buying bulls in December may not be the most convenient thing for everyone to do. So, we are offering a bull development program to assist in wintering and developing the bull calves for you. This option is only available for bull calf purchases.

- The decision to participate in this program needs to be made at time of settlement.
- The cost of the bull development is \$1,000 per bull and will be applied to your invoice at settlement.
- Insurance is highly encouraged and will be available at time of settlement. Meadow Acres Simmentals will not be liable for any injury, sickness or death of bulls left in our care without insurance.
- All bulls are guaranteed to pass their semen tests by 15 months of age. We will work with the buyers according to their individual requirements for breeding timelines.
- In the event a bull does not pass his semen test by 15 months of age, a full refund will be made in the amount of the purchase price plus the \$1,000 bull development cost.

This is a special event that opens the door for every progressive cattleman to enhance their programs and reap the rewards of a decade of passion and dedication that the Meadow Acres family put into building this program. From year 1, they were winners and natural leaders in this breed as they always invested in the very best and had instant success with the first bull to sell under their prefix, MAF Horizon 7Y at \$82,000. The breed and entire industry instantly took notice that they meant business and were seriously dedicated to buying the best cow families to build around and market cattle to enhance the breed forward. They love this breed and the people within it and we are absolutely impressed with the incredible cowherd that they have assembled.

When visiting with them over the years to acquire new females and more importantly, the next big-time herd bull; it is evident they are extremely picky and that has resulted in a program that flat out produces. Their deep commitment to prioritize foot quality, udder strength and structural soundness in a highly productive cow isn't taken lightly and they go every extra mile to ensure they are adding the right breeding piece. From viewing the dam, sire, grandams, sisters and more; they have studied the Simmental database inside and out. We can confidently say that they rank up among the highest of any breeders we work alongside with to ensure their next investments check off all the important boxes to incorporate those particular genetics to positively change their program.

The cattle world is a people business firstly and a cattle business secondly. The Meadow Acres family have been great to work with and always put their customers at the very forefront of their priorities. They are highly respected in the industry and we think

this is the ideal sale to step into and acquire that special one, two or trailers full of cattle as they flat out work. They have responsibly built a large program and culled extremely heavily so that they can provide a product for their valued customers that will give them profitability on their investment. For being in the Simmental breed for 11 years, they have a large group of repeat customers that realize that value of the MAF prefix and the advantages that these genetics offer. Unfortunately, change is inevitable and this is the last time to acquire the MAF genetics and we will definitely miss them as they were great to work with.

Success is where preparation and opportunity collide and we have never seen a larger chance to enhance your program than the genetics that are for sale in this group. We fully respect their knowledge and the years of particular and educated breeding decisions, it has resulted in a cowherd unlike any other that we have seen for quite some time. We encourage you to contact the Meadow Acre crew to discuss the cattle on offer as they take pride in this program and rightfully so, they would love to visit with you about them more. Plan now to be with us all on sale day, we encourage you to join us in Lampman to take in the largest and deepest quality sale of the year that offers opportunities unlike any other. If you can't make it, feel free to contact any of the sales staff listed as we are all working together to represent the MAF family in a positive and professional manner but we hope you're with us as it is sure to be a historic event for a great family with an incredible set of cattle.

Best regards,

Welcome to the Meadow Acres Simmentals Complete Herd Dispersal. This will be one of the major events that we will see in 2021, not only in the Simmental breed, but the entire livestock industry. Simply put, there will not be a better opportunity to purchase this many high quality Simmental genetics in one day. Nowhere else will you find such a huge selection of donor cows, powerful bred heifers, fancy heifer calves and breed changing herd sires. This is truly the no miss event of the Simmental breed.

The Meadow Acres story began in the purebred beef industry over 30 years ago with the purchase of 10 purebred Polled Hereford cow calf pairs. This quickly grew over the years to over 150 mother cows. In 2009 the decision was made to add a handful of Simmentals to the purebred program. 5 cow calf pairs were purchased privately from Spring Creek and thus began Meadow Acres Simmentals. In the fall of 2010 one of the foundation cows to the Meadow Acres herd was purchased for \$25,000 in the prestigious Checkers sale, LFE KJLI Dreamlady 79W. This huge investment then resulted in MAF R Horizon 7Y, who was sold in the Checkers sale the very next year and was at that time the record high selling red Simmental bull of all time. After such immediate success and camaraderie from the breed and fellow Simmental breeders, the very difficult decision was made to disperse the Polled Hereford cattle and focus solely on Simmentals. In 2013 the Polled Herefords were dispersed at the farm and the Labatte cow herd that is the base of what you see today was purchased. The rest is simply history!

As we inch closer and closer to this very emotional but also historic day, we can't help but look back at all the great times, hardships, success stories and most of all the excellent cattle that came and went at the farm. Dispersals like this are always a very tough, emotional and exciting day for not only the producers but fellow breeders and friends as well. The cattle industry is truly the greatest industry of all. The lifelong friendships, generosity, sense of community and goodwill to see each other succeed, is truly second to none. As you read the crew at Meadow Acres' welcome you will see that not only the cattle are highlighted, but the people most of all!

Please plan on joining us December 21st at the farm by Lampman for the Meadow Acres Simmentals Complete Herd Dispersal. Once again this is a no miss event for not only great cattle, but also second to none hospitality. I strongly encourage you to view the cowherd in the weeks and days leading up to the event and call the folks at Meadow Acres direct to discuss the offering with them. If for any reason you are unable to attend, the entire crew at First Class Cattle Marketing will be very familiar with the offering. It will be our pleasure to assist you in both a professional and confidential manner in the purchase of your next Meadow Acres influenced Simmental genetics. I hope I can visit with all of you at the sale and I wish you all a successful fall and a very Merry Christmas,

Respectfully

*Darnell Fornwald*

Pashmenia  
**PASHMENIA**  
COW FAMILY

MAF 19H

MAF 142G

NUG Pashmenia 403P is a legendary female in the Simmental breed and we were fortunate to have her walk our pastures right up until last fall. Pashmenia was a female that we focused building our program on. With twelve direct daughters, this is the largest cow family back to one single cow we have. When you look through this cow family section you will see the production record speaks for itself. These females are powerful, bull makers. Females that are full of substance, strong udders, feet and maternal strength. We did not sell many Pashmenia daughters for a reason. Many sale highlights will be found in this family in every age group from mature cows down to calves.

Pocahontas  
**POCAHONTAS**  
COW FAMILY

FBL 108C

FBL 150D

The Pocahontas Cow Family is a combination of three well known females in the breed, 105L, 68M and 52N. These cow's records speak for themselves and have always been highly sought-after genetics. The Pocahontas family is the largest in numbers in the offering. There is a lot of variety within this cow family as far as type and kind, but quality is high throughout. Donor dams in this cow family for us have been 215U, 16Z and 173B. Their daughters will highlight this cow family. With the embryo work that was focused on in this cow family there are a lot of young females that will be just entering their prime of production. Highlights will be found amongst the cows as well as breds and calves. This cow family is one that we were building upon and really excited for the future of.

Lot 80

MAF 82H

Mackfrid  
**MACKFRID**  
COW FAMILY

MAF 173G

A cow family that has produced a couple of donor females for us. The Mackfrid's are power and performance cattle that are highly marketable. This cow family is highlighted by the highly successful flush of 27F. She sells along with her 10 ET calves and 1 natural calf that are the most consistent set of calves we have ever had off of one female. 46B is another donor that produced our high selling red bull in 2020. A cow family that will be highly productive and provide an exciting future for their new owners.

-298D was not intended to be a recip but happened to be bulling in the proper timeframe for a fresh embryo if needed. We did end up with some number 3's and chose to implant her rather than throw it out. She is a very solid cow that fits in with the Montana cow family. She sells with her papers and will be ready to breed this spring.

Montana  
**MONTANA**  
 COW FAMILY

FBL 27B

MAF 135H

The Montana cow family was started with a purchase made from the Remington Dispersal. We found 76T while Scott Anderson toured us through the fall calving red cows. She was powerful, excellent uddered and just a beautiful female we needed to own. She never disappointed. Her daughters are very similar to her in their makeup and are beautiful females that have produced an impressive set of highly marketable progeny to date. This includes MAF Rip 120H, who we kept for ourselves this year. He sells and you will see his service on select females throughout the offering. The 6 direct daughters of 76T are beautiful females that you will see are ideal in their type and kind and produce functional cattle for any operation. Many sale features will be found in this Cow Family, including a big-time bred heifer and an Exclusive bull calf that is exceptional in his structure and design. This cow family excels in udder quality, length of body, capacity and they are highly maternal. These Montana's won't disappoint.

The Noremac Cow Family all stem back to the LCL Miss Noremac 16M cow. This cow family is well recognized throughout the industry as powerful producers. They excel in power, performance, udder quality and excellent feet. The high selling female in this springs bull sale belongs to this cow family and there always seems to be a sale highlight each year.

RCCI 28T

FBL 23C

MAF 114G

MAF 95G

The Cassade Family begins with one of our first purchases from the Remington Dispersal, RCCI Cassade 28T. We wanted to purchase a donor quality female that we could build upon. The cow family has been very strong producers for us. There have been three herd sires we have utilized in our program, including the most recent being MAF Mr 95G and MAF Lockdown 114G, whose progeny are well represented throughout the offering. MAF Cassade 18A, a Lock n Load daughter produced the Lockdown bull and the cow family is highlighted by four flush mates of hers sired by MAF Full Velocity. These cattle are functional, moderate framed, phenotypically sound and highly productive. The right kind for any type of operation.

GLS Tyra 5T is the cow that begins this cow family. A cow family that isn't overly large but has an impressive set of females to offer. 232B is the anchor of the cow family for us and one of the most beautiful mature cows you will ever lay your eyes on. With four direct daughters selling and the youngest possibly having the most potential, it's easy to fall in love with this cow and family! Heavy on daughters we have only sold one female from the Tyra's. One of the big-time red bull calf features also comes from this cow family. His dam suffered a stifle injury this fall and is unfortunately out of the sale. Another feature bull calf on the black side is also from this family. An outstanding cow family that deserves serious consideration.

This is the girl's heifer calf, better known as Suzie. Her dam is not in the sale only because Britt owns her and refused to sell her!

COW FAMILY

MAF 39F

MAF 250F

The Patricia's stem back to WFL Patricia 49L and are highlighted by the young donor cow 183D. 183D is the dam of our high selling black bull in 2020 MAF Mr 148G who sold to Outlaw Cattle Company, Sevick Simmentals & M&J Simmentals. We did utilize him in our own program and you will find his progeny in both the heifer calf and bull calf pens. We decided to flush 183D to Bentley and although the flush was not huge the resulting heifer calves are very well-made females that should make great cows. She is an impressive cow and crosses well how ever she is bred. She has also made up good time after being flushed and is calving early. There are a lot of very productive cows in this small cow family. Our high selling red bull from 2021 came from this cow family as well.

MAF 93F

The Sabrina Cow Family is a young cow family that stems back to our feature donor cow Sabrina 89B. She was selected for the donor program based on her flawless phenotype, excellent udder and her blaze face did not hurt either. She has been an excellent donor female, flushing very well averaging 16 embryos on 4 flushes to date. Her daughters are an impressive group of females from mature cows down to open heifer calves. 22E has already been flushed here, her Sailor daughters are proving to be producing the right kind and her bred heifers are sure to impress as well. MAF Patriot 32F was the high selling black bull at our bull sale in 2019 that sold to Rust Mountain View Ranch and is one of the stoutest and soundest bulls we have raised. We haven't sold any Sabrina females before this. We lost two beautiful young females from this cow family this summer, they also would have been sale highlights.

 COW FAMILY

MAF 198H

MAF 190F

The Shamrock family is a cow family that doesn't get a lot of recognition, but really should. They all go back to IPU Shamrock 120L. Three donor females have come out of this cow family. Big, tanky type females that are sound footed and productive. 106C is a highlight that after her first three bulls were all sale features, we decided she earned her way to the donor pen and she sells along side four of her bred heifers.

The Clair family is a smaller cow family, but they have raised good ones and deserve to be noted. These females all go back the Ultra Temptress Clair 12R cow. Anchored by the older cows that have raised marketable and productive offspring to their daughters that are just beginning production and impressing already. A highlighted high selling black female in the 2021 bull sale was a Clair female. They are all strong in udder quality and phenotype in this family.

**LIZZIE/SPRINKLES**  
 COW FAMILY

MAF 189E

MAF 143H

This cow family started with the purchase of an open heifer from 3D Simmentals, 441Y. It took on a new twist when we gave Brenna & Britt their first heifer, which they named Sprinkles. This cow family has been highlighted by the high selling Sprinkles 14A and her high selling daughter Sprinkles 189E. They are a cow family that is easy fleshing, big bodied and always stand out in a crowd.

 COW FAMILY

We purchased a package of Angus embryos off the SAV Duke Girl 8161 cow from Brooking Angus. A little bit of a mixture here from the different sires but included are performance types as well as calving ease and a Renovation female that should be a home run female. If you utilize Angus genetics, be sure to check out these highly sought-after genetics.

Lot 270

An outstanding Poker Face daughter that has an exceptional udder, big volume and can produce. She has produced 3 full sibs over the last 3 years when mated with Exclusive, seemed to be the perfect cross. We kept her son Rolex who sells as Lot 416 for ourselves this past spring as we felt we needed to utilize him in our own program. He is most definitely a sale feature!

After going to look at bulls at Marlin's we saw this maternal sister to Yuma, she was easily a stand-out in the pen of first calvers and we had to own her. Her first flush was a success and after that she ended up with an infection that forced us to get her back in calf to clean up. She will be calved out by the end of November and ready to flush early in the new year. Lots of potential here!

This coming two-year-old bull was slated for the 2021 bull sale but suffered an injury prior to any bull sale preparation and was not catalogued. He recovered fully and we felt he was worthy of selling as an extra-age bull. 142H is soggy made and out of a beautiful, hard-working cow that sells as lot 171.

Rip checked all the boxes of one of the red bulls we were looking for this spring. He is dark red, deep bodied, extremely stout and easy fleshing. He has excellent head carriage and that is something that is very important to us when looking for a herd bull. Rip is a look a like to his sire, Patriot, but in the dark red colour we all love. He is backed by the Montana cow family and his dam who sells as lot 123 is one of our top females. The guess work is done here with a pedigree that includes the Montanas, Sabrinas and Pashmenias. A bull that really wraps up our entire program in one package. Rip offers power and presence as well as the pedigree to make outstanding females.

When we were reviewing our requirements for herd bulls this year, we started to look in our own bull pen. We have never kept a herd bull for ourselves, but we felt there were two bulls that we would be hard pressed to replace. So, we tucked Rolex away for the winter keeping him our best kept secret for the 2021 breeding season. There is so much I love about this bull. He is full of herd bull character, well balanced, long bodied, smooth made, very stout and extremely sound in his structure. His dam who sells as lot 270 is a big bodied, excellent uddered, powerful Poker Face daughter. This cross worked very well on her as there is a two-year-old and an open heifer that are full sisters to Rolex that are both extremely good. We utilized Rolex on a small group of heifers as well as cows this spring. His moderate birth weight and design makes him a bull that offers a lot of versatility.

We purchased Launch as the high seller from the Springcreek sale in 2018. We were searching for a bull that had immense herd bull character, maternally stacked, long bodied and hairy. He checked all those boxes and has not disappointed in his production. The group of two-year-old Launch daughters in this offering are where you can see this firsthand. They are outstanding females and are going to be valuable assets to their new owners. He is a sire that can add length, hair and frame without sacrificing thickness and soundness. Launch is a very athletic herd bull that is always ready to get to work. He has been an excellent breeder from the very start. The Launch progeny have been well received by purebred and commercial breeders alike. After the first two calf crops sold through the bull sale, Launch sons have been amongst the high sellers each year. Every daughter of this bull will be a keeper with his highly maternal pedigree. Launch has done very well for our operation, and we are so proud of the group of two-year olds he has produced. We are confident that he will continue to be a valuable breeding piece for years to come with his overall soundness and physical shape.

Launch sells in his entirety including semen inventory consisting of the following:

CAN - 104 doses | Exportable CAN/USA - 326 doses | Exportable CAN/AUS - 431 doses | Stored at Bow Valley Genetics

Springcreek Launch 110E - June 2021

MAF Montana 253H - Daughter

MAF Pashmenia 19G - Daughter

Lot 418

"Marlin" was purchased as a clean up bull in 2018. He has done that well and has been utilized to moderate birth-weights and did work on heifers which was a bonus. The Marlin progeny are sure to impress. There are some really nice calves in the offering sired by him. A good honest breeding bull that has never let us down.

540F was purchased as a heifer bull. He caught our eye with his attractiveness, body type and overall completeness. He has filled the heifer bull roll well here and matured into an impressive herd sire. Dark red in colour, smooth made and deep bodied. His progeny are the right kind and can be found throughout the bred heifers, open heifers and bull calves. A bull that will be very useful for any operation.

LOTS 433A-T: 10 UNITS PER LOT (200 UNITS TOTAL)

I have told the story of Exclusive many times. At the time of purchasing the Canadian Semen Rights on him it seemed like a big chance we were taking. What didn't take long to figure out was that it was the right decision and that has become more solidified with each new milestone we meet with Exclusive's breeding here. As you will find throughout the catalogue the Exclusive progeny are setting up for big things. The females are beautiful with excellent udders and the bulls are masculine, stout and they are structurally sound. He is a sire that adds style, presence, foot quality, udder quality and moderate birth weights. We have found that he did work best on bigger framed cattle, as he moderated frame more than we originally expected. This was the first spring we did not AI to him, as we chose to move forward with his genetics and capitalize on what we feel is his most outstanding son to date, MAF Rolex. Exclusive is a bull that we believe will provide a strong foundation and useful qualities that will never go out of style.

REFERENCE SIRES

SIRE SVS TYCOON 841F | DAM HLTS SAMMIE (WS BEEF KING WIDT)

# MF RANCHER 424

HOMOZYGOUS POLLED | BW 105 LBS | WW 975 LBS | YW 1529 LBS

HLTS SAMMIE (WS BEEF KING)  
*Dam of Rancher*

SVS TYCOON 841F  
*Sire of Rancher*

*The \$110,000 phenom that is one of the most exciting bulls to sell in the breed in 2020. Rancher has large, dark, impressive feet and is out of a near perfect, awesome udder donor who is beautiful in her design. His now deceased sire is the hottest bull in the business and we feel Rancher could be the most exciting power bull in our sire line-up.*
