Mature Cow Sale

December 3, 2021  
**Del Bonita, Alberta**

# WELCOME

Grant & Annette Hirsche

Wow what a ride! We love this breed, cattle and people. For over 45 years, we have travelled, showed and promoted this great breed, but most importantly, these cattle have given us the opportunity to raise our family among the best people in the world. That's you, our valued friends and customers. For the last 5 years, we've worked with the Nelson family to build NHP and appreciate the opportunity to do so, but now with NHP changing to calving in May and June, and going to a more grass fed program with less maintenance and selling mostly 2 year old bulls in the spring, we've decided to slow down a little ourselves and concentrate on the top end and help our customers market their cattle. Annette and I have decided to sell all our cows 3 years and older to reduce our numbers and give us the opportunity to travel and promote a little more. We will be retaining all our heifer calves, bred heifers and embryo cows as well as all partnership cattle. We are still planning a sale next fall and will continue to develop

and breed cows that are big and powerful with excellent udders and milk. Carcass quality has always been a high priority at Hirsches. We've been ultra- sounding these cattle for over 35 years and now are working on feed efficiency testing as hard as any. I believe we can have effective cattle rather they're big or little and there is a place for both. Rambo is a perfect example that big cattle can be effective. He ranks in the top 3% of the breed for RFI and is a trait leader. One of his latest sons, 21F that is even bigger than Rambo is showing a ranking in the top 1%. With the help of Nelsons over the past few years, we have been able to fine tune our cow herd into what I believe is by far the best set of cattle we've ever been able to assemble. The acquisition of the Anderson cow herd has helped alot in getting to this level. Think you will notice the pigmentation has also been a higher priority in our breeding selection. Not only is this an exceptional group of cows, but I think the services they are carrying are some of the best in North America. This will be the first chance you will have to purchase the service from 2 of the most exciting new sires available, Blockbuster 170H and Avalanche 1H (Lot 216). Many of the cows will be bred to cutting edge breed leaders like Stock Option, Perfecto, Dominate 308F, Candy Belle 9036, Entice, PDHR 24H, 324G, Eclipse, and 21F.

I think this sale will also be unique in the fact that it's also offering herd sire prospects from these exceptional cows. Once again, we're offering some of the newest and best genetics available, both horned and polled, from Stock Option, Perfecto, Historic, 599E, 47G, and Eclipse. This sale does provide a unique chance to buy the very best we have to offer and yet we are NOT quitting the business, so we will still be here to stand behind these cattle and continue to help promote them. We truly appreciate all the help, service, kindness and friendship you've offered over these many years. We sincerely invite you to this historic event in our lives. Thanks again and see you all Dec. 3, 2021

# NHP 5<sup>TH</sup> ANNUAL PRODUCTION BULL SALE

December 3<sup>rd</sup>, 2021 at 1:00pm

Cattle available for viewing  
at the Ranch in Del Bonita  
Nov 29-Dec 2 all day.

## SELLING

5 Semen Lots (Max 10 packages of  
10 doses for each lot)  
15 - 2021 Herd Bull Prospects  
75 - 2 year old bull lots

Jimmy (403) 635-7075

Stirling Fee Lot Manager:

Mike (403) 308-8074

8 Nelson children with their families.

Dear friends.

I hope that life has treated you great, and that your families and businesses are doing great also. What a roller coaster it's been this year. The Pandemic, record feed prices, drought, record crop prices, etc. We went from some of the best crops produced last year to some of the poorest this year. Grain and feed prices have doubled, and some even tripled since last fall. Feeding our herds this year will be challenging. We hope and pray for more feed next year. These markets are not for the faint of heart. What a ride. Fortunately you are still here, and moving forward. Unfortunately we did lose some dear friends again this year, and we are sad to see them go. They are still in our hearts.

I want to personally thank you for the love, support, and friendship that we have been blessed with these past 5 years. I especially want to thank Grant and Annette for their love and friendship. I have learned a lot from them. I look forward to seeing what the future has in store for all of us. We are optimistic that the virus will be defeated, and life will return back to normal soon. People have learned the importance of our food supply, and are a lot more mindful of where their food comes from, and the distribution pipeline. I hope that we have all learned more, and are better prepared to face the uncertainty that we see in our lives. Protecting our food supply will be on our minds for a while. Cattlemen take great pride in the product that we produce, and together we will continue to produce a safe, desirable product. Alberta Beef is awesome. I love it!! I eat it every week. I encourage all of you to be involved in our industry and help to teach our neighbours the importance of our industry. They need to hear our story from us, not somewhere else. Together we will continue to grow and develop our great cattle industry.

We are very excited to invite you to our Fall Production Sale at the Del Bonita Ranch. Located 7 miles west of the Del Bonita store on the 501 Hwy. Give us a call and come visit anytime. You can also look up some info on our website, [www.nhpurebreds.com](http://www.nhpurebreds.com).

I look forward to visiting with you this fall. Call anytime.

Jimmy Nelson (403) 635-7075

Jeff Nelson (403) 635-7078

Kelly Millward (403) 849-8140

Mike Smith (403) 308-8074

\*\*All Marketing Agents listed on page 5 will be available with phones sale day.

## TERMS & CONDITIONS:

**Guarantee:** Standard Canadian Hereford Association Guarantee applies. We do, however, follow up on all animals sold to insure satisfaction.

**Health:** The Herd is maintained in a TB and Brucellosis free area and the Cowherd is annually vaccinated for IBR, P13, BVD, BRSV and Vibrio. All Sale bulls have been treated with Ivermectin. All ET Cows are preg checked by DRI and the Cows are preg checked by Dr. Storm Bartsoff.

**Terms:** Cash Sale day unless arrangements have been made with Grant and Annette. We will make every effort to accommodate your needs. Cattle become the responsibility of the buyer after purchase.

**Sight Unseen Program:** Call and let us help select the right animal for your needs. We guarantee the best possible animal for the best possible price. If you aren't satisfied with our choice, we take them back.

**Other Information:** All announcements from the Auction Stand take precedence over any other information written or oral. PHONE AND INTERNET BIDS accepted.

For In Herd Semen Interests in Bulls announced sale day:

WE ARE RESERVING THE RIGHT TO DRAW SEMEN ON ANY OF THE BULLS SOLD IN THE SALE TO BE USED IN OUR OWN HERDS ONLY. THIS WOULD BE DONE AT OUR EXPENSE AND THE BUYER'S CONVENIENCE.

**ALL CANADIAN FEMALES MUST BE PICKED UP BY DECEMBER 15TH.**

**For US Buyers:** At Buyer's request, we will provide all health, customs and brokerage papers and delivery of the cattle to US SIDE OF SWEETGRASS, MONTANA. Trucking from that point will be the buyer's responsibility. Help with arrangements for trucking to final destination is available. \*Note if you want us to do your paperwork, you must provide your IRS number sale day.

**Wintering:** \$200 discount per bull if they are picked up before December 15th. Bulls can be wintered free of charge until the March Bull Sale if you would like. \$100/month will be charged after that date, but must be picked up by April 1st.

**RANCH LOCATION:** Del Bonita, Alberta on the USA/Canada border. Highway 501, between Whiskey Gap and Del Bonita, Alberta. Turn south at Range Road 230  
Directions from Great Falls Airport: Approx. 2.5 hours. Drive north on I-15 and west on Highway 501

**Accommodations:** Cardston South Country Inn (403) 653-8000  
Lethbridge Comfort Inn (403) 320-8874  
Shelby, MT Best Western Inn (406) 424-4560

**We are a sponsor of the CJHA Heifer Lottery**

Junior Lottery

Congratulations to Maysa & Tycee for being chosen for credit in 2021

**SPECIAL NOTE FOR AMERICAN CUSTOMERS**

Due to the strong American dollar, there will be close to a 20% discount. US\$8,000 will buy close to C\$10,000.

**Can't make it to the sale? Internet Bidding Available.**

To view this sale visit [www.dlms.ca](http://www.dlms.ca), Fill out the registration form located under registration and sign-up for your free user account and select a username and password.

Data and photos will continue to be updated online clear up to sale day. Some videos online November 3 & the rest Nov 20.

# THANKS TO OUR MARKETING CREW

Fellow Cattlemen!!

I have had the privilege of working with Grant & Annette Hirsche for over 45 years, and I have written many sale welcomes. This sale welcome is perhaps the most important and exciting one ever!

Hirsche's & Nelson's have together built a tremendous, outstanding herd of the top Hereford cattle on the Continent!

Performance – Feed Efficiency – Fertility & Production are all important criteria that this herd has been developed upon.

This year's offering gives producers both purebred & commercial, an opportunity to buy into one of the most proven programs in the Nation!

Homozygous polled cattle, polled cattle, horned x cattle and straight horned cattle are all represented in this sale. The absolute heart of a great cow herd are here to buy. The newest, most exciting pedigrees, plus some of the greatest old proven pedigrees are both in the offering.

The service sires used are the leading edge of bulls right across North America. This is a great sale, with a powerful trend setting offering. Buy from a proven program!

See You At The Sale

Respectfully, Robert C. Balog

# OUR COMMITMENT TO OUR CUSTOMERS

**We use every tool available to produce efficient, high carcass cattle that will improve your herd.**

WE RAISE EFFICIENT, PROFITABLE CATTLE WHETHER THEY ARE BIG OR LITTLE

## 1 Why we use Growsafe & RFI Data?

We have always tried to use every tool available to help our customers and our own program in selecting the best genetics available. As time moves on, we keep getting more and more technology to aid in our selection. The Feed efficiency knowledge is fast becoming one of the most critical forms of data that has come along in recent history. It will help us select bulls and females that eat less and convert more, thus putting real dollars in your pocket. In 2018, we put in our Grow Safe system where we have RFI tested almost 1400 bulls. (All 2 year olds in the sale have RFI data available in the catalog) We believe that this is a real tool that we need to implement into our cow herd. It is heritable and will not only help produce cow that are more efficient, but through RFI testing, we can reduce greenhouse emissions such as ethane by 30%.

## 2 Ultrasound We have done Ultrasound for over 35 years.

From Windy Ridge Ultrasound: Ultrasound has been used to evaluate beef carcass on live cattle since the late 1950's. I started doing carcass ultrasound testing commercially in 1994. Hirsches were some of the earliest supporters of carcass ultrasound and now many of their bloodlines excel in desirable carcass traits. Without the knowledge of individual carcass traits, breeding to achieve desired outcomes would be difficult. Desirable carcass traits are one of those factors that can add to the profitability for the feed lot and cow calf producers. Percent Lean Meat Yield (what percent of the carcass is lean muscle) is calculated using the Backfat (BF) and Ribeye Area (REA) where the BF reduces Yield about 7 or 8 times more than REA will increase Yield. Weight adj. REA of 10 square inches of REA there are for every 100 pounds of weight. (1000 # bull with a 10" REA would be a Weight Adj. REA of 10 square inches of REA per 100#s of body weight) A bigger bull should have a bigger REA so the Weight Adj. REA is comparing apples to apples. It is a real pleasure working with Nelson Hirsche Purebreds as they are very progressive in their use of technology. Yours truly, Rod Wendorff [rod@cattleultrasound.ca](mailto:rod@cattleultrasound.ca) (403) 330-3000.

## 3 EPDs (Expected Progeny Difference)

EPDs- The prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. You cannot compare EPDs across other breeds. Each breed association calculates that breed's EPDs  
BW- Birth weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

WW- Weaning Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Milk- Maternal Milk EPD is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

TM- Total Maternal, Maternal weaning weight EPD measures a sire's ability to transmit milk production and growth rate through his daughters. It predicts the weaning weight of a sire's daughter's calves. It is equal to his milk EPD plus one half his weaning weight EPD.

REA- Ribeye area EPD is a predictor of the difference in square inches of ribeye area of a sire's progeny compared to the progeny of other sires.

IMF- Marbling, Intramuscular Fat EPD is a predictor of the difference in a sire's progeny for percent intramuscular fat in the ribeye muscle compared to other sires.

## 4 HERDTRAX

The Nelson and Hirsche's have recently enrolled their entire cow herd (purebred and commercial) onto Herdtrax. Herdtrax is an online record management program that is based on the detailed collection of data on each individual animal at all key health and production points. The philosophy is "What's measured improves." The goal of the entire exercise is to acquire and share meaningful data on all of the animals produced and use this information to assist the commercial producer with making better decisions regarding what type of bulls work best in their program and to also provide the producer with valuable feedback on how their bulls are working for each commercial producer in the respective environments. NFR are unique in that they also have a substantial feeding operation and are able to provide a conception to carcass (c to c) network through the buyback of progeny from the bulls sold in their sale. These purchased cattle will be subsequently fed until harvest when individual live weights, gains, and carcass data is returned and when possible linked back to the dam and sire. Herdtrax Inc. is proud to have the opportunity to work with the Nelsons and Hirsche families and if you have any questions regarding their Herdtrax data sharing network contact myself directly. Yours truly, Troy Drake email: [troy@herdtrax.com](mailto:troy@herdtrax.com) Phone 403 540-8934

# READING THE LOT DATA DERIVED FROM THE 4 TOOLS

1

## Grow Safe Explained

Example of data shown on each sale Lot:

### Growsafe Data

ADG	EFF Index	FEED to GAIN	RFI	NHP Index
2.71	92	8.36	2.2707	92

#### Feed Efficiency Test

ADG- Average Daily Gain during test

EFF- Efficiency Index

F/G- Feed to Gain (ex. 5.1 lbs eaten = 1 lb gain)

RFI- Residual feed intake

NHP Index -  $ADG/F/G/RFI=NHP$  Index

This is the Third year Nelson Hirsche Purebreds (NHP) are using GrowSafe to measure the feed efficiency of their young breeding stock.

GrowSafe technology measures the feed intake of individual animals and their weight gains. When an animal puts its head in a GrowSafe feed bunk, its RFID tag is read and the feed intake is calculated. When the animal goes to the water trough its weight is calculated.

Cattle are on test for approximately 2 months which gives an excellent representation of their efficiency. Through this process Residual Feed Intake (RFI) is calculated which is the difference between their actual and expected dry matter feed intake.

The lower the RFI value is the more efficient an animal is. For example, an RFI value of -2.1 means an animal is projected to consume 2.1 less pounds of dry matter per day than what is expected for its size and weight gain.

The goal of NHP is to select highly efficient breeding stock, stacked generationally, that will bring improvements to their breeding herd and increase value for their clients.

Calculations are all based on data acquired from the GrowSafe feed trials:

- **ADG** (*Average Daily Gain*) - animal's weight gain divided by days on trial.
- **Eff** (*Feed Efficiency Ratio*) combines an animal's efficiency and ability to gain weight, weighted 60% on RFI and 40% ADG.
- **F/G** (*Feed to Gain index*) - feed conversion is calculated by an animal's average dry matter intake divided by its ADG. For example, a 5.62 F/G value means an animal consumed on an average 5.62 pounds of dry matter for each 1 pound of gain.
- **RFI** (*Residual Feed Intake*) - the average pounds of feed consumed by an animal per day minus its expected feed intake. Negative is better

• **NHP%** (*Nelson Hirsche Purebred Balanced Index*) -  $(ADG \text{ Index} + F/G \text{ Index} + RFI \text{ Index}) / 3$

We have developed the **NHP%** which equally weights an animal's **growth, feed conversion, and efficiency**. An animal with an 100% NHP index would be average in its contemporary group. Animals with higher NHP indexes are likely going to have offspring that are more productive and efficient through growth and maintenance. All calculations are made from data received from GrowSafe, a third-party provider. All animals are sorted into contemporary groups according to breed, trial start date and weights, age, and gender.

2

## Ultrasound Explained

Ultrasound Data on each lot:

LMY	BK Fat	IMF score	REA in <sup>2</sup>	REA/100#
66.38	2.38	AAA	12.04	1.0

#### Ultrasound Data

LMY- Lean Meat yield

BK Fat - Rib Fat

IMF score - Marbling

REA in<sup>2</sup> - Rib Eye Area square inches

REA/100 lbs - ex. 1 = 1 sq in of rib eye per 100 lbs

### Ultrasound Data – What do the numbers mean?

(Rod Wendorff)

All Carcass measurements are taken between the 12th & 13th ribs which is the industry standard.

- Ribeye Area (REA) is the size of the loin muscle in square inches (in<sup>2</sup>).
- Percent Lean Meat Yield (%LMY) is what percent of the carcass is lean muscle.
- Backfat (BF) is the thickness of fat covering the loin muscle in mm.
- PFat (Percent Intermuscular Fat/Marbling) 9+ is Prime, 4 to 9 is AAA/Choice, 2 to 4 is AA/Select, < 2 is A/Standard
- The Ranking is (RFI Ranking of 1-185 Hereford bulls that went through the GrowSafe)

3

## EPDs Explained

EPDs and Performance Data on each lot:

EPDs	BW	WW	YW	MM	TM	REA	IMF
	3.0	50.3	81.2	22.6	47.8	0.35	0.08

#### EPDs Table

BW- Birth Weight

WW- Weaning Weight

YW- Yearling Weight

MM- Milk

TM- Total Maternal

(milk + growth combined)

REA- Rib Eye

IMF - Marbling

#### Performance Data

BW	205	365	Sept WT
100	576	917	1270

#### Performance & Growth Data

BW- Birth Weight

205- Adjusted 205 Day Weight

365- Adjusted 365 Day Weight

September 2020 Weight

All our Herefords are enrolled in the THE PROGRAM. (Total Herd Evaluation) is a complete herd reporting system to evaluate performance traits. Participants in the program provide performance reports (adjusted weights, indexes and ranks) and EPDs which are one run twice a year.

4

## HerdTrax

If you are using HerdTrax, we will transfer all our HerdTrax records on the NHP bull you purchase.

A great Upstream bull out of a Neon daughter. Uptown was the most powerful show bull we ever owned. He won the World Hereford Conference, Agribition, Supreme Champion and Reserve Champion Bull. But more impressive is his breeding power. We love his females and sale day you will see why. They are big, power cows with great udders and lots of pigmentation.

This bull has turned into one of the great bulls we've raised. His daughters are among our best producers ever. They have tight udders and all raise great calves. He was also a show bull winning Agribition as a yearling and Reserve Champion Bull at Denver. Our show heifer "Bella" that won the Canadian National Show at Agribition. Our great Eclipse 27E is one of his greatest accolades. You will find this sire in the pedigrees of many of the cows in this sale.

Purchased in the Upstream 2015 bull sale. Maybe one of the great buys we've made. His dam is a great uddered Neon daughter with hair and power. His sire Sensation, is a light birth weight bull out of a Rambo daughter so "Ruger" is a double bred Neon and it shows in his calves. They are so thick. They have hair and a winning pedigree as well. You will love them sale day. The more we've used him, the more valuable he becomes. His daughters and granddaughters are moderate, easy fleshing with unsurpassed milk and udder quality.

In today's industry when you're looking for muscle and power, Eclipse has to be ranked near the top of the Hereford breed. Neon and Rambo were identified early in their life as something special and went on to be industry changers. Eclipse is following that same pattern. Shortly after his birth, we found him to be unique, emphasizing more muscle and power. We then watched him grow into one of the best calves we have raised and sold that fall, 1/2 interest for \$80,000. He then went on to be one of our best show bulls ever, winning many major shows including Supreme Champion at IPE and top 5 at Edmonton and Agribition Supreme Show. But most important, he has proven that show bulls can be breeding bulls also. His calves are our best ever. Muscle, power, style. This is our first year of calving his daughters and it looks like they will be unbelievable. Udder quality is # 1 with tons of milk.

(ALSO USED HEAVILY AS A SERVICE SIRE)

It's so nice to see a show champion turn into a great breeding bull that helps improve our great breed. This guy is one of those. Denver Supreme Champion as well as a Champion breeder. Our top selling bull Blockbuster last year was his son as well as several other features. This year he hit a home run again with 125J lot 200 and many other features carry his genetics and service. He adds performance and muscle in a unique, stylish package.

A proven super star with 10 traits in the trait leader status and still a real outcross, especially in the horned division. Muscle, extreme calving ease, maternal, and pigment are his strong suites. We've used him alot over the past year and love the results. One of the few bulls we've used to consistently add lots of pigment and lower birth weight, yet add growth. Really think his daughters will be something special.

**Owned by JK Fraser.** Another young Super Star we're really pleased to have been able to add to our semen inventory. We've used over 100 doses and wish we had more. I was able to see his dam and sister at Colyer's and decided right then, this is the Belle Air son we needed. Just take a look at his thickness and power, it's like few others and great pigment. We flushed our #1 young cow 132F to this guy. That should speak volumes.

Denver Supreme champion in 2019, but more important is his ability to produce the great ones. His calves are still young and only a very few in Canada, but all reports are 2 thumbs up. If his pedigree and EPD's run true, he will be a breeding champion. An opportunity to buy some of the very first embryos offered in Canada on this super star and several cows carry his service.

A true feature out of our top 132A Lot 16 cow. She's also the dam of feature lot 201 and 202. 21F is the best Rambo son we've raised to date. I love his power, hair and pigment. He is the example of a big bull that has great feed efficiency data out of 200 bulls. He was #1 and has an RFI EPD of 116, top 1% of the breed. Top 1% for REA and Carcass weight as well and top 8% for both yearling and weaning growth. A very sound bull with great carcass, growth, RFI, hair and pigment, from a great dam. That's why you will note he was used as a cover bull on a lot of our top cows. Nice to have walking bulls of this quality.

This is the bull we've selected to use on the horned cows to keep the Anderson cows as much straight horned as possible. 83G is moderate, but really thick with great hair and pigment. Very structurally sound with a great cow family to back him. He was purchased by Gus Gustafson of Kansas from Peter Ulrich and we were lucky enough to get the Canadian semen along with the interest Peter kept. 83G will have an impact in our herd. Was Al'd to a bunch of our heifers that I am keeping plus being a service sire on sale lots.

## 315Y's greatest son: GH ECLIPSE 27E

Our greatest show bull: Top 5 Supreme both Edmonton & Agribition Champion, and Supreme IPE

Our greatest breeding bull: We're lucky - best breeding & best show bull don't always go together.

Pictured sale day with Tom Lane of 4L Herefords after he sold for \$270,000 I felt that Rambo didn't get the recognition he deserved after he sold to the US because of BSE, but now we see several of the top producing bulls including "Sensation" are coming out of Rambo daughters. A couple of years ago, I decided to use some old proven bulls we had in our semen tank and Rambo came to the top quickly. It's pretty cool to see his calves now on our thick cows. Our top selling bull in 2018 was a Rambo son. His progeny in this sale come to the top easily. Most of our cattle go back to Rambo or Neon 2 or 2 times in their pedigrees. Take the opportunity to buy semen on this Industry Leader.

# THE POWER IS IN THE COW: 315Y

6 embryos sell as Lot 6

315Y

Her son is one of the most successful show bulls and herd bulls ever.

ECLIPSE 27E

315Y is an example of how one cow can make an impact on a herd and the industry. It doesn't matter which bull she's bred to, the mating is a success.

## SELLING DAUGHTER OF 315Y

SELLING 132F, EMBRYOS AND PREGNANT RECEIPTS

LOT 1A

### 1A GH SUPER ZAM FAYTHE ET 132F

### LOT 2&3: SELLING 2 PREGNANT RECEIPTS

#### 132F X Candy Belle 9036

Not sure which one, but the offspring from these matings are going to be pretty special. Buying one or both of these could put you at the very top of this breed overnight. I would be very surprised if one of these matings isn't our #1 feature in next year's sale.

### LOT 4: THREE #1 EXPORTABLE EMBRYOS

#### 132F X Candy Belle 9036

CANDY BELLE: See Reference sire H, page 11

### SELLING PICK OF THE PAIR: 1A OR 1B

**Lot 1A 132F:** Very seldom does one get the opportunity to buy one with the potential and power that 132F has. As a donor female, her potential is unlimited. Only flushed once and produced 25 freezable embryos and then bred back to calve the end of January. Her first calf is a young herd bull that we are using and the second one is this 69J sweetheart. 132F is a direct daughter of our unbelievable 315Y cow. I never thought we would have a cow to produce better than our great Sydney 59M cow, she was Legendary. However, I believe 315Y has with producing over \$450,000 worth of progeny and still going. She produced the likes of Eclipse, Blockbuster, 777H, Bullet 102B, and 129F all outstanding herd bulls and many daughters that outbred themselves, but the best are 132F and her flushmate 53F. She is producing and showing for Tava Gustafson, Junction City Kansas. Terms will be announced sale day. Bred naturally to our Second High selling #1 feed efficient bull, Headliner 499H (owned with Anderson Ranches). All our donor cows were bred to this young super star in the making.

PE April 23-June 1

Preg check late January.

# SON OF 315Y - THE POWER CONTINUES

Our #1 Service Sire.  
Last year's high seller \$145,000

**BLOCKBUSTER 170H**

## SELLING GRANDDAUGHTER OF 315Y

## LOT 6A: THREE #1 EXPORTABLE EMBRYOS

315Y x ENTICE

## LOT 6B: THREE #1 EXPORTABLE EMBRYOS

315Y x ENTICE

**POLLED** You all know the history of this cow. What an opportunity to buy 6 embryos out of a cow like this and from a new exciting sire like Entice. Doesn't matter what 315Y is bred to, they are just the best of the crop. I can only imagine what these calves will be worth. By far the most valuable embryos we've sold to date. 315Y has produced of \$450,000 in progeny.

315Y Son: ECLIPSE sold for 2/3 interest for \$80,000

315Y Son: BLOCKBUSTER sold 2/3 interest for \$145,000

315Y daughter: 132F sells as Lot 1

Many picked this guy as the best bull at the Oklahoma show this spring. I felt he was definitely the heaviest muscled bull there. We feel fortunate to have been able to flush our best cow, arguably the best muscled cow in the breed to this guy. This is truly one of the best potential crosses that we have put together. A really rare opportunity to purchase embryos like these.

**HORNED** Chance to buy one of my proven donor cows that is still producing well naturally. Bred early to Eclipse 27E. What a combo! 171Z is our #1 RFI cow and has produced 2 donor females and 3 herd sires, 14G, 47G and 324G. She's really sound and should have 5 or 6 good years left. On her latest flush, she produced 12 #1 embryos. Was open 2020 to flush. Special note\* Her grandmother is our great Sydney 59M cow. No wonder she produces. Preg checked late January.

Pastured exposed to 27E April 7-June 1

## 9 PREGNANT RECEIP

**171Z X Candy Belle 9036**

Pregnant receip carrying the mating of Candy Belle and 171Z. Could be as good a mating as any. She will definitely add the growth, while the sire will add the Cosmetics and even more maternal and thickness.

171Z Produces outstanding Herd sires including 324G, 47G, & 14G

324G

# SELLING PICK OF THE PAIR

**STRAIGHT  
HORNED**

**LOT 17A**

**Straight Horned \* Special Lot choice - Cow or Heifer Calf**

This is my #2 pick of the entire cow crop. I could write about her all day. We planned along time to breed her to Blockbuster 170H. Hoping for a bull with her pigment. First cow we Al'd April 6. Low birth weight Blockbuster will add the performance.

But, what really makes this one cool is her heifer calf, 1J out of Eclipse 27E. She's #1 in my book and her heifer calf last year was my #2 pick of the 200 bred heifers. She sold to David DeCok. He got a great buy! The cool thing about this pair, I'm not so sure I will loose the cow. Her calf is that good.

**Bred April 6 Blockbuster 170H**  
**Preg checked to AI date**  
**PE Apr 10-Jun 1 to Eclipse 27E**

**POLLED \*Special choice – Cow or Heifer calf**

What a cow. Only in a sale like this would you get a chance to buy this one. Billy Paul's best one. He won several shows, but her ability to produce great ones is her claim to fame. She needs to go into a flush program. Just look at her 2021 heifer calf. I would love to see a 21F son from this cross.

	2.8	46.2	76.3	28.3	51.4	0.25	0.08

**HORNED** Another great Design cow. 36D has not had a chance to produce a bull yet, but she has the ability to have a great one. 2 females remain in the herd including her heifer calf this year that ranks top 15 out of all the heifer calves. EPDs are pretty good (a cow of this size and a 2 birth and 29 milk. She's a big cow.) 36D is the kind to raise a herd bull.

AI April 16 to Stock Option      PE April 21-June 1 to 324G

18Y: Dam of Lot 73

# HEREFORD BULL CALVES

This group is probably as good as we've offered and yet they're the most different. We have some with an extreme amount of growth and performance and some that are ultra thick. Their EPDs are as good as we have had and by far the strongest we've had for pigmentation. As you evaluate these bulls, you will have to agree they're the deepest group we've offered.

### POLLED

It is easy to talk about this guy. I love thick and meaty bulls, but I believe we need a little more growth for the most part and this guy has both. Probably the most consistent in quality. His sire Stock Option passes on his style and class and this guy is no exception. He's always got his head up and is very proud. His mother is one of my all time favourites. She is also the mother of MVP 67Y. As you study this offering, you see the value of our MVP daughters and most of the maternal comes from this dam, 253W, selling as lot 11. This could be as good of a herd bull prospect as we've offered. I know he will be one of the biggest. Look at his carcass #s as well top of the breed for both REA and Carcass Weight.

# FLUSH BROTHERS - HEREFORD BULL CALVES

**HORNED**

**HORNED**

This guy is my kind. He is really, really stout and has lots of muscle, big red eyes with a great EPD profile. 9 traits are in the top 30% of the breed and 6 in the top 15%. His dam is truly a great one with a perfect udder. She also produced our famous 21F Rambo son (Firepower) By far the biggest bull we've ever raised, but so sound, long, docile and his calves are good for birth weight. Last year 132A, selling as lot 16, produced a feature heifer calf that sold to Sky Virtue ranch, while her bred heifer sold to Justin and Ashley still. His sire is a true outcross for Canada and yet has proven his worth as a calving ease and maternal giant. The udders on this guy's daughters should be superb. I just know you will wear out a truck driving up and down the road to find one that checks as many boxes as this guy. I really like his chances to be one of those rare ones to help change our breed. Will definitely take off white and add pigment.

### HORNED co-owned with Karsten Grabler

If you're looking for a Stock Option to add power, muscle and maternal strength, here he is. Son of our top selling 2 year old feature last year for \$15,000 to Karsten Grabler and she's worth every penny of it. Her first calf is one of the best yearling heifers we've raised and won her class at Bonanza. Great EPD profile with huge emphasis on carcass traits. Top 30% for all 4 carcass traits. I've always valued testicle size and shape as a huge importance and this guy is #1 in that department.

1037F and 88J

35H, maternal sister to Lot 205

### HORNED Co-owned with Dahl Livestock

As stated in our preface, our herd bull prospects run pretty deep and here's another one. Probably our best 27E horned herd bull prospect to date and backed by an exceptional cow family. His mother is a daughter of our donor and Top RFI cow 171Z. She sells as Lot 8 (171Z). 21J's already no stranger to the winning circle and I don't believe it will stop. Reserve calf champion at the Canadian Junior National Bonanza and class winner with his mother. He definitely has the muscle and power from his dad and growth of his mother. Don't miss this one. He's pretty good.

Reserve calf champion at Canadian Junior Nationals and Idaho State Fair

Son of 578G, sells lot 10  
Grandson of 171Z sells lot 8

**POLLED** I like this guy alot. His dam also produced our feature powerhouse yearling bull 65H, LOT 217. Probably as much growth and power here as any in the sale. You have to love his stifle and hind leg. Great maternal and growth here. Top 18% for milk, maternal weaning and yearling growth. 4 pretty important traits if you want to stay in the cattle industry very long. Dam was purchased as a pick of the LFH heifer calves at Bonanza 2017, owned with Kevin and Joanne Fraser.

### HORNED

If you want a bull to help build a cow herd that will keep you in the cattle business, he he is. Big, deep stout and tons of maternal. His dam is one of my very favourite cows, perfect udder and all kinds of milk. She sells feature cow 104E Lot 31. Take a look at this guy's growth, both weaning and yearling top 1% and scrotal size top 10%. Sire 599E needs no introduction.

**HORNED**

**LOT 208**

104E, dam of Lot 208

# HEREFORD BULL CALVES

**HORNED** I think this is the best Eagle's Rock 599E, we've raised to date. Another bull with great growth numbers. Dam is a big cow with big goggle eyes. This guy take after his mother in this department and hair was well. Probably our best bull for hair, pigment and markings. Nice EPDs as well with 6 traits in the top 10% with yearling, weaning and scrotal size included in those 3.

98E, dam of Lot 209

LOT 209

### POLLED

Another polled outcross pedigree. I would use this guy in our own program. Dam sells as lot 318C Lot 96 with a perfect udder. Sire 767 is a Line 1, female producing giant. Many of our best cows go back to him or 252M. We went back to the semen tank on the strength of his cows. Our top heifer calf 32J a daughter of 767 and won Reserve Grand champion with her mom at Bonanza.

### HORNED

It's pretty cool to end this bull calf division with a calf of this guy's power and performance. His dam is a power cow that sells as Lot 70 (7D). Just wait and see, she will be one of the great buys in the sale. 30 milk and high total maternal of top 25. This guy will be the heaviest or second on sale day.

**HORNED**

**LOT 214**

7D: Dam of 82J. She sells Lot 70.

# HEREFORD YEARLING BULLS

This is truly one of the best set of coming 2 year olds we've ever had on offer. Several we've used ourselves and there are at least 5 ET calves out of our top Donor cows. These bulls have all gone through the growsafe test for feed efficiency. We believe this is one of the most important trials we have to assist us in creating an efficient cowherd as well as cattle that will excel and be profitable for the feed lot. These bulls ran on grass all summer until Sept 1st.

HOMO POLLED

LOT 216

1H at 9 months. No creep, feed only on 2 year old mother's milk

**HOMO POLLED** This guy is freaky good. Bought in dam at the Elmlodge sale in 2019 with Kevin and Joanne Fraser and what a buy! By far our best purchase. He just checks all boxes. His EPD profile is the best we've had on this ranch .09 birth and 130 yearling growth. WOW. He has outstanding testicles and produced top, top semen at 13 months. Weaned off his 2 year old dam at over 900lbs and NO creep or extra feed of any kind. His dam is moderate with a perfect udder. He and his dam are both 100% pigmented. His feet and legs are nearly perfect. Had a good grow safe test with an ADG of 3.62 and F/G of 4.83. He's a totally outcross pedigree for us and is Homozygous Polled to boot. Don't know where you would find one much more impressive. He's really easy to look at and is extra proud. I really like him. We used him alot and will continue to use him alot in our programs. Nelsons, Hirsches, and Frasers will all be keeping

**HORNED** If you want size, power and performance, you won't find one better. Like lot 216, he has herd bull written all over him. This guy represents by far the best 2 year old herd bull prospect we've sold in any NHP sale. This guy's sire has champions all through his pedigree with at least 3 as Denver champion or Reserve. His dam is one of our great young cows with lot of milk. Fraser's and ourselves bought the right to pick any heifer calf from Little Fort Herefords at Bonanza 2017. Cow is now owned by Kevin and Joanne. Her calf this year is 155J and sells as lot 207. He's one of our best Eclipse calves to date. Proven cow family and Kym Jim will attest to that. For pure growth, she is probably in the top 2 or 3 of our entire cow herd.

100	100	AAA-	100	60.5				

**HORNED** It's really cool to have 3 bulls as good as these three to start the 2 year old offering. All are great ones and yet all so different. This guy is the thickest and stoutest by far which is quite a statement if you look at lots 216 and 217. Quite moderate in his type and yet still weighed in the top 5 of all our 2 year olds. His sire needs no introduction as he was Supreme champion in Denver. His dam is our great 91A that has been a feature in at least 3 of our sales and still holds the record of selling the top horned heifer calf in Canada at 1/2 interest for \$17000 to JKF. 91A was named Grand Champion at Agribition and had one of the best udders on the ranch. We lost her a year ago, so this is her last son.

**POLLED** Consigned by Oakridge Farms

Polled with one eye heavily pigmented and the other is 10%. This is Paul's bull out of their great 123C cow. Was all breeds supreme champion in Armstrong, but more important is her maternal strength and power she put into her calves. Has one of the top heifers again this year selling as Lot 30 (241J) 851H's sire is Deluxe our Ruger son that sold to Stuber Ranch for \$60,000 1/2 interest. No shortage of genetic potential in this pedigree.
