

# 10<sup>th</sup> Annual

## *Premier Hereford & Angus Bull Sale*

**February 7<sup>th</sup>, 2022**  
**Northern Livestock Sales**  
**Lloydminster, SK - 1:00PM MST**

*Lock Farms* □ *Ace Herefords* □ *Ayrey Hereford Farms*

# Terms and Conditions

## Terms:

The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of dispute the auctioneer's decision will be final. Announcements from the auction block will take precedence over the printed matter in the catalogue. Current exchange rates will be announced sale day. All monies are in Canadian funds.

## Certificate of Registration:

Each animal will carry papers issued by the applicable breed association. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

## Health:

All animals in the sale have met all necessary health requirements.

## Guarantee:

Each animal becomes the purchaser's risk immediately after the animal is sold. All animals in this sale will be sold under the terms and guarantees set forth by the applicable breed association with regard to health, freedom from defects and from both reproductive and specific genetic unsoundness.

## Females:

Females must be taken home and paid for sale day.

## EPDs:

Accurate at time of printing.

## Liabilities:

All persons attend the sale at their own risk. The sellers, facility owner, auctioneer and sale manager assume no liability, legal or otherwise, for any accidents that occur.

## Delivery:

Every assistance will be given in getting your purchases home. **FREE DELIVERY.** Each animal becomes the risk of the purchaser as soon as sold. Bulls will be delivered as soon as possible after the sale.

## Internet, Phone, Wire, Mail Bids:

Real-time bidding with live audio and video will be available via the Internet for this sale. Buyers must create an account at least 2 days prior to the sale. Please visit [www.dlms.ca](http://www.dlms.ca) to get started.

Bidders unable to attend the sale may also phone, wire or mail their bids and instructions to the sale manager, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

## Insurance:

Agents will be in attendance to insure your purchases. Bulls returning to the consignor's farm must be insured.

## Errors:

All announcements at sales time, written or oral, supersede any written material in the catalogue.

**All Bulls will be semen tested. Free Delivery.**

lockfarms@xplornet.com

www.lockfarms.com

WOW 10 years, welcome once again to our annual hereford and Angus bull sale.

This year we have a very strong group of both polled and horned bulls for you to evaluate. This is the last crop of bulls from our popular Leverage 371E bull. He leaves dark, neat heifer bull options. Whether you need a heifer bull or a power bull this pen has what you are looking for.

When purchasing a bull from Lock Farms our goal is to have your cows covered. Make us your first call if a bull goes down. We will get a semen tested bull in your pasture as quick as possible. We offer free delivery of all bulls in a timely fashion post sale.

This year we have brought in Shane Castle (306) 741-7485 & Mark Forsyth (306) 784-7844 from Castlerock Marketing to help market all Lock Farms bulls and heifers, both Hereford and Angus. Please feel free to contact them about our sale offering.

We value our loyal customers and are thrilled to meet new ones and are honoured you trust us with your bull and heifer purchases.

The sale will be live on DLMS.

You can view sale videos of heifers and bulls at [www.lockfarms.com](http://www.lockfarms.com).

Reach out to us on facebook at [lockfarmsltd](https://www.facebook.com/lockfarmsltd) or [stan/susanlock](https://www.facebook.com/stanlock).

Pen tours are always welcome, give us a call anytime.

## Polled/Horned Inheritance

Unfortunately, one of the biggest misunderstandings regarding the proper fit for Hereford bulls is horned/poll inheritance. When understood, it can provide more flexibility to use horned or heterozygous polled bulls on many commercial cows than might be expected-if avoiding horns is the intention. For this example, heterozygous polled cows might be a set of F1 black baldy females out of Angus and Horned Hereford. Consider homozygous polled cows as a set of long time straightbred Angus.

### USING A HORNED BULL

Mated to horned cows:

100% of calves are horned

Mated to heterozygous polled cows:

50% of calves are horned and 50% of calves are polled

Mated to homozygous polled cows:

100% of calves are polled

### USING A HETEROZYGOUS POLLED BULL

(50% horned, 50% polled)

Mated to horned cows:

50% of calves are horned, 50% of calves are polled

Mated to heterozygous polled cows:

25% of calves are horned and 75% of calves are polled

Mated to homozygous polled cows:

100% of calves are polled

### USING A HOMOZYGOUS POLLED BULL

(100% polled)

Mated to horned cows:

100% of calves are polled

Mated to heterozygous polled cows:

100% of calves are polled

Mated to homozygous polled cows:

100% of calves are polled

Credit: Lance Leachman

*Ace Herefords*

Welcome to the 2022 sale! Since last year we have added a new member to the family. We welcomed our son Benny in August.

We culled our bulls harder than we ever have only to bring you the best! They were weaned on October 15, 2020 and fed greenfeed and brown oats throughout the winter, then were grassed from June 10, 2021 until October 26, 2021, and since then have been back on greenfeed and brown oats. They are tie broke and were clipped prior to pictures. This year, for the first time, we are offering Angus bulls as well.

We have videoed the bulls, so if you would like to look at them move, please contact me for a video link. It will also be posted on my Ace Herefords Facebook page and our website at aceherefords.ca.

Bull & heifer sale videos are available for viewing on ayreherefords.com.

*\*Also offering 50 purebred horned Hereford heifers!\**

With the lack of moisture of this year, it has definitely tested us all and required us to make changes and decisions that we hoped to never make! We always appreciate you standing behind us and believing in our program. We continue to strive at bringing you the best genetics to better the breed and believe in each of our sale animals. We stand behind them 100% so we hope that gives you a sense of comfort when purchasing. Calves are weaned without any creep feed & yearlings have been pastured on grass through the summer. Our cattle have not been pushed because we believe that in order to sustain longevity, they need to have a steady rate of growth & not be pushed. Our cattle perform well under natural conditions and therefore will smoothly transition to their new environment after they are sold. This past year was a real testament to how our cattle thrive in any condition and we were happy to hear back from customers that they did. Note that we listed the actual weaning and yearling weights this year. We believe that these weights are a more accurate representation than an adjusted weight that also factors the cows age into the equation. Weaning weights were taken November 18, 2020 and yearling weights were taken April 6, 2021.

Please join us for our corral tour weekend January 8 & 9, 2022. Pending weather and safety precautions.

lockfarmsangus@gmail.com

Welcome to the 10th annual Premier Hereford and Angus Bull Sale from us here at Lock Farms. This year we have an exciting group of Angus bulls to select from. Whether you need a heifer bull or a power bull the three different sire groups on offer has it all.

Our last calf crop of our very popular Intuition bull we purchased from Minburn Angus has left a lasting impression in our herd with many exceptional daughters. We have three sons from Sting; a bull from Merit Cattle company that we use via AI. Sting was used to add that muscle and hip width that we are trying hard to maintain in our herd. This will be the first calf crop off our new herd bull Climate Change. Climate Change is a bull that we found a while touring the yards at the Denver Stock Show from Bush Angus from Britton South Dakota. His dam could very well be the best angus cow we have seen. The addition of Climate Change to our herd is exciting with how the heifers and young bulls are growing. If you're looking to boost the material part of your herd with some replacement female, look for his son's sale day.

When it comes to purchasing a Lock Farms bulls, we want to make sure your cows are covered. If a bull goes down prior to or mid breeding season, make us your first call. We can work with you to get another semen tested bull to your yard to cover the cows.

Like last year we have brought Shane Castle and Mark Forsyth with Castlerock Marketing in to help assist with any questions about our bulls. Feel free to reach out to either Shane or Mark about any of the Hereford or Angus bulls we have on offer here at Lock Farms.

We deliver the bulls free of charge, and will do our best to get them to their new homes as soon as possible. Videos of sale bulls are available at [www.lockfarms.com](http://www.lockfarms.com).

Be sure to stop in for a tour of the bull pen and dams of the bulls prior to sale day! Coffee is always on!

Moderate framed heavy muscled bull out of a tank of a cow. 316H dam is one of the cows that turns heads when you see her. deep set cow with that extra rib and width to burn. 316H is going to sire a very strong set of females being backed by one of favorite cows on the farm. On his sires side, Climate Change's dam is easily one of the best angus cows we have ever seen and is one of the major reasons we purchased him, to bolster up the maternal power in our own herd.

Moderate framed smooth made bull with excellent feet on him. If you looking to add that length to your cows this is the guy for you. Out of a beautiful uddered cow that had plenty of width, look for this guy if you're looking to bring the size of your cows down.

A long smooth made bull that can get out and walk. This is a bull that would work great in a large pasture. His dam was 12 years old and never broke down, a cornerstone cow that never missed in those years. If you're looking for longevity in your cow herd 304H will sire daughters that will stick around and produce every year for you.
