Finest Female

PRODUCTION SALE

DLMS FARMGATE

NOVEMBER 20-21, 2022

7 AM OPEN | 7 PM CLOSE

Welcome

Greetings from all of us at Jaymarandy Livestock, we would like to welcome you to our first online female sale. The offering is our Finest, not our largest, definitely our finest. When we decided to host our own online event it was our way of streamlining our sales position in the industry.

In the previous 3 years we have been participating in several different live and online events throughout Canada and the United States. Although we truly appreciate the opportunity to work with a diverse and knowledgeable group of stockmen and women, and management groups we felt with our growing family and farm that going it alone and from home is our best course charted. When discussing the best name for the sale with Ben Wright, he felt the best name for it would be Jaymarandy Livestock's Finest Female Production Sale. In our effort to fully commit to the Finest Female aspect, we are offering exactly that.

We have gone through our females and selected the top of each division. This offering will only include our Black Angus cattle as the Simmental are a new endeavour and require some time to develop. Our top yearling females in the Senior and Intermediate divisions and the heifer calves from our Senior and Junior female divisions are available. This includes daughters of our top production and top donor cows, and embryos from those same great donors. We are also offering you our greatest female ever produced in the 40 years I have been involved in purebred cattle production.

Thank you for your time in looking through the catalogue, we hope you will find the cattle useful in their design and also unique in pedigree.

The boys are growing and always keep us on our toes. Owen and Finnley are both in school which comes with so many new discoveries. Owen likes playing with transformers, yet finds his true element when he is puzzling or doing math. Finn is the dare devil that has already figured out how to climb the hallway walls and loves to be outside helping dad. Corban hasn't change all that much, still love pestering his brothers at every available moment and spends every minute he can holding dad's hand and tripping over cow turds in the pens or fields. This fall we welcomed a beautiful and healthy baby girl, Isla Mary Rose, and we are so blessed to be able to say that her brothers are absolutely in love with her, for now.

We hope that this finds you all feeling well with your crop in the bin, bales hauled, silage piled and enjoying an incredible high in the feeder calf market. It is a special fall with such strength in the commercial industry.

Please join us at the farm to view the females and their mothers at any time prior to the sale. If you cannot make it to the farm, please log onto farmgate timed auctions at DLMS or feel free to call and visit about the offering with Mark.

Again, the offering is small, however, what we lose in size we certainly make up for in quality. Our Finest!

All the best,

MARK, ELISABETH, OWEN, FINNLEY, CORBAN AND ISLA ANGUS

From the desk **ATT BAR C**

Modern day technology is so unique in terms of how the purebred livestock sector has generated and created events with smaller numbers on offer but with the finest of quality. The Jaymarandy crew have leaped out to offer nothing but the finest in this online auction. Mark Angus and family are talented cattle people that breed cattle with extreme phenotype and the kind every true cattle person enjoys. They have surrounded their growing cowherd around top donor cows that have enabled them to be at the forefront of the industry in some of the finest quality. The Lot 1 A and 1 B are very precious. This bred heifer to look at in the flesh puts it all together. Beausejour, Manitoba may not be on the normal path or direction of many purebred Angus outfits, but I encourage you to make any effort you can to witness the Jaymarandy product. Elite heifer calves in every division are available and as you can tell in the pictures all have that eye catching very soft and hairy look we all crave. Of course the donors featured also have some unique embryos on offer and also just look through the pedigrees of the cattle this family breeds and uses... you'll notice a lot of outcross potential to generate a solid up swing into your own program. As always if you have any questions or concerns or would like a T Bar C rep to represent you for any bidding process. Please don't hesitate to call or text.

LOT ONE A

Sire of Lot 1A

Dam of Lot 1A

It is with great pride that we offer this incredible female. The Georgina females are new to us but are amongst our best. I first noticed this cow family while helping Barry Young at Ag-Ex. Her Great Grand Dam was Reserve Champion female as a heifer calf, I asked him to price her and he said, "No, this one is not for sale". She went on to then win her class at Agribition. A couple years later I found her first daughter available for sale as a heifer calf. I clearly did not waiver in my desire to own her. Since then she has gone onto become an amazing production cow with all daughters, accept for one, being retained. One selling in the Rosebowl to Ben Dumontal of Sand Creek Angus. Georgina 103J is a forth generation 1st calf female. Which I feel is extremely important as it displays the immediate return to production of offspring or the return on investment that is available with this cow family. Her Dam is a female that will soon be entering our donor program based solely on her production. The best part is that she is such an incredible female to assess phenotypically. From a sire stand point, the now deceased, Severtson's G-Man 288E has come to produce some of our most valued females and some of our top selling commercial bulls. Unfortunately he is no longer available for natural service, fortunately we have a small owners use semen reserve on him. The only place that he is presently available is in service or in his Get, from us. Look for Georgina to provide years of solid production as her Dam and Grand Dam are also doing. Aside from her obvious phenotypical strength, she is very good in her hoof, is laying in the makings of an amazing udder and is extremely docile. She carries a unique service to our newest herd sire BCC Tahoe 24H, who is one of the few Tehema Tahoe sons available in Canada and the only one that is available to provide natural service. Georgina has a strong EPD profile which includes growth numbers in the top 4-10% of the breed with BW, CE, CEM EPDs in the top 15-35% with Carcass and Ribeye EPDs in the top 10-30%. Not only does she project for great things but she also has a WW index of 123 and YW ration of 113 for a life ration of 120 out of a first calf dam that was our #1 YW indexing female as an open female. Predictability in a donor quality female. **Natural service to BCC Tahoe 24H on April 1, 2022. Due January 8, 2023. Examine safe to date on June 14, 2022 Retaining rights for two successful flushes yielding 6 or better #1 embryos per flush, at sellers cost and buyers convenience.**

LOT ONE B

Sire of Lot 1B

Dam of Lot 1B

As previously seen by her maternal sister, Lot 1, this cow family is versatile and can do interesting things with any sire that they are mated too. Lot 1 is definitely the power female and Lot 1A is more moderate, cleaner made in her front end and has a more traditional Angus head. She has excellent neck extension, is up headed and remains that way on the move. Georgina 202K is manageable for juniors and was taken as a project heifer for Sophie to a recent Weaver Fitting Clinic with Kirk Stierwalt, where she went in green and behaved remarkably well. I personally see this heifer beginning to belly down more and more which will go well with her flare filled muscling and robust top and rib shape. Again, her Dam will be moving into a donor position in the coming years and her sire will be made fully available for public use in 2023. He is backed up by the productive and attractive Grace cows and seems to be the solution for flat made cattle and appears to be improving foot quality across the board.

LOT TWO A

Dam of Lot 2A

Full sister to Lot 2A

Maternal sister to Lot 2A

Something that we don't normally do is part with single owned daughters of Young Dale Grace 169B. Young Dale Grace 169B is one of the most consistent placing show females of recent history in Canada, always representing her division over a 3 year period and doing so with 2 different calves at foot. She has gone onto produce over \$200,000 in offspring and embryo sales. This female is one of my favourite Copenhagen Smile daughters and has a full sibling in production which makes her available. Grace 120J starts at the ground with a steep and symmetrical hoof design, is broad based, moves easily and is full of rib shape and muscle. In combination with these traits, we love her tidy front end and traditional Angus skull. If you follow our program you will know why we chose to return females such as this into our program. We have 3 sisters in production with Jaymarandy Grace 640D also serving as a donor. Her dam is in shared ownership with C Bar L Cattle Company of Kansas and Beaman X6 Ranch of Colorado and in full time embryo production at Trans Ova Colorado. Her sire is Copenhagen Smile 6003D who is sire by one of the greatest female producers in Angus history and his Dam is highly sired after Donor in the Canadian Donors program. She carries the service to the exciting Severtson's G-Man 288E. **AI bred to Severtson's G-Man 288E on April 10, 2022. Due on January 17, 2023.**

EP	CE	BW	WW	YW	MILK
	6.0	1.1	51	93	23

LOT TWO B

This is as high level of a mating as can be found anywhere on the planet. SAV Renovation has proven himself to be an elite female maker and the sire of sires. Brooking Angus Ranch has set a new level of production with this incredible bull with high selling bulls into elite programs. Not only topping the Brooking sales, Renovation sons averaged \$25,000 plus USD at Schaff's Angus Valley, again going into elite programs and AI studs. His dam is as ideal as an Angus cow can be made and his sire is notorious for female production. Young Dale Grace 169B has now moved onto Colorado for Beaman X6, C Bar L and Jaymarandy leaving a limited number of embryos in Canada. Her production is undeniably upper class with her daughters in top end production. She passes along her high maternal traits religiously and stamps the phenotype. **USA, EU, and AUS Qualified. Stored at Bow Valley Genetics.**

LOT TWO C

Another high end mating with a Montana Ranch purchase from the 2022 Brooking Angus Bull Sale. Again, the Renovation 6822 sons have received great praise and purchase by top end Purebred programs. Revival 0074 is one of the top without doubt. He possesses herd bull phenotype an elite pedigree and a strong EPD profile. This combination is capable of driving home the elite end maternal and has the makings to be competitive in the show ring.

USA Qualified only. Stored at Transova Colorado.

11.0	0.1	50	87	27

LOT THREE A

Maternal Sister to Lot 3A

Sire of Lot 3A

As individuals these 2 females of the Grace family are different in their overall make up. That said they are both equally important to our program and do carry several very important qualities that are of paramount importance to us - both are really well made at the ground, both have large center mass, both have very strong and predictable dams. Although they are both from different branches of the Grace cow family, they are both from the Young Dale Grace 107W family.

Although expensive, we chose to utilize the Basin Payweight 1682 semen on the Grace cow family and bred 3 maternal sisters to the bull in hopes of hitting the female jackpot on them. We caught all three and hit the female jackpot on this female without doubt, with 2 3/4 sib bulls for the 2023 bull sale. Grace 201K is long made, balanced in her presentation, symmetrical and steep in foot quality and is backed by the extremely consistent Grace cow family. Her dam has been a very consistent producer that has put sale bulls into top quality commercial programs like Sliworsky Ranch and Swynar Farms. She also has knack for raising elite phenotype in females that find favour in purebred programs. A maternal sister to Grace 201K is the highest selling female in Keystone Classic Sale history at \$27,500 for 3/4 interest and her dam has a lifetime production of \$50,500 over 5 calves. We endeavour to put our best stock into the industry and this one, this one is definitely one of our best.

Retaining the right to flush the selected female for a minimum of 6 #1 embryos. Always at buyers convenience and our cost.

LOT THREE A AND THREE B SELL ON CHOICE

JAYMARANDY *Grace* 208K

 E A ROSE 918 YOUNG DALE GRACE 169B

CE	BW	WW	YW	MILK
2.5	2.2	61	101	22

Her Dam, Jaymarandy Grace 640D is one of our most consistent producers of stock that find favour in Purebred programs. She has been a solid producer of embryos and she can raise big stud bulls on her own. I see Grace 208K as a carbon copy of her dam. She is moderate in stature, packed full of muscle and carries it in a broad bodied, broad based, big bellied, big ribbed manner. 208K is one of those females that when it rains, her top holds water. That is an indicator of the availability a tremendous amount of high valued meat cuts. Can you imagine the herd bull possibilities that can extend from this female? The subsequent feeder cattle available to your customers? I think about it often. She will be a bull maker just like her dam. She is well made at the ground with a deep heel and symmetrical toe design. She also has as traditional a skull as there can be in the breed. Our Grace females crossed so well with the EA Rose family, with a Grace x Firebrand selling in the Rose Bowl for \$10,500 to Lyseng Land and Cattle and Ty Kueber and a Grace x Firebrand bred selling to Rocky Top Cattle Co for \$9250 in the Keystone Classic. Her Grand Dam is none other than Young Dale Grace 169B and combined with the EA Rose female the possibilities are enumerable. This excellent cow prospect has male flush mates working at Wagonhammer Ranch in Nebraska, Pine Ridge Stock Farms of Manitoba and here in Lights and Sirens 911G, with a female flush mate at Willow Rock Farms of Beausejour. Her maternal brother will be exhibited in Regina at CWA and in Denver at the National Western Stock Show and she has another flush mate slated for our bull sale in 2023. There are few that produce with the consistency of this family.

LOT THREE B

Dam of Lot 3B - Donor at Jaymarandy Livestock

Flush Brother - Lights and Sirens, Sire at Jaymarandy

Maternal Brother - The Lion, Junior Herdsire

Flushmate - True North, sire at Pine Ridge Farms, MB

Flushmate - Treasury, sire at Wagonhammer Ranch, NE

Granddam - Donor for Beaman X6 Ranch, C Bar L Cattle Co., and Jaymarandy Livestock

LOT FOUR

Dam of Lot 4

Socialite 8146F - Grandam

We clearly made the decision to hold nothing back in our first female sale. The Socialites are a brand new family to us and this young female is the kind that we need to be moving back into the program. That said, her Dam is our show 2 year old female this year and will be a future donor for us, no doubt. Her dam is made so complete and well balance, has a perfect udder despite having cut a teat this summer, has plenty of heal and a symmetrical closed toe. She is perfect at the ground and so is Socialite 204K, maybe even more steep in angle. Impressive on the profile with a long hip to pin set and a wide pin placement provides extra space to laying all the muscle she is carrying. Another Lights and Sirens daughter with flawless Angus skull. I had hoped to get her and her mother to a few more fall shows, however, the farm does not farm itself. I believe this Socialite will be highly productive and have the same perfect udder as her mother and paternal grand dam. Buy with confidence in the productivity available in this female.

LOT FIVE

Dam of Lot 5

Maternal Brother - Natural Renegade, sire for Jaymarandy and Shewe Farms

Maternal Brother - Fort Gary Horse, sire for Sliworsky Ranch

Another new to us cow family that has risen to the top. Her young dam has mothered 2 natural bulls that are working at Sliworsky Ranch and a son that will see use here in the future, owned and shared with Schewe Farms. This young heifer comes in a bit more green given her March birthdate and the fact that we do not creep feed females. Yet, she is full of muscle, length and potential. The Erica 8080F cow was gem of a find in a sale in Oklahoma with her origin from the great Marshall and Fenner program in Missouri. Expect this female to milk really well with solid udder quality for both sides of her pedigree. Another well rounded female balanced in phenotype with an EPD profile that checks the boxes for calving ease, performs, maternal and carcass.

JAYMARANDY *Hazel* 223K

Sire of Lot 6

LOT SIX

The Hazel cow family is not especially large in Canada and here either. We sourced Hazel 223K's Grand dam from the Legendary Van Dyke Program from Montana and what a find she was. The fact that we are selling this one is a testament to us selling our finest. She is our only Tahoe calf on the farm this year and her highly productive dam is the only other remaining daughter. Hazel 223K has the makings of a top production cow, with length, body and ideal skeletal composition. Her dam has as near perfect udder as can be made and already has a son working at Sliworsky Ranch and another at Rawluk Farms, both elite commercial programs. This heifer has a fabulous disposition and will be an excellent program builder for any junior. The bonus is she comes with a strong EPD profile with elite tabulations in calving ease, performance, milk and carcass traits. She is a very well rounded individual.

	5.5	1.5	50	87	25

Sire of Embryos

LOT SEVEN

We had initially intended to add Tilda 733E as a feature lot selling her outright. Unfortunately, she injured her udder at weaning time and we can't guarantee that she will come out of it completely. As such she is off the availability list. As we always like to include some different pedigrees and opportunities we will offer another 3 of her conventional embryos by the Champion of Champions Conely South Point. Champion Bull at Canadian Western Agribition and the National Western Stock Show, back to back. Accomplishing the victory at one of those events is incredible, winning your breed at both of them back to back as a yearling bull is a lifetime achievement. Crossed with Tilda 733E, who possesses elite phenotype and produces that in every single calf, the possibilities are very very exciting. In the words of Barry Young, there is no such thing as a bad Tilda.

Canadian Qualified only. Stored on farm.

6.0	0.3	59	96	26

From an early age Lights and Sirens exhibited above average musculature and character. He has continued to raise interest from purebred and commercial breeders alike. Many have designated him "a real bull". He is not smoke and mirrors, he is as honest as they can be made. 911G has a very admirable EPD profile which is definitely maternally made. Not only this, his dam and grand dam are top donor cows with his paternal grand dam working at a donor at ZWT Ranch in Tennessee. He has the greatest influence in this years sale. He is proving to transmit excellent foot quality, calving ease and docility with added muscle shape into every single calf he sires.

After his purchase from the Legendary Midland bull test from the good folks at Barragree Cattle Company he needed to be put into quarantine prior to being tested to come North. By the time we received him into Canada there was extremely limited cows to breed. This year he has service over 50% of the cows and we look forward to a larger crop of calves. Not only elite in his EPD profile, elite in foot quality and phenotype.

LEONARD ANGUS

Memorial Award

As many of you know, my father loved to see youth participate in the livestock industry and it filled his heart to see his grandson, Angus, and granddaughter, Jules, participate in it. My father worked tirelessly in order to make agriculture available to his children, grand children and any family member that displayed interest. We began this, with my mother Ruth, in an effort to see his name continue on in effort to make agriculture available to youth. Our way to provide opportunity for kids to grow. What do we do? We offer Junior cattle person's that support our program the opportunity to learn from the best. Kirk Stiewalt is exactly that, one of the best. Matter a fact he was just voted the greatest cattle fitter of all time by Show Time Magazine. And, for any Junior that supports us in 2022/23 the opportunity to receive the same is available for you in the closest clinic available to you. Please send us the location and date and we will cover your fees to enter. In 2020 we awarded this to Brock Sigurdson of Big Sig Cattle Company. With circumstances as they were for 2 years, unable to make the clinics happen, we differed until 2022. During this time we met an amazing family from Northern Ontario that have become great friends and fortunately for us, their daughter Sophie Koshel, has joined us in a mentor program. As such Sophie has received the award for 2022. Both of these individuals participated in the Weaver Show Products and Kirk Steirwalt Clinic in Lundar Manitoba in September. Congratulations to you both! We appreciate you both and look forward to following you progress in the future.

TERMS AND

Conditions

TERMS:

The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. Announcements from the auction block will take precedence over the printed matter in the catalogue. Current exchange rates will be announced sale day. All monies are in Canadian funds.

CERTIFICATE OF REGISTRATION:

Each animal will carry papers issued by the Canadian Angus Association. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

PEDIGREE ESTIMATES:

Pedigree Estimates (PE) are created on the projected mating of the animal's sire and dam based on averages of the two, creating estimated values that do not hold the same accuracy of actual EPDs issued from the association and should be used as such.

HEALTH:

All animals in the sale have met all necessary health requirements.

GUARANTEE:

Each animal becomes the purchaser's risk immediately after the animal is sold. All animals in this sale will be sold under the terms and guarantees set forth by the Canadian Angus Association with regard to health, freedom from defects and from both reproductive and specific genetic unsoundness.

PREGNANCY INFORMATION:

All serviceable age females have been pregnancy examined by an accredited veterinarian, giving an estimated length of gestation. This estimated gestation period shall be used only as a guideline to calving and is not a guarantee of actual service.

EXPORT:

Purchases going to the United States will be delivered at cost.

LIABILITIES:

All persons attend the sale at their own risk. The seller, facility owner and sale manager assume no liability legal or otherwise, for any accidents that occur. It is understood that T Bar C Cattle Co. (2013) Ltd. is acting only as a medium between buyer and seller and is not responsible for any failure on the part of either party to live up to his obligations. Neither does T Bar C Cattle Co. (2013) Ltd. assume any financial obligations to collect or enforce collection of any monies between parties and any legal action that may in exceptional cases be taken must be between the buyer and the seller. T Bar C Cattle Co. (2013) Ltd. assumes no responsibility for any credit extended by the seller to the buyer. The buyer must look to the seller for fulfillment of all guarantees and representations made hereunder.

DELIVERY:

Assistance will be given in getting your purchases home. Each animal becomes the risk of the purchaser as soon as sold.

PHONE, MAIL, WIRE BIDS:

Bidders unable to attend the sale may phone, wire or mail their bids and instructions to the sale manager, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

INSURANCE:

We strongly recommend that insurance is purchased for full value.

ERRORS:

All announcements at sale time, written or oral, supercede any written material in the catalogue.
