Welcome from POPLAR MEADOWS Angus

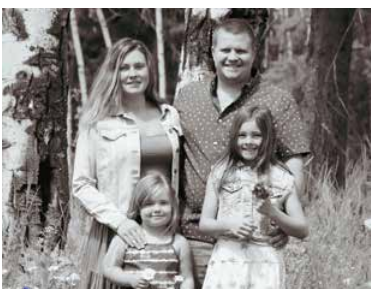

Welcome to our Herd Reduction Sale.

We are very proud of the cows we have on offer. We have always put our commercial rancher first and developed a very maternal cow herd. I never put a straw of semen in hoping for a bull calf. Our cows are not pampered pets and they are built to work in the real world. I'm sure after looking through this offering you will know what my vision of an Angus cow is. We have pictured every cow and I'm confident when you see the videos they will look like the pictures.

We are not getting out of cows but every B cow and younger is offered including all the bred heifers and the top cut of heifer calves. There are many cows that could easily go to the donor pen and gorgeous young females with unlimited earning potential. We have culled out the bottom 15% earlier this fall and I've tried to be as honest as I could on the cows in my footnotes.

There will be lot of tears seeing them go, but am confident they will work well, and I look forward to following their success.

We are to a point in our lives where we are questioning how you bring the joy and enthusiasm back into our lives! We have many irons in the fire and the time has come to slow down and start enjoying life. This winter watching Alaina and the girls play with calves and enjoy the cows was

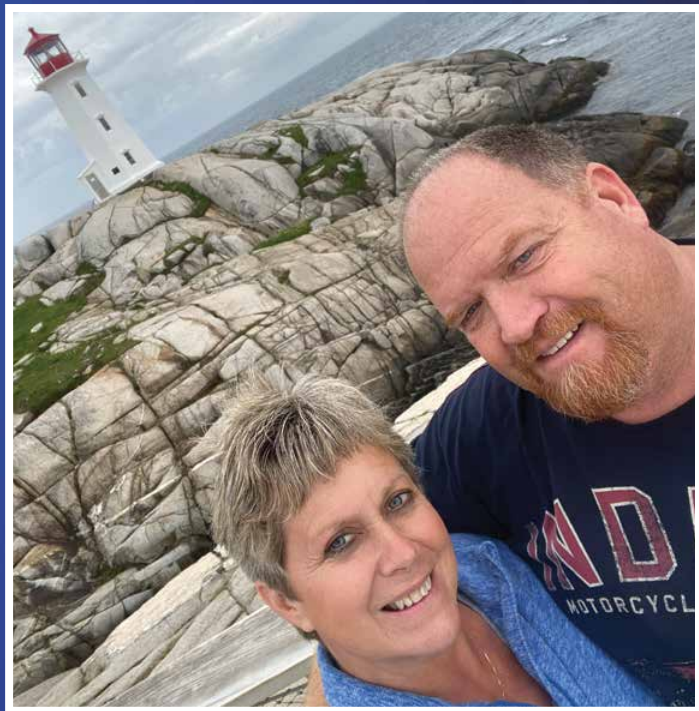

a huge realization of how I never take that time as there is always another job that's more important. My parents Frank and Dianne Strimbald started Poplar Meadows in 1965 and I thought I'd keep the name as I was only going to have 3-5 cows. Well those 3-5 cows became 400 rather quickly. I'm sure we can love 75-100 cows, have time to enjoy our family, time to travel and perhaps a new adventure. This been a job to get this sale organized and have we would like to thank all the people who have stepped up to give us a hand. In particular Nate Marin, Jordie Buba, Maddison Sibbald, Robyn Burt and my family.

The sales crew is top notch, and they have all been through the cows this fall and have notes and grading on them all. Please contact them with confidence or me anytime.

I need to thank Monty, Taylor, Alaina and my girls for all they do to enable me to live out my dream of building this amazing cow herd. Their unselfish love for me is beyond measure and is truly appreciated.

Tanya Belsham

Welcome from

BOHRSON MARKETING Services

November 2nd, 2022 will certainly be a day that goes down in Angus book history as Tanya & Monty Belsham and family open up their operation for the "Herd Reduction Sale"

This sale is certainly not "farewell" or "good-bye" but rather one that shows as much future and opportunity to you, fellow Angus enthusiasts, as any sale that's been presented in quite some time. The decision to lighten the work load on the ranch surely comes as your benefit and we know Tanya is very excited to see where these cows end up and how well they can influence their new owners programs.

Tanya's labour of love that started as "just a dozen or so cows" after they rebooted the Poplar Meadows herd name from her parents, it has truly flourished into one of the most elite cow herds in North America. Within minutes of analyzing the depth of quality in this offering, it's evident to see why the PM prefix has had the success and global recognition it has. Tanya has always had a firm belief in the strength of a cow herd and when you see the "cookie cutter" type she has bred into her cattle, you will come to appreciate how she has never gave up on the fundamentals of the Angus cow. The PM silhouette is consistently soft made, easy doing, with a strong emphasis on foot and udder quality and the ability to adapt to any environment they are placed in. The extremely impressive cow families represented across breeding aged females 8 years old and younger, and select open heifers on offer is truly commendable. The Poplar Meadows program is based around these fault free, no nonsense family trees and the opportunity to come in and purchase many females closely related is very exciting. The services alone to the bred cattle on offer is sure to make a quick ROI as Monty & Tanya are constantly on the hunt for the next great AI sire or walking herd bull. They have spared no time or

expense when it comes to getting out and touring herds across North America to find the next piece to fit their puzzle.

We could go on about the quality of livestock that will be up for live auction in this memorable event but would be remiss if we didn't touch on the great folks that back this program. When you do business with the Belsham's you are truly dealing with salt of the earth people. Tanya, Monty and family are extremely humble and hard working and they put their heart and souls into everything they step out to accomplish. The sheer quality and quantity of this cowherd is a true example of this family's dedication to everything they do and we believe this is one of the greatest opportunities to present itself.

The Poplar Meadows hospitality is extremely inviting and entertaining and we encourage you to take the trip to their Houston, BC location for this sale. Their beautiful sale facility is unforgettable and one you have to see to fully appreciate. We can promise you that the cattle, the people and the surrounding will be something you will never forget.

We truly hope you can join us in beautiful Houston, British Columbia for this big time sale offering, unmatched hospitality and gorgeous scenery on November 2nd, 2022. If for some reason your busy schedule doesn't allow you to be with us, please feel free to reach out to Tanya or any of us at Bohrson Marketing Services as we would be very pleased to visit about this stout set of females and represent your bidding and buying needs sale day with our free, confidential order buying service.

Taylor Richards

Bohrson Marketing Services

Welcome from

OBI LIVESTOCK Ltd.

Welcome to the Poplar Meadows Angus Reduction Sale. This is an event you will sure take a serious look at this fall. The quality of the Poplar Meadows cow herd is sure to please your eyes and mind. You have the opportunity to obtain the genetics that put this operation as one of the leading Angus seedstock suppliers across Canada.

Last year we all were so excited when the Bred Heifer was announced and when the sale finished the success story was had. So many top end bred heifers were wanted by many astute cattlemen and the event exceeded all expectations. Now this year the bred heifers are all back with the same quality. Now we all get to access the brood matrons as well, what an opportunity. The uniform set of females at Poplar Meadows was built with Tanya's ideal cow mindset and sticking to the program. The development of the cow herd has taken years and years to accomplish this feat. Always using top AI and walking bulls to continue the evolvement of their herd. The product you will see in this catalog is all the hard work done by the family, a testament to the vision that was seen.

The ET program has been a very successful one for Poplar Meadows with having many full sisters in the herd. When the right mating was found, Tanya stuck to these matings producing such a uniform set of brood matrons. This is a chance for you to obtain cow families or paternal sisters and create your own foundation females at your place.

I will be at the sale facility 3 days before the event. I am very familiar with the Poplar Meadows program and if I can assist you in any way in your selections, please do not hesitate to call me or any of the OBI Livestock Ltd. staff.

Welcome from

T BAR C CATTLE CO. Ltd.

From the desk at T Bar...

Welcome to Poplar Meadows Angus and their "Major Herd Reduction Sale" on November 2, 2022, at the ranch, Houston, British Columbia. Located in the beautiful Bulkley Valley, the herd was founded by Frank and Dianne Strimbold in 1965 and over the decades has been and continues to be a leader not only in the Angus breed but British Columbia agriculture in all phases. After Tanya and Monty assumed the program, they built Poplar Meadows into one of the most powerful cow herds in the Angus breed. High quality cattle... strong dedicated people... it is often said "the cattle are only as good as the people who produce them" ... well, Poplar Meadows is one of the best!

In the last decade, Poplar Meadows have garnered more Supreme Champions than any other operation in the seedstock industry. It is that competitive nature which makes the Poplar Meadows program so prolific and predictable. Marketing nearly 100 bulls each spring to purebred breeders and commercial cowboys, their large cow herd gives them the luxury of suppling sires to many repeat customers.

Tanya is very proud of their herd bull battery... and rightfully so. Competitive in youth, these champion bulls walked the pastures producing predictable results... now you can take advantage of years

of building and striving to improve their program and that of their customers. The females selling on November 2nd are foundation material... ranch raised, broody, have exceptional performance and high maternal values. The select group of current year heifer calves are of a competitive nature, the mature cows are the foundation builders... and the bred yearling heifers... wow!

This "Major Herd Reduction" offers the livestock industry, windows of opportunity, offering quality and depth in all sectors and classes. You can select from the top of the herd comfortably knowing that there will be a high return on your investment. Stop by the ranch for a preview of the program prior the sale and do not hesitate to give Tanya or Monty a call.

This is your invitation to be with us at "Poplar Meadows Angus Opportunity Day!". Feel free to give any of the T Bar Team a call and we will assist you with your purchases in a professional and confidential manner.

BRIAN GOOD MEMORIAL

The Dash

By Linda Ellis

I read of a man who stood to speak
At the funeral of a friend
He referred to the dates on the tombstone
From the beginning...to the end

He noted that first came the date of birth
And spoke the following date with tears,
But he said what mattered most of all
Was the dash between those years

For that dash represents all the time
That they spent alive on earth.
And now only those who loved them
Know what that little line is worth

For it matters not, how much we own,
The cars...the house...the cash.
What matters is how we live and love
And how we spend our dash.

So, think about this long and hard.
Are there things you'd like to change?
For you never know how much time is left
That can still be rearranged.
If we could just slow down enough
To consider what's true and real
And always try to understand
The way other people feel.

And be less quick to anger
And show appreciation more
And love the people in our lives
Like we've never loved before.

If we treat each other with respect
And more often wear a smile,
Remembering this special dash
Might only last a little while

So, when your eulogy is being read
With your life's actions to rehash...
Would you be proud of the things they say
About how you spent YOUR dash?

A DASH WELL LIVED

**YOU WERE A GREAT
FRIEND AND WE MISS YOU
DEARLY**

 Cow Families

Feature

Beautiful cow that I always threatened to take to the shows. Her dam is still in our herd and never disappoints. 158B has a very nice daughter in sale as well as one at Dragon View and Nicole Groot's as well. She had twins this year and raised them both. The Thor cows I always protect on scrotal when I breed them. Sire Verified.

FIRE 189H, DAUGHTER

Recognized as an Elite Dam by the CAA. Her sire produced exceptional foot quality and moderate tanky cows. Will be interesting to see how many Blossom cows I actually have. I guess by the time I get finished this fun exercise of writing footnotes I'll find out. A daughter sold last fall to Leeuwenburgh Angus and another one in sale. Sire Verified.

FIRE 76J, SON

Exposed from April 30 to June 3 to Blast Encore 4H. Observed bred May 11

Big volumed Aviator daughter. Her first daughter was a Bismarck who was awarded reserve division at Agribition and was our high selling calf in the Shades of Autumn Sale to Dragon View Angus. Bull calves have sold to Turner Ranch and Fennel Ranch. A yearling heifer sells in sale and her Bismarck bull calf will definitely be sought after this coming spring. I used sexed Bismarck and still got a bull!! Sire Verified.

AI bred April 28 to PM Executive Decision 149'20
Vet called 4.5 months Sept 7
Exposed May 18 to August 12 to PM Denver 295'19

FIRE 256J, SON

Another Aviator daughter out of a Predominant cow. Long bodied, sound and lots of life left in her. Aviator daughters are very maternal and won't lose their calf on pasture. They aren't mean but can be a little over the top when calving. Our commercial guys love the Aviators as the calve and get them up and going.

Exposed from May 18 to June 4 to PM Denver 295'19

I think I called about ¾ of the cows one of my favourites when we pictured. But this truly is one of my favourites. I sold a very good Natural heifer out of her to Wildina Farms. A daughter also sells that I think is pretty special. Her Natural Law bull calf from this year has been a head turner all summer. So we preg checked close to 400 cows and 64C managed to hangout in the bush and not come home for a few days so we will do her at a later date.

AI bred on May 10 to Schiefelbein Gable

Exposed from June 3 to August 12 PM Denver 295'19

Missed being preg checked was in bush.

Fancy fronted Bravo heifer out of a Thunderbird cow who's grandma is an OCC legacy. She is just started on feed. I think she will show as well.

Herd **HEALTH**

POPLAR MEADOWS ANGUS

All our calves are vaccinated in the spring (April-May) with Ultrabac 7 Somubac and Pyramid FP5 + Presponse and a second vaccination in the fall prior to weaning (Sept or Oct). Live virus vaccine.

Our entire cowherd receives prebreeding vaccination of Express FP 5 yearly and every 2 years Ultrabac 7 Somubac. Entire herd is treated with Ivomec yearly, usually bulls will be done twice a year.

We are proud to belong and follow the VBP+ program.
We feel strong about maintaining herd health for our protection and yours.

FIRE 99J, SON

Long bodied, deep sided Aviator daughter out of one of Dad's favourite old cows. The dam was recognized elite and raised 13 calves. Sons have sold to Wineglass Ranch, 57 Holdings and Clemitson Family. She has a fancy heifer calf that sells with her. This cow needs to be left alone for a few days after calving or just leave her outside as she doesn't want to be a barn cow.

FULL SIB

Here we have a full sister to the Soo Line Locomotive bull that has done so well for Blairs Ag. He bull calf last year had a 205 day weight of over 800 lbs. Very attractive female that has a story behind her to assist her marketing offspring. She didn't calve as a 2 year because of a bull we had with our heifers that either didn't breed a pile of them or they were late. A lesson to have more than 1 bull in every pasture. The price of DNA testing is much cheaper than open or late cows.

DNA PENDING

The
JUANADA
 Cow Family

Feature

Well I dug out the Strawberry Haagen-Daz to try sooth the pain of writing this footnote. This beautiful young cow has produced the two offspring you see displayed with her here. All 3 appear to be cut from the same mold. If I was keeping her, she would be going straight to the embryo transplamt center. Her first bull calf was purchased by the Fitchett Family and is still breeding cows. If you decide to flush to Natural Law I'd be happy to supply the semen in Canada or the US. This is a rare opportunity to buy a cow of this quality.

Aviator daughter who has worked hard on her Executive Decision heifer calf. Her calf was a favourite by many this summer. Her Bravo bull calf last year was one of top in pen and then he hurt a foot in early March. I kept him and think he is finally sound. She's not the prettiest and not the easiest to get in off pasture but she's worth it.

Exposed May 18 to August 12 to PM Blue Chip 93'18

Exposed June 3 to August 12 to PM Bravo 171'21

Vet called 3 months on Sept 7

Feature

This young cow could possibly be the best cow I've produced thus far. She was middle of the pack as a calf and bred and started to bloom last summer and then WOW this year. A unique pedigree on the cow side and the great Natural Law female maker on the top. This is the type I'd like an entire herd of. When you look at her mother and maternal sister its obvious this was not a fluke. This is an opportunity you don't want to let slip by. The Eureka bull offers a cool twist on pedigree and you will love him.

FIRE 321H, DAUGHTER

This cow is just starting her own march to stardom. She is recognized as an Elite dam on her first 4 calves. A heifer sold last year to Jaycee Dutchik. This cow has perhaps the best bull in the pen this year. I spent lots of time wondering this spring if I should try halter break her and show them as a pair. I did come to my senses and realize that was a crazy idea. I think the baby she is packing could be outstanding. I AI bred only my very favourite cows to Schiefelbein Gable. Semen traded from \$500 to \$1000 this past spring. She has great potential to become a Donor cow. I think you will be impressed with the Lady cow family as they have a look and produce. Parent Verified

Full sister in blood to the 27D cow. These Pioneer daughters are outstanding, and I think if you could gather up a few of them you would be extremely happy. This girl caused the most grief picturing as she flat out refused to stop properly. If anyone has spend time in a picture pen know how frustrating it is when they stop and then slowing move foot forward. But no curse words were said. (out loud anyways)

Another favourite and from the Lady cow family. This young cow has a gorgeous udder and perfect phenotype. Only think she lacks is the tips of her ears. She had twin bull calves on her this summer. I think this young cow moved up in the calving cycle would make a world of difference. She is very much the vision of the type I set out to breed.

This is without a doubt my favourite E cow. We showed her as a May 2 year old and a great big Sky High bull calf at side. That calf sold to Jarin Carter. A very good Tribute heifer sold to John and Tammy Dolliver last year. She calved 2 weeks premature, and we lost her Rainfall bull calf. Her Bravo yearling heifer is near the top of the pen as well. This is a young cow who should be a donor cow. She is beautiful in her make up with a gorgeous front, bone, rib shape, thickness and a proud carriage. She ticks most of not all of the boxes.

The
LASS & LASS TRADER
Cow Families

Feature

DAM OF FIRE 97E & 84G

This is a tough to write footnotes on cows you really don't want to sell. This Bank Note daughter is out of my favorite Crowfoot cow. She is exceptional well made and the type I strive to produce. She has a very good Growth Fund bull this year. A son sold to Cody Herr and a South Point bred heifer sells in sale. Checkout her service sire.

AI bred May 7 to Bar-E-L Natural Law 52Y

FIRE 185H, DAUGHTER

I sound like a broken record but here is another gorgeous Natural Law daughter. Her dam is an Elite Aviator daughter. She has a very cool High Bars bull calf this year. I think this cow has a bright future but needs to be handled with care. She is best left to calve outside and not put in barn or small pen. We tried to graft a calf on her as a heifer and that experience didn't go well. Perhaps I shouldn't be offering her for sale, but she comes with a full disclosure, so you be the judge. Parent Verified.

FIRE 265H, DAUGHTER

We purchased 2 cows from Duff Cattle hoping to development 2 new cow families. In trying to decide what to use for sire's we toured Origen and saw the Basin Payweight 107S. He was without a doubt the soundest best footed bull there. This cow has raised females going to the Fitchett Family, Jaycee Dutchik and another sells in this sale. Her 2022 heifer calf is very hairy, stout and eye catching.

AI bred on May 7 to HLC CSI Private Stock (early morning)

DONOR COW... We have purposely left this cow open to enable the new owner to flush her this winter. We are expecting Eyes On You and Natural Law embryos this coming spring out of her. We also flushed her mother. Blast Angus bought a son sired by Bismarck that has produced very well and a Natural Law daughter was selected by Jeff Stephens. This cow carries herself like a Diva. She is hard to fault and believe she's in the prime of her life and there is lots of upside on her.

OPEN ready to flush Has a June bull calf at side we will retain.

Feature

FIRE 134B

Absolute beast of a power cow. She unfortunately lost an early calf after trucking home to calve in Houston. Females have sold to J Square S and Loyal Farms. The Honey family had great success showing their heifer in Ontario. Bulls have sold to CTN Ranching and Wineglass Ranch. She has a pair of yearling twin heifers that are young, but I think would be a wise purchase. Parent Verified. She will add birthweight so be careful what you breed her to.

Long sided Pioneer daughter out of the cow Monty bought from Brent Stewart. The dam is now considered Elite by CAA. We held her open to change her calving date. She was one of the F year heifers that was in pasture with bull that didn't work. It takes a long time to rectify his mess.

Exposed from April 18 to Vee Tee High Bar 3716 and then PM Bravo 22'21 was added May 4 til August 12.

FIRE 181D, MAT SISTER

I purchased the LD Complete bull to try improve carcass traits in our herd. I try very hard to look at all the sectors of which my bulls sell into. We sell our steers typically on the grid and receive premiums for good carcass quality. My theory is to try raise cattle that help people put more money in their pockets. This cow is a maternal sister to one of my favourites 181D.

Very nice young Motive daughter we purchased from the Tibble Family in Manitoba. Long bodied with perfect udder you go to expect from the Motive's. **Here is the issue with this girl... On my AI sheets it says we bred her Motive which I'm 95% sure we didn't I think it was the fact she was a Motive. So I will pay to DNA the calf and will supply 2 straws of Natural Law to breed her next year.**

Very productive young cow. Her first 3 calves weaned at 114 for bull and heifers at 109 ratio. Her 2021 bred heifer is very good and I'm sure you will find her in the pen. A bull sold to the Huxley Colony and a heifer last year to Darrell Comazetto. A maternal brother to 112E had a ribeye scan of 19.9 which is outstanding. If return on investment is important, I'd recommend checking her out. Her dam had 12 calves.

HOW TO FIND *Poplar Meadows Angus*

————— DIRECTIONS —————

From Houston take Highway 16 for 28 Km West. Turn left onto the Walcott Road and follow it approximately 4 Km.

From Smithers take Highway 16 for 37 Km East. Turn right onto the Walcott Road and follow it approximately 4 Km.

MEET OUR RANCHERS

Q: Why do you raise Angus cattle?

A: "The main reason is because I wanted to do something with my family. My dad raised cattle until he passed in 2015, and my sister, Lia, still cares for a herd," Tanya shares. "I did spend some time away from the ranch, but it just made me realize how important this lifestyle and my family are to me."

Q: Why is it important for ranchers to share their traditions?

A: "It's up to us to teach the next generation about where their food comes from. Sharing why we do what we do is an important part of that," Tanya says. "One of my favorite ways to do that is walking around the ranch with my granddaughters, showing them the cattle and land."

Q: What does ranching provide that other jobs don't?

A: "It's the wide open spaces for me," Tanya says. "There's nothing greater than sitting in the field and watching healthy calves running around in the sunshine. That scene is a satisfying reminder that whatever you put in, you get back out."

The Belsham Family,
Houston, British Columbia, Canada

Tanya Belsham was born the same year her parents, Frank and Dianne Stibold, bought their first Angus cows. It was the start of a superior herd for the Stimbolds and a foreshadowing hint of what young Tanya would one day make her career. Before meeting her husband, Monty, and having their son, Taylor, Tanya did leave the ranch to work as a real estate agent, but the enticing rural life and ties to family brought her back to the black-hided animals she loves so much. It's her honor to continue a legacy her family started long ago and to share it with her two granddaughters.

**"My family has been here for over 100 years,
and we're blessed to see the heritage continue."**

*One of many ranching families
raising the best Angus beef.*
