## Welcome TO GENETIC FOCUS 2022

Every year we offer the very top end of our program in this sale. This is the main reason we decided not to offer any Black Angus females this year. We will consign a few ELITE black females to sales this fall, however, with the smaller size of our black herd, we felt we had to keep the majority to maintain our genetic advancement.

Six Mile Ranch has been focused on producing the very best females since our beginning in 1949. The heifer calves offered here are arguably the best group we have produced to date. The bred heifers are stellar in their own right, however adding to their value are the elite and exclusive service sires we have sourced here at Six Mile.

Our ranch family is expanding. Rustin Richard Hertz joined us on October 5th and within a few days, he was headed to a cattle sale with his family. Callie and Tyson now have three under three! Rustin's big sister Sloane (3) showed her first heifer at the Young Ranchman's show and is hooked. Fowler (2) is not sure what to think about being a big brother yet, but has said "He's so cute" so that's promising.

Our son, Cade has also joined us on the ranch as our Ranch Foreman. It's a big change from his Engineering job (and his old paycheck) but we are incredibly grateful to have him come home. We are beyond blessed to have the best team here at Six Mile. The term "strong work ethic" comes to mind when I think of every single member of our ranch family. A big Thank You goes out to Tyson Buist, whose effort goes above and beyond and has earned him the MVP award here at Six Mile. We must also acknowledge Eric Smith who has become an integral part of our team, although his school work gets in the way!

We feel strongly about standing behind what we sell and try our best to support our customers beyond sale day. We truly believe in our motto "Where Customers Become Friends"

Please feel free to contact us about any of the females or genetic opportunities in the sale.

*With Kind Regards,*

**Clayton and Corinne Gibson, Cade & Coy Gibson

## PAYMENT TERMS/FINANCING OPTIONS

Payment will be made to Six Mile Red Angus Ltd. And is due prior to any cattle being released. Payment is expected within 72 hours of the sale unless other arrangements are made. A 5% monthly interest rate will be applied to any invoices not paid withing 45 days of the sale date.

IF PAYMENT TERMS ARE NEEDED, PLEASE CONTACT CLAYTON OR CORINNE GIBSON WELL IN ADVANCE OF THE SALE TO DISCUSS. WE ARE HAPPY TO ASSISIT YOU AS LONG AS WE HAVE ENOUGH NOTICE.

## U.S. EXCHANGE AND TRAVEL

U.S. funds are currently at an extreme premium here in Canada. U.S. funds will be accepted at a rate of exchange announced prior to the sale. The closest Airport to the ranch is Regina International Airport in Regina, SK which is 2.5 hours from the ranch. We are located about half an hour from the Montana/ Saskatchewan border. Please call Corinne for any assistance needed in travel arrangements.

## SIGHT UNSEEN PURCHASES

If you are interested in any of the lots, but unable to attend the sale, please contact any of our Six Mile team prior to sale day. This allows us time to discuss your needs and suggest lots that fit your criteria. Your order will be held in strictest confidence and handled with professionalism. Your SATISFACTION is 100% guaranteed if you have talked to one of our Six Mile team members (Tyson, Corinne, Clayton, Callie, Sebastien or Tyson Buist) prior to sale day.

## DELIVERY

Six Mile will assist you with delivery and in many situations deliver the cattle ourselves to central locations. The cost of delivery will be the buyer's responsibility; however, we will endeavor to keep the costs as low as possible by coordinating loads. For any purchases going to the U.S. - Six Mile will do all the export testing and administration at our cost and will deliver to the border for free. From the U.S. border the cost will be the responsibility of the buyer although we will help coordinate to keep costs as low as possible.

## A FEW NOTES

- The majority of the sale females have been DNA sire verified or fully parent verified. Any service that requires DNA verification will be paid for by Six Mile.
- Some heifer calves in the offering are halter broke and entered at Canadian Western Agribiton. Please contact Tyson to visit about options.
- All EPD's in the catalog are generated by the Canadian Angus Association. Please refer to our website or contact us for RAAA BOLT EPD's.
- Check out further terms on the Inside back cover of this catalog.

## Customer Service & Customer Success

We are here to support customers with their Six Mile Genetics. Seeing customers succeed with our genetics is the greatest reward.

- If you would like your animal clipped, or assistance in clipping, throughout the year you are welcome to bring them here to Six Mile at no cost to you. One of our talented team members will assist you. We also offer to prepare and photograph your Six Mile animal.
- We are always available to provide advice on anything regarding breeding, feeding, marketing, daily care, or any questions you may have. This extends to general advice not only advice on show cattle.
- As we all know, things don't always go as planned with genetics. Please let us be the first to know if something does not work out with your purchases. We stand behind our product and will do our best (within reason) to assist in making it right.

## 2023 Six Mile "Spring Fling"

Geared for all ages and experience of juniors (and even adults) wanting to expand their knowledge. Judging, show care, clipping, grooming, public speaking, showmanship, marketing and general cattle evaluation and care will be discussed. We will have exciting prizes and cash incentives to be won simply through your participation. A full day of experience, learning, great food and a whole bunch of fun. All customers of Six Mile genetics are welcome to attend this event, free of charge.

### PURCHASES MADE IN THIS SALE QUALIFY.

Watch for dates to be posted.

Our future goal is to expand this cow camp into a weekend event including a full-fledged show (and possibly even a sale). We want to reward our customers for their patronage and to support their efforts to promote and market their own programs. This event will include both haltered show cattle and a pen show. We are very excited to create a one-of-a-kind event – its just taking longer than we expected to get our facilities and ideas together.

# Six Mile Genetics AT WORK

## BREAKING NEWS

Congratulations to all the juniors in the recent Final Leg of the \$100K Junior Futurity Show that culminated at the historic 50<sup>th</sup> Anniversary of Red Round-Up.

Six Mile is proud that many of the top ten females featured Six Mile genetics especially:

Peyton Christman who chose **Red Six Mile Enid 232G**. She racked up the wins every year and was crowned the Top Spot in 2022 Final being awarded **\$20,000.00 CASH** and other great incentives. What an amazing accomplishment for this talented young lady and her Six Mile Genetics.

Kamrie Kaufmann chose **Red Six Mile SUN Olivia 328G** as her project and landed in Number two spot taking away **\$15,000.00 CASH**. She had won Reserve Champion Female in 2020 and was Champion Female in 2021. Both Kamrie and Olivia 328G have such a bright future in front of them.

Ivy Livestock, AB and Koda Cattle Co, Ab were owners of the Reserve Champion Red Angus Female at Agribition 2021. **Red Six Maria 214G and Miss Maria 475J**

Congratulations to Heather Leblanc and junior Eric Smith as they partnered up on **Red Six Mile Betdoll 444J**. She was Grand Champion Red Angus female a few times this summer

Addison Vowel, Sandridge Red Angus, MI selected **Red Six Mile Ellie 205G**. She won her many banners but even more importantly has now become a prominent donor in their program

Iris Creek Angus, Ont. Purchased **Six Mile Ms. Blackbird 386C** in last year's sale. She has produced a stud bull calf that they are selling at the National Angus Sale on the 100<sup>th</sup> Anniversary Royal Winter Fair

Georgia Howe purchased **Red Six Mile Cheta 685J**. Her hard work and determination led to Grand Champion female at her Regional 4-H show

Carsten and Shelton Grabler of CS Ranching, AB purchased many top end Red Angus Females. It was rewarding to see them show these females this summer, even Wind Chime 689D who has not seen a halter since 2017! Carsten won his first Agribition Banner with **Red Six Mile Minerva 667J**

"Baby Shark/ Stark" **Red Six Mile Ms Frado 344J** was purchased last year by the Harvie Family. Chick, Gentry and Tel showed her to many champion banners

Leah Evans, Iowa has done a great job showing her various Six Mile females. She recently won Champion Red Angus Bull at the Iowa State Fair with a son of **Six Mile Alana 748G**

Ranch Covey Hill, QC purchased a half interest in **Red Six Mile Tafetta 419H** - she has become a stunning two-year-old with huge production and future ahead of her.

*Keep sending your Six Mile Success Stories through to Tyson, Callie and Corinne! We love seeing our genetics at work!*

**Birth Weight: 84 lbs.**

At Six Mile, we pride ourselves in always offering our best heifer calves at public auction. As you will see in the first half of this catalog, the 2022 heifer calf crop was unlike any group of females we have raised. The depth of quality across a variety of sire groups is amazing.

Deciding on a Lot 1 for this sale was a challenge, but ultimately, we think Alana 118K is the most fitting. Donor dam and past Genetic Focus highlight, Alana 515F is quickly filling the footsteps of her iconic mother, Alana 13X. She boasts an impressive wean index of 115 on her natural calves and most importantly injects her added pin width, deep blood red color and robust body design to her calves. 118K is a kid friendly show heifer option that isn't scared to show off her natural presence. We think this female will have a successful show campaign, and an even more impressive record in production.

**Entered at Agribition.**

RED SIX MILE MISS LARK 300C

Birth Weight: 76 lbs.

Full Sister to Semex/Moose Creek Sire “Mossy Oak”. From an early age we knew this was a special flush. We have 4 bulls that will highlight our sale in the spring and these two top notch females. Lark 35K is impressive from every angle; she is so soft ribbed and flanked with a gorgeous teat size and placement. When on the move, she glides around the pen with a full range of motion in every joint. Donor dam, Lark 225E is making a strong push for high earning donor here at Six Mile. The sire of these flushmates, John Wick, needs no introduction.

**Entered at Agribition.**

**MOSSY OAK 175H | FULL SIBLING**

**RED SIX MILE MISS LARK 225E | DAM**

Full Sister to Semex/Moose Creek sire "Mossy Oak". From one of our highest quality and most consistent flushes, Lark 12K and Lark 35K represent the future generation of Lark's! As an added bonus to her stunning phenotype, 12K sports a very impressive EPD profile with 9 traits in the top 35% of the breed including top 10% for CE and Maternal CE. This heifer was the most enjoyable female in the picture pen, she is sound and proud! And check out that hair coat, super shaggy.

RED SIX MILE MISS LARK 300C

**Birth Weight: 88 lbs.**

Maternal Sister to Semex/Moose Creek sire "Mossy Oak". The largest outlined of the three sisters (Lot 2-4), Lark 130K is long spined and very attractive. She is sired by one of our most under-utilized female makers, Enforcer 204E; look for more of his influence in the future as we increase his AI usage. The Lark cow family is very prevalent in this year's sale and has stood the test of time in our herd; longevity is bred into them.

**Birth Weight: 84 lbs.**

We think Lark 55K encompasses all the things we pursue to accomplish in our breeding program. She is backed by a long list of donor females that are influential not only in our herd, but across the Red Angus breed. She is sound, fluid and built for longevity; in the showing and in the pasture. Her CAA ELITE dam consistently outproduces herself with her most notable offspring being high seller, Stealth 269F, to Running JR. Her EPD profile suggests an unmatched growth curve with WW & YW in the top 1% of the breed. She is intriguing, captivating & high quality.

This heifer is the darkest shade of red. As you flip through this book, you will notice I use the term “dark red” A LOT. This color doesn’t happen by accident. We put a high priority on color when selecting new herd sires and donors. It helps our loyal commercial bull customers when they market their calves in the fall sale ring and it is important for our purebred customers in the show ring. In addition to Witzel’s captivating color, she sports a long feminine neck, deep soft rib cage and athletic build. We think this heifer competes at a very high level in the show ring and will excel in the pasture. Her dam, Witzel 84F, has a 103 wean index on her first three calves with a gorgeous udder and impeccable foot.

Your eyes will quickly find this female when you step into the show heifer calf pen. Her rib cage is "HUGE" (insert Trump voice). She is a member of the famed Marta cow family that pops up on a lot of the feature lots in this sale. The Stark heifers are the easy keepers of the pen. This heavy constructed, dark red beauty is the performance leader in the pen and offers a fresh, yet proven pedigree.

This heifer is so well designed. She is moderate yes; but so dang good. We often have the discussion amongst our crew "How big do we need cattle? How moderate is too moderate?" and honestly, I don't think there is a right answer; quality will always trump frame size in our herd. We have big cows that raise big calves and maintain an appropriate body condition in the process. We have some really nice moderate cows that wean an above average % of their body weight every year. We also have had big cows and small cows that can't cut it in our environment and they hit the road to town. So, I guess if you are looking for a January show heifer that will be competing against terminal or exotics, Bess 22K is probably too small. But if you want to add a high quality, easy keeping, moderate statured female with a very unique pedigree to your herd; put a star on Lot 8.

Our hardest working employee, Mr. TyTy Buist selected Marta 11H to be his entry in the 50th Anniversary Red Round Up Futurity, and as I write these footnotes, he is working in the show barn on Sunday afternoon getting ready to take her out to Olds. TyTy is the MVP of the Six Mile Team; he clips show cattle, bales hay, fixes fence and calves cows by day and still has the energy to play farm with my kids and read them bed time stories at night. We are blessed to have him at Six Mile and he has a keen eye for quality stock. This April born heifer gets better every day and she has a great temperament to go a long with a high quality build. Her dam is a stunning John Wick daughter from our Marta 300Y donor.

 RED SIX MILE KURUBA 712A      RED SIX MILE MS EXTRA 568A

Birth Weight: 82 lbs.

The only Parabellum heifer in this sale and again out of a cow that the keen eye of Ty Buist scooped up. This March show heifer prospect is super stout featured and real shaggy. Her sire, Parabellum is really causing quite a stir in the USA this fall as online sales start popping up. He injects a dark red color, undeniable presence and added frame to his offspring while maintaining foot quality and structural integrity. Her dam was the high selling bred heifer last fall that dropped a gorgeous udder at calving time. We plan on showing this heifer alongside her dam this fall at Farmfair and Agribition.

**RED SIX MILE MS EXTRA 373H | DAM**

**RED SIX MILE PARABELLUM 675G | SIRE**

This ET March heifer is intriguing. Her donor dam, Cheta Girl 144B was a past Genetic Focus feature and one of the stoutest featured females that we have raised. Her mating with the now deceased Gentry produced two dark red soft sided heifer calves. 437K is really sound and moves like a cat. We are anxiously awaiting the Gentry daughters hitting production this winter and are expecting gorgeous udders.

**RED SVR RUBY 46H**

RED SVR RUBY 64D

**Birth Weight: 86 lbs.**

We purchased the dam of Ruby 46K with Peyton and Sterling Christman, Twin Anchor Cattle, to compete at the 50th Anniversary Red Round Up Futurity. We had a little bit of insight into the high production level of the Ruby cow family down at Ceylon, having a strong influence from SVR Ruby 16P in the Six Mile herd already. This John Wick daughter is long and stretchy with a mellow temperament and awesome hair coat.

**RED SVR RUBY 46H | DAM**

This is the first and only Mossy Oak heifer calf offered in a Six Mile sale. We are thrilled to see the consistent quality of calves that he is siring in our herd. Mossy Oak bull calves were one of our heaviest weaning sire groups this fall and the heifer calves are stout, shaggy and sound. Hami 44K fits that mould. She has a gorgeous High Caliber dam behind her that Eric Smith of Breed Creek had a good amount of success with on the show road. Hami 44K ranks in the top 35% of the breed in 8 traits including top 10% for YW and Milk.

The Wick x Barry pedigrees go together like peanut butter and jam. You get the stout features and awesome color from Barry, the loose and flexible structure and added presence from John Wick. Plus, you double up on foot design, maternal instinct and mothering ability from both sides. This heifer will be a safe investment as a great replacement female.

**RED SIX MILE FLOWER 209F | DAM**

Moderate, shaggy and great colored. This is another heifer that stems to the highly productive Lark cow family. She was raised by a hard-working, sound footed Powder River daughter that displays a tight tidy udder with awesome teat size. Adding Gentry to the mix on the top side of her pedigree only adds to her maternal value.

One of my favourites, this May show heifer is super sweet. Bold and pretty, balanced profile with stout features. She's soft haired, great colored and has an awesome disposition. We love showing our cattle and watching our genetics excel in the showing. Now the show cattle in the USA and Canada have some significant differences absolutely, but quality stock always does the winning when it counts. One thing that impressed us at Junior Nationals in Chickasha was the quality AND quantity of cow calf pairs; maybe us Canadians are rubbing off on our American friends! Angus cattle set a higher standard for maternal superiority, and it's refreshing and rewarding to see the Red breed putting such a high emphasis on this trait in the show ring and in commercial aspects. Despite her late birthdate, Ruby Tuesday 560K is a female we have high expectations for!

Here's a unique built heifer. She is long and slender necked, deep bodied and heavy structured. Her sire, Redwing, was selected by Peacock Angus Ranch in Texas for \$30,000 in our 2021 bull sale. Redwing combines the highly productive Marta cow family with the exciting Red Box AI sire. Her dam was acquired with the Cactus Coulee cowherd and has produced one female selling to Camo Cattle and 2 daughters retained in the Six Mile herd.

Birth Weight: 82lbs.

I love cattle that appear to float when on the move; when each and every joint work together with a full range of motion and stride length. Blackbird 512K demonstrates this at a high level. She is a larger outlined heifer for her age and is really long spined. I think this could be the sleeper heifer calf of the group that would be a great show heifer for the younger age divisions if someone is willing to put in the work on halter breaking her.

**RED 3SCC NORTHBOUND F344 | SIRE**

Another heifer you could probably hang a halter on and have some success with in the show ring. Our biggest issue when sorting the show/sale calves was how many show caliber February calves we had this year. There are probably 10 or more in this sale that deserve a show career. Missy 204K is great colored, big legged heifer that gets out and covers her track with ease. Her Razor dam is large outlined, refined, and angular with a picture-perfect udder.

An excellent Stealth daughter with influence from elite donors Lakoto 35W and Selma 358X on the bottom side of her pedigree. We are a year behind getting the Stealth daughters into production, but Josh Rempel at Running JR is pretty excited about the ones he has milking. Lakoto 269K carries herself with poise and balance on the move.

**RED SIX MILE STEALTH 269F**  
**SIRE OF LOTS 19 & 20**

We figured we needed to sell this heifer in hopes to end the bad luck associated with the Misty's on this ranch. Granddam to 17K, Misty 809E was an amazing cow that was slated to enter our donor program but she decided to get stuck and die inside a culvert in the winter months prior to calving. 17K's dam, Misty 205H, cast herself on the bedpack just weeks after 17K was born... we can't make this stuff up... there is a quote that I think is very fitting for all of us trying to make a living in this industry "Owning livestock allows one to be in control of everything, but completely powerless at the same time". Misty 17K is a big bodied, cherry red Lincoln female with a pedigree stacked full of maternal greats!

We decided to AngusGS test a good portion of our calf crop this year, which is the equivalent of 50K test in the USA. I still question the accuracy of these genomic profiles when I see my 3-year-old daughter scratching a heifer in the pen with a docility ranking in the 99th percentile... but for this Gold Cup 147K heifer it's a great selling feature! She ranks in the top 25% of the breed in 11 traits including top 10% for CE, BW, MCE, Milk and Mature Weight. She also has a high level phenotype to go with her sporty EPDs!

**Birth Weight: 80 lbs.**

This heifer is one of Clayton's favourites to make a ranch cow. She may have a little extra leather up front but that also translates to extras behind her shoulders; a big bold rib and soft turn to her flank. Clayton always uses the description on cattle like this- "She looks like she's got an extra hide draped over her." It's a difficult phrase to beautify for a college reasons room, but that is the most real world way of saying that she's loose hid and easy fleshing!

Birth Weight: 84 lbs.

One of the feature April show heifer prospects that was a late addition to the sale pen. She is as chiselled in her front 1/3 as we can make them without sacrificing performance and body mass. Roush was a choice lot with, and flushmate to Redwing in 2021. We utilized his natural service heavy and are very impressed with the set of bulls and females he produced. Combining the Lark and Marta cow families represents one of the strongest maternal matings in the sale.

I like reading sale catalogs; I generally read every word cover to cover from the operations I have a great deal of respect for; not just Red Angus and not just cattle operations. Some folks have a beautiful gift for written word; however, I am not one of those gifted writers. So as a small token of my appreciation to those that struggle through reading all my footnotes, we are going to have a contest. The first 4 people to read this and send me (Tyson) a text message will receive a \$300 sale credit to be used on November 18th (only one per family/operation). Good luck.

Choice of maternal sisters. We started doing these maternal sister choice lots last fall and they were well received. As a seller, it allows us to showcase some of the really solid ranch cows that are producing at a high level (without the cow being in the ET program). Some of these cows may end up entering our donor program and some will just be great ranch cows. Frado 32F will most likely be one to hit the donor program. This Lincoln daughter is beautiful and she has always had "the look". She is slim and tidy necked and then opens up with a bold forerib and hip. The dense muscle pattern, attractive skull and beauty teat spacing is evident in both females in this choice lot.

*Ms Frado Family*

From nose to tail, this is the longest heifer in the sale (I should be a poet). I do think this industry, probably more specifically the Red Angus breed (including our own operation), needs to be reminded that spine length is the easiest way to add pounds on the scale. Also, I believe the longer spined cattle are generally sounder and more athletic; increased longevity. But that's just my opinion and with my hiatus from social media; I use these footnotes as a platform to be a keyboard warrior! This heifer was one we debated about putting a halter on and promoting as a show female, but then we thought we should keep her, and now she's a choice lot... we are indecisive folk here at 6M!

Choice of Maternal Sibs. This Badger daughter has been on our radar since she was a baby. Her young dam, Lakota 95E is consistently cranking out quality stock. One son sold to the late Mike Tilleman and her "H" model heifer was a choice lot in last years.

**RED SIX MILE BADGER 529G | SIRE**

**CHOICE LOTS** *Lakota Family*

Another choice lot from the Lakota cow family. Here's a great story, Lakota 213C was supposed to be in the Genetic Focus sale last fall because we sold all of the "C" model females. 213C is a ranch cow, she is protective at calving time, she knows where you are before you step foot in her pasture and she took one look at the video pen last fall and excused herself very quickly. So, we pulled her out of the sale, which worked out just fine because we are now able to feature this pair of maternal sisters! This Hotwire heifer calf is cowy; big bodied, soft flanked and has a much more mellow disposition than her mother!

Lakota 745J the consensus favorite of our ranch crew; she's flat good. I honestly struggle to write footnotes on heifers like this because I don't think there are enough words to describe how great she is. Her combination of phenotype, royal lineage, and chart topping EPD profile is near impossible to find. She will be at the top of the sale order and will have more than enough friends come sale day. We planned on keeping this female and that is why she is not bred to a proven calving ease sire; we would be happy to keep this heifer around for calving season if the new owner wishes.

We think very highly of this female. Over the 50 years of Six Mile Ranch, we have always put the highest priority on maternal quality and productivity; it's all about the momma cow. Lakoto 952J is very unique; she stacks a truly unrivalled group of donor females in her pedigree that represent the best cow families that walk the hills south of Fir Mountain. Her pedigree showcases generations of donor dams; Lassie 417X, Lassie 377P, Gloria 29A, Gloria 746W, Lakota 35W, Minerva 35C & Anexa 271Y. Add into the equation her chart topping EPD profile with a huge BW to YW spread, her exclusive service to new AI sire PIE Captain and her stunning phenotype; this heifer is the whole package.

**Retaining a ½ Embryo Interest - Negotiable.**

Remember the three certainties in life: taxes, the Leafs never winning Lord Stanley's Cup and a Lassie bred heifer highlighting Genetic Focus. This female is just awesome; I think she needs to be seen in the flesh to appreciate how good she is. Her dam is a gorgeous young productive cow who will most likely find her way to the donor field if she keeps producing at this level. She just weaned one off a stud bull calf at the top of the pen. Bid with confidence on 624J.

Early service to John Wick only adds value to this high quality Fifth Sense daughter from the famed Frado cow family. She is bold from every angle with a proud and attractive front end. The dam of this heifer was one we lost too early. She was a daughter of our new up-and-coming donor Frado 133B. 401J is one to mark high on sale day, she's a safe investment.

**RED SIX MILE MS FRADO 401J**

Big body, soft made and high quality; this Flagship daughter is a pen favourite. She also is a maternal sister to Enid 232G, a past high seller at Red Round Up. This Enid cow family cranks out heavy calves at weaning while breeding back in a timely manner and maintaining excellent body condition. Ranch cow in the making.

Another striking Flagship daughter, she commands your attention in the pen. She is super flexible and sound when set in motion and appears to be dropping a beautiful udder. Her dam, 26A is a great footed, dark red, tanky ranch cow who produced a herd sire for Spruce Meadow Farms and a daughter selected by Ferme Marnoit. She also has earned "Premier Dam" status in the CAA.

**RED SIX MILE FLAGSHIP 506F**  
**SIRE TO LOTS 42 & 43**

Choice of Full Sisters. One of the most prolific cow families in recent history. The Marta's are some of the hardest working, heaviest milking, and consistent breeders in the Six Mile cow herd. These two flush sisters are full sibs to Marta 238C, the \$26,000 lead off female in last year's Genetic Focus Sale who has produced a long list of quality progeny, and Marta 816G, the dam of Lot 7 in this year's sale.

One really neat part about this Marta Choice Lot, is they are both carrying service to Stark (Sexed Female Semen) which makes the resulting heifer calf a full sister in blood to the high quality Lot 7 heifer calf. Our daughter, Sloane, also selected her first show heifer at a very early age and she is the Marta-Stark genetic combination as well! A big time opportunity on some of our most predictable genetics!

You will notice that we used Jumanji, the \$50,000 valuation Northbound son on a lot of these Comin In Hot heifers. We think his added frame will mate well with the rib and body of CIH. It will also stack some of the most prolific cows in the pedigree of the resulting offspring. We have 686J marked pretty high, she's long spined and big bodied with a heavy structure and balanced profile.

Alana 675J is definitely one of the stoutest featured bred females in this offering. She's a dark hided granddaughter of the famed Alana 13X donor. Her dam is also gunning for the donor pen. Her first heifer, 301G was a past Genetic Focus highlight, and 50E also just weaned off one of our favorites in the replacement pen. Grab on to an Alana because we don't let many of these females go!

Another stout featured Comin In Hot heifer that stems back to a good cow that Callie and I bought out of the Pasquia dispersal. She ranks in the top 10% for WW and YW and her added frame and stature suggest accuracy with those rankings, and a very complimentary mating with Typhoon.

Feature bred heifer here! This Stark daughter checks all the boxes. She stems from the high profile "Lakota" cow family that was so influential at Las Rojas. 293J is due early to the new exciting sire from the Pieper program, Captain. We love her added athletic structure, the soft turn to her flank and perfect teat placement.

Another Wrangler daughter that we expect to shine in production! Her dam is a full sib to Game Face 164Y. This female does so many things right; she offers genuine base and pin width and added red meat down the top side of her skeleton. She looks like a herd bull maker!

**RED SIX MILE LAKOTO 35W | GRAND DAM**

I remember when this heifer hit the AI chute last spring, she was one of the first to cycle, I said to Ty "this may be the best heifer we breed this year" and I reminded him of that when she hit the picture pen. As an added twist, we nearly lost the dam of 361J in a sink hole last fall when grazing some drought stricken crop land at the neighbors. Her added frame, stature, body mass and intriguing pedigree make 361J a true sale feature for those that enjoy quality stock with a great story behind them!

This set of Rolex daughters are definitely worth the trip to Fir Mountain. When we do get visitors down to the ranch they always ask "Where is the mountain?" And honestly we have no good answer for them... We have a lots of rolling hills and very few evergreen trees so where the settlers came up with "Fir Mountain" as a town name is a mystery to us. Anyway... these Rolex daughters are awesome colored, very consistent and are working very well in our ranch country!

I know that everyone has the big idea to belly into a trickedout heifer calf or bred heifer for more money than a pick up truck is worth- then she will win every show and have 3 natural calves, each that sell for more than you paid for her. She then enters the donor program, flushes an average of 10 embryos that will sell for \$1500/. Works every time, right??? Here's a safer investment strategy, buy this heifer around or less than sale average, look her up online when you get her home to realize she has an ELITE dam who never missed in 8 years, with 5 working daughters, and 2 sons in purebred operations...10 years later, send Six Mile a note on how productive 852J was in your herd.

650J traces back to Lakota 162T, much like the two maternal sister pairings in Lot 34-37. We sampled RAML Payload before he hit the open market. His offspring show ample muscle shape in a sound structured skeleton. We think very highly of this heifer, she combines an athletic build with real muscle shape and an awesome cow family.

Dam of Dixie 714J was the lead off choice lot in Genetic Focus Expanded Edition last fall, had she been selected; this female would not be for sale. We think this heifer is the real deal. She is bold and opened up in her forerib with a perfect foot under her. She carries an abundance of power and substance in an elegant, youthful package. Due early to John Wick, the G.O.A.T. of the Six Mile program. Bid early and bid often, she will not disappoint you.

**RED SIX MILE DIXIE 546C | DAM**

The Lark cow family is very prevalent in this year's offering; check out the swath of heifer calves Lot 2-4. 704J exhibits the body shape and sound structure that is a staple of the Larks. She's due early to the new Brando bull; exclusive service.

Big time maternal pedigree! Flushmate to 609J, Barbarian, who was a pen favourite in the bull sale last spring selling to the Nicklason's. On an unrelated note, this heifer was raised in an ET herd up in the Lafleche dirt ranching country and I know that Dayton reads every footnote in the book, so shout out to the Packet recip for raising this high quality, great tempered female!

Elegant. Robust. Captivating. This John Wick daughter has all the extras. She is gorgeous on the move or still. Her dark red color with her bold and attractive design is tough to come by. Her sire, John Wick needs little introduction but we must say, his legacy will undoubtedly be his daughters in production. They are sound, gorgeous uddered and raise heavy, high quality calves. Add a Wick daughter to your herd while you still can!

If you aren't convinced by the legitimacy of John Wick yet, please take a gander through some of our previous sale catalogs. I think his sire group has led off the bull sale for the past 3 years and his daughters are now cranking out high sellers. In fact "the pick of our heifer calves" was out of a Wick first calf heifer. 524J is a flushmate to Lot 3&4 from the bull sale last spring selling to Sandbur Ridge and M Bar. This heifer is carrying exclusive service to PIE Complete, our newest addition to the bull battery.

Moderate statured, heavy structured and hairy Alibi daughter. Should be a very complimentary mating with Fifth Sense. Funny story about the dam of 659J, she was purchased from Redrich by McMillens as a bred. I think the story goes that she caught a ride down to Fir Mountain and forgot to get on the trailer over to MRLA... So we ended up calving her out and then buying her from McMillens... the cattle industry is a crazy world.

Put this one on the sleeper list. She is solid and tough to put a hole in. She's carrying service to OHR Jackson, a new addition to the bull battery. He caught our eye with his proud, alert profile, superior dam and proven calving ease numbers. As I write these footnotes, I always ponder what our cow herd would look like if we never sold a female... but then I remember that we could never afford to feed all the critters in these drought years! We also love seeing our genetics working across the globe, so until we win the lottery or get 30" of rain in a summer, we will continue to have larger production sales.

The Enid cow family is quietly doing a great job in our herd. I would compare them to a 3rd line left winger, they may not show up on any highlight reels, but they work hard every shift with the hopes of getting bumped up to one of the top 2 lines. We have never had an Enid in the donor program yet every one of them raises quality calves, breeds back in a timely manner and are sound uddered. Championships are won with roster depth, not first overall draft picks. Just ask the Edmonton Oilers front office.... Add this gal for roster depth in your herd.

439J is one of the few females in this offering carrying service to one of our new herd sires WEBR Brando; Lot 1 from Jesse's sale last spring. We tried relentlessly to buy Brando 666C back from Weber's, we finally caved in and bought the best footed son with a gorgeous dam and maternal sisters. We think the added frame and stretch will mate perfectly with Brando's dark red color and added rib.

I understand that some females in this offering aren't as "chubby" as other sales, and there always has to be a "last draft" in a live sale. I will call a spade a spade, I bet this female ends up there. And that is perfectly fine because I am betting that she hangs around in her new owners herd for 12-14 years just like her momma. Longevity should be a higher priority in today's industry.

All these Gentry's appear to have a perfect teat set and placement. I'm thinking they will be living their best life in production. Due early to Fifth Sense!

Large outlined, high growth Comin in Hot x Pride combination seen here. She's the darkest shade of red and ranks in the top 15% for WW & YW.

RED SIX MILE MARTA 238C

In the tradition of only offering the best in this sale - here we are. These embryos are the definition of POTENTIAL. Marta 928E is a stunning female whose last two progeny have both made our top ten list of heifer calves. She flushed successfully and bred back easily. We chose the PIE CAPTAIN sire after extensive research and seeing him with our own eyes. Although we cannot predict the EPD's on this lot due to the sire being currently only registered in the USA There is no doubt they will be impressive in all categories. This mating is one of the highlights of the fall sale season.

Stark is an outcross sire whose future is incredibly bright. His progeny are gaining recognition in our program and around the country. Stark daughters are his crowing glory. We are absolutely blown away by their volume, feed efficiency, gentle nature and phenotype. We sold the pick of our heifer calves last year and the pick was a STARK female from the Tafetta cow family. There will only be 120 units of semen offered in Canada and the United States on this sire from now until October 2023. This represents the first 40 selling.

*Six Mile* IS CELEBRATING **50** years of Registering Angus Cattle  
and we're just getting started!

# Never GET SO BUSY MAKING A LIVING, THAT YOU FORGET TO MAKE A *Life*

# IMPORTANT TERMS AND CONDITIONS

**RETAINED INTERESTS/ FLUSHES:** Six Mile Ranch reserve the right to two successful flushes on any of the female selling at our expense and the buyer's convenience, unless otherwise noted on that lot. We will reserve the right to a minimum of 8 embryos. We hope buyers appreciate that the females we sell are off the top of our herd and this term is the only way we can continue to do so every year.

**TERMS OF AUCTION:** The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. Announcements from the auction block will take precedence over the printed matter in the catalogue. Current exchange rates will be announced sale day. All monies are in Canadian funds.

**CERTIFICATE OF REGISTRATION:** Each animal will carry papers issued by the Canadian Angus Association unless otherwise stated. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

**PEDIGREE ESTIMATES:** Pedigree Estimates (PE) are created on the projected mating of the animal's sire and dam based on averages of the two, creating estimated values that do not hold the same accuracy of actual EPDs issued from the association and should be used as such.

**HEALTH:** The health of the herd is excellent. All cattle in this sale is free from disease or defect to the best of our knowledge. We guarantee that all sale cattle will ship to Canada or mainland United States. All cattle are on a full herd health program. Our veterinarian is available for consult upon request.

**GUARANTEE:** Each animal becomes the purchaser's risk immediately after the animal is sold. All animals in this sale will be sold under the terms and guarantees set forth by the Canadian Angus Association with regard to health, freedom from defects and from both reproductive and specific genetic unsoundness. If a guarantee is deemed appropriate relating to the terms and guarantees of the CAA, a credit to a future Six Mile sale will be given or an animal of comparable rank will be supplied as a replacement. No cash refunds will be given.

**PREGNANCY GUARANTEE:** All serviceable age females have been pregnancy examined by an accredited veterinarian, giving an estimated length of gestation. This estimated gestation period shall be used only as a guideline to calving and is not a guarantee of actual service. Females sold safe in calf have been examined by a veterinarian and are guaranteed to be safe in calf at the time of the sale. Any issues with the pregnancy must be reported to Six Mile within 50 days of the sale date. After 50 days, no further fertility guarantee will be given.

**INSURANCE:** We cannot stress strongly enough the importance of insuring your purchases immediately following the sale. Your purchased animal is your sole responsibility as soon as the sale concludes. As hard as we all strive to ensure the health of your animal, there is an array of unfortunate circumstances that could lead to the death of your purchased animal. No refunds will be given in the event or a death following the sale.

**DELIVERY:** Each animal becomes the risk of the purchaser as soon as sold. Six Mile will care for the purchased animal for a reasonable length of time, at the buyer's risk, until delivery can be arranged. Delivery will be the financial responsibility of the buyer; however, we will provide assistance as best we can. See more information on page 1 of this catalog.

**ERRORS:** All announcements at sale time, written or oral, supersede any written material in the catalogue.

**LIABILITY:** Neither Six Mile Red Angus, nor any person connected to this sale, assumes any liability, legal or otherwise for any accident, injury, illness or damage to persons or personal property.
