## *Welcome from* **SPRING CREEK SIMMENTALS & RED ROSE ANGUS**

It takes a while to wrap your head around the idea of selling the cattle. You start to realize that it's a thing that must be done. Over time, your mind gradually absorbs the idea. Then you begin to make a plan. A date is set, and there's no looking back.

As I faced the prospect of letting go of my life's work, I also realized that I have been among the most fortunate of men. There's nothing I would rather have done with my life. What better industry and place, to raise a family in a beautiful rural setting. What a privilege to have lived on my own terms on the family farm in Spring Creek. Sharon and I have raised our family in one of the greatest places on earth, among some of the best and hardest, most resilient and thoughtful people. Our kids will always be Saskatchewan farm kids, and we know that's the best start in life we ever could have offered them. My 102-year-old mom has spent her whole life here, watching her family grow and thrive, all thanks to the Simmental industry and the opportunities it has afforded us. The appreciation I feel every day is heartfelt and sincere.

In 2017 when the Canadian Simmental Association celebrated 50 years of Simmental in Canada I was honored to be inducted into the Canadian Simmental Hall of Fame. I had had pretty humble beginnings here on the farm, and to think I was being recognized by my peers was very satisfying, and continues to mean so much to me.

I had taken over a family farm, which has become a Century Farm, but my family wasn't really in the cattle business. I took animal science at university. I ran into some people there whose parents had just imported some Simmental cattle from France and so it was exciting times. The whole industry was starting to import continental breeds from

Europe. Around here at that time it was probably 90 per cent Hereford cattle. I had always liked cattle as a kid and was always following cow families and their performance. I always thought they needed a little more milk to be more productive and the Simmental breed offered that. After I graduated from university my first job was teaching courses to beef farmers and as it happened my teaching partner was also in the Simmental business. The purebred industry was expanding and it was exciting to be part of something new. I worked for Ag Canada in the livestock division in Winnipeg and Calgary, and I started purchasing some Simmental half-blood cattle in 1973. In 1976 I came home to farm full time. My dad had commercial Hereford cows. The CSA's open herd book policy allowed me to upgrade, so that's what I did. It became a passion and didn't really seem like a job; it seemed like something fun to do. I could see the potential of the breed; I could see what they were accomplishing. They really did have a lot of performance compared to traditional breeds at the time. Fast forward to the future. The Canadian commercial herd is now predominantly a Simmental and Angus cross herd and the population of Simmental cattle is second only to Angus cattle in Canada.

I've tried to involve myself in associations and committees due to my passion for advancing the breed. First of all in the late 1970's there was our local association, the Crossroads Simmental Association, of which I was a director, then president. After serving a couple of terms on the SSA, I became a director of the Canadian board for six years, the last two years as its President. Along the way I served on many committees: Agribition committees, bull sale committees, test station committees and local sporting committees. When you're proud of your breed and your operation, you want to be a part of these associations. I think it's one's duty to take their turn and help run these

## BRIAN MCCARTHY

P.O. Box 467  
Moosomin SK S0G 3N0  
brian.mccarthy@live.ca

associations. I also had ideas of where I wanted to take the business, and sometimes the best way to get that done is to be involved yourself. I was proud to be a part of the CSA board when we introduced THE (whole herd reporting) and maternal upgrading. I believe both initiatives have helped ensure our breed's recent and future successes.

Canadian Simmental cattle as we know them today are not the Simmental cattle that we started with in the early 1970's. The Simmental breed has changed from a spotted red and white breed to predominantly solid red/black cattle, while still maintaining valuable Fleckvieh/traditional genetics. Industry acceptance has been huge. To be a part of all that change is gratifying, and to know you played a role in it. Had the breed not changed it would just be a hobby or antique breed. You have to adapt the breed so that it fits the market. This process has enabled me to do this for my whole life, and have some fun along the way doing it.

In the early 2000's, I started building an Angus herd to complement the Simmentals. The large Angus gene pool and semen availability certainly aided me in building an Angus herd of which I am very proud. I believe my Angus to be structurally correct, eye appealing with extra volume and easy doing abilities. The Sim/Angus cattle are so easy to like, and make up a huge part of Canada's commercial herd.

Superior cowherd productivity is the biggest driver in terms of profit for your operation. A strong reproductive herd has been our goal since the beginning. I have always kept a large group of replacement bred heifers which enabled me to make further selections along the way. Along with this efficient reproduction, udder quality, foot quality, docility and eye appeal have always been stressed. While there isn't an EPD for eye appeal, it is much more enjoyable

to be working with cattle that are pleasing to your eye and the eyes of your customers. The sires of my cow herd have always had superior testicular development which goes a long way to making more reproductively efficient cows. Take advantage of the work that has already been done with these strong cow families to ensure the success of your operation going forward.

I've met so many great customers and lifelong friends through the cattle business. Thank you to all of you. I wish to encourage and support all the young couples who have decided that the cattle business is what they will dedicate their lives to. I pass the torch to you. I know that the industry is in good hands. I feel satisfied that I've done my bit. I know that whoever purchases these animals will be adding honest, reliable genetics to their herds, and I feel good about that. Working in this industry will keep your heads on straight, will keep you in touch with reality, will keep you grounded, and will help you know what is important and what isn't.

Planning a dispersal is a very big undertaking. Thank you to the Sales Management teams, auctioneers, ringmen, photographers, video producers, the online teams, my family, Team South Africa and many more.

Presale visits and tours are certainly encouraged as there are a lot of cattle to sort through in all sections. Please feel free to drop in or give us a call anytime.

When it's all said and done, I believe, there's no greater tribute one can pay than to say, "He was a cattleman!" From my family to yours, I wish you all the best in the future, and I hope to see you down the road.

*Brian McCarthy*

**BOHRSON**  
MARKETING SERVICES

## *Welcome from* **THE BOHRSON MARKETING TEAM**

One of the most anticipated sales of the last decade has certainly been the herd dispersion for Spring Creek Simmentals and Red Rose Angus, and on behalf of Brian, Sharon and their family we are pleased to welcome you to this impressive catalogue which features Brian's life's work.

For over 50 years the Spring Creek prefix has been associated with quality Simmental genetics that has grown into one of the largest and most impressive cow herds in North America that annually rears one of the top bull sales in all the land. Commercial cattleman and seed stock producers alike are repeat customers every spring and fall to source top Simmental and Angus genetics to help improve their bottom line. Brian's cattle have always been functional, high performing cattle with a heavy emphasis for fleshing ability and sound structure. The product annually offered at Spring Creek is what has kept a loyal base of customers and friends coming back year after year to purchase cattle. Programs of this magnitude that have been in it for multiple, multiple decades only stay this successful when the product works and the people are great to deal with and we believe this rings true when you talk about the McCarthy family.

The opportunity will be endless on December 20th when Brian's entire bred cow herd and 2022 born calf crop becomes available. As you dive into the catalogue, the big, impressive cow families are truly just that. The chance to combine many top females from the same cow families is truly special and a great opportunity to add a new family to your herd. The cows at Spring Creek have always been the backbone of the operation as they produce the great set of bulls Brian would assemble each bull sale

season. The cows are functional, big volume cows that flat out work. The bred heifers is an exciting group with many services to the popular high selling bull from spring 2021, Shamrock 151H. The open calendar year heifer calves carry as much earning potential as anything with a lifetime of production ahead of them and we think you'll be far ahead to get many of them bought up to be new cornerstone matrons. Although late December isn't typically the time of year to get your bull shopping done, we think it's a great time as you can come for a tour of them and easily view the dams and sisters to these great bulls.

The herd bulls are a neat group as they are the power Brian has so much confidence in to be used to service his cows, the guess work is taken out of this equation, Brian's done the leg work, we highly recommend paying close attention to that section.

We highly encourage you to plan to be with us for this historic day in Simmental history when we sell Brian and Sharon's cows. This is one sale we know has been and will be talked about for a long time to come. Come take advantage of all Brian has worked so hard for over the last 50 + years, we know you will be impressed. Please find time to come for a pre sale viewing of the offering with Brian, he would be very happy to show you all he's assembled after all these years. If you need any assistance leading up to and on sale day, please don't hesitate to contact any of us at Bohrson Marketing Services as we would be very happy to work with you on our free consultation and order buying services.

We hope to see you in Moosomin!

### *From the desk at T Bar...*

Welcome to the Spring Creek Simmental and Red Rose Angus Complete dispersal on December 20, 2022, at the ranch headquarters, Moosomin, Saskatchewan... a day in Simmental history. Brian and Sharon McCarthy have spent a lifetime in agriculture, livestock, and the Simmental breed... half a century building one of the elite breeding programs in the industry.

"On December 20th, they will leave a legacy for purebred and commercial producers to use and prosper in the years even decades to follow."

Consider the battery of herd bulls and sires used over fifty years to build this elite cowherd. Not all worked but they were steppingstones for a man with a great eye for livestock and a dedication to make each generation greater than those prior. As he built cow families that were efficient and predictable... the quality of the bull pen enabled Spring Creek to breed and market endless amounts of bulls to both purebred breeders and ranchers throughout North America. Only in this complete dispersal, can one get to bid on and acquire the factories... whether you are looking for a foundation donor or the best heifer calves in the herd. The Red Rose Angus herd built over the last decade or so, offers the same type, quality, and mindset, as used in building the elite Simmental herd.

From the early years of halter breaking bulls for the Regina Bull Sale to the 17 "Pursuit of Perfection" bull sales hosted at the ranch, Spring Creek's success has been based on quality and repeat customers. This being a complete dispersal, you can acquire any of the herd bull battery or the exciting set of herd sire prospects with their mothers. The recipients carrying embryos, all the semen and the tanks it's stored in... everything sells.

Although we hate to see this great breeding herd disperse, December 20th is a day of opportunity in the livestock industry. Stop by the ranch anytime prior and preview the herd or give Brian a call as he loves to talk cattle.

Feel free to give any of the T Bar Team a call and we will assist you with your purchases in a professional and confidential manner.

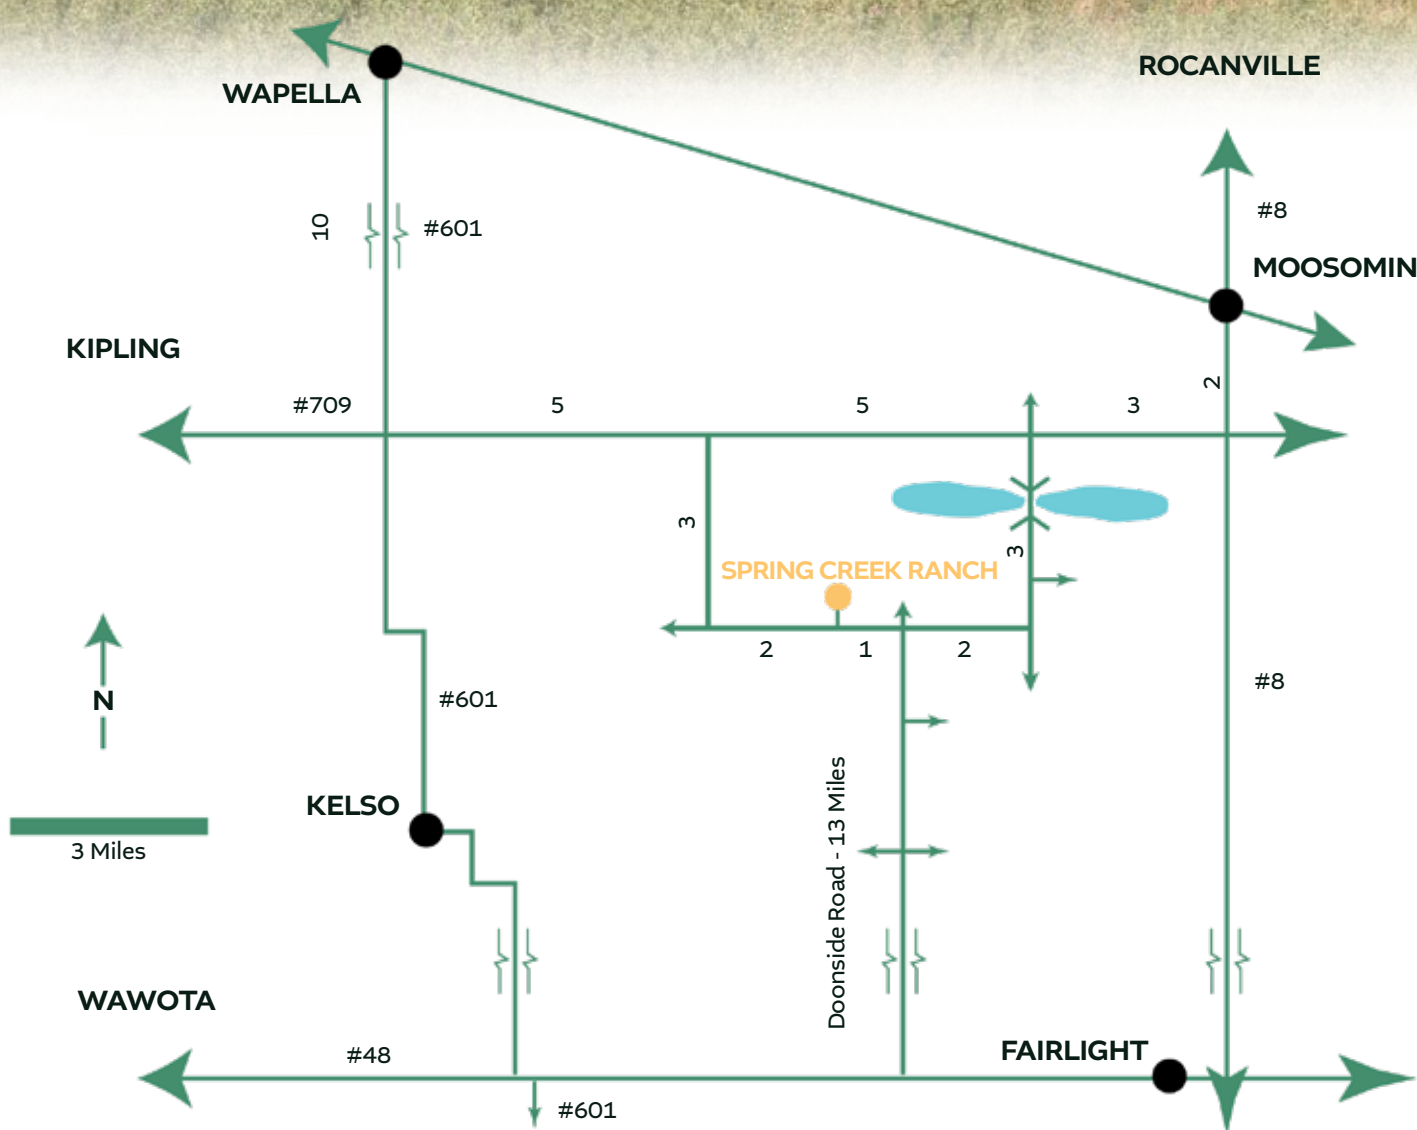

*Chris Poley*

*Where to find*

# SPRING CREEK RANCH

Spring Creek Ranch is located near Moosomin, SK. Google Maps "Spring Creek Simmentals"  
PRE-SALE VISITS ARE WELCOME AND ENCOURAGED!

# SALE *Information*

## U.S. BUYERS INFORMATION

All purchases made that are going to the States will be charged \$150/animal to cover the cost of export testing and paperwork to have animals ready to export. Trucking, U.S. Customs and Veterinarian charges will be the expense of the buyer. Buyers are welcome to pick up their purchases at the farm if they prefer.

## TERMS

The terms of this sale are cash, cheque, E-Transfer or wire transfer.

## BREEDERS GUARANTEE

As this is a dispersal sale, all cattle sell with no further guarantee. Bull calves that are purchased and left at Spring Creek Simmentals/Red Rose Angus under the bull development program will carry a guarantee as mentioned in the details of the program.

## ANNOUNCEMENTS

All Announcements from the auction block will take precedence over the printed matter in this catalogue. Buyers are urged to stay attentive for such announcements throughout the sale.

## DELIVERY

Full settlement must be made before cattle will be released. Cattle are to be picked up at the farm or trucking arranged. All purchases must be picked up prior to December 31, 2022.

## BUYERS RISK

All purchases become the responsibility of the buyer once the sale is over. We strongly encourage you to protect your investment by insuring your purchases.

## LOAD OUT

All cattle will be available for load out as soon as settlement has been made. All cattle must be picked up by December 31, 2022.

## ACCIDENTS

Although every precaution will be taken to protect the safety and comfort of people in attendance, neither the Sales Management nor Spring Creek Simmentals/Red Rose Angus assume any responsibility in this matter and disclaims any liability, legal or otherwise in the event of accidents or loss of property.

## PHOTOS & VIDEOS

The cows were pictured in early August. All the calves, bred heifers, and herd bulls were pictured in late September. The heifer calves were pictured three weeks after weaning and they did not have creep feed. Videos were taken in Late October.

## VIDEOGRAPHER

Videos done by Golden Thread Livestock Images. Videos of all lots will be available on DV Auctions and DLMS. Pregnant Recips were not videoed.

## CATALOGUE DESIGN

The information printed has been supplied by the seller and believed to be accurate. Updated sheets and announcements from the block will take precedence over any incorrect printed material.

## POLL AND COLOUR TESTING

All animals are polled and color identified.

## SEMEN/EMBRYOS

Semen storage is indicated by each lot. Shipping costs are assumed by the purchaser. Exportability is noted accordingly within the lot information.

## BULL CALF WINTERING PROGRAM

We understand that buying bulls in December may not be the most convenient thing for everyone to do. So, we are offering a bull development program to assist in wintering and developing the bull calves for you. This option is only available for bull calf purchases.

\*The decision to participate in this program needs to be made at time of settlement. The cost of the bull development is \$1,200 per bull and will be applied to your invoice at settlement. Insurance is highly encouraged and will be available at time of settlement, Spring Creek Simmentals/Red Rose Angus will not be liable for any injury, sickness or death of bulls left in our care without insurance.

All bulls are guaranteed to pass their semen tests by 15 months of age. We will work with the buyers according to their individual requirements for breeding timelines. In the event a bull does not pass his semen test by 15 months of age, a full refund will be made in the amount of the purchase price plus the \$1,200 bull development cost.

# THE *Jaycee* COW FAMILY

I was the runner-up bidder on BVD Just Cause M204 as a calf in Bismarck, ND. She was purchased then by M&J Simmentals, but she and a daughter later became available in an M&J Sale and I took them both home to start the powerful and attractive 'Jaycee' cow family. There are at least a half dozen feature cows in this group that will find their way up the sale order.

# THE Brooke COW FAMILY

This family began with the purchase of a bred heifer from Kappes Simmental. Herd sires used to expand this family were: GW Black Creek, Springcreek Red Tank 57P, Wheatland Red Teddy, and KOP Crosby. All the 'Brooke' cattle in this sale are daughters and granddaughters of the very maternal Springcreek Brooke 68Z. She was our highest selling cow ever at \$50,000, selling to Maxwell Simmental and Sun Rise Simmentals. At this point, she has 55 registered progeny, with more to come. Her influence can also be gathered from her son Springcreek Spark Plug, the \$95,000 high selling bull to Labatte Simmentals and Circle 7. I wish I had used his influence a little more as his progeny have super udders and are very attractive with great dispositions. There will certainly be many highlights in this section, including a couple of black 'Liner 56U' daughters.

# THE *Abbey* COW FAMILY

This family started with the purchase of an open polled Fullblood, RWU Miss Abbey 18Y, from Richard Westburg at a Crossroads Simmental Association sale in Whitewood, SK. Highlights in this family will be MBJ 99E and her daughters. Our high selling bull in our 2021 bull sale, Springcreek Estate 58H, is a 99E son. He is now owned by X-T Simmentals and Ashworth Farms. You will see progeny of and services to 'Estate' in this sale. MBJ 117H, MBJ 91K and other daughters of '99E' will be sale features.

This is a flush sister to Springcreek Estate 58H. I predict you will hear a lot more from these individuals. AI to Mader Walk the Line 92J on April 21. Exposed to MAF Rolex 151H from April 28 - June 20. Vet opinion due end of January. Bull calf sells as Lot 285.

# THE *Lena* COW FAMILY

The 'Lena' family started with MBJ 23R, a 'Line Drive' daughter out of a heifer that I bought from Skillestad Ranch in Montana. Of note, many of these cow families were helped out mightily by the influence of Line Drive. MBJ 23R was an attractive and productive flush cow with an excellent udder. This large cow family will have many features. MBJ 1E, MBJ 11F, MBJ 153G and MBJ 90H will be easy to find. MBJ 153G may well have my best bull calf and he is sure to be a headliner.

MBJ 13K - 2022 BULL CALF

# THE *Goldy* COW FAMILY

The original 'Goldy' was a 'Country Gold' x 'Signal' daughter that was born in 1986. They were very good producers with excellent udders. Flush cows from this family were sold to Wilson Stock Farms and Dugdale Ag. The dam of the \$75,000 'Blue Chip', MBJ 111R, was a 'Goldy'. Two outstanding daughters (34E and 146G) of '111R' sell in this sale.

# THE *Lima* COW FAMILY

The original 'Lima' was also purchased as a heifer calf from SRS Simmentals in Montana. One of her first daughters was MBJ 7P by Kansas Tank. She entered flush programs for Black Sand Simmentals, Maxwell Simmentals and Sun Rise Simmentals and has 33 registered progeny. A granddaughter of 7P and Liner 56U was the dam of Springcreek Denali 21E, a high selling bull that sold to Doll Simmental Ranch in North Dakota. Denali's dam has eighteen registered offspring and he has one hundred. MBJ 34F, MBJ 12G and JTC 12E will be feature cows in this family.

**BRED COW | BLACK - RED CARRIER | HOMO POLLED | PUREBRED**

I purchased 12E and her daughter from Sun Rise Simmentals when they were feature lots. I really wanted to have a Spark Plug influence in the black cattle. Her son was a high seller in my last Bull Sale. Check out the pregnant recipis for some of her influence. AI to Mader Walk the Line 92J on April 12. Exposed to DMJ Monopoly 10H from April 28 - June 20. Vet opinion due mid January.

# THE *Mickey* COW FAMILY

The 'Mickey' cow family has essentially been on this farm forever. My Dad got a Hereford cow from his Uncle Jack and called it 'Mickey'. In the early 1970's, I started breeding this cow family to Simmental bulls and upgraded them eventually to purebred Simmentals. Any cow family that can remain in the herd for that length of time, has to be doing a lot of things right. MBJ 51D is a full sister to Springcreek Grand Slam, a very prominent herd sire for Bata Bros. in North Dakota. MBJ 102D is a powerful 'Liner 56U' daughter and MBJ 26G is sure to be a great one.

# THE *Polly* COW FAMILY

I purchased Miss Polaris 114L, a bred Fullblood heifer, from John Dimler (Richard's Dad) in a Crossroads Sale in 1980. This family has continued here for 42 years! Hopefully it can continue for that many more. There are two full sisters by 'McDavid' that will prove to be very good cows.

# THE *Lass* COW FAMILY

I purchased a group of ½ blood cows from Murray Pearson from Percival, SK in 1978. One of them was a Gordon Harris bred 'Viktor' daughter. Her daughter was bred to L7 Country Achilles which produced Springcreek Lass 37U, the start of my 'Lass' cow family. That makes 44 years for this cow family. Over this time period, the calves out of the 'Lasses' were always among the fleshiest in the fall.

5K wandered off from the pasture and her mother in July or August. I had presumed her to be dead in the bush somewhere, but it was a happy day when in late October, Brayden Hall, a neighbor, phoned to say that she was in his pasture. Consequently, she missed getting clipped and pictured. I had considered her to be one of my very best open heifers. She will have some compensatory catch-up and she will reach her full potential. Don't overlook her, as I know the Estate progeny will make a name for themselves.

# THE Gracie COW FAMILY

In the early 1980's, I helped my good friend and neighbor, Ralph Bruce, purchase Simmental herd sires to use on his very good commercial Hereford herd. I then helped him register the resulting half-blood calves and he in turn sold them to me. A 'Country Gold' daughter out of one of these half-bloods began the 'Gracie' cow family. Many good traditional Fullblood sires, including Kulaway Warren and DD&E Gangster helped develop this family before red and black sires were introduced. There are some very good young cows available in this group.

# THE *Mistress* COW FAMILY

In the fall of 1987, I purchased JWS Mistress from the Shurygalo Bros, from Beinfait, SK. I had seen her first when they showed her at a fall show in Edmonton. Glenn Osborne was judging that show and he made her second in a large class. There aren't too many left in this cow family, but her production over the years was too good not to mention. Springcreek Lotto 52Y has Mistress in his family tree as does the percentage bull, Springcreek Tesla 6E, owned by Rocky Meadow Ranch. Lotto's dam entered the Ultra Livestock flush program and now has 43 registered progeny.

# THE *Honey* COW FAMILY

I purchased a Black Joker bred heifer from SYS Simmentals in North Dakota and she was the first 'Honey' cow. She was very quiet and had a super udder. I believe the feature cow in this family will be MBJ 134G. 134G's dam was a beautiful cow, super uddered and the easy keeping, big bodied type. 134G was dry this summer, losing her calf in one of the April storms, but don't let that bother you. She has a typical gorgeous 'Honey' type udder along with that attractive fleshy look.

# THE *Pocahontas* COW FAMILY

I purchased IPU 25E, a Spark Plug daughter, from Barry Labatte's famous cow family. She has been a very productive cow, raising superb males and females. A son, Redford 55H, works as a herd sire for Dale and Judy Smith and he was also used here in our AI program

**BRED COW | RED | HOMO POLLED | PUREBRED**

25E is the dam of the Redford bull that sold to Dale and Judy Smith of Valleyview, AB. This year, she raised two sons of Brooks. She has been flushed, and would certainly be a flush candidate for her new owner. Bull calves sell as Lots 325, 326. AI to Mader Walk The Line 92J on April 10. Exposed to MRK Capitalist 35H from April 28 - June 20. Vet opinion due mid January.

# THE *Arrow* COW FAMILY

I purchased a 'Chuckwagon' daughter from Arrow Creek Simmentals in 2002. Her first two calves were exceptional, both being out of Line Drive. The son was purchased by Doane Bros. and was used here as well. The Line Drive daughter, MBJ 10R, began the 'Arrow' cow family. She was very productive here, including a high selling 'Red Teddy' son to Double Bar D. She then sold to Rainbow River when the 'R' cows were sold in my production sale. She was fourteen years old when she raised her last calf.

Rolex was a high seller in the Meadow Acres dispersal. When considering his purchase, I certainly noticed his dam and full sisters. His dam and three year old full sister were sale features that day and I thought his full sister open heifer was the top black heifer calf in the sale. Once again, you will find easy calving numbers on Rolex. All the homo black Simmental cows in this sale were exposed to Rolex after a 25 days of AI'ing. **Homo polled, homo black.**

Monopoly was purchased from Dana & Megan Johns in their 2021 Bull Sale. They selected his dam from the Skors Dispersal and he came in dam. I purchased him on the strengths of his dam, his phenotype, his gentle disposition and his excellent calving ease numbers. All the black red carrier Simmental cows in this sale were exposed to Monopoly after a 25 days of AI'ing. **He sells with his entire semen bank of 40 doses. Homo polled, red carrier.**

Dam: KWA MS ROCK 14X

Shamrock was the high selling bull in Ashworth's 2021 Bull Sale. His dam is the famous Rock 14X cow that has sixty registered progeny including KWA Red Mountain, KWA Monarch and KWA Can-Am. His sire is a son of the very useful R Plus Venom. Shamrock has outstanding calving ease numbers, easily being in the top 1% for CE, BW and MCE. All of the Simmental bred heifers are bred to him, with the exception of a few AI matings. He is also very dark red which has become a very important marketing tool. Note that he has red hooves with a good foot. Progeny that come easy, are dark red with a proven pedigree will be easy to market. He sells with his entire semen bank of 175 doses. Homo polled.

BULL | RED | HOMO POLLED | PUREBRED

Sire: MR HOC BROKER

Dam: LRX MS BLACK 91A

Capitalist was purchased as a calf from Colton McIntosh. As a weaned calf, I could see his muscle mass in an attractive package. His good uddered dam has thirty-three registered progeny, including MRK Priority, a herd bull for Barry Labatte. He really has a herd bull presence, lots of muscle with an attractive front end and a big foot. All the red Simmental cows in this sale were exposed to Capitalist after a 25 days of AI'ing. He sells with his entire semen bank of 118 doses. Homo polled.

# THE *Jaybird* COW FAMILY

My largest Angus cow family traces back to a bred heifer that I bought from Darren Carvey, SLKA 3N. I retained two Final Answer daughters. They were very attractive females that produced extremely well. The service sire for the bred heifers came out of a 'Jaybird'.

405

# THE *Queen Ruth* COW FAMILY

This family dates back to a feature cow, WOS 28H that I bought in a Crescent Creek sale. A granddaughter, RRAR 15A, that sells in this sale, was designated Elite/Premier in 2022 and may well be the most productive Angus cow that I have raised. Look for the 15A daughters and granddaughters.

# THE *First Date* COW FAMILY

I purchased some embryos (HF Tiger x BXB First Date 208L) at the Mountain View Dispersal and I ended up with a super cow, RRAR 45Z, that started my 'First Date' cow family. They have excellent body shape and superb udders.

# THE *Favourite* COW FAMILY

This cow family also traces to a purchase from the Glendor Dispersal. RRAR 8D is a red carrier that would offer some very good genetics to the Red Angus breed. Her daughters, 7F and 31H, are also red carriers, while granddaughter 5K is homo black.

This No Doubt son has worked very well for me and was an excellent follow up to Mindbender. Thanks to Rob Voice for selecting him for me. His progeny have very nice front ends and heads and come with an attractive muscle pattern. He has a balanced set of EPDs.
