It is important to the Top Cut Sale group that in this uncertain time we take every precaution to make our sale as safe as possible and adhere to all the health protocols.

- Our bulls will be available for viewing on and prior to the sale day.
- Online bidding will be available through DLMS.ca.
- Videos will be online several weeks prior to the sale.
- We have sale staff and knowledgeable cattlemen onsite to handle bidding over the phone or for honest evaluation.

CRAIG ANGUS

On behalf of Craig Angus welcome to the 29th Top Cut Bull Sale.

We realize the last year has been a challenge to everyone but we will keep moving forward. Our philosophy has not changed in 29 years of selling bulls. We want to offer top quality bulls for the commercial cattlemen/women. Bulls that are not pushed, but grown out on a high percentage forage ration with their longevity in mind. Put on grass in late April to the end of October with no extra feed other than what Mother Nature can provide. A strict culling program that begins within hours of birth until they are offered for sale. I strongly believe if I won't use a bull on my cows how can I expect you to use him on yours?

We don't chase fads or rush to buy the latest show ring champion's genetics. We use the same bloodlines in our purebred herd as our commercial cows and background all our calves. The genetics we are offering work. We see it every day when the calves come up to the bunks.

With COVID regulations changing often we encourage you to come out ahead of time and look through the bulls. We will be broadcasting the sale on DLMS for anyone who can't make the sale and videos of all the bulls will be posted on DLMS in early March.

Lastly you will notice a change to this year's sale. Hawkeye Ranching Company Ltd have built a new calving barn and with their increased number of bulls they have decided to have their own bull sale. I would like to thank Leif, Melissa and family for helping make the Top Cut Bull Sale a success.

Please consider this your invitation to join us on March 26th.

Jason & Tanya Craig
Jim & Shirley Craig

It's a real pleasure working with the Craig's on their nutritional needs for their livestock operation. The cow herd utilizes a customized mineral program that is balanced throughout the year. This supports proper bull calf development from a young age. The bull feeding program is built to maximize forage utilization and gut health; they are developed on grass with their moms and then moved onto a balanced TMR that promotes lean muscle. The bulls are challenged with a foraged based TMR to

help them develop to their genetic potential. Organic minerals are used to ensure proper immune function and overall health. Craig Angus uses a total nutrition program on their entire operation, ensuring optimal cattle performance. If you have any questions about the nutrition of the sale bulls, please feel free to call. Best of luck on sale day!

Joe McLean
Beef Consultant

© More Than Just Feed

Each operation has unique challenges and opportunities. Ultimately, our goals are similar, we want to produce cattle that enable us to make a satisfying living at ranching. Over the years we have worked with the unique circumstances here to build a herd of quality purebred and commercial cows. These bulls are the result of careful selection to produce hardy cows tolerant of extreme terrain and weather while raising calves each year that will put money in the bank. The cows graze year round to meet all or part of their forage requirements depending on the season. Therefore, they must have great feet and legs to handle the steep and rocky terrain and exceptional hair coats for conserving energy when the winter winds howl. Additionally, cows are expected to calve without assistance as calving, seeding, and fencing happen simultaneously, so low birth weights and good udders are necessary. Finally, for tasks such as branding or preg-checking we have a minimal crew, so only good tempered cattle are tolerated.

These bulls ran at their mothers' sides on pasture without creep feed from birth until weaning in early November. From weaning until mid-May, they were on a mixed ration of hay and pellets fed at one percent of body weight resulting in gains around 2.5 pounds per day. Since May 20th, the bulls have been on native grass pasture. At the beginning of October, the bulls we gradually started on a ration developed by Cargill for growing bulls. During the winter, long yearlings are fed this ration at 1% of body weight mixed with dry hay while remaining on pasture and walking over a mile a day between feed, water, and shelter. These bulls develop gradually to give them the best chance for longevity. Like the cowherd, we are continually culling animals for any performance, temperament, or conformational issues, so what you see here is the best not only of this year but also of years of herd development.

We are excited to present this outstanding group of the top 25 bulls from the 2019 calf crop. We will be posting a number of sale lot photos to our Facebook accounts and videos will also be available prior to the sale for your consideration. If you have any questions about the bulls or would like to see them for yourself please don't hesitate to contact us.

We look forward to seeing you on or before March 26th!

Colin Forbes & Stacey Wolfe

SIRE - CRESCENT CREEK MOMENTUM 10E

I purchased Momentum in the 2019 Cresnet Creek Sale. After talking to Wes about the production of his Rosebud females, I was confident he would be a good fit for our program. Momentum sires progeny with length, frame, good temperament, and performance. He covered 40 plus females last breeding season and maintained his condition well.

Thank you

To All Our New and Repeat Customers
Who Supported us in 2020!

BEAR CREEK ANGUS

Directions to ranch: 4 miles south of Piapot
and 1½ miles west

The past four years have been hard on the feed supply but these tougher years just further instill in us that Black Angus cattle are the ones that can get us through the tough years.

There are many tools at one's disposal in selecting your next breeding genetics: performance data, EPD's, genetic testing, carcass data, but for myself nothing beats the process of culling. In a world of efficiency, I focus on cattle that will walk soundly the duration of their lives, milk and breed without any maintenance. This leads to fewer cull cows, requiring fewer heifer calves retained, maximizing calf production.

When the structure, udder quality, and fertility is taken care of: I breed for length of body, eye appealing angus character, including an angus head which promotes calving ease, and lots of natural muscle. When selecting a sire, I try to use a bull with the fewest amount of flaws.

Beef cattle have been compared to pork and poultry, but one aspect will always vary, our environment. It changes what type of cattle work where and on what inputs. Our cattle are raised on ranch conditions and are developed slowly to ensure longevity. We solely make our living raising cattle, commercial and purebred, and our cattle work for us because we need them to. And I believe they can work for you too.

Visits before the sale to view the bulls, cows, and herd sires are very welcome. Our website has pictures of the cows and herd sires.

If you have any questions please contact us at:

SIRE - EASTONDALE JACKSON 63'15

Jackson is impressive. Starting with large, good feet, legs with a little extra bone to them and natural thickness with a masculine angus head. His bulls are sure to please, they check all the boxes, but even more so do his heifers; they are incredibly consistent with a stamp to them. The first crop of heifers calved last year and their udder development is second to none. Aside from that, he's an outcross pedigree that does not sacrifice quality in any shape or form. Right now, Jackson and Stoney are our flagship herdsires. I don't believe we can ask for much more than these two sires do, and we are very fortunate to own them.

This guy will grab your attention, definite herd sire here. Extra big topped, square hipped, he moves freely with herd sire presence. He is from an excellent cow that's designated an elite cow by the Canadian Angus Association and us! I feel this bull offers a lot to any program, with a full brother at the top of the pen for next year, the consistency is proven in this cross.

We retained this bull's full brother for in herd use and bred a field of registered cows to him. His full brother's bull calf crop averaged 3.5lbs per day of age, beating both Jackson and Stoney Creek's bull calf average daily gains of 3.2lbs per day of age. I think this bull offers just as much as the brother we retained, so make sure you check him out.

SIRE - MERIT STONEY CREEK 4023

We had high hopes when we purchased 'Stoney', and he exceeded all of them. His heifers are flat out amazing, the bull calves are the most consistent that we have raised. If you are looking for thick, hairy cattle to add spring of rib, and stick some meat on while doing it with moderate birth weights then Stoney sons are the bulls you need. It is amazing how theses bulls weigh up with their thickness and length. They are angus cattle through and through.

We have a lot of history with this bull's mother 56R; she raised 13 calves for us, her heifers were always at the top of the pen and most have gone on to be great cows. Last year's high selling bull to Bone Creek Angus was a grandson of 56R. Maternal brothers have went to Travis Armstrong, Brett Bock, Hal Topham, and Chris Knight.

Recommended for Heifers. While he's 84lbs off a mature cow, we used this bull's full brother on heifers and never helped a single heifer calve. He's a full brother to the herd sire 54D we retained for our own use. A lot of breeding potential in this guy.

54D had impeccable feet, and a physical presence that never failed to impress. He was heavily muscled, nearly phenotypically perfect and lowered the birth weight on his calves like I've never seen before. Really thought a lot about this bull so make sure you check out his two bulls on offer.

A nice balanced bull from a great footed, great uddered cow. We were sad to lose this bull's mother to a lump that we could not get cleared up this past summer. When looking through our pedigrees, when you see a Lucky Sevens cow, you can be sure she has amazing foot and udder structure.

This bull really looked nice at weaning time. Comes from a gorgeous cow, from one of our most prolific and strongest cow families, the lavender lady's. The bulls grandmother stayed until she was 15 years of age and still had perfect feet and udder, and her last calf is in the sale too. I think this bull should work on larger heifers.

TERMS OF SALE: The terms of the sale are cash or cheque, made payable in Canadian funds immediately after the sale. The right of ownership shall not pass from seller to buyer until settlement is made. As soon as the animal is sold it becomes the responsibility of the purchaser.

BREEDING GUARANTEE: All cattle are sound and sell with a responsible breeder guarantee of satisfaction. In the event any bull 14 months of age or over fails to prove a breeder after being used on cows known to be breeders, within six months of the sale date, may be returned to the seller at the buyers expense. The seller reserves the privilege of trying to prove that animal a breeder. Full settlement and satisfaction of all claims is the option of the seller (whether return of the purchase price or replacement of the animal with one of equal value.) Any animal returned must be free of disease and in good health.

CATTLE INSPECTION: All carry permanent identity tags corresponding to the sale lot numbers. All shall be available for inspection prior to the sale.

ANNOUNCEMENTS: All announcements from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay close attention to any announcements.

DISPUTES: In the case of disputes bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The Auctioneer's decision in such matters is final.

LIABILITIES: All people who attend the sale do so at their own risk. The owners, Management and Sale Staff assume no liability, legal or otherwise, for property loss or any accidents that may occur on or about the premises.

CERTIFICATE OF REGISTRY: A certificate of registry duly transferred will be Furnished to the buyer by the breeder for each registered animal after settlement has been made.
