WELCOME FROM THE MANITOBA TEST STATION

It gives me great pleasure to welcome you to the 57th Annual Manitoba Bull Test Sale! It sure has been a tough year with all the uncertainty in the world these days but one thing we can be sure of is people will need a steady supply of protein to meet their dietary needs. As we know beef is a major part of that equation and that will not change going forward as the world population cannot live on plant based protein alone due to our limited land base globally. As I write this seedstock sales seem to be staying strong for quality seedstock! There are always top dollars to be offered for top quality cattle! That is exactly what you will find here at the Manitoba Bull Test Station! No BS and consignors that will back what they are selling.

The Manitoba Bull Test Station is the second oldest test station in North America. We take great pride in testing breeding stock for our consignors and the customers of the test station. It is no coincidence that we have been around for 57 years! The advantage we have over other sales is our bulls and heifers come from many different herds/genetic bases. Once arriving in early October these consignments of animals are tested against one another for performance after a 28-day warmup period. When tested against one another you get a better picture of the genetics and phenotype that are truly superior within a breed rather then just cattle tested among their in herd contemporary group with a smaller genetic base. Truly a test that is rare these days but that is needed more than ever before. Once again this year we will be doing the Pick of Your Peers Bulls for each breed! This was a new thing we did last year where we had board members pick the most balanced bull when factoring in all things like phenotype, growth, structure and genetics in each breed. These bulls headlined the sale of each breed followed by the Top Performing Bull.

All animals have tested BVD Negative and we have a full vaccination program in place as usual to ensure our sale offering is in the utmost health to work for their new owners! I would like to take this opportunity to thank all our consignors that support us in what we do. A big thanks to our past buyers that purchase cattle from us and truly enjoy the benefits of this form of testing!

I am happy to announce as well that we have a new Manager Cody Nolan at the Test Station this year! Both Cody and his Fiancé Kendra live on site to give our patrons the best service possible. Thanks to the two of them for all their help and dedication to the Test Station this season! Feel free to stop in to look at the offering anytime and introduce yourself to Cody. We look forward to an exciting sale season again this year and we will be having the horse sale once again after the cattle offering. We are live on DLMS again this year and time will tell if we can put some in the stands too! Any questions you can give me Kurtis Mckee (President) a call at 1-204-870-1033 or Cody Nolan (Manager) 1-204-763-4696 to help you out in any way we can.

See you down the road!

Kurtis Mckee
Test Station President

STOCK CONSIGNMENTS WELCOME FOR FALL 2021

Welcome to the Manitoba Bull Test Station! It is my pleasure to be hired on as the manager of the test station in June of 2020. I have been involved in the cattle industry for over 20 years, from cow-calf operation, feedlot, purebred, showing and clipping cattle. With the help from my fiancé (Kendra) and 7 year old daughter (Ellie) we run the test station like it is our own, with hard work and determination. Kendra, Ellie and other family members have been a huge help throughout the test year, whether it be, opening gates, helping feed or helping on weigh days. Stop in anytime to have a tour of the test station and find your next herd sire or elite female!

This is your official invitation to consign stock for the 2021 test year. We offer developing bulls/heifers, as well as a mature bull wintering program and a younger bull development. The development bulls/heifers come to the test station within a 5 day delivery period. Once the cattle arrive, they are on a full vaccination program. The test animals are put onto a warm-up ration

for a month. This warm-up period is to ensure that all the animals are put onto a level playing field before they begin the test. Once the warm-up period is over the animals enter a 112 day development period where animals are weighed every 28 days, to ensure their gains are monitored. All bulls and heifers are CUP Ultrasound to determine the carcass characteristics of the animals. All sale animals are run through a breeding soundness evaluation to ensure that the animals that sell will go out and work. There is no better place to develop purebred stock so that they can be compared to many breeders genetics of the same breed and other breeds as well from across the prairies. This is a very useful tool to gauge how every breeder is doing and finding the traits we are trying to select for to improve the beef industry!

Please do not hesitate to contact myself or visit the website with any questions that you may have.

Follow our Facebook page — Manitoba Bull Test Station to keep up to date with what is going on around the station. Finally, I would like to extend a big thank you to Bennett Foster for all of his help getting ready for and throughout picture days.

This is my first time having bulls at Douglas Bull Test Station. I have been in Simmentals for 50 years. These bulls are the best set yet. The cow herd is all polled, fleckveigh and very maternal. A moderate framed and lighter colour bull. Top 10% for milk and

good maternal traits. Would do well in a commercial herd.

BHMA 77H: horned, another dark red bull without much white. His mother is a good uddered cow I purchased from Garry Graham. Dark colored hooves.

BIRTH WEIGHT & CALVING EASE

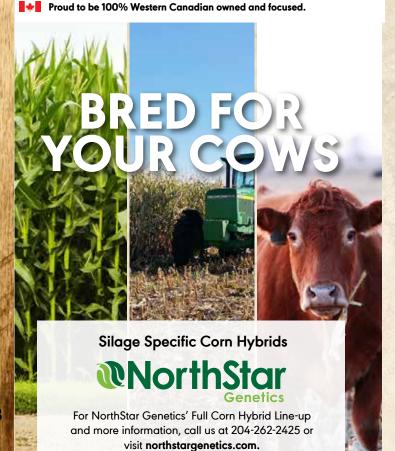

University studies in Wyoming and date in Montana and Colorada lend credence to the following conclusions:

- 1. The birth weight itself influences calving ease by 65%.
- 2. The female has 60-70% influence on birth weight of her calf.
- 3. The bull has 30-40% influence on birth weight of his progeny.
- 4. Pelvic measurement and angle as well as the shape of the calf have 35-40% influence on calving ease.
- 5. Length of gestation greatly affects birth weight. A fetus can gain over one pound per day in the last days of gestation.
- 6. Weather and tempurature the last 30 days of gestation affect the length of gestation.
- 7. Size and maturity of the cow affect calving ease.

Most commercial producers do not take birth weights. Guessing is an inaccurate as driving with a broken speedometer what's thought to be 55 mph may in fact be 65 or 70 mph, and what's thought to be 70-80 lbs, may actually be 80-90 lbs. Remember, everything is relevant, increased growth, frame and performance will increase BW.

A longer-bodied calf will weigh more. If a calf is expected to have genetics for growth, it will display this prior to birth as well as after. As a rule of thumb, it takes a calf weighing 85 lbs at birth to finish at 1200-1250lbs. A cow should easily give birth to a calf weighing 8% of her own body weight. Thus a 1200 lb cow should give birth to a 96 lb calf with ease.

Continued selection for light birth weights will ultimately reduce the mature sizes and performance of your cattle.

Real Industries Ltd

REAL PRODUCTS, REAL QUALITY, REAL PRICES... GET REAL!

PROUDLY MADE IN CANADA

Real Industries has proudly served Canadian and American cattle producers for 45 years. We continue to offer practical and affordable options for their day to day operations.

NEW FOR 2021 is the double wide (side-by-side) alley for low stress animal handling. Your animal moves from tub to squeeze with another animal at its side to promote a calmer experience.

2021 Real trailers utilize a zinc primer to further prevent rusting on stone chips. This, combined with the chip resistant liner up to the 2nd rib on the outside and to the 1st rib on the inside, gives your new trailer maximum protection. Check out the new dump trailer with electric winch for a multitude of small jobs.

CLARKS POCO DOC CLARK'S DIAMOND POCO DIAMOND ROYALE

SHINING COMET SHINING BARGIE BARGIE PINE

Here is a horse that has done it all! Gator is a finished head horse, he has been used to brand and tag calves, rope yearlings, cows and bulls, and much more. He would be great for high school rodeo kids, ranchers or team ropers, whether you're a seasoned roper or just getting started.

He scores great, and is awesome in the team roping box. He has been hauled to team roping jackpots, rodeos and brandings. You can leave him for months, then saddle up and he goes straight to work. He is great to be around. He travels well, stands great at the trailer overnight, is good with the farrier and gets along well with other horses. He is 15.1 hh and well put together. Make sure you don't miss out on this one!

RED SUN CORONA

SUN FROST COLD SUN MOLLY MCWIGGLES

RED RIM ROCK RED RIM CORONA CORONA BOON

Leroy is a nice gentle gelding who stands 14.3. Leroy has been used in the feed-lot sorting and checking pens, as well as in the branding pen and checking cattle on pasture. He has been started roping breakaway calves, and the smarty steer. Leroy is a very easy going horse that is ready to go to work. Ride him everyday or give him a month off and he will be the same. For more information contact Michael Mott (204) 861-0319.

DUAL PEP BOON DOC DUALLY BOOTESSA

SOME LITTLE PEPPY GR PEPPY'S PROMISE DOC OLENAS VALENTINE

Really nice, quiet, five year old sorrel gelding. "Big" isn't just his name this guy is thick and stout. Ranch on him all day and rope at night. He has been used to treat cows in the pasture, roped the heelomatic & started on live steers both head and heel side. He has also worked and put in miles at the feedlot. We will continue to rope on him until sale day. For more information or to come try him out feel free to contact Ory Brown & Janet Rankin 851-5466 or 750-2310.

"Red" is a big strong gelding 15.2 and 1250lbs. He's seen lots of outside miles checking and moving cows and has doctored a few and caught some strays. This is a easy moving gelding with a nice smooth ground covering stride. He's been lightly started heading and heeling live cattle and has been breakaway roped off a bit as well. He's the same if he's rode every day or gets a month off. For more information contact Justin (204)724-8473

SALE TERMS & CONDITIONS

The terms of the sale are cash or cheque at par to the Manitoba Beef Cattle Performance Association Inc. (M.B.C.P.A. Inc.). The buyer assumes all responsibility of his/her purchase at end of said purchase. The M.B.C.P.A. Inc. cannot be held liable after the sale clerk has recorded the buyer's bidding number on the sale receipt. All settlements must be made with the settlement officers of the sale in the office before any cattle will be released. Phone bids welcome. Please contact the Test Station to arrange telephone bidding.

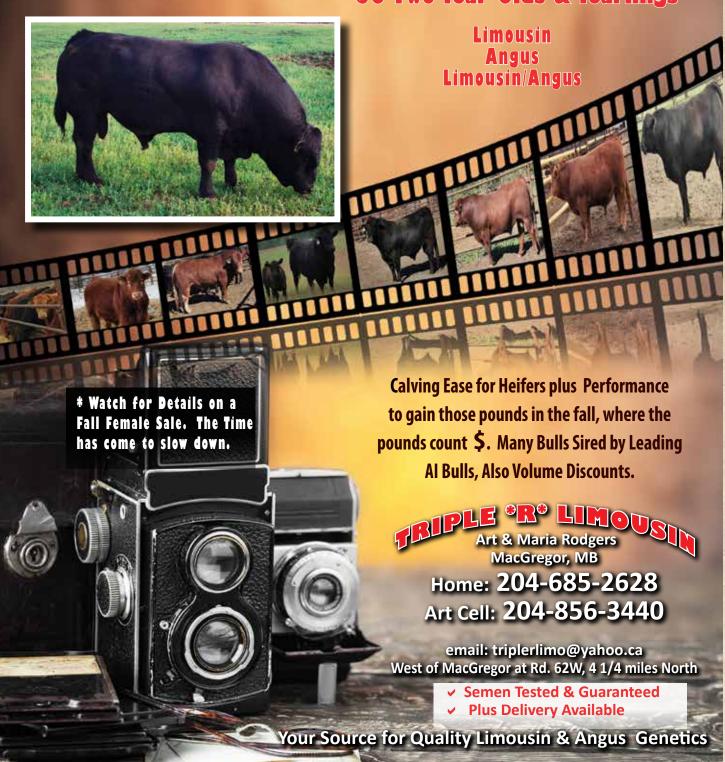

All bulls purchased may be left at the station until convenient for pick up at purchaser's risk by signing a form in the office. One week free board, \$3.50 per head per day after. Please inquire at the Test Station office for details. Livestock insurance will be available from HMS Insurance at the Station on sale day and is strongly recommended to be purchased. The guarantee on a bull is between the buyer and seller. The M.B.C.P.A. Inc. will act as a mediator in case of dispute. To protect both buyer and seller, a non-breeding bull must be reported to the seller within six months of the date of sale or according to the Breed's Code of Ethics. The seller will not provide replacement or credit for physical injury or mismanagement. In the event that your bull is a non-satisfactory breeder, the seller will not under any circumstances, be responsible for more than the original selling price of the bull.

The Manitoba Beef Cattle Performance Association Inc. is only providing a service in providing this sale; persons attending this sale do so at their own risk. Sale catalogues will be available at the sale and copies of the registration certificates on file will be available at the office. Visitors may inspect the bulls at any time prior to the sale. If errors are noted in the report or in the sale catalogue, corrections will be made from the auction stand, and will take precedence over any printed matter.
