Welcome to our 14th Annual Best Bet Bull Sale.

We would like to extend our sincere appreciation to all of our past bidders and buyers, your continued support drives us to do our best.

We are missing the “get togethers” with all of our customers and friends but trust that you are all well. I am sure that many of you are tired of hearing about COVID-19(20-21), so I will deal with that briefly. We will run our bull sale exactly as we did last year! We plan on moving the bulls to Williams Lake one day early on Wednesday, to accommodate freedom of viewing. The bulls will be videoed and internet bidding will be online again with DLMS. We will be respecting the guidelines for your safety with spacing and unfortunately, we won't be able to host a welcome lunch but hopefully will be able to serve through the kitchen facilities. We absolutely see value in you being able to see the bulls in person, it is the best for you and us, you are most definitely welcome to view them anytime here at the ranch or at the lake before the sale. If you are uncomfortable with the situation, we will provide you with any information you may need.

We are fortunate here on the ranch to have both kids at home and to be carrying on in our “somewhat normal” self isolated life. The cows still get fed and we still enjoy the great outdoors. We are thankful to have Leanna here helping with everything cattle oriented, her interest and eye for cattle is uplifting. Thompson keeps the bulls bedded and is making his way through a very disrupted grade twelve. Sadly, the joy of his basketball career has been removed from school. Mom is amazing, she still drives her pickup, gets the mail and keeps up on the activities.

We feel that we are bringing the most consistent set of bulls we have produced to date. We have more black Simmental bulls than in previous sales and this will be the first sale that we have catalogued more black bulls than red.

Our goal is to produce bulls that will be sound, maintenance free and profitable for you. It is our belief that the conditions in which the bulls are raised and the feed that they are developed with will lead to their productivity and longevity.

These bulls have developed in conditions that are similar to yours, rough country and mother's milk, their performance is a result of the cow not a creep feed bin. Feet and legs are extremely important to us as they have to be able to move long distances. We feed a high roughage total mixed ration that is designed to keep the bulls healthy. We focus on the females being trouble free; good udders, easy calving and sound. They need to produce a calf every year, no free rides, no exceptions. We have a great deal of pride in our cows and invest a large amount of time and money to source new herd sires. As usual we have put a lot of emphasis on carcass traits as we still have a viable meat program and these traits are important to us as I am sure they are to you.

As our world revolves around cattle, we always strive for new genetics for next years calf crop. Suitably we have added a polled Fleckvieh that we are excited about, we have been waiting for one that was good and polled. Suitably, because our first Fleckvieh cow was born 50 years ago this spring, Rymar Karina 21C produced the first Full Fleckvieh calf born in North America and was the foundation of our herd. I find it amazing that Mom and Dad imported Simmental genetics and started selling Simmental bulls 47 years ago.

Our thanks to BC Livestock; the crew always does a fantastic job preparing the yards and looking after all of our needs.

If you cannot make it to the sale or would like a little more time and information, the bulls will all be available for viewing at home until March 31st, the coffee is always on. If you wish to have someone do the bidding for you, contact us or the sales staff at BC Livestock. They are familiar with the bulls and would be more than happy to assist you with your sight unseen purchase.

Our sale partners, Ron and Lois, are a pleasure to work with and share our commitment to our customers. On behalf of the Crosbys it is my pleasure to extend our greetings and invitation to join us for our sale on April the 3rd.

See you all at the Lake,

Ian, Anja and Family

	16.4	-0.6	66.4	102.4	29.8	10.5	63.0

A prime example of the Revelstock 12C / Eastwood 22E cross. You won't find a match up that makes easier keeping cattle. While Revelstock is unrivalled for growth, I can't remember ever pulling a calf sired by him, and Eastwood 22E is top of the breed for calving ease, birth weight and maternal calving ease. 29H is stout with adequate muscling and proud head carriage.

Lot 2

EPDS	CE	BW	WW	YW	MILK	MCE	MWWT
	16.1	-0.2	73.8	107.1	35.2	12.0	72.1

165H is cherry red, long spined and thick made. His dam is a pear shaped, broody cow who did a great job here on her first calf. This calf ranks in the top 1% for calving ease, maternal calving ease and API, and the top 4% for birth weight and ribeye area. That's not all either, take a look! This calf is a calving ease specialist, but won't skimp much on performance either, his progeny should be meaty and easy keeping.

Lot 3

EPDS	CE	BW	WW	YW	MILK	MCE	MWWT
	18.0	-1.7	70.3	104.5	29.1	12.7	64.3

174H was bred to be king of the heifer pen. He has a moderate birth weight and is incredibly smooth. We are very impressed with the Dillenger 116D females, they profile nicely, have improved udder quality and are very sound like the bull himself. This calf is a combination of our two go-to calving ease bulls over the past years in our red program, and his EPDs confirm what his pedigree already tells us. He is top 1% for calving ease, birth weight and maternal calving ease.

EPDS	CE	BW	WW	YW	MILK	MCE	MWWT
	10.2	2.3	69.1	104.0	29.8	7.2	64.4

139H is just plain good. He's good tempered, good topped and thick throughout. His dam is a curve bender cross with good calving ease and lots of power. Matched up with the moderate and easy fleshing Chancellor 71C genetics, we couldn't have hoped for any better. Great calving ease numbers here, but a bull whose calf crop will definitely push the scales down.

43H is one of, if not the most, impressive bulls in the pen. His first-calver dam, 102F has sure outworked herself here, bringing this bull calf in off the range at a whopping 935 pounds. He was born unassisted, and has been a standout right from the get go. This cow family is known for their performance, with lots of females going back to 227Y showing the same productivity. He is also a true hybrid, so if you're in the market for one whose calf crop is going to push the scales down, this is your bull.

If there was any cow whose dam I wish was recordable, it's 194Z. Time and time again, walking through the bull pen pondering if there are calves that we need to be adding to our herd bull battery – her's are often on the list. And each time we are reminded that the progeny would not be purebred by the book. Our loss is your gain! This calf is moderate, easy fleshing, has a great top and tons of muscle shape. He is quiet and easy to deal with, just like his beautiful bodied, nice uddered nine year old dam, who still looks and produces like she is in her prime.

EPDS	CE	BW	WW	YW	MILK	MCE	MWWT
	15.6	-1.6	70.7	104.8	26.0	6.7	61.4

This cross has worked so well for us in the past, we just had to make it happen again. 193H has a great long top, and lots of rib and adequate muscle to go with it. He is smooth as can be, and has calving ease and birth weight EPDs in the top 1 % and 2%. A superb curve bender combination, weighing 77 pounds at birth out of a mature cow, weaning at 845 pounds and still gaining 3.5 pounds per day on feed. 193H is a bit nervous, but never a problem. This calf will prove that heifers' calves can fit right on the load of steers with the mature cows' calves. A full brother has gone to Circle G Simmentals & Angus, and another to Ed and Ange Pawloff. A maternal sister is one of my absolute favourite big volume, first calvers, and 112B is out of the dam of Lot 40. Have a look at those footnotes, you'll soon see just how highly I think of this maternal line.

The heaviest black bull in the pen for yearling weight comes with no surprise, as this calf has been gaining 4.6 pounds per day since weaning. 144H's dam has four maternal sisters in the herd, one being the dam of Lot 57. All of these girls as well as their daughters bring in big calves come weaning, and we expect the same growth from 144H's calf crop.

	10.9	2.1	77.1	113.0	22.7	6.0	61.3

This calf has really grown on me. He is gaining 4.3 pounds per day, and carries it well! A big round hip, good top, and still smooth and correct. Though he is growthy, he still has great calving ease and birth weight numbers. His ¾ sister is moderate and easy fleshing, calving in the first cycle along with her mamma.

 Jan 26 WT: 1000 lbs.

EPDS	CE	BW	WW	YW	MILK	MCE
	13.0	-3.7	22	34	25	13.0

Heifer pen deluxe. 164H has a small head and is tidy through his neck and shoulders, but still has a ton of middle and dimension to him. Adequate muscle shape from all angles. He will sire correct, easy doing calves that are born easy.

**Lot 78**

LRX Dillenger 116D

"Dillenger" was the high selling red Simmental bull, topping Robb's 2017 sale in Saskatchewan. He continues to have stellar EPDs. We have now calved two sets of his females and they are some of the most easy-keeping, feminine and quiet young cows in the herd. They profile nicely, and are extremely sound like the bull himself. After giving 116D a year off to see his daughters develop, it is evident that he has proven himself plenty well enough to see another big group of cows this spring.

BJL MR KILLSWITCH 79F

A bull that we acquired out of the South Sask Sale by the popular sire Wheatland Kill Switch. His dam has a very impressive track record, bringing a bull to the sale every year. BJL 79F has added chrome and thickness, and is not a small bull himself. He is still in the top 15% of the breed for CE, BW and MCE.

Erixon Lad 12C

We chose 12C from Erixon's sale based on his mass and substance. He was a high seller from this prestigious sale. Check out his EPDs, he is well above average in every category except one. "Revelstock 12C" saw nearly 50 cows here again this spring; he is unrivalled for growth and still calves exceptionally well, even for a bull with so much performance.

KRSS Red Desperado 4D

We really like the females from our Power Play bull and decided to find another KOP Crosby son. Desperado fit the bill, he is full on and out of a good cow. He is leaving cows with extra length and loads of hair.

SBSF Eastwood 22E

This is one of the most moderate and easy to look at sires in the herd bull pen which we purchased for \$20,000. I'm sure he hasn't dropped an ounce of flesh since the day he got here, and that's pretty impressive in itself considering his depth and thickness. A very complete package that is eye appealing and to no surprise calved extremely well on heifers with EPDs in the 1st percentile for CE, BW and MCE. Spring Creek Simmentals bought a semen package and used him on heifers and mature cows and the resulting progeny are fantastic. We have just finished calving his first set of heifers, they are well balanced, feminine, moderate, young brood cows that all set up pretty udders with ample milk.

Circle G Explorer 40E

A bull purchased based on his performance blended with great CE, BW and MCE numbers, and his dam's quality and productivity. We have been very pleased with 40E's calves. They are thick made, well muscled and some of the heaviest steers come fall were sired by "Explorer." The udder quality and milk production of his first set of females to calve is absolutely ideal. We are very pleased with their phenotype and "Explorer" will be seeing another group of cows this spring as a result.

Mitchells Blk Gold 110E

110E has always been a standout and is as good as any bought bull we have ever brought West. Right from his first month up until now he has always displayed exceptional dimension and muscle pattern, as well as being extremely sound and free moving. His dam is productive and good uddered, with another calf in the sale this year and females retained in the herd. We believe you will find this set of calves to be performance oriented and built to last in the rugged conditions they were raised in, just like their sire.

Muirheads Time Out 263B

"Time Out" as we call him is extremely consistent. We used him on 45 cows last year and he saw another group of cows again this spring. Not many bulls are as sound and trouble free as he is at seven years of age. It is no surprise that he is out of one of Muirhead's favourite cows, and we understand why LaBattes and Circle 7 use a brother.

Mitchells Blk Gold 59E

A calving dream come true. We couldn't have asked for a better black calving ease sire in the past two years. Calves are bright and most come with that perfect white 'money stripe.' 59E has always displayed his sire's thickness and muscle throughout, and the calving ease and moderation achieved through his dam proved to be a great cross.

Red Moose Creek Sawyer 142E

Purchased from Moose Creek Red Angus, we didn't intend on spending over \$20,000 for a heifer bull, but the good people at Triple S Angus definitely wanted him as well. This bull has added stoutness and style to each one of his calves and is still worth every penny.

RED RSL UTAH 835F

The "Utah" herd sire was chosen for his excellent curve-bender performance. He was born at just 62 pounds and yet his two-year-old dam had him weighing 800 pounds come weaning. His heifer calves in the pen are some of the heaviest Angus as well, even off of first calf heifers. We are keeping a son for our own use as well.

Red Mitchell's Park 65E

A 489C son that we retained as a calving ease bull. There is tremendous depth in his cow family going back to the most productive Angus cow we have ever owned, 31S. He calves extremely easily and the calves have good growth.

Ron & Lois Crosby

Vanderhoof, BC

250-567-0521 Cell
ronloiscrosby@gmail.com
www.crosbycattle.com

Welcome to the 2021 Best Bet Bull Sale. This is the 14th year Crosby Cattle have joined Mitchell Cattle Co. to bring you a top set of bulls.

We greatly appreciate the support of all that have attended our sale, and bid on the bulls over the years. We would like to thank BC Livestock for a great facility and staff and the efforts they made in 2020 to get regulations for COVID-19 in place to allow sales to continue. Also, thanks to DLMS for broadcasting our sale last year.

For 2021 the bulls will be at BC Livestock Co-op in Williams Lake for viewing on Thursday, Friday and Saturday before the sale. The sale will also be on www.DLMS.ca for bidding and viewing.

For 2021 we are offering bulls sired by:

JL Renown 7237, his offspring are very consistent in overall mass, good structured and excellent hair. He is a son of S A V Renown 3439, who is one of the top bulls used in the Angus breed today.

Burnett Chinook 5D, his offspring offer exceptional calving ease. The consistency and quality is very impressive. These calves are born small with exceptional vigor. At about a month of age they have already developed a good top and are very growthy. At weaning they weigh up with the calves from other sire groups. The "Chinook" sired bulls will give you great calving ease and a very saleable product in the fall, or females to retain in your herd.

JL Nation 8132, son of S A V Sensation 5615. This is our first group of bulls to sell sired by him. We are impressed how his offspring are moderate at birth and very impressive at weaning. These bulls are smooth fronted, deep quartered and wide topped. Big ribbed bulls that are super fancy in their profile.

We are also offering bulls from well known AI sires: S A V Final Answer, S A V Bismarck and Basin Rainmaker 747L.

Our breeding season is kept short: if a cow is open, late, or not raising a calf...she doesn't live here anymore.

The bulls have been vaccinated with Express 5 and Fermicon 7/Somnugen and treated with pour-on Ivomec. Prior to the sale the bulls will be semen tested and evaluated for soundness. We do not sell any Angus bulls off the farm prior to the BEST BET BULL SALE.

We would again like to thank Mitchell Cattle Co. for having us join them for this event to bring you some excellent bulls.

We welcome you to stop by the farm before the sale to go through the bull pen, you can social distance and have a look at the sale bulls. If you would like more information on the bulls, give us a call.

We, like everyone else, wish things were different so we could enjoy lunch, and visit while viewing the bulls, we have greatly enjoyed the social aspect of our sale for many years.

*Thank you to all of our past bidders and buyers for
your continued support*

Notes

Thank you to BC Livestock Co-op for helping make our sale a success.

We would also like to thank our friends and neighbors who are always there to help when needed.

Terms & Conditions

Terms:

The terms of the sale are cash or cheque, payable at par at the sale location unless satisfactory credit arrangements have been made prior to the sale. The right of property shall not pass until after full settlement has been made. All settlements must be made in Canadian funds with the sale clerks before any cattle will be released.

Bidding:

Each animal will sell to the highest bidder, the seller reserves the right to pass the bull.

Disputes:

Bidding will be reopened between the parties involved in dispute. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision on all disputes will be final.

Announcements:

All announcements made from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay close attention to such disclosures.

Purchasers Risk:

Each animal becomes the risk of the purchaser as soon as sold. We strongly recommend insuring your purchase for full value.

Delivery :

Free delivery to central points in BC.

Health:

All animals in the sale have met all necessary health requirements.

Insurance:

All bulls will be covered in the yards by Hartford Insurance; insurance will be available for long term coverage.

Breeder's Guarantee:

The animals in this sale are guaranteed per the breeder's guarantee of the breed association they are registered with. In the unlikely event that a bull proves to be a non-breeder he will be replaced with a bull of equal value. Should this not be possible, an adjustment will be made to reflect the value of the bull in question or a credit will be issued towards a future purchase. At no time will we be responsible for any costs exceeding the original purchase price and no guarantee is made that semen from any bull will freeze. This guarantee will not cover any situation where the animal has been subjected to mismanagement or physical injury and we will not guarantee any animal that is subjected to any hormonal or surgical reproduction techniques after the sale. Insurance is available sale day and we strongly recommend that you take advantage of this service. We will do our utmost to work with you to ensure your satisfaction should any problems arise.

Rights and Obligations:

The above terms and conditions of the sale shall constitute a contract between the buyer and seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.
