## Welcome

Welcome to the 2021 edition of the Bull Rush sale. I trust after 2020 everyone is ready to move on! The cattle industry remains one of the strong points in our economy and I think as producers we should be proud of that, it goes to show the quality, and sustainability of the beef industry.

This year marks our 19th annual sale, it hard to believe that we started it 19 years ago already, 19 years just goes to show the commitment of the group to produce top notch, functional bulls for the producer. It seems every year the quality of bulls in this bull sale takes another step forward and this year it holds true once again. This year you will see Full Fleckviehs, Red Simmentals, Black Simmentals, and a couple Angus Bulls in the sale. The depth of quality of the bulls in this sale is hard to beat, and you can travel a lot of miles to find this kind of consistency and quality! Back this year you will see Stouts have a great Black purebred heifer and 2 lots of commercial heifers in the sale, so it truly is a one stop shopping experience.

We will be running our sale as close to normal as possible this year, however there will be some AHS rules that we will have to follow, one of which may be a maximum attendance in the building. We encourage everyone to give the consignors a call and stop by their farms to view the bulls! Bulls will also be available for viewing starting the afternoon of FEB 24 in Rimbey at the Agrim center. DLMS will be available to anyone who wishes to buy online, if you need help with setting that up you can give DLMS a call or contact one of the consignors. Also you may contact anyone of our sale staff to help you with your purchasing needs they are more than happy to assist you.

In closing, as a group we would just like to say buy with confidence we are here if you have any problems with your purchases and are committed to making sure your needs are met and that your 100% satisfied with your purchase. Thank you to all our past bidders, buyers, and people that support us it is greatly appreciated without you we wouldn't have a sale!

*Bulls may viewed at each consigners farms prior to  
Feb 23, and Available for viewing at the  
Rimbey Agrim Center starting Feb 24.*

## Can't make it to the sale? Internet Bidding Available.

To view this sale visit [www.dlms.ca](http://www.dlms.ca), Fill out the registration form located under registration and sign-up for your free user account and select a username and password.

BIDDERS - To be approved as a bidder, Log in to [dlms.ca](http://dlms.ca) and click BUYER APPROVAL tab, select the sale you are interested in bidding at and click sign up.

2021 marks the 19th Annual BullRush Simmental Bull Sale and welcome all to what will be a stellar year in the cattle business! Movald Ranches and the RT tattoo have been breeding registered simmental cattle for many years and we have lived through the ups and the downs of the cattle cycles, but one thing that hasn't changed over the years is that no matter what the market is in any particular year, good proven cattle sell better. We have worked hard to bring to you genetics that we feel are right for these times. Easy calving, good gaining polled maternal animals that work, and will keep you profitable and in this business long term. This crop of yearling bulls is probably the quietest and most easily workable group we have ever raised so if docility is something that is important to you make sure you dig into our offering. We welcome visits year around and of course prior to the sale, and if you have any questions or are curious if there is something that will suit your program do not hesitate to contact us. If distance or other factors are an issue, and after living through 2020, we have mostly learned how to communicate digitally so we will accommodate your requests readily. Thank you for considering our genetics for your operation.

The first thing you will notice about this bull is his unique colouring, He is the darkest red you will find, with black under tones. He is tested as a non dilutor, so get reds from your reds and blacks or reds from your blacks. Quiet dispositions flow through his back round. He is a moderate framed animal that has not only some dandy pedigree behind him, but checkout his numbers. His API ranks 2nd and his TI is #1!

This blazed faced grower is one of our top bulls from the 2020 calf crop. Check out his abundance of muscling and WDA. He carries much capacity in the middle, and his offspring will utilize that to convert roughage to beef in an efficient manner. Calving ease is combined here with great performance. Tap into some of these newer genetics as they will not disappoint. With a couple of calf crops, you will wish you had them all like this. Even though he will produce efficient gaining sons, your heifer calves may bring you more than their brothers will!

One item to note on this young bull is his age. He was born on Feb. 7th and has a phenomenal weight gain behind him. He is a tank of a bull that has an extremely quiet disposition. Search his tattoo and check out his lab work. He is out of an awesome coming 7 year old dam that has some additional hip height to her. These Hometown offspring seemed to have gotten somewhat overlooked the first year that we marketed the offspring from him, but guess what bloodline folks seem to be asking about lately?

A very balanced bull with such a reasonable birth weight combined with some really great gains. He also has a ton of hair! These Dreamboat calves start smaller, hang with the pack during the summer/fall, but the more time that goes by they seem to develop into the keeper types you wish you had more of. His dam has a bit more leg under her, and has an awesome udder. Look to Red Dream to give you male and especially females to propel your herd into many profitable generations.

A good solid young blaze faced bull here out of a very quiet dam that has been a real good producer for us. Her maternal great grand dam was RT 16C the 1993 version, that was out of the old Lynn Holb fleckvieh breeding. She was the deepest of liver red in color and possessed those wide hips and an abundance of milk. Infuse that with some Rogant breeding along with the old Antonius line and you have yourself amazing mama cows. The combination here in RT 52H of the red homo polled bull Epic, will be none other than just that...Epic!

If you need the docility trait placed deep into your herd, look no further than RT 74H. He had to be pushed into position for photos, is so very easy to handle, has a huge amount of gut capacity, and has some pretty great weight gains to round things off. His dams lines go back to our old donor cow KRIN Gwen 7W that had a huge and lasting impact on our herd. She was wide hipped, quiet, and a bit of a gate blocker. Take note, RT 74H has just a February 11th birth date.

Another quiet natured Epic son out of a young Lad daughter. This bull has some exceptional length that will carry through to some nice calving ease qualities. He is tested homo polled so he will knock off the horns, and with his growth pattern emerging, he will keep the growth factor intact. This is a good snapshot of what we are breeding here. Maternal qualities with pounds to sell, animals that are easy to work with, and lines that will last a few years so that profitability can be sustained longer term for the initial investment of time and resources that we all put in.

For those that have come to tour through the herd bulls, they already know this young bulls sire. For those of you that are not as familiar, let me introduce to you a son of the bull we have affectionately nicknamed "Bob". Oh Kay Dynasty 28 D is one of the deepest bodied bulls you will find, and passes on his maternal qualities to be savoured for the generations to come. This young Dynasty offspring will be no different. He is backed by some pretty solid cows that have stood the test of time. The dam of RT 111H is out of a son by MVRN Pol Dixie 85P, and she produced until the spring of 2019 at the ripe old age of 15 and still looked like an 8 year old.

Sired by our Full Fleckvieh heifer bull, this fella started of with only an 86 lb birth weight, so quite moderate in that department, and he has some good growth as well. He will mature into a moderate framed traditional type of simmental bull. Solid colored body patterns for many generations back also, so look for him to add that into his calves. If you likem traditional with a lower birth weight, he is your pick.

A finer boned homo polled son of Dynasty that goes back to some of our high calving ease females. His dams first calf weighed in at 58 lbs at birth, and had a respectable weaning and yearling weight, was saved back as a replacement female, and caught first cycle to AI and is due in January of 2021. His maternal grand dam sired our red polled heifer bull RT 322C that was a go to for us and has since gone on to other pastures. Consider RT 165H for the 2nd calvers in your herd...he may give you the confidence to move him into the heifer pen once you see the results.

Another bull with some unique colouring on him. He is red and has black brindle on his muzzle that will have you noticing him from a distance in the pasture. Great performance on him too considering his 74 lb birth weight. His Dynasty dam is a contender here for the top ten young "F" cows award. She is a spiffy up and comer. This bull needs to be admired for his length and hind quarter muscling. He has been an eye catcher from a real young age.

A large blaze face tops this dark red youngster. A good combination once again of red and fleckvieh breeding. RT 204H and many of the bulls you will come across in the Movald Ranches section of this BullRush catalog are February born calves. They are the ones that can get out and grow, with the added benefits of calving ease and polled that we have been working hard to instill in the breeding here. This prospect is no exception.

The dam of this bull is sired by our 163A King bull that left us with many great females. As time has gone by they are maturing into not only eye appealing cows, but producing very well also. RT 214H comes from some real milking types and has a low 78 lb birth weight. If you follow the bloodlines you will notice some of the same calving ease cows in his pedigree as in the RT 165H bull. Oh, and he is a darn quiet one too.

Long and quiet with an abundance of polled in his breeding. Somehow his dam got missed being registered, but nevertheless she popped out a dandy here. He would make a great addition to a herd that wishes to focus on the calving ease combined with a growth curve and that also retains their own replacement females. Or better yet, package up some of those replacement females he will produce for you and you reap the rewards of a premium that exists for raising the good ones.

Out of one of the renowned King daughters and the calving ease specialist Otis. Unbelievable gains on this bull starting out at only 87 lbs and weighing in at 15 days short of his 12 month birthday at a whopping 1370 lbs. An added bonus is that he is as quiet natured as they come. Not only are his physical numbers, stature and data phenomenal, compare his EPD's to all the others out there as they are certainly nothing to sneeze at. These ones are special individuals that do not come along everyday, and is a hard one to part with. If you want some exceptional not only curve bending genetics but also some powerhouse maternal boost to your program take a serious look at MVRN Pol Black Magic 217H.

Out of one of our finest Full fleckvieh cows, this bull is so adequately named MVRN Pol Blazinghot. Thick, soggy, polled and one heck of a hair coat, with a blazed face and at only 10 and a half months old as of January 6th he is on pace to have some exceptional gains by the time he is a yearling as well. The disposition of his sire is second to none and he is stamping his calves with not only great length, but that mellow attitude. This one is a dandy, and well worth your appraisal. He covers the bases, checks the boxes or however else you may describe it when an animal is able to cover a multitude of characteristics. Sought after and proven bloodlines.

Deep red in colour with a blaze face, this here bull is that some would describe as an absolute meat machine. Use him to put muscling and growth in, and he would work really great on a maternally bred herd. He is also tested non dilutor so use him on your blacks and get that money stripe on the offspring. He is a February calf that has good testicle development and is doing quite well. Come breeding time he will be ready to go out and get those cows covered for you, and you will be impressed when those heavyweight and stylish calves to come in at weaning time the next fall.

Very mellow and deep gutted, he will put that forage capacity into his offspring. His pedigree should make him very usable on the red genetics that exist out there as on the dams side they are older tested, true and many have been pushed way back deep into the pedigrees. His sire is relatively new in Canada with some good looking progeny just beginning to surface. RT 271H is a good prospect with much longevity and polled built in.

A ton of hair on this fella, and if you like them shiny with some eye appeal he will fit that requirement. A very stylish bull out of a dam that has raised some real good ones. She is the dam of our Boomtown bull that we used for about 5 years, and he was quite the breeding machine covering more than his fair share annually. Also one full and one half sister are currently in our breeding herd, so a decent track record on his dam. The sire needs little introduction as he a calving ease and maternal breed leader. This combination of breeding will leave little guess work as it is very proven from all angles.

A direct son of the Harvie Red Summit 54B bull that has some respectable growth and lower birth weight. These Red Summit calves came easily and were up and sucking quickly. The dam has always thrown polled calves, and is darker brown to red in colour with a large blaze face. There is a long production record from the cow lines he is derived from, and they have always thrown the longer types that get out and grow. If you analyze this bull from above, he is sleek and long spined, which leads one towards thinking about his ability to work in the heifer pen.

A very interesting pedigree on this blazed faced young bull. His dam is a maternal half sister to one of our top cows here MVRN Pol Red Lady 48D. She is the ideal image of a cow in my eyes, and her half sister and dam of 308H-RT 136 Z-is very similar with a bit less hip height on her. All very easily workable cows and RT 308H will follow in their footsteps. A docile one like most here in the bull pen. This is a great combination once again of the older type fleckviehs combined with the polled red lines.

Invasion is an embryo calf, results from a flush that was purchased from Anchor D Ranch. He is definitely a bull that is easy to find in the bullpen. Heavy pigmented, dark red, significant muscle with an outstanding big-footed structure. This bull is big, soggy and loose made! Can't help but appreciate his sheer mass, he will make a pen of heavyweight steers and big volume heifers. **Non Diluter**

This calf is very stylish and with every day it seems that he is catching up with the big boys in the pen. He is out of one of my favourite cows who goes back to our R5 Sampson bull who we were unable to get our full use out of. The daughters we do have from him are large volume type cows and easy keepers. He will take you to the top.

On behalf of Stout Bros., we would like to welcome you to the the 19th annual Bull and Female Sale. Now more than ever we want to invite any interested parties out to the farm before the sale to look over the bulls in their natural setting. As well as view the cows behind the bulls something we think is very important. Once again in 2021 we will be offering commercial heifers with one group being true F1 females, along with a black registered heifer. Weaning weights taken August 25th and Yearling Weights were done Jan 1st. As always our bulls have been slowly developed on the Country Junction Right Way beef ration pellet and fed free choice haylage. All the bulls have all been tested for diluter gene (if bred to black cows non dilutor will have no greys) , homozygous polled (homozygous polled bulls will have no horned calves) and coat colour where applicable. DNA test results will be seen at the end of each footnote, if you have any questions about the DNA testing give us a call and we will go over it with you. The bulls and heifers will all be videoed and can be viewed at you convenience 2-3 weeks prior to the sale on DLMS, Cattlevids, or our Facebook page. If you have any questions about our offering feel free to give us a call, text or come see the cattle in person, we would love to hear from you. Hope to see you all February 25th in Rimbey!

**POLLED PUREBRED  
STBS BIG JAKE 37H**

CA-PG1334260 STBS 37H 4/1/2020

Its been a few years since we led our offering off with a red bull but if there is a bull that deserving its Big Jake. Our only Amber Jack Bull this year and he is an absolute chunk that has been a standout from day one. Wide square hip, big topped, long spined, deep sweeping rib cage and dark blood red colour to boot. We have been very pleased with the performance on the Amber Jack cattle and really convert pounds when they hit feed. Big Jakes dam is without a doubt our number one red cow on the farm, every year she puts one in the keeper pen and every year it's at the very top. We retained a full sister to Big Jake last year and she has a beautiful tight udder that you wouldn't want to change. If your serious about raising top quality, performance, easy keeping cattle this is your bull! Big Jake will be big time! **Tested Homo Polled - Non-dilutor**

A little different twist on pedigree here for a red bull with the cross of Winchester and our big polled fullblood cow, Penny. We have crossed Penny on purebred red and black bulls many times with great results. We choose calving ease sires to reduce birthweights as she is a big old cow that could probably birth a baby elephant. She has put two bulls through this sale selling to Gary Shnell and Dan and Tara Nicholson, with two daughters being retained in herd. War wagon may come with a bit more birthweight but I urge you to study his smooth made shoulder and extra length of spine, top 15 percent in the breed for calving ease and an actual weaning weight of 924 on August 25th.... sounds like a money-making combination! **Tested Non-dilutor.**

We have only used two straws of Blaze and have gotten two good bulls out of him. Last year's Blaze bull was purchased by Nick and Camille Jenkins and reports on the bull have been very positive. Brannigan is another outcross red bull out of a half fleckvieh cow that transmits performance into her offspring. Expect Brannigan to do much the same. Maybe not the most endearing picture of him as he wasn't as cooperative in the picture pen as some but is a bull that has all the goods. A bull bred for performance and with heavy weight steers fetching premiums this is a bull you're going to want to own.

John Wayne will be our first son out of our newly acquired heifer bull SKORS Bootlegger 85F, known around our place as Pudd. We only had a small sample size of the Pudd calves as we Al'd most of our commercial heifers the first cycle. The ones we do have we are very impressed with. HE calved very well and although the calves were younger and off of heifers, they weighed right up with the rest. They might not be the largest framed in the pen but believe me, these moderate framed stout calves really blew us away as we ran some across the scale. John Wayne is a carbon copy of his sire, stout, long spined, big scrotal, and an abundance of hair we all love. If you're looking for a bull to reduce frame and not give up pounds, John Wayne will get it done. **Tested homo polled - Non-Dilutor**

The long black bull in the pen this year. Ringo Kid so happens to be a maternal brother to our high selling bull, Shadow a few years ago to Randy and Kathryn Dolman. We purchased a half interest back in him to use on our commercial herd and to clean up on the blacks after AI. We were very pleased with his offspring, siring flashy steer calves that pushed down the scales and quality, tight uddered, heavy milking females. Ringo Kids maternal sister is an absolute power house that we ranked number 1 in the bred heifer pen. She calved in late December and looks to have a very bright future. A nice moderate birth weight with a calving ease EPD in the top 15% with good actual performance numbers, combined with an awesome phenotype on a good solid foot. You won't go wrong with Ringo Kid. **Tested Homo Polled Hetro Black**

We have had good luck using Hextor on our fullblood heifers the last few years, they come easy and they get up and grow. This is Hondo to a "T", born with a modest 88 pound birth weight and weaning off his first calf dam August 25th at 874. Not bad from a moderate first calver! In 2018 the lead off and high selling bull was a Hextor selling to Wilcooke Simmentals at Caroline, calving reports from Rocky were very strong. Hondo sports a wide top, thick, well-muscled rear quarter all wrapped up in a moderate package. This is a bull we rank very high on our list and has caught the eyes of many touring the pens. **Tested Non-Dilutor**

**69** FLECKVIEH FULLBLOOD  
**STBS YELLOW RIBBON 84H**

Over the years we have admired the production record of the great donor cow Kananaskis at Ferme Gagnon. She has over 30 progeny registered in the CSA herd book, many of which that have made great contribution to the breed. In the fall of 2018, we purchased these embryos along with an additional flush, I think that alone speaks volumes on how we feel about this cow. A full sister to Undeafated and Yellow Ribbon raised a \$38 000 bred heifer this fall purchased by Ghanim Cattle Co. She will be walking our pastures and without a doubt you will be hearing about her in the future. In all honesty, we were hoping for heifer calves to build our own cow family around but when you get bull calves like these two you don't complain. The consistency of the cross with Spitfire and Kananaskis has been remarkable. Ferme Gagon has flushed Kananaskis three times this way producing top males and females alike, look for these two sons to continue the trend. A little different hair coat but many of the same great qualities between them. Yellow Ribbon had a much better recip so is carrying a few extra pounds than his counterpart. These yellow bulls are becoming harder and harder to find and with how tan hided cattle are selling at the markets, you might want to dig in a little deeper on Yellow Ribbon. As mentioned Undeafated was mothered by a recip that thought he shouldn't suck her back half and eventually went dry. Since weaning he has kept pace with the rest of the bulls and really starting to shine. Deep blood red, polled head and backed by one of the industries best. Yellow Ribbon or Undeafated, either way, you cant go wrong!

Another bull from our ET program from Justified and MS Zander, a beautiful polled cow at Elm Tree farms in Ontario that we were lucky enough to purchase a flush on. We have had two calves thus far from this mating and it has really clicked, we eagerly await to put more in this spring. We have always admired the Justified cattle for their phenotype and good performance. I would disregard True Grits weaning weight as he had a very poor recip that we eventually lost in late spring. He virtually was on his own after reaching a month of age but really took off once he was on feed. Again, a little larger birthweight than some may like but these embryos tend to go over due quite often. A big time performance bull here that will sire an impressive set of calves. Let's see who has their homework done sale day, he will be a wise investment! **Tested Non Diluter**

Here will be our first set of sons from Ballistic, a mature bull we were very excited to acquire from XRC Simmentals in Saskatchewan. We had admired Ballistic throughout his development at Beechinor Bros as a calf and after seeing his progeny at XRC we knew he would be an asset to our program. The Ballistic/Sue cross clicked very well and will be doing again in the future. If you study our footnotes you will know what we think of this cow family. Without a doubt our top family, they just flat out produce the good ones. Suzie, Leatherneck's great grandam will enter our donor pen this spring at 15 years old still boosting perfect feet and a good udder. Simply Sue has followed the trend, producing calves for Beechinor Land and Livestock and Tyler and Karen Pletz on her first two tries. Leatherneck will produce soggy heavy weight steers and females you won't want to part with. Step in here on one of our best! **Tested Non Diluter**

Big Trail, the younger of the two Ballistic calves, patterns much the same as Leatherneck. Deep, soggy well-muscled and great colour pattern on a solid black foot. His dam cherry is a flashy young up and comer with a terrific udder, producing a good bull for Arden Loomis's heifer pen in last years sale. Here is a good bull that will add an element of calving ease with performance. Our birthweights were a bit larger last winter but don't let that turn you away. This cow family consistently transmits short gestation and lower birthweights. Big Trail would work well on a set of second calvers and mature cows for sleep easy nights and big pay cheques come fall. Once again, the females from these Ballistic calves will be tremendous. **Tested Non Diluter**

There was a big debate on whether or not Red River would lead off our bulls in the catalog. We make no bones about the Simmental program being the drivers seat of our program, to even debate having an Angus bull lead things of tell you what we think of this bull. 22G is the definition of a power red Angus bull. He suffered an injury on pasture and still weaned off his dam at a hefty 860 lbs. He hasn't slowed down any since in fact he's gained his way past all his counterparts including the Simmentals to weigh 1412 on Jan 1st! Talk about performance. IT comes as no surprise given his sire Rollin Deep is known for good performance traits. With the the power, muscle and style Red River possesses it's easy to look past the maternal values he will provide. This would be a huge mistake because 22G is backed by a great mother cow we purchased from the Chitticks. She's backed by the great cow maker Lazy MC Detour 2W and has picture perfect udder. Worth the trip to Rimbey... he will not disappoint.

Rio Lobo is a direct son out of the \$120 000 MRLA Resource bull. Although our angus herd is smaller, we have done our best to source the best genetics available to provide our customers with angus cattle with a little extra performance. We didn't get many straws of Resource but we have been impressed with the quality of the calves in our herd and in others. Rio Lobo damn was purchased out of Linda Weins reduction sale as the high seller. She has done a nice job producing a heifer for the keeper pen and Rio Lobo. If your looking for angus bull to use on your cows to add a little more growth but still calve well, take a long look here!

We have admired the Ter-Ron Parker cattle in other herds for their added muscling ability, something that we are trying to incorporate into our angus. Rio Bravo will be the first of the Parkers and comes from a very solid cow family, the old 26x cow raised her fair share of good ones. Two full brothers to the dam of Rio Bravo have sold through this sale to Jordon Livestock. Rod has been very pleased with both sons and uses them on his purebred herd both in the heifer pen and on cows. We also have a full sister to Rio Bravo due to calve any day that is spectacular and sure to add into this already stellar cow family. A shorter gestation bull here with a stacked cow family to back him, there is no guess work with Rio Bravo.

Cahill is almost as thick as he is tall! This moderate framed rascal is our second of our Parker calves and is going to sire quite the set of thick well-muscled calves. The dam to Cahill was another cow purchased from the Linda Weins reduction sale and she is virtually flawless, in my opinion she is phenotypically our number one red angus cow. Great strong foot, awesome leg structure, tremendous udder and always in top condition while raising a good calf. A bull that will moderate frame, add thickness and quarter to his offspring. Red Angus bulls with this amount of quarter are sometimes hard to find, a good young bull with very workable birth weight and a very bright future!

We don't sell many heifers but with our growing herd and high number of black heifers this year we thought it would be a good time to offer one off the top of the herd. Lana comes a good purebred cow that has done a really good job for us. She has raised bulls for Monty Youb and Dallas Frank and we were lucky enough to rent Daddy Sang Bass from Dallas to use on a couple of cows and had very good results. Sired by the new AI sire proclamation gives you a little bit of new blood in the purebred world. A very good, honest heifers with a nice set of EPDS that will go out and work for you.

## Stout Simmentals - 2 Pens of 3 Commercial Heifers

After a year off of selling heifers in the bull sale we are back with 2 lots of 3 heifers that come right out of the keeper pen. These heifers were selected from top producing cows and our own Purebred Simmental and Red Angus sires. The heifers will be palpated by a vet for breeding soundness and come with the same breeding guarantee as our bulls do.

## Thank-You to our 2020 Buyers!

### TERMS & CONDITIONS

**TERMS:** The terms of the sale are cash or cheque payable in Canadian Funds at par immediately following the sale. The right of ownership shall not pass until after settlement is made. All settlements must be made before any livestock will be released.

**DELIVERY:** Bulls will be wintered free of cost until April 1, 2021 providing the bulls going back to their farm are insured for all risks from the date of sale until purchaser obtains possession. After such date there will be a \$3.00 per head per day charge per bull. Assistance with delivery arrangements will be made available at cost.

**INSURANCE:** Cattle are the property of the buyer as soon as the auctioneer declares them sold therefore buyers are urged to insure their animals. An insurance salesperson will be in attendance.

**FLECKVIEH STATUS:** All bulls that are at least 5 generations Fleckvieh are considered Full Fleckvieh. Fleckvieh percentages are determined by each individual consignor to the best of their knowledge. It is recommended if further research is required, to check with the Simmental Association.

**CERTIFICATE OF REGISTRY:** After settlement has been made the buyer will be provided with the proper registration papers, duly transferred on the record of the Canadian Simmental Association. Further transfer to the herd books of other countries shall be at the buyers expense.

**BREEDERS GUARANTEE:** Standard terms set forth by the Canadian Simmental Association, with the exception where any animal is subject to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

**ACCIDENTS:** Although every precaution will be taken to protect the safety and comfort of buyers and public, neither the consignors, auctioneer, sales staff of facility assumes any responsibility in this matter and disclaims any liability, legal or otherwise, in the event of accident or loss of property.

**FERTILITY & HEALTH:** All bulls have been under a full herd health program. All bulls will be semen tested prior to the sale. In order to assist our customers better. Should you have any questions please give us a call.
