WELCOME

Welcome to the HBH Angus Farms Cattleman's Connection Bull Sale for 2021. We are having the sale at the farm this year which is going to make it much easier for us and give you the opportunity to view the bulls in their natural environment.

HBH Angus Farms Inc.

Box 94

Oak River, Manitoba

R0K 1T0

Neil Carson 204-773-6927

Darcy Heapy 204-365-7755

The bulls are developed on a TMR ration with hay, silage, oats, and proper mineral for their development. They are fed for longevity in mind but enough growth so they can go out and work. We don't have any open heifers in the sale this year but have decided to put a Pick of the Heifer Calves for 2021 in the sale. This will be open to all heifer calves born from our walking herd sires, AI program and even our embryos calves. There will be an excellent selection for you to pick from and anticipate showing the lucky buyer around to choose from approximately 100 heifer calves.

We hope you can come to the sale. I think we have a good mix of calving ease bulls and performance type sires. Bulls can be viewed at the farm any time prior to the sale if you choose to bid on DLMS instead. We will keep the bulls at the farm and deliver them to you when it works for both parties. If you have any questions or need help picking out your bull give myself or Darcy a call, we would be happy to talk to you!

FROM THE DESK AT T BAR...

Welcome to the annual HBH Cattleman's Connection Bull Sale! With HBH being one of the largest Angus cow herds in the province you can be assured of top-quality Black Angus bulls. Neil Carson and his crew have studied this cow herd many times over to make the right breeding decisions for you, the buyer. Whether you need performance-oriented cattle, or you have a heifer breeding project in mind, the bulls available through this sale have been designed with these credentials in mind.

HBH uses extensive AI as well as having one of the most powerful walking herd sire batteries within the breed. The data these cattle display through EPDs and overall total pounds per day is impressive. The cow herd is very maternal hailing back to the famed Brookmore herd that was very popular nationwide. Look for great customer service with an added value product from the HBH program that also contains a very strict culling process when deciding on which bulls get entered in the sale. Also, a feature in this event is the pick of the open heifers. Keep in mind HBH has been aggressive in embryo transfer so the pickings in this group are of high caliber in type and pedigree.

Please note we are having the sale right at the nicely managed HBH yard. This great facility is perfect for viewing the bulls in their own setting and be able to see mothers responsible for these future herd sires. Again, all of us at T Bar C are knowledgeable of the HBH program so please call or text us with any questions you may have or to bid on your behalf!

See you at the farm!

- My pick of the pen! This is a very complete calf with great depth, style, wide top, deep quarter and has the herd bull look!
 - Dam has bulls that have sold to Tony Czeranko and Jason Yanke.
 - 48H's growth EPDs are in the top 1% of the breed.
 - Use him to add performance, style and thickness.
- Retaining 100 straws for in herd use.

-2.0	3.6	65	112	22	94	775	1235

- Very stout, very compact son of Admire.
- WW and YW EPDs in the top 10%.
- The Admire progeny are very easy to pick out. They have the extra look to them in a nice moderate package with good hair coats. Calves are born very easy and maintain good growth. 85H should follow in his father's footsteps.

- Very chunky Sim-Angus bull with a lot of substance, good hair coat and nice shape.
- His dam is a young cow with a lot of future. Her first calf sold in our female production sale to Daryl Craik and Anna Walsh of Neepawa.
- These Sim-Angus bulls are designed for added power while keeping calving ease in mind.

trouw nutrition
 a Nutreco company
 trouwnutrition.ca

Trouw Nutrition is proud to feed this great lineup of bulls. These bulls are given a balanced ration which supports better health, better fertility and longevity. The bulls are fed a balanced TMR throughout the winter, developing them at a moderate rate, to develop a good working bull. The goal is to feed these bulls a good quality ration, while not pushing them too hard to avoid foot problems and fertility issues. All bulls are on a high-quality textured ration, which includes: chelates, hydroxy trace minerals, and Rumensin®, to maximize animal performance. Congratulations HBH on a great lineup of bulls, we wish you a successful sale.

- We used the 163E bull a bit before selling him to Hylife. We didn't DNA the sire so this guy will sell unregistered but is a purebred.
- The sire is a very good looking Rage son and this son looks the part also.
- He has a low BW and good muscle.
- His dam goes back to our 147W cow that we flushed this past year that also has a son in the sale.

PICK OF THE 2021 HEIFER CALVES

We've decided on something a little different this year. Seeing as we don't have any yearling heifers in the sale this year, we have decided to do a pick of the 2021 open heifer calves! This will a pick from approximately 100 heifer calves. Open to any of the females sired from our walking bulls to our AI calves or our embryo calves.

Pick must be made by October 1, 2021

HBH Herd Health 2020-21

Vaccination Program

The HBH breeding herd is on a modified live program for BVD and IBR. These vaccines are given pre-breeding in the spring of the year. Proper vaccination for these two common viruses reduces the risk of reproductive losses in the cow herd as well as protecting against the odds of having calves born with persistent BVD infections. Persistently infected calves can have drastic effects on overall herd health through the constant shedding of BVD virus which can be carried on through the life of the animal.

The bulls and heifers are vaccinated at birth/boosted prior to pasture turn out and again in the fall against the common respiratory infections including BVD and IBR which also gives them their primary reproductive protection against these viruses. Blackleg vaccination occurs prior to pasture turnout and is also boosted at weaning. The heifers and the bulls are again boosted prior to sale for BVD and IBR, the same as the breeding herd. A booster for blackleg is also administered at a year of age.

All animals are treated with an ivermectin pour on in the fall for lice and internal parasites.

Bull Infertility Evaluation (Virden Animal Hospital)

Bulls are assessed for conformation, examined internally and externally for abnormal development of sexual organs, scrotal measured and semen is collected and examined for normal concentration, motility and morphology. Breeding behaviour to ensure adequate libido and proper penetration needs to be assessed by the owner on pasture particularly for virgin bulls. Having your own herd veterinarian evaluate newly purchased bulls is also encouraged.

One of four scores is given to the bulls.

1. Satisfactory: Bulls are conformationally sound, meet minimal scrotal measurement requirements for age, and meet minimal semen requirement for concentration, motility and morphology.
2. Deferred: Bulls are conformationally sound, meet minimal scrotal measurement requirements for age, but semen production does not meet minimum requirements and bull is under 16 months of age. Just a maturity issue.
3. Questionable: All satisfactory requirements are met but bull may be lame or have abnormalities such as penile warts or a severe frenulum that needs to be rechecked at a later date.
4. Unsatisfactory: Does not meet minimum requirements for scrotal measurement, does not meet semen requirements and is over 16 months or severe conformational issues.

Normal Expectations for Yearling Bulls

12 months old – 45% will score Satisfactory on evaluation (55% deferred)

14 months old – 75% will score Satisfactory on evaluation (25% deferred)

16 months old – most will score Satisfactory on evaluation (rest unsatisfactory)

The above numbers were taken from the third edition of Bull Breeding Soundness (2013) Albert Barth Western College of Veterinary Medicine – Theriogenology

It is biologically normal to have deferred bulls when dealing with animals that are under 16 months of age. Producers need to consider when your turn out date and age of bull (if deferred) to determine if it is likely to be the bull for your program. Remember well over 90% of deferred bulls will reach maturity by the time they are 16 months.

TERMS & CONDITIONS

TERMS:

The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance, unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. Current exchange rates will be announced sale day. All monies are in Canadian funds.

BIDDING:

Each animal will sell to the highest bidder...no by-bidding will be permitted. Disputes - Bidding will be reopened between the parties involved in dispute. If no further bidding is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision on all disputes will be final.

ANNOUNCEMENTS:

All announcements made from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay close attention to such disclosures.

CERTIFICATE OF REGISTRATION:

Each animal will carry papers issued by the Canadian Angus Association, unless otherwise stated. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

PEDIGREE ESTIMATES:

Pedigree Estimates (PE) are created on the projected mating of the animal's sire and dam based on averages of the two, creating estimated values that do not hold the same accuracy of actual EPDs issued from the association and should be used as such.

HEALTH:

All animals in the sale have met all necessary health requirements.

GUARANTEE:

Each animal becomes the purchaser's risk immediately after the animal is sold. All animals in this sale will be sold under the terms and guarantees set forth by the Canadian Angus Association with regard to health, freedom from defects and from both reproductive and specific genetic unsoundness.

LIABILITIES:

All persons attend the sale at their own risk. The seller, facility owner and sale manager assume no liability, legal or otherwise, for any accidents that occur. It is understood that T Bar C Cattle Co. (2013) Ltd. is acting only as a medium between buyer and seller and is not responsible for any obligations to collect or enforce collection of any monies between parties and any legal action that may, in extreme cases, be taken must be between buyer and seller. T Bar C Cattle Co. (2013) Ltd. assumes no responsibility of any credit extended by the seller to the buyer. The buyer must look to the seller for fulfillment of all guarantees and representations made hereunder.

INSURANCE:

We strongly recommend that insurance is purchased for full value.

ERRORS:

All announcements at sale time, written or oral, supersede any written material in the catalogue.

U.S. BUYERS:

We will announce the exchange rate on sale day and all veterinary export costs will be covered by HBH Angus Farms.

SEMEN:

We retain the right to draw in-herd use semen on any bull in the sale at the new buyer's convenience and our expense.

TRUCKING:

HBH Angus Farms will deliver bulls free of charge within 750 miles of Brandon, MB.

SIGHT UNSEEN PURCHASE PLAN:

If you are unable to attend sale day, you may call or send bids to the consignors or any member of the sales management team. Those who are interested in this plan are urged to contact anyone of the consignors to discuss your bull requirements and determine a budget. Every effort will be made to buy you the right bull or bulls, at the right price to make you a repeat customer. If for any reason you are not satisfied with any of the cattle you purchased on order, you are under no obligation to accept them.

WINTERING POLICY:

Wintering of bulls is free until April 15, 2021. We ask purchasers to state their intentions for wintering at the time of settlement. We strongly encourage you to insure your bulls under this policy.

CATTLEMAN'S CONNECTION BULL WARRANTY:

Cattleman's Connection guarantees to sell you a bull that is structurally sound, a bull that has passed a semen test and a breeding soundness evaluation by a licensed veterinarian. Should any bull fail to be a satisfactory breeder - unable to physically service a cow or heifer - he will be replaced with a bull of equal value. Should this not be possible, an adjustment will be made to reflect the value of the bull in question, or a credit will be given towards the purchase of another bull.

IN SHORT, WE GUARANTEE TO PROVIDE YOU WITH A SOUND, BREEDING BULL.

We, however, will not provide replacement or adjustment for physical injury or mismanagement. Bearing this in mind, we stress the importance of insurance on your bull. At no time shall the seller's liability exceed the purchase price of the bull. Should you have a problem with your bull, call us right away. We will work with you to make sure you are satisfied with your Cattleman's Connection bull.

HBH Angus Farms uses Canadian Angus Performance Program whole herd reporting.
