SAJ SIMMENTALS

22nd Annual Bull Sale

OFFERING A SELECTION OF YEARLING FULLBLOOD,
RED AND BLACK SIMMENTAL BULLS

TUESDAY, MARCH 16, 2021

SALE TIME 2:00 PM CST

**LLOYDMINSTER EXHIBITION GROUNDS
LLOYDMINSTER, SK**

From the desk at T Bar...

Welcome to the 22nd Annual Kuntz Simmental Farm, McIntosh Livestock, SAJ Simmental Bull Sale, March 16, 2021 at the Lloydminster Exhibition Grounds, Lloydminster, Saskatchewan. This annual bull sale is one of the oldest continuous running Simmental Bull Sales in Canada, maybe even North America. Over the past 22 years this event has yielded many purebred herd sires in addition to hundreds and hundred of bulls selected by farmers and ranchers throughout Western Canada. Many of these buyers are repeat customers which states that the bulls are of the highest quality and money-makers for the users.

The 2021 lineup might well be the strongest, most uniform to date. The full bloods are rugged and stout... they have always been a feature here and this year will be no different. The purebred division is by far the most even set ever, both red and black. Many of the bulls are homo polled and several homo black. Optimal in frame size, they display thickness with top, plenty of middle, with tons of hair and testicle. No doubt, credit must be applied to the powerful cow herds that produce this high-quality product... the rewards are the daughters in the replacement pastures.

There are many sales each spring... each sale offering the best... well... after twenty-one years you can be assured, they have been around that long for one main reason... "the cattle work!"

The bulls will be available for viewing the day and evening prior in the heated sale facility. Feel free to visit any of the breeding operations anytime prior where you can see their mothers or do not hesitate to give any of the guys a call to discuss their bulls and which bulls will fulfill your breeding requirements.

Plan to be with us on March 16th and select your value-added herd sires... if you cannot attend be with us online.

During these times, feel free to call anyone on our T Bar C Team to discuss or purchase any of the cattle offered. We have graded each individual and will be pleased to assist in a professional and confidential manner.

Watch and Bid Online...

Well these past 12 months have been quite interesting to say the least, but here we are preparing for another bull sale. Not only would I like to take this opportunity to invite you all to our annual bull sale in Lloydminster on March 16, but I would also like to thank all of our past customers for your support in our breeding program. Your continued support is what drives us to produce the best genetics possible to allow you to prosper in the cattle business. We take pride in our cattle and our goal is that you can also be proud of the cattle that you have purchased from us.

In these uncertain times, we now more than ever, we encourage you to come evaluate the bulls prior to the sale. Whether that is any day at the farm, where you can see the bulls and their mothers, or stop in at the Exhibition in Lloydminster where you can view them indoors on March 14, 15 and 16th.

At the time of cataloging, I am waiting on Diluter gene test results for our fullblood bulls as well as a few polled tests on some of the polled bulls. Those results will be available prior to the sale.

Please check our website www.kuntzsimmentals.com or our Facebook page for those and other updates regarding the sale. We are located approximately 40 km south west of Battleford off Highway #29. The coffee is always on, we would love to show you around.

Kuntz Vortex 60G

517C does it again! Hotshot is exactly the type of bull that we strive to raise. The terms: thick, square hipped, soggy, big ribbed, hairy, eye appealing, herd bull look, all describe Hotshot. He is a big performance bull that travels freely on a big sound foot. A full brother sold last year to James Creek Simmentals, ND. and Virginia Ranch, AB. bought a maternal brother a couple years ago. **Full Fleckvieh/Diluter Test Pending**

Hefner is a typical Esposito son, Ruckus is a bull that has been a real head turner from the beginning. He is a very well balanced bull with lots of length and a nice level hip. But what really tops it off is his color, they don't come any darker or with much less white than Ruckus. 715E is a moderate framed cow that puts it all into her calf, if only every cow could wean off the percentage of bodyweight that she does.

Kuntz Ruckus 6H with Dam

Here's a bull that is smooth made with good length and a nice square hip. The 521C cow has been a real solid producer for us. She is an attractive cow with an excellent udder. This is the fourth year in a row that she has put a bull in the sale and it looks like next year will be the fifth as she has a real nice full brother on her again this year.

Haggard is a very masculine, heavy muscled Full Fleckvieh bull. His dam, 522C, is a product of our embryo transfer program out of our top producing Miss Moses cow family. She is a full sister to the dam of Lot 1, half sister to dam of Lot 6 and the grand dam of Lot 3. If you want a herd bull from a highly proven cow family, be sure to check these guys out.

El Capo is quite an impressive bull with big time performance. One has to admire the amount of mass and muscle that he carries through his flank and into his hind quarter. He has all the attributes of a big time herd bull but when you add his polled head, it makes El Capo a true feature bull. The 308A is one of my favorite cows and she has a reputation for raising front end herdbulls. We plan to retain some semen on El Capo and put him to use in our own herd.

Here's a pair of interesting ET brothers. Jim Beam is exceptionally thick made with a strong top and a little extra muscle expression. Ruby Red drew the short straw and ended up with a bit of a weaker recip and has been playing catch-up all year but has come along quite well. MAF Seanna 48C is a picture perfect cow and Crimson Tide is an interesting individual with an outcross pedigree to our herd. Unfortunately, these embryos did not produce a female for us, therefore we intend to retain some semen on Jim Beam to utilize these genetics in our herd.

Lot 8 and 9 - Homo Polled/Non-Dilutor

Peacock's Li'l Nettie 23Y - Dam of Lot 12

Colossal is a true curve bender bull. He started out at a mere 74 pounds and comes with a 1538 pound yearling weight but his EPD's also support this claim. Colossal ranks in the top 2% of the breed for both CE and BW then ranks in the top 20% for WW and 10% for YW. All this should come as no surprise as he is a embryo calf out of Nettie 23Y, the dam of Kuntz Sheriff 8A. Whether you're a numbers person or just like thick, hairy beef bulls, you need to check this guy out.

Lawyer is out of a beautiful uddered first calver who's done a real nice job here. He is a moderate framed, heifer bull prospect that is deep bodied and soft made. Lawyer has acceptable performance considering his 72 pound birth weight.

This red baldie son off Law is a square hipped, strong topped bull with excellent performance. 841F has a picture perfect udder and is a young blaze faced cow that has a bright future. When a two year old heifer weans a calf that is almost 1000 pounds and breeds back for an early January calf, it's hard not to get excited.

Lawler is a real attractive bull who has excellent depth of rib and carries that through to his flank and into his hind quarter. He is nice headed and smooth shouldered, just the way you want your calves shaped coming out of heifers. Law has become a very reliable option for our heifer pen. Today for instance, 3 heifers bred to Law calved, all unassisted with an average birth weight of 78 pounds. They start small but have the ability to grow into solid, smart looking calves.

Hubert is a bull with a lot of presence and character to him. Lots 19 and 20 are very similar in their type. They are both long-spined, high performing bulls with a bit of white on their faces. Law may be our go to heifer bull but these two bulls are proof that he can also sire the performance and pop that you expect from your mature cows.

Hooch is a bull that I took a liking to right from a baby calf. Maybe it's because he is such a friendly, gentle bull who likes to just hang out beside you and get scratched. Or maybe its his excellent, cherry red hair coat and his sharp profile that makes him such an easy bull to like. Hooch gets a lot of his positive attributes from his mother, she too is easy to like and hard to fault.

Conductor is a smooth made bull that has a ton of eye appeal. He is really nice headed and I love the way his neck blends so smoothly into his shoulders. Conductor is big barreled, deep flanked, and level hiped and he has shown that since he was a week old. He has a nice blend of calving ease with solid performance numbers. 722E is an embryo calf who is making her bid to enter our ET program herself. Her first calf is one our top heifer that calved this January and she has another top end heifer calf on her again this year. Conductor is another bull whose genetics we intend to utilize in our AI program.

Barracuda is a real interesting bull, he is super stout and has as much barrel and spring of rib as you will find anywhere. A couple years ago we purchased some embryos from Canadian Donors with the goal of raising a red bull calf that we could use for our next herdsire. I am a huge fan of the WFL Red Sage 506C cow and want to incorporate her genetics into our herd. Unfortunately we didn't get the red bull that we were after but we did get one hell of a black one. Barracuda is a full brother to the \$60,000 SVS Dynasty 915G bull who Lewis Farms and Canadian Sires purchased from Sunny Valley last Spring.

Homo Polled By Pedigree

Welcome to the 22nd Annual Kuntz/McIntosh/SAJ Bull Sale. We are excited to showcase this group of bulls. We feel this is a very complete group of bulls that we have brought to town, with a good mix of calving ease, highly maternal and power bulls to add value to your operation.

We truly enjoy raising our family in this industry and spending time at cattle shows and sales watching the excitement in the Simmental breed. We seem to get busier every year though, with things around the farm and activities with family and perhaps don't get a chance to show our appreciation and visit with all our customers the way we would like to. So a special thanks to everyone that has supported us at the past bull and female sales over the years. Without all of you we wouldn't be able to enjoy this great industry!

McIntosh bulls have been developed on a TMR ration this year. Our ration consists of brown oat silage, chopped hay, brown oats and a BULLSEYE Feed bull supplement. All bulls have been double vaccinated with Fusogard to help in the prevention of foot rot. Also, bulls have been double vaccinated with Bovi-Shield Gold One Shot and Ultrabac 7/Somubac. Bulls have been treated with Ivermectin and Cylence and were also Safe-Guarded in the fall. Again this year we decided to do the Q-Select Genotype testing to add another useful tool in beef production to help us improve carcass merit in our herd.

We offer free delivery in Alberta and Saskatchewan and cost shared to other destinations. We will work with you to get the bulls delivered as close to you as possible and in a time frame that works for both parties.

Keep an eye on the McIntosh Livestock Facebook page, as well as DLMS/Cattlevids for videos in late February. Sale weights and scrotal measurements will be posted a few days prior to the sale.

We would like to invite all past, present and future customers to come on out to the sale and also make sure to stop by the farm to preview the bulls and the cow herd any time. The bulls will be on display indoors from March 14-16 at the Lloydminster Exhibition Grounds in Lloydminster, SK. Don't hesitate to call with any questions. We look forward to seeing everyone March 16th!

Blair & Stephanie McIntosh

Here's a bull that's been a standout for quite some time. He's so correct in his structure, so good footed, so dark red, just really hard to pick a hole in this one. 62H is moderate in stature and really reminds us a lot of his sire Dare Devil, we expect him to breed very similarly to Dare Devil as well. His calves are going to be very dark red and hairy and you are going to want to keep every heifer calf sired by him. 62H carries a maternally stacked pedigree and sells as one of the first out of our Mary Jane donor cow. Mary Jane is solidifying her presence within our herd and is a name you will hear from our program for many years to come. A maternal sister to 62H sired by Epic was our lead off heifer calf to sell this past fall at the Border City Sale.

Wolverine is the maternal brother to our high selling bull from 2020, who was a Captain Scream son selected by Westman/Klutz/Lewis. Wolverine is sired by Dare Devil and carries a lot of similarities to his big brother; his stoutness of bone is second to none, depth of body and spring of rib are on point, and of course he's backed by our great Red Mountain cow. I could go on and on about the 43C cow, arguably the deepest bodied cow on the farm. She is a heavy milker and knows how to raise bull calves. This bull has performed notably well from weaning to yearling and posted a real nice 1399 lb. adj yearling weight.

Northstar is an impressive looking individual and is easy to find in the bull pen. He carries a certain presence and has a very stylish look. He does have a star on his head, so if a little bit of white is what you like, he'll check that box for you. Northstar carries some extra thickness along with a desirable muscle pattern. On the dam side of his pedigree, Northstar traces back to our R Plus 8297U donor cow. Maternal greatness runs deep on both sides of this guy's pedigree.

These four bulls are prime examples of what we are striving to produce. Two years ago, our high selling bull was a full sibling to these boys, and he sold to Westgold Farms for \$51,000. If moderate and tanky is your favourite type of female, then you will absolutely love the Bootlegger dam to these herd bulls! She is as sound footed and structured as they come and carries the strong udder quality and milking ability that you would expect of a donor female. She stems back to our R Plus donor cow, 8297U, who wrote her own book, producing many great females and powerful herd bulls through the years. When you combine the maternal strength of their dam and the maternal prowess of Dare Devil himself with the Lewis Farms' Amber cow family backing him, you really can't go wrong.

It's really been a struggle for me this year to not sound like a broken record on these red bulls. They really are ALL so dark red and so hairy, they are good nuted, and sound on the move. Dare Devil just has his stamp and they are all like peas in a pod. Gambit is no different, and we appreciate him for mostly the same reasons we appreciate all these Dare Devil calves. Gambit does come from a stellar cow family as well, with his dam, Eyefull 90A, being the maternal granddam to Rendezvous Farms' bull, McIntosh Legacy 28F! 90A really knows how to raise the good ones and Gambit is a testament to that.

Hawkeye is a very interesting bull and one that would be worthwhile to take a good look at. He is the full sibling to Rendezvous Farms' 2019 purchase, McIntosh Legacy 28F! We are very pleased to hear what a great job Legacy has done so far for the progressive Rendezvous operation. As a group, the Legacy sired calves at Rendezvous are very impressive to say the least! Not to be outdone by his big brother, Hawkeye holds his own in the bull pen this year even considering he is quite young, being born March 2nd.

Nashville strikes again! This show heifer turned brood cow has made a habit of cranking out the sale bulls. This is her third bull through the sale in as many years, and he may be the darkest red and biggest nutted one yet. Her first calf is getting the job done at Pinder Farms, and her last year's bull is now working for JK Bar and Westman. Yes, Hardball started out small with just a 75 lb. birth weight, but boy did he turn it on after that! His weaning to yearling performance has been impressive with an ADG of over 4 lbs./day.

Falcon is a bull that we really like, for several reasons. He is as thick as they come, really big nutted from an early age, and he just has a real natural herd bull presence to him. He's proud and exhibits ideal extension through his front third. He's sired by our R Plus Copperhead 7135E bull, Copperhead is really hitting his stride here now and siring the right kind. He is an impressive bull in the flesh and will be servicing a large group of cows here this spring. Falcon's dam is a no miss girl as well. She has put more naturally born bulls through this sale than any other cow we own. She milks like a dream and has a youthful, well-shaped udder even though she's getting some age on her now. Buy with confidence here, Falcon won't disappoint.

You really have to appreciate this guy for his type and kind. He presents himself as a very complete and eye appealing package. He's stout hipped and wide based and travels around with casual ease. Nice 90 lb. birth weight on this guy, and his first calf momma did a nice job raising him up right. Jim is Carter's calf; his dam was Carter's 2019 4-H heifer project and he did very well with her. Carter is off to a great start in the bull business with this guy!

Power plus in this bull here. He is a tank! This red Loaded Up 1119Y son is an easy one to find in the pen. Great testicular development, great thickness throughout,

and a great stout hip on him which undoubtedly comes from his Horizon dam. His dam, MLL Black Velvet, traces back on the bottom side to the Sweet Meat/Pocahontas cross that worked so well for us and you will hear more about as you go through this catalogue. Long story short, we love his dam. She is the kind of cow you want your herd sires to come from. Especially if your end goal is pounds added to a calf crop!

If you've been toying with the idea of trying a red Simmental bull in your heifer pen but just haven't seen the right one come along or just haven't been able to find one period, Instinct may just be what your heifer pen has needed all along! TNT Gunner is his sire, we've used Gunner many times on heifer's over the years. Gunner has great CE and BW EPDs and he has a very high accuracy percentage on those numbers. Instinct takes those CE and BW numbers and makes them even more desirable, showing a +13.1 CE and +9 BW. Instinct had a 285-day gestation and a nice 83 lb. birth weight. His first calving Dare Devil dam is doing things right so far and is one we feel has a bright future.

Here is an interesting bull on paper as well as in the flesh. Road House is sired by the popular, but not widely available R Plus Swayze bull. We sold a Swayze heifer calf in the Friday Night Lights Sale this past December, where she was quite well liked. She was selected by Rusylvia/Shologan, and we look forward to seeing what she does for them! Swayze easily made it onto the list of bulls to use again for the 2020 breeding season and Road House is one of the top reasons why. He calved well here, and they grow like crazy! Our Swayze sired bull calves were the heavy weights of the pen at weaning, and just kept performing from there.

If you've read through our footnotes much it's pretty easy to tell that we have quite a few cow families that we are pretty dang proud of, but Point Break and Road House might just be from one of the all-time favourites! They go back to the one that started it all for us, IPU Pocahontas 139M. Then there is McIntosh Lulu 43X, she was National Junior Champion Female a few years back. Next in line is Lyla, she's the dam of 13H. Followed up by McIntosh Lily 21D, she's Point Break's beautiful dam. We showed Lily successfully as a two-year-old and she just gets better and better with age. Point Break is a power bald face calf that'll be easy to find on sale day. He combines impressive growth potential with acceptable calving numbers.

right for us over the years, it's really remarkable. Cobra can moderate birth weight and grow like no other. I wish we still had a tank full of Cobra semen. Rainmaker's dam is a first calf Olympian daughter that we purchased as an embryo from Mader Ranches. Rainmaker was born unassisted at 278 days gestation with an 85 lb. birth weight. His EPDs are solid, posting good maternal as well as growth numbers. He also knocked it out of the park in the Q-select testing! Good, solid all-around bull here.

Loaded Up has become our go to baldie bull to use on heifers. He calves great, they know how to grow, and they have added eye appeal. Watcher boasts a moderate 82 lb. birth weight with an ideal 286-day gestation. He carries some nice curve bending EPD numbers ranging from a +12.6 CE to an impressive +109.6 YW. That kind of spread is tricky to get, and definitely worth noting when you find it. EPDs and Q-select point to Watcher also excelling in the tenderness, rib-eye area, backfat and marbling areas as well!

Stockman is an interesting bull and if you are at the sale looking for a black bull, he will surely be one you have marked. Sired by McIntosh Stockman 43E who is a Cowboy Cut/Cobra combination. 43E was purchased by Ken Gilbert in 2018 and has been working well for Ken's Westgold Farms operation. We purchased 44H in dam from Ken's bred heifer sale in the fall of 2019 and wow did she knock it out of the park her first time at bat! Stockman boasts some pretty impressive growth EPDs with his +88.1 WW and +126.4 YW and he will add some pounds to a calf crop. He also tested TT for Leptin. The groundwork is all there for this guy, all he needs is a group of cows!

Legislator was another in dam purchase for us from the Shades Sale in fall 2019 from the Prairie Wind Farms' program. She was a great buy if I do say so myself! I'm pretty sure she's one we will be hearing a lot from in the years to come. She is pretty ideal in her type and one of those ones you just wish you had more of. Legislator has been a fan favourite of visitors to the farm this winter and checks a lot of boxes for most people. He is moderate in frame and big on eye appeal. He's stout when you get in behind him and boasts a little extra in his rib shape. Big growth and carcass numbers on this guy as well.

Big power, Matrix sired bull here. Matrix is a sire that we walked here for quite a few years. He is a Springcreek All In 155Y son. We unfortunately lost 47H's dam this summer so this will be the last natural calf we will have from her. We do have some embryos in the tank still, so even though she is gone, she will still have an influence in the years to come. She was a direct daughter of our Pocahontas donor sired by Sweet Meat. Sweet Meat wasn't a real widely used bull, but we used him some, and the cross with Pocahontas was dynamite! The Sweet Meat/Pocahontas females turned into fantastic foundation cows for our herd. 47H performed well in his genetic testing scoring mid-range to excellent in all categories.

Due to last years 4-H show and sale being cancelled Carter decided to make a video of himself showing his steer and also a interview about himself and his steer Skully. With his videos he advertised on Facebook to have a little Auction to sell him. Carter would like to thank all the bidders and huge thanks to Lee and Chelsea Norheim of Norheim Ranching for buying his steer and supporting the 4-H program.

SAJ Simmentals

Welcome to the 22nd Annual Bull Sale. I would like to thank all past customers and friends who have purchased bulls from me. All SAJ bulls will be double vaccinated for the prevention of foot rot and are on a full herd health program. I will deliver your new bull, in most cases, right to your yard or a suitable meeting spot. If you take your bull home sale day, you will get \$100.00 off your purchase price. With the uncertain year we've had, I have videoed the bulls this year and they will be on buyagro.com, dlms.ca and cattlevideos.ca. The bulls are available to view anytime at the farm and call with any questions.

451G is an Epic son who I used on a select group of cows. Epic shortened gestation while moderating birth weight without sacrificing performance. This bull has loads of middle and is a very soggy, easy doing bull. The 45X mother was a purchase from the Stoughton dispersal and has only had bull calves since being on the farm. Last year's bull was sold to Osborne Grazing Alliance, SK.

A personal favorite here. An embryo son of my old Helga cow who has raised breeder bulls and good commercial bulls. Her most notable son would be the Equalizer 7U bull who Blair and Stephanie McIntosh have had many descendants walk through the sale ring here. Hatchet is as dark red as you could make him and very quiet. He is a long and strong topped bull. His sire, Summit, is a past Agribition Simmental champion. I have five full sisters to this flush and they are going to develop into strong females. He is a bull I am very high on and look forward to seeing what he will do in the future.

Sleepy Joe is an interesting bull as he came from two black parents but is RED! Coming out of the Bohrsen owned Gold Key bull, he should add calving ease and some performance from his powerful dam. The 85Y dam has had seven straight bull calves to start her production but finally gave me a heifer this year. When Chris Poley toured the bulls in late November, this was his pick of the reds and maybe the whole pen.

Here is an exciting bull. A homo polled blazed face. This bull is very easy to find in the pen. I really notice his strong hip and easy doing appearance. He is strong topped, big middled and very docile. His dam was purchased through the Source Sale from Little Willow Creek. She was a blaze faced cow who did well on this fella. He measured 39.5 cm in early January at around 11 months of age. Take a good long look at this bull.

Auburn comes from a proven sire who raised many good quality cattle a few years back. He came in dam from the Lazy Creek Dispersal Sale. His black dam is tight uddered and was one of the easiest fleshing cows sold that day. As I write these notes, it is -35 with the wind so I appreciate bulls and cattle with hair and this bull has lots of it. He is the youngest bull I have in the pen this year but stands well beside his pen mates.

Addiction is a bull that is sure to add length and stretch into his calves. He is a long bodied, big bull who has a milky, solid cow who stood beside him all summer. His dam has two daughters in the herd and her other bull sold to Wes Regan, SK. This bull comes from the All Aboard bull who is a fresh pedigree in Canada this year. He is also the sire of the Epic bull who sired the bulls that lead my catalogue this year. If EPDs interest you, then you will notice he is above average in 12 out of 13 categories.

A direct son of the ever-popular Captain Morgan. This fella came in dam from the popular SKOR Simmental dispersal. A bull that has a presence about him and likes to show off in the pen. He has a good look to him; soft made with a good top on him when you get behind. His 19E dam was a good purchase and you will hear more about her in the upcoming years.

Another Gold Key son here. 17H is a solid black bull whose dam is a big, powerful, red white faced cow who came out of the Stoughton herd. Holtby Farms, SK have purchased a son from 75X in a past sale. 17H is a bull that will sire growthy, get up and go calves. His replacement females may be the best part about this bull as his dam is a very nice cow.

23H is a bull that came in dam through Perlinger Simmentals at the Source Sale. This 52E dam is tight uddered and moderate. This bull has an extra rib in him it seems as I was way off when he steps on the scale. Length adds pounds. He has a big hip and strong top. He will add value to a pen of Angus cows and will sire calves that have some extra length and growth to them.

Razor gets the call to start my fullblood section this year. He is noticed by everyone that has come through the pen this year. His deep red color pulls you in but then you notice how loose made, deep and just overall how solid he is. His dam is very close to what I call an ideal cow. Her udder is about as good as you can make. She herself is a full sister to the bull that Westgold bought in the 2019 sale as a feature bull. Razor is a bull that I feel could go work for a purebred breeder or any good commercial herd. A bull that should have some friends sale day.

Max is a Crush son who provides some performance and appeal. He is dark, dark red and big goggled. His 450 dam is a good one. She raised a \$10,000 bull at the sale to Barry Saunders, North Creek Simmentals in the 2019 sale. Max will sire big performing steers and his daughters will find their way to the replacement pen. He is a nice quiet bull who will be a good investment I'm sure. The day we pictured and videoed, he slipped on the ice so I didn't get a video but I can easily send one if anyone is interested.

Mogul is a solid bull. Deep, thick, moderate. Mogul is sired by a bull that was one of my best in 2019. He was injured and couldn't be sold so I hand bred a few cows to him. The dam of this bull raised my high seller to Hairy Hill Cattle, AB (2019) for \$35,000. Reports have been good on that bull and I expect Mogul to be a good breeding bull as well. The dam of Mogul, as the picture shows, is an ideal body type. This will be the last bull from 15X, as she was sold last fall.

37H is a polled full blood who may be one of the deepest sided, if not the deepest bodied bull in the pen. 37H comes from my 10A Maxwell cow, who has raised some good calves including the 450 cow who is the dam of 50H and a bull that sold to RCN Livestock, Paradise Hill, SK. Romeo is a bull that will knock some horns off without sacrificing weights.

A low birth weight Guerrero son here. I have used Guerrero on my heifers for a few years. I have daughters calving this winter and they have ample milk and very small teats. I think they will be productive cows. 49H is polled, hairy and a solid bull that moves out well. He was the other bull that I didn't get a video on but can easily take a pen video upon request.

Crusher is another Crush son. His sire consistently throws extra length and the solid color and dark red. 58H is a high percentage Fleckvieh bull that had a full brother sell last year to Troy Bohn, Paynton, SK. Crusher would work on a wide variety of cows as he is a non-dilutor, so there are many options for you.

A pair of Guerrero calving ease bulls to finish my part of the sale. Both of these bulls are off of first calvers and have moderate birth weights. Both bulls have low birth weights and rank high in birth weight and calving ease EPDs. I would think that either of these bulls could enter a heifer pen and do the job that is expected of them. Both the dams of these bulls have nice udders and did what was expected. These two bulls won't be the biggest or heaviest sale day but that is not what they were bred for.

Terms & Conditions

Terms...

The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance, unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. Current exchange rates will be announced sale day. All monies are in Canadian funds.

Bidding...

Each animal will sell to the highest bidder...no by-bidding will be permitted. Disputes - Bidding will be reopened between the parties involved in dispute. If no further bidding is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision on all disputes will be final.

Announcements...

All announcements made from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay close attention to such disclosures.

Breeder's Guarantee...

All bulls sold are guaranteed breeders by the owners. We guarantee to provide you with a sound breeding bull. Should any bull fail to be an unsatisfactory breeder, he will be replaced with a bull of equal value or a credit will be given toward the purchase of another bull. If you have a problem with your bull, please notify us immediately. Under no circumstances will the seller be liable for more than the purchase price of the animal.

Exception Guarantee...

In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, this guarantee shall be null and void.

Certificate of Registration...

Each animal will carry papers issued by the Canadian Simmental Association. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

Pedigree Estimates...

Pedigree Estimates (PE) are created on the projected mating of the animal's sire and dam based on averages of the two, creating estimated values that do not hold the same accuracy of actual EPDs issued from the association and should be used as such.

Liabilities...

All persons attend the sale at their own risk. The seller, facility owner and sale manager assume no liability, legal or otherwise, for any accidents that occur. It is understood that T Bar C Cattle Co. (2013) Ltd. is acting only as a medium between buyer and seller and is not responsible for any failure on the part of either party to live up to his obligations. Neither does T Bar C Cattle Co. (2013) Ltd. assume any financial obligations to collect or enforce collection of any monies between parties and any legal action that may in exceptional cases be taken must be between the buyer and the seller. T Bar C Cattle Co. (2013) Ltd. assumes no responsibility for any credit extended by the seller to the buyer. The buyer must look to the seller for fulfillment of all guarantees and representations made hereunder.

Rights and Obligations...

The above terms and conditions of the sale shall constitute a contract between the buyer and seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

Phone, Mail, Wire Bids...

Bidders unable to attend the sale may phone, mail or wire their bids and instructions to the sale managers, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

Delivery...

We will assist in arranging transportation wherever possible. Each animal becomes the risk of the purchaser as soon as sold. \$100 rebate on bulls taken home sale day. Bulls must be insured by buyer.

Insurance...

Will be available sale day. We strongly recommend that insurance is purchased for full value.

Errors...

All announcements at sale time, written or oral, supercede any written material in the catalogue.

The sellers reserve the right to draw semen from any bull in the sale for in-herd use only.
The collection will be at the purchaser's convenience and the seller's expense.
