**CELEBRATING
30 YEARS!**

PRESENTED BY STUART CATTLE STATION

BRANDING THE BEST BULL SALE

Wow, 30 years. It seems like yesterday that the first Angus females were unloaded here. Little did we know it would grow, develop and advance like it did. That growth would not be possible without the support of our customers, and for that, we thank you.

If you turned off your television, 2020 was a good year out here. Early rains led to grass like we hadn't seen in years and hay crops were good. Harvest went well and up until the cold blast in early February, fall and early winter were mild. Appreciating what you're given seems more important than ever.

We are excited to show you this group of bulls. The red pen is highlighted by the Admiral and Reno sire groups. New bloodlines that offer something different in type and pedigree. Many will work in heifer programs, and a growing number that will sire top end replacement females and steer calves on your cow herd.

The powerful Frank sons in the black group are outstanding. The consistency in type and quality is impressive. There are a number of calving ease options as well from the Laramies, Cedars and Irish as well as the first offering from Merit 8015F.

The bull calves were weaned October 2, and transitioned to a TMR diet in early November. With grain prices being so high, concentrate levels were dropped to ½ % body weight. With the nice weather November-January, the pen has done well. Weaning weights are represented by what the bull's mother was capable of under last year's conditions with no creep. Their diet after weaning was targeted for 2.3-2.5 lbs ADG. The bulls on average are about 10 days younger than other years. It was by design and I can't say I see any difference in the pen. Bale grazing and not calving for 10 extra days in February tends to make a person more sane.

We haven't sold a perfect bull yet, and we don't own a perfect cow. If you want an honest opinion on any bull, don't hesitate to call or text. We are our own worst critic. As always, we back these bulls 100%. There are some calves in the offering that we are considering keeping a semen interest on, we will have more details closer to sale day.

So with that, please feel free to come tour the pen and see their mothers. We are planning for some restrictions to still be in place by sale day, so doing your homework ahead of time is encouraged.

Thank you for your continued support,
The Stuarts

FROM THE DESK AT T BAR...

Welcome to the 30th Annual "Branding the Best" Bull Sale on April 15, 2021 presented by Stuart Cattle Station at their station headquarters, Edam, Saskatchewan. For the past three decades, the Stuart Family have been supplying repeat customers and building a great cow herd. David will tell you that it is not an overnight job... selecting and breeding seedstock with no extremes and suitable to maintain a strong customer base.

Despite the past twelve months of indecision and confusion, Stuart Cattle Station has had a great calving season and you will see the exciting results in the bull pens. It is great to see that their herd bull selection has paid dividends for you, the customer, and their replacement pastures.

The sons of Admiral and Reno headline the Red Angus yearlings. They are uniform in phenotype... lots of muscle shape, thick topped, full of hair and style... the kind that bring that extra premium in the fall at weaning while the daughters make awesome replacements.

The sons of Duralta 9C Onward 161E (Frank) headline the black section of the sale. What an investment he has been. The sons are high in performance, wide based, strong topped with hair and presence. The power of his mother will insure high maternal values in all their daughters.

The two-year-old bulls are from the "cover your butt" pen... bulls retained for bull wrecks whether at Stuart Cattle Station or that of their customers throughout the breeding season.

Stop by the ranch anytime prior to the sale and David or Mitch will give you a preview tour. Do not hesitate to give the boys a call to discuss the bulls which will fill your breeding needs. You will get an honest assessment "straight from the hip" backed by the Stuart guarantee.

If we may be of assistance, prior to or sale day, feel free to contact any of the T Bar team or myself, we will help you in a professional manner.

Chris Poley

MISS ROSE 56C

We once again have a small group of two year old bulls on offer. Our policy has always been to keep some yearlings back should any issues arise with bull purchases in the months after the sale. These bulls were pastured from May until November. From November to the end of February, they were wintered on a half section of pasture and fed a silage TMR every three days. Water was provided from a near by creek. They came home at the end of February, nine months after they left last spring. They are an athletic bunch that will cover ground for you this summer. They will be trich tested by sale day.

The high selling, lead off bull from Milk Creek Reds in Montana in 2019. It's not often you get the bull you want out of the cow you want, but we were able to acquire him that day. He walked with the heifers the first year plus we used him through AI on the cow herd. He calved 24 heifers all unassisted, plus left some powerful calves off of mature cows. His ability to add base, rib, fleshing ability, eye appeal and dark hair coat in one generation is impressive. His calves are really stamped in their pattern. We encourage you to look over the fence at his daughters, they follow a similar style. Whether you are breeding a group of heifers, or want to make some densely made, easy fleshing replacement heifers and steers, we recommend an Admiral son. Co-owned with Wes and Kelly Lundell

One of the best home raised bulls we have produced, Dominic has matured into an impressive senior herd sire. His sons highlighted last year's sale. He stamps his calves with a thick hair coat, extra muscle expression, wide tops and extra scrotal. Sons have been used successfully in both cow and heifer pastures. His first milking daughters are wedge shaped females dropping great udders. His 10 year old dam is still in production and stands on an ideal foot with a weaning ratio of 109 on five sons. The influence of his sire only improves his credentials.

BW average on sons - 84 lbs. BW average on daughters - 81 lbs.

Reno was a feature bull from Wraz Red Angus in 2019. He combines some proven herd sires in Mambo, Final Answer and New Trend 22D from a female with a proven track record. He saw heavy use the past two years, has held up well and stands on a great foot. He tends to follow the cow on birth weight, and as the calves mature, he is proving to add performance, especially on test. We highly recommend Reno sons on British based cows and heifers

One of the most influential bulls we have used. After registering 169 calves through the Canadian Angus Association, this will be his last calf crop to be offered. The daughters are forming the nucleus of the young Red Angus females. They are our type of cow. Moderate, deep ribbed, wedge shaped, easy fleshing with great udders. Sons have sold across the countryside in both cow and heifer programs, both purebred and commercial. This will be your last opportunity to buy a son. If you don't like surprises in your herd bull purchasing, consider a Breakout son.

BW average on sons - 85 lbs. BW average on daughters - 82 lbs.

The most consistent sire we have used. It's a bold statement but if you look at this group of bulls, you'll understand. Deep ribbed, wide based, high performing, heavy muscled calves that rise to the top of the pen. Every one of them has a "look at me" type of presence. His first milking daughters are starting to calve now and the udders they are dropping look fantastic. The influence of the 139U cow seems to really come through, that female is one of the better cows you will find. Every herd bull will have an Achilles heel, but we just haven't found it on this herd sire yet. He walked with 57 cows this past summer, didn't lose weight and covered all but two of them. You can close your eyes and pick a son and you will not be disappointed.

BW average on sons - 92 lbs. BW average on heifers - 86 lbs.

LARAMIE 100'17

One of many feature Laramie sons at Eastondale in 2018. Laramie is backed by a great female at Easton's that is our type. Smaller in stature, but heavy in production. The last three years he has seen use on both cows and heifers with success. The udders on the first calving daughters look incredible. Look to a Laramie son for your heifer program. They are built right up front and will still leave you something in the fall.
BW average on sons - 87 lbs. BW average on heifers - 85 lbs.

TERMS AND CONDITIONS

TERMS: The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance unless previous arrangements have been made. Each animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. Current exchange rates will be announced sale day. All monies are in Canadian funds.

CERTIFICATE OF REGISTRATION: Each animal will carry papers issued by the Canadian Angus Association. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

PEDIGREE ESTIMATES: Pedigree Estimates (PE) are created on the projected mating of the animal's sire and dam based on averages of the two, creating estimated values that do not hold the same accuracy of actual EPDs issued from the association and should be used as such.

GUARANTEE: Each animal becomes the purchaser's risk immediately after the animal is sold. All animals in this sale will be sold under the terms and guarantees set forth by the Canadian Angus Association with regard to health, freedom from defects and from both reproductive and specific genetic unsoundness.

LIABILITIES: All persons attend the sale at their own risk. The seller, facility owner and sale manager assume no liability, legal or otherwise, for any accidents that occur. It is understood that T Bar C Cattle Co.(2013) Ltd. is acting only as a medium between buyer and seller and is not responsible for any obligations to collect or enforce collection of any monies between parties and any legal action that may, in extreme cases, be taken must be between buyer and seller. T Bar C Cattle Co.(2013) Ltd. assumes no responsibility of any credit extended by the seller to the buyer. The buyer must look to the seller for fulfillment of all guarantees and representations made hereunder.

PHONE, MAIL & WIRE BIDS: Bidders unable to attend the sale may phone, wire or mail their bids and instructions to the sale manager, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

INSURANCE: We strongly recommend that insurance is purchased for full value.

ERRORS: All announcements at sale time, written or oral, supersede any written material in the catalogue.

CATTLE INSPECTION: All carry permanent identity tags, corresponding to Sale Lot Numbers as well as Canadian Cattle Identification Tags.
