BECK FARMS & MCCOY CATLE CO. Charolais and Hereford Bull Sale

13th Annual Bull Sale

FARMS, MILESTONE, SK - 2:00 PM

Vednesday

WEICOME TO THE SALE....

Gary & Donna Beck Wade & Cynthia Beck Mark & Tami Beck Box 5, Lang, SK SOG 2W0 Wade: 306-436-7458 wcbeck@sasktel.net Welcome to our 13th annual bull sale. This is the time of year we look forward to with anticipation and excitement. Please accept our invitation to join us on February 23rd for our bull sale and some hospitality. We always enjoy this time spent with our customers and friends.

Every year we work diligently to put forth the best set of Charolais bulls we possibly can. This year is no exception. There is a number of very unique individuals in this year's offering. Whether you are looking for a bull to breed heifers, a power bull to breed cows or anything in between you will find them here.

We are extremely proud of the mother cows that raise these herd bulls. All but one two year old were raised by cows that were born here and carry the backwards R B brand. These mothers are available for viewing any time whether its before the sale or on sale day.

I believe the cattle industry is headed for unprecedented times. As I write this the feeder market continues to turn upward in spite of extremely high feed cost. Preliminary predictions are that this will continue throughout the year ahead.

Please join us for lunch on sale day in our heated sale barn on the farm. Be prepared to stay after as we are bringing back our annual 'fish fry'. We hope to see you all on February 23, the bulls and the hospitality are guaranteed not to disappoint.

If you have any questions or would like a tour before the sale, feel free to contact Mason at 639 440 7027 or myself. Better yet, find Jorja on sale day and ask for her opinion. We would be more than happy to help you with your bull selection.

Wade

The Nicholas Family Box 479, Milestone, SK SOG 3L0 Chad: 306-436-7300 Carrie: 306-436-7425 www.mccoycattle.com | cnicholas@mccoycattle.com

It gives me great pleasure to welcome you all to our 13th annual bull sale on behalf of McCoy Cattle Co. I suppose a few things have happened in the world since our 12th sale. I will start off by saying I for one have heard enough about Covid so I promise this is the last time I will use that word in this welcome.

I can't get by without talking about Mother Nature. She seems to be getting more and more difficult to get along with the past few years. We were very fortunate to get more timely moisture in 2021 than many of you so I won't complain too much. In fact, had we had normal temperatures through the summer of 2021 Our year would have been fairly normal for South Central Sask. We did end up sending a couple liner loads of cows north for pasture this summer but all in all our year was not bad. We have managed to scrape up enough feed to get through the winter once again. Water is definitely plenty tight around here as we head for 2022 but that is not an abnormal thing around here.

2021 has definitely been a reason to cull harder than normal. We also sold a few packages of bred females in the fall to keep our numbers in check heading into 2022. As I write this welcome the amount of snow we have received is starting to add up so hopefully it continues. The cattle markets also seem quite strong with many experts talking about calves selling at close to record levels by fall of 2022. Not sure if that will happen but sure nice to know there is a strong demand for the product we all produce.

The current economics of running beef cows underscores the need to have some Hereford influence in your cowherd. \$9 barley and \$300 hay means the necessity to manage an efficient, moderate sized cowherd with maximum maternal heterosis is more important than ever before. The goal of our breeding program has always been to breed moderate framed, easy fleshing, maternally focused cattle so we hope that puts us in a good position to help you gear your cowherd for the future.

Wade and I both look forward to discussing our sale offerings with you. Feel free to call us anytime to talk about the bulls.

FROM THE DESK AT TBAR.

Welcome to Beck Farms and McCoy Cattle Co. Charolais and Hereford Bull Sale, February 23, 2022, at the Beck Farms Sale Facility, Milestone, Saskatchewan. In it's 13th year, this event is one of a kind offering large multiples of Charolais and Hereford bulls to select from. This sale is the source of breeder and ranch bulls that add value to your bottom line through stockers and replacements in your pastures.

I think both operations compete as to which operation will bring the strongest, most uniform offering to the sale... for 2022 it is a tie! Outstanding is the best description of this powerful lineup. Optimal in frame size, rugged, stout with tons of hair and testicle... both programs operate on the same parallel in uniformity of type and kind. Run on rolling pastures, the soundness factor has been bred in over numerous generations.

Their goal is to get your cows bred with "peace of mind" and add value to your product at the sale barn. We all know that buckskin stockers have led the marketplace for decades... in both weaning weight and selling price. Beck/McCoy offers bulls that will work with and enhance any breed... an event that you cannot miss!

These breeding establishments are only a few miles apart, therefore you can preview the bulls and their mothers in one trip anytime prior the sale. Feel free give them a call, discuss the bulls and which sires will fit your breeding needs... one thing is certain "they will give you straight answers" for even difficult questions.

Plan to update your herd bull battery, be it Charolais, Hereford or both at "Beck/McCoy" whether it be with us in person, online or on the phone. During these times, feel free to give any of the T Bar C Team a call and we will be pleased to assist you in a professional and confidential manner with your selections.

Holiday Inn Express & Suites...

4255 Albert St S. Regina, SK S4S 3R6 (306) 789-5888

Delivery...

Free delivery in western Canada & to Paris, Ontario. For bulls going to the U.S. we will cover export test and deliver to border.

Sight Unseen Purchase Program... While we will do our best to stage a near normal live auction

and we encourage our customers to come view the bulls anytime before the sale, our sight unseen program is another great option. No one knows these bulls better than we do. We are more than willing to discuss the bulls with you and find ones that would work for your breeding program. When we deliver the bull, you must be 100% satisfied with your purchase or we will load the bull up and bring him home - no questions asked.

General Information...

Point of Sale... Each animal becomes the risk of purchaser at time of sale.

Free Wintering... Bulls will be developed free of charge and discuss delivery dates with Wade and Chad.

Breeding Guarantee... We guarantee to provide a sound breeding bull capable of passing a semen test at 14 months of age. Any bull failing to be a satisfactory breeder will be replaced with a bull of equal value and quality, or a credit given towards purchase of another bull

Insurance...

Alameda Agencies, Bonnie Thompson 306-489-2258

Announcements...

Errors in catalogue will be corrected by announcements from the block. Announcements will take precedence over any printed material.

YEARLING BULLS

The yearling bulls in this year's sale spent the summer on native and tame pastures. Creep feed is put out in middle of August as an aid to help with the weaning process. They were weaned on September 27th and put on a forage based TMR. As in the past, none of the yearling bulls will be semen tested before the sale. They will be testicular measurement and palpated by a licensed veterinarian. Semen testing will take place in either March or April as dictated by you the buyer. We keep lots of spare bulls. Spare bulls are available for your use in the case that something happens to the bull you purchase between sale day and turn out. In the event the bull doesn't pass his semen test, we will refund your money and give you a spare bull to use free of charge. Don't be concerned about the quality of our spare bulls. There have been many discussions this year about why some bulls are spare bulls and not in the sale.

Beck Farms reserve the right to draw semen on any of the sale offering for in-herd use only. This will be at our expense and your convenience.

different genetics. After travelling over 800 miles and sorting through over 600 buils, our pick was Marksman. Sired by LT Ledger, Marksman may not be the outcross we were looking for but backed by an incredible Trademark daughter make him a potent breeding piece that will lead our program into the future. As we calve his second set of daughters we couldn't be happier. They are going to be easy doing mother cows with beautiful udders and way more milk than his EPDs suggest. 16 yearlings and 2 two year old sons of Marksman sell this year.

## **LOT 3**

		BECK'S Checkmate 2129J

Justify has been a stand out since birth. He ranked first in his contemporary group at weaning. His high performing rugged build is sure to add pounds to your next calf crop. His maternal sibling was Masons 4-H heifer last year.

Sheriff is one you have to see on the move to appreciate how good he is. Muscular, Soggy and very sound. He is one of Masons favourites.

Our youngest Marksman son to sell this year, Benson is deep middled, big footed and wide.

It is a pleasure to be working with the Beck family at Beck Farms. The program has a great set of bulls on offer for the 13th Annual Bull Sale.

The Beck bull program consists of a forage-based, total mixed ration that is designed to promote lean muscle growth as longevity is a primary focus when developing the sale bulls. Rumen health must stay a priority throughout every stage of the bull's development; therefore, the diet utilizes an organic mineral package to enhance the bull's immunity and complement its growth patterns as they develop. The cowherd also utilizes an organic mineral package throughout the year to maximize the mother cows and progeny's proper immune function and overall health.

If you have any questions about the nutrition or sale bulls, please feel free to contact me.

Best of luck to Beck Farms with this year's sale bulls!

Eight Ball carries an impressive amount of body capacity, stoutness and style. He tops it all of with his curly hair, which contributes to him easily standing out. His Grandma is arguably the best Hombre daughter on the farm.

Figure suits his name perfectly with his impressive body figure. A bigger bodied Affinity son with tons of power and length out of a first calf heifer.

Prime Time is one of our leadoff Acclaim sons for good reason. Raised by a Marksman two year old. Sound and shaggy is the easiest way to describe this unique individual.

Another Acclaim son who we think a lot of. He's soft made, wide topped with a really cool design.

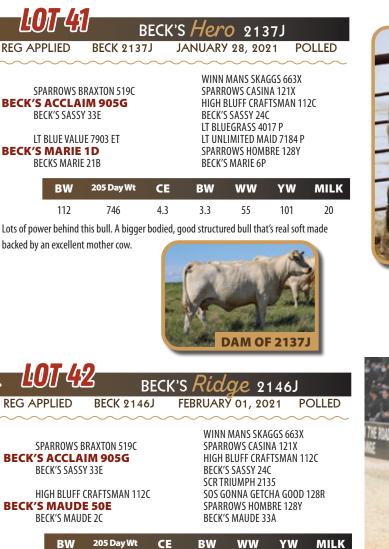

Custom comes in a stretchy, soft sided package that makes him one of our favourite Acclaim sons. His maternal brother was one of our leadoff Braxton sons in 2020.

After admiring the BHD Stout progeny for years, we bought a son in the spring of 2018. The Preston's are super sound with moderate birth weights. Some of our best heifer calves are sired by Preston. 4 yearlings and 2 two year olds sired by Preston sell.

Highlights deep middled, wide topped frame is one of the many reasons why he is one of the leadoff Preston sons. He was 2nd for weaning weight in his contemporary group.

Sandman can be admired for his soggy, fluent build. He comes out of the 196W cow that raised our 2015 and 2016 high sellers.

Triggers dense hair coat, and smooth build offers an outcross calving ease bull.

A power bull with lots of hip and definition that can make an old cowboy happy.

TWO YEAR OLD BULLS

This year's group of two year olds were specifically selected for the 2022 sale. This years group is a diverse group. There are bulls that we kept for spares in 2021, bigger birthweight bulls that we used in our commercial herd in 2021, and younger bulls that were managed specifically to sell as twos. These are the best bulls of the youngest bulls born in the spring of 2019. They were summered on grass in 2021, brought in the end of October and are being wintered on a forage based TMR. All two year olds will be semen tested before the sale. All non-virgin two year olds will be trich tested.

All Beck Farms bulls will have received two shots of Fusogard for foot rot before they are delivered.

83													MILK

A bigger bodied structure two year old that is a natural born good looker. Tons of power, performance and length that he packs on him. His mother pumped out bull calves that have been really successful in lots of commercials operations. Not to mention he's a twin brother Jorja's 2021 show steer who won plenty banners in his show season.

A herd bull filled with power, muscle and hair compacted to a moderate frame. Design carries style and function. He became an orphan at 3 months of age which is why he has a poor 205 day weight.

A bigger framed bull that will add stretch and power to your calves. Used on our commercial cows in 2021.

88838 was our pick of the bull pen at the 2020 Shaw Cattle Co. Sale Bull Sale in Caldwell, Idaho. He was a standout in that sale in our opinion in terms of his overall type, kind, and balance. The 88838 sons are long-bodied, easy fleshing, well-muscled bulls. They are a moderate framed bunch but performance thus far is very strong in this sire group. 88838 also left us a group of replacement females that we are extremely excited to breed in the summer of 2022. About the time he had bred 60 females in the summer of 2022 it was determined that he was a carrier for MD. All of his progeny are tested. MDF denotes the bull is free of this gene. MDC denotes the bull is carrier. Call Chad to discuss further. We are retaining 2 sons of 88838 to use in our program. Homozygous Polled.

Good	uck trvi	na to find	many flaws	in thic a	uv 711	ic on ult	ra comn	loto woll	roundo	d hard

Good luck trying to find many flaws in this guy. 71J is an ultra complete, well-rounded herd sire prospect. His dam is a maternal sister to Maverick 25E, our high selling bull in our 2018 bull sale going to Standard Hill Farms at Maidstone.

115J is a super stout, great haired son of Mandate 88838. His dam, 143D, is a consistent producer putting out extra thick, rugged progeny that stand out in their contemporary group. 143D is a maternal sister to the dam of Matrix.

group of 56 bulls at weaning and has continued to pound down the scale since. He is long bodied and has a little more scale than some of the 88838 sire group. His dam has had sons that have sold near the top of our past two bull sales. Homozygous Polled.

Sentinel 38J is a moderated framed 88838 son that will bring extra calving ease and leave moderate daughters with ideal udder structure.

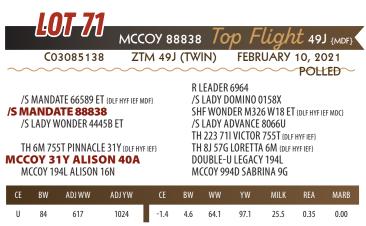

Recommended for heifers

46J is an exceptionally long bodied, good haired son of Mandate 88838. His young dam has done a great job on her first two calves.

49J is a stout made, rugged, good haired individual. His dam comes from the Alison family so look for extra longevity in this pedigree.

234J (or Bandit as Carrie called him at birth) carries a bit more red (complete with goggles) than the average bull in our offering. Use him to reduce white in your calf crop. His maternal brother was high seller in our 2019 bull sale.

248J is an 88838 son that carries a bit more calving ease and comes from a dam that has been a long lived, consistent producer in our herd. We expect he will sire daughters that are ideal in type that should have some longevity to them.

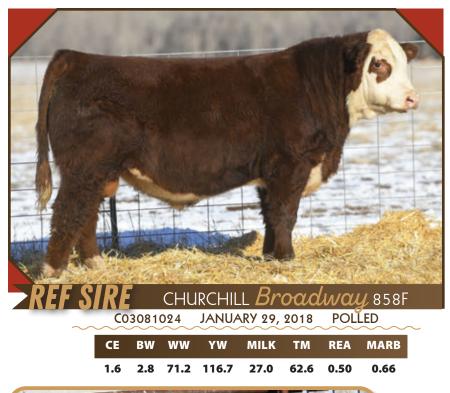

Recommended for heifers

This is the first group of bulls that we have offered sired by Churchill Broadway 858F. We are certainly pleased with what we see so far. His sons are a stout-made, big middled, strong headed bunch. His progeny are consistently dark coloured and well pigmented if that is something you are looking for. Broadway was selected for his growth and carcass values. We are retaining one son to use in our breeding program. Homozygous Polled.

In keeping with the program, here is Kalla 10D's natural calf born in 2021. We used Historic due to the ideal female type he was producing. Look for this guy to be a herd bull that sires great calving ease, ideal females, and still with more than adequate performance. We think this bull checks a bunch of boxes.

Recommended for heifers

the most consistent AI sires we have used. We don't need to say much more about his dam. We think this bull offers a lot. Homozygous Polled by pedigree.

Excede has been one of the most consistent AI sires we have used in our breeding program. The Excede calves are born easily and grow rapidly with above average muscle and dimension. We now have a number of daughters in production and like what they are doing. He is leaving ideal udder structure in his daughters. Homozygous Polled.

Definite herd bull prospect here from an early age. He is stout and soggy from a no miss cow family. Use 5130J to produce females with extra body volume, ideal udder quality and above average carcass traits.

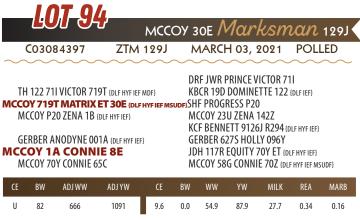

Matrix continues to produce very useful, functional bulls and females at MCC. The Matrix calves are moderate at birth and are born with lots of vigour. We feel that Matrix sons will produce an ideal type of beef female that so many of our customers are looking for. We expect that Matrix will reduce mature cow weight in your herd. Homozygous Polled.

If you are looking for a bull that is dark coloured, goggle eyed, and has little white on him this is your bull. A maternal brother sold in last year's sale to Levi Debruyne.

## **MCCOY BULL DEVELOPMENT**

The McCoy bulls spent the summer of 2021 on a combination of tame and native grass pasture. Creep feed was put out August 18 to aid in the weaning process (we planned to wean early based on pasture conditions). Bulls were vaccinated and 205 day weights were recorded on September 4. Bulls were weaned a fairly normal date of October 4 after we received some timely moisture the end of August. Since weaning, bulls have been developed on a high roughage ration of silage, hay, oats and protein supplement. Corn has replaced oats in the ration since January 7 due to cost. 365 day weights were recorded on January 17. Through to January 17 our bulls are gaining approximately 1/3 of a pound per day less than normal due to recent cold weather.

As in past years the bulls will not be semen tested prior to the sale. All bulls will be measured and palpated by a licensed veterinarian before sale day. Semen testing will take place in late March or early April as dictated by the buyer. We retain a large number of high quality spare bulls. Spare bulls are available to you should something happen to your bull between sale day and turn out.

All McCoy bulls will receive initial vaccination for foot rot prior to being delivered.

2022 will be the last year we will have Impact sons for sale. It turns out his name has been appropriate as B451 has definitely had a strong impact on our breeding program. He has left a set of functional, excellent uddered females in both our herd and at Crittenden Land and Cattle. B451 is a leader for REA and IMF in Canada so look to his sons for balanced carcass values.

255J is a younger bull than many in the group but don't his age fool you. He comes from great maternal lineage with lots of longevity in the cow family. This guy should be an udder improver both in terms of teat size and suspension.

Jumanji is a long bodied and attractive marked bull. The combination of above average calving ease, low birth weight with growth is consistent for generations on both sides of his pedigree. **Recommended for heifers** 

# LOT 112

### F1 Hereford x Gelbvieh FEMALES

2022 marks the sixth year we are offering Hereford-sired, open replacement heifers through the sale. We have been overwhelmed by the value that these females have brought to our customer base. This year we will be offering 7 groups of 3 heifers. All heifers have been vaccinated with Vista Once SQ and Vision 8 in the spring and fall of 2021 and have received lvermectin and Clean-Up. All heifers are pregnancy checked to be open.

**52** 

# Terms & Conditions

#### Terms...

The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of disputes the auctioneer's decision will be final. Announcements from the auction block will take precedence over the printed matter in the catalogue. Current exchange rates will be announced sale day. All monies are in Canadian funds.

## **Certificate of Registration...** Each animal will carry papers issued by the applicable breed association. A certificate of

registry duly transferred will be furnished to the buyer for each animal after payment has been made.

#### Health...

All animals in the sale have met all necessary health requirements.

#### Guarantee...

Each animal becomes the purchaser's risk immediately after the animal is sold. All animals in this sale will be sold under the terms and guarantees set forth by the applicable breed association with regards to health, freedom from defects and from both reproductive and specific genetic unsoundness.

## Pedigree Estimates...

Pedigree Estimates (PE) are created on the projected mating of the animal's sire and dam based on averages of the two, creating estimated values that do not hold the same accuracy of actual EPDs issued from the association and should be used as such.

**Delivery...** Assistance will be given in getting your purchases home. Each animal becomes the risk of the purchaser as soon as sold.

### Liabilities...

All persons attend the sale at their own risk. The sellers, facility owner, auctioneer and sale manager assume no liability, legal or otherwise, for any accidents that occur. It is understood that T Bar C Cattle Co. (2013) Ltd. is acting only as a medium between buyer and seller and is not responsible for any failure on the part of either party to live up to his obligations. Neither does T Bar C Cattle Co. (2013) Ltd. assume any financial obligations to collect or enforce collection of any monies between parties and any legal action that may in exceptional cases be taken must be between the buyer and the seller. T Bar C Cattle Co. (2013) Ltd. assumes no responsibility for any credit extended by the seller to the buyer. The buyer must look to the seller for fulfillment of all guarantees and representations made here under..

## Phone, Mail, Wire Bids...

Bidders unable to attend the sale may phone, wire or mail their bids and instructions to the sale manager, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

#### Insurance...

Agents will be in attendance to insure your purchases. We strongly recommend that insurance is purchased for full value.

#### Errors...

All announcements at sale time, written or oral, supercede any written material in the catalogue.
