Welcome to our 15th Annual Best Bet Bull Sale

As I write this, our cows are due, by the book, to start calving today. We have sixty on the ground already and fortunately the weather has found a happy place in the middle of the extremes of the past year. Between fires, drought and flooding it certainly has been a challenge for many and our hearts go out to those that have felt the hardship. We were fortunate to have only dealt with one big fire on the range for the summer and managed to juggle the cows around for grass. I always get a bit jealous when I see bulls that are born the first of January, pastured in the back yard and put on feed in September, they look finished already. However, I have to remind myself that January is cold and our cows don't come off the mountain until the end of October and deserve a break. On the bright side the bulls grow up and are accustomed to conditions that they will have to work in. When I think back, we have it so much easier than when Mom and Dad started the herd in 1970, there has been a stack of genetic fine tuning and improvement in facilities in the past 52 years.

We are so fortunate to have Thompson and Leanna interested in the ranch, Leanna knows all of the cows and is building her own herd. Thompson is starting his herd as well; he is at university but comes home to pitch in every weekend.

We are pretty excited about our set of bulls this year; we feel this is the most consistent group of bulls that we have ever put together. There are more bulls in each group than we have had in the past and they are solid from start to finish. It was a challenging summer for feed and miles travelled but the bulls came home looking good. They have gone on feed and performed very well; the entire group has averaged 4 pounds per day for the first 110 days.

These bulls have developed in conditions that are similar to yours, in rough country on mothers' milk, their performance is a result of the cow not a creep feed bin. Feet and legs are extremely important to us as they have to be able to move long distances. We feed a high roughage total mixed ration that is designed to keep the bulls healthy. We focus on the females being trouble free; good udders, easy calving and sound. They need to produce a calf every year, no free rides, no exceptions. We have a great deal of pride in our cows and invest a large amount of time and money to source new herd sires. As usual we have put a lot of emphasis on carcass traits as we still have a viable meat program and these traits are important to us as I am sure they are to you.

We are very thankful that Ron and Lois have been our sale partners from the very first sale. It is a pleasure working with them and has worked so well with Ron looking after the North deliveries and us the South. Ron and Lois have sold their black Angus cows looking forward to slowing down a little and to focus on their Simmentals. We wish the Crosby's all the best in their last sale here and will deeply miss our friends as sale partners in 2023.

Our Thanks to BC Livestock; the crew always does a fantastic job preparing the yards and looking after all of our needs.

If you cannot make it to the sale or would like a little more time and information, the bulls will all be available for viewing at home until March 30th, the coffee is always on. If you wish to have someone do the bidding for you, contact us or the sales staff at BC Livestock. They are familiar with the bulls and would be more than happy to assist you with your sight unseen purchase. We will have the bulls available for online viewing and bidding with DLMS, their system is very user friendly.

It is our pleasure to extend our greetings and invitation to join us for our sale on April the 2nd.

See you all at the Lake,

**Ian and Anja**

**Leanna and Thompson**

	6.9	5.7	91.5	130.0	33.0	5.1	78.8

A big-time growth bull with a massive top and tons of muscle shape. His dam had an excellent Eastwood 22E son that was well received in last years' sale. RYM 36F is a big bodied power cow, and has three maternal sisters in the herd. All of which are top producers – the dam of lot 2 is a sister and she is the kind anyone would like to have a lot of. 75J is in the top 5% of the breed for weaning weight and maternal weaning weight. We expect his calf crop to push down the scales come fall.

**Lot 2**

EPDS	CE	BW	WW	YW	MILK	MCE	MWWT
	9.4	3.8	81.5	119.0	30.9	7.0	71.7

Talk about dark cherry red! Lot 2 has never missed a beat; he has looked like a herd bull his whole life. His dam is a maternal sister to the dam of lot 1 and comes from a great, heavy milking cow family. RYM 149E weighed 1100 pounds when we preg checked her in the fall – so you can imagine that this near-900-pound hunk looked pretty impressive next to her when she weaned him. The Galen 48G calves have impressed us in every way. We admire their colour, heavy hair, they come easy and are some of the easiest fleshing and heaviest calves in both the bull and the replacement heifer pen.

**Lot 3**

**MITCHELLS RED WHISKEY 189J**

Red Polled 7/8 Simmental PRS1362248 RYM 189J Feb. 13, 2021

EPDS	CE	BW	WW	YW	MILK	MCE	MWWT
	12.9	1.2	86.7	132.0	30.1	7.8	73.5

This calf is one that catches my eye in the pen all the time. Very loose made, tons of rib and hip. His temperament is also pretty stellar. We kept his maternal brother as a heifer bull to use on our replacements last year and they are coming easy, we are excited to see them develop. 189J has impeccable EPDs. The perfect balance is calving ease and growth doesn't mean "middle of the road" in this case – he is top 15% of the breed or better in 8 EPD categories.

## Lot 4

### MITCHELLS RED WHISKEY 218J

Red Polled Purebred PG1363613 RYM 218J Feb. 16, 2021

EPDS	CE	BW	WW	YW	MILK	MCE	MWWT
	11.3	2.6	83.6	117.3	30.1	6.2	71.9

218J has a tremendous amount of middle. When we say the Galen 48G progeny are easy fleshing we mean it! His dam is easy to love - moderate, heavy milking and feminine fronted. Every single EPD category is well above average, and we think that will prove true when you get his calves on the ground.

## Lot 5

### MITCHELLS REVELSTOCK 20J

Red Polled Purebred PG1354741 RYM 20J Jan. 27, 2021

ERIXON REVELSTOCK 41A

EPDS	CE	BW	WW	YW	MILK	MCE	MWWT
	10.6	1.7	75.7	115.6	32.4	6.8	70.3

This will be our last set of Revelstock 12C calves and we're going to miss them. We purchased the herdsire for his curve bending EPDs, with great calving ease numbers and top-of-the-breed growth. He did exactly what we wanted, leaving us with females with more substance, excellent feet, and fleshing capability. As for his male progeny they have left their mark as well, there is a reason they have been so popular in past sales. 20J is no different, he is a very attractive package that has performed well and looked the part every step of the way.

## Lot 6

### MITCHELLS REVELSTOCK 85J

Red Polled Purebred PG1361608 RYM 85J Feb. 4, 2021

EPDS	CE	BW	WW	YW	MILK	MCE	MWWT
	9.0	3.6	86.6	140.3	27.0	2.6	70.3

85J has a great top with lots of length. His dam is one of the few Red Rock 68B females that we have left as we unfortunately only had him one breeding season, but the progeny we have are here for the long run. They are sound, feminine, eye appealing cows that continue to impress.

**Lot 7**

**MITCHELLS REVELSTOCK 116J**

Red Polled Purebred PG1362106 RYM 116J Feb. 6, 2021

ERIXON REVELSTOCK 41A

EPDS	CE	BW	WW	YW	MILK	MCE	MWWT
	8.0	3.6	78.3	125.2	34.9	5.9	74.1

This is one I would love to keep for ourselves. His traditional colouring has sure been popular across the Rockies! 116J had an average daily gain of nearly 5 pounds per day on feed, which is a huge part of why people gravitate to these exotic cattle. His dam comes from a great cow family, with 18 retained females going back to the Laika 72N cow, not to mention all of the bull calves sold out of those females over the years. Excellent EPDs back this sound, strong topped, cherry red bull. He is herd sire material and will catch a lot of attention come sale day.

**Lot 8**

**MITCHELLS REVELSTOCK 286J**

Red Polled Purebred PG1364038 RYM 286J Feb. 24, 2021

EPDS	CE	BW	WW	YW	MILK	MCE	MWWT
	4.6	5.1	83.3	135.4	30.3	-0.5	72.0

Loose hid and moderate, his picture doesn't do him any justice. 286J had a full brother in last years' sale go to Ellis Cattle Company and he was just as good. His dam calved first cycle with a set of twins this time; she is a broody, correct, level uddered young cow we have really come to appreciate.

**Lot 9**

**MITCHELLS SOCHI 37J**

EPDS	CE	BW	WW	YW	MILK	MCE	MWWT
	19.2	-3.2	64.4	96.1	26.2	11.6	58.4

As we start into the Eastwood 22E sire group we ramp up the calving ease. 37J is bred to calve like a dream on both his sire and dams side. He is top 1% of the breed for calving ease, birthweight and maternal calving ease. RYM 42G is a beautiful young cow with a picture-perfect udder. Her 11 year old dam is still here, and every daughter retained in the herd is the same: super feminine and deep bodied.

## Lot 10

Red Polled Purebred PG1361602 MITCHELLS **SOCHI** 79J RYM 79J Feb. 4, 2021

	13.7	0.5	77.1	114.7	27.5	7.1	66.1

There is a lot to admire with this attractive fronted, strong topped herd sire prospect. His dam is one of the most productive cows on the whole place, siring an excellent bull that sold to Wayne & Jacki Van Sickle in last years sale. This will be her fourth bull calf she's brought to the sale. 130J came in off the range at nearly 900 pounds. He is early maturing and heavy weaning, something we strive for in our cattle. RYM 64C is unfortunately out of a cow we were never able to register, but she also goes back to the super productive Reality 9P cow family. Her sister is the dam of lot 63.

	15.3	-0.3	80.4	111.5	25.0	11.4	65.2

Lot 20 starts off our last set of Air Force 20Z calves with style. He has great length throughout, is attractive fronted, smooth, and comes with that desired chrome to top it all off. The only downside to this bull is that he was too quiet and busy eating straw to get a good picture of him! His hybrid dam 5143C may be non recordable, but she has been an outstanding producer. 5143C, all of her daughters in the herd, as well as her dam RYM 121A have all calved already as I write this – only 9 days after our calving start date! One of her daughters is the dam of lot 24, she's a very impressive young cow.

The Bootlegger 87G bull has really allowed us to raise the bar for the performance of our red Simmental heifers first calves. They are shaped right to come easy without being too small to perform later in life. RYM 217G has some power packed into her pedigree, and she did one heck of a job bringing 126J home from the range at 785 pounds. Her pedigree goes back to the dam of lot 12; the two cows are similar in many ways, even though they're born ten years apart.

**Lot 26**

	12.2	0.9	65.0	94.4	29.1	10.0	61.6

Another lot that goes back to Reality 6P. RYM 227Y is perhaps even more productive than her mother was, we have retained 5 females out of her and kept multiple bull calves over the years as well. She is the granddam of lot 25. Another daughter, RYM 102F had a powerhouse hybrid bull that sold to Squaw Valley Ranch last year. Our herd sire Kill Switch 148G moderated the birthweight of this calf, it seems to have been a very successful cross.

177J is out of a sweet tempered, moderate framed, really soft middled cow who goes back to the Laika 72N cow family we talked so highly about in lot 7s writeup. This will be the fourth bull calf RYM 218Z has raised. She also has numerous daughters and grand daughters in the herd, all of which display the same substance and dimension; You just can't pick a hole in this sound, solid cow family.

Lot 44

	8.9	3.3	78.3	118.9	21.3	3.9	60.5

An attractive, long bodied Gringo 66G son who also displays some chrome. His dam is very correct, with a top you could eat your supper on. 211J's weaning weight speaks for how well this cow milks. Her udder may be a foot and a half wide when you get behind her but it is well suspended with small teat size.

State of War 207F was the high selling black Simmental bull in Erixon Simmentals 2020 sale. We purchased him based on his phenomenal calving ease traits, curve bending growth and foot quality. I can't say that I ever remember having a herd sire whose calves consistently came with nearly a week early gestation. Never mind how much explosive growth they have after birth. 23J has a ton of extension through his front third and reminds me very much of our herd sire himself. Very long spined and with ample muscle and volume.

	19.3	-2.3	73.2	108.0	26.2	12.6	62.8

I will start these footnotes by saying RYM 309G is a small cow, maybe 1000 pounds as a two-year-old and not a whole lot heavier now. For her to bring in a bull calf weighing just a couple hundred pounds less than herself is amazing. 27J also went on to gain 5.14 pounds per day on feed, he's no slouch.

Another descendant of Blacky 138S, our current oldest cow and a true maternal powerhouse. 138S has 12 registered progeny in the system, and I can very honestly say I like every single one of the females we have retained out of her. RYM 162G really outdid herself here. The 61-pound birthweight was expected, but to bring in a bull calf over 800 pounds on the first go is the icing on the cake for us! If she is anything like her sisters, she will continue to impress. 38J is in the top 1 and 2% for calving ease, birthweight and maternal calving ease.

Black Beauty 247U is a stellar cow. We finally sent in DNA and upgraded her registration status this past summer as she's had so many bull calves through the sale and females retained over the years it really seemed like a shame to not have them be recorded. She still has a level udder and perfect teat size at 14 years of age, and is set to calve in the first cycle once again. 166J has a great top, huge hip and hind quarter dimension, and has always looked the part right from day one.

340J is one with a lot of performance. He is a freight train. Dark red, thick and long topped best describe this calf. He has smooth and appealing muscle expression and a big hip. If you're looking to add pounds to your calf crop come weaning this is the one to do it. His dam is of high quality; very sound, well refined, long topped and with tons of substance.

This is a bull I'm really high on phenotypically. He has great extension through his front third, a refined head, great length and dimension through his top, big rib and ample muscling. You don't find many catalogs these days that show a bull in this little straw that still looks this impressive - and he's just a heifer's calf. He is above average for calving ease, birthweight, maternal calving ease, weaning and yearling weight EPDs. His granddam is a stellar cow, and his dam is following in her footsteps.

	-0.5	2.3	53	86	23	4.0

Lot 89 may be the youngest Angus bull on offer this year but he has always fit right in. He boasts one of the highest rates of gain at 4.6 pounds per day. 336J is deep sided and stout, he will sire some impressive calves.

**RED ANGUS REFERENCE SIRES**

**RED RSL UTAH 835F**

The "Utah" herd sire was chosen for his excellent curve-bender performance. He was born at just 62 pounds and yet his two-year-old dam had him weighing 800 pounds come weaning. His heifer calves in the pen are some of the heaviest Angus as well, even off of first calf heifers. We retained a son for our own use last year and we are so impressed with the quality of his calves. Utah has been an absolute dream for calving ease. He is king of the heifer pen but saw a lot of cows as well. It is a no brainer when calves come consistently lighter and grow so well.

**Red Mitchell's Park 79G**

A bull we retained based on the productivity of his dam combined with excellent numbers, great calving ease and performance. It is always gratifying to us when our best calves come from genetics that we retained for ourselves. Park 79G's dam is out of the Dawson 3Y herd sire we raised and kept years ago. Fast forward to this year and I think 79G's progeny are some of my favourites in the pen.

**Red Mitchell's Driver 27G**

Driver 27G is out of a really sweet, soft sided, attractive fronted six-year-old cow with a good udder. She is sound, keeps easy and produces well. 27G is a true calving ease bull, and his EPDs point to that as well. He had a 64-pound birthweight but ranked in the top of his group for weaning weight. His calves have proven to be shaped right to come easy and he will likely find his place in the heifer pen this spring.

**Red Moose Creek Sawyer 142E**

Purchased from Moose Creek Red Angus, we didn't intend on spending over \$20,000 for a heifer bull, but the good people at Triple S Angus definitely wanted him as well. This bull has added stoutness and style to each one of his calves and is still worth every penny. His daughters are proving to be moderate, soft middled and stout, with refined fronts.

# RED SIMMENTAL REFERENCE SIREs

**Erixon Lad 12C**

We chose 12C from Erixon's sale based on his mass and substance. He was a high seller from this prestigious sale. His EPDs are still very impressive. Revelstock 12C has seen a ton of cows over his years here; he is unrivalled for growth and still calves exceptionally well, even for a bull with so much performance. His daughters have so much added volume and are very easy keeping and good footed. We hope they will continue his legacy here.

**Skors Kill Switch 148G**

Kill Switch 148G was selected out of Skor Simmentals final bull sale following their dispersal and was the second high seller at \$17,000. He is a big barrelled, moderate framed herd sire with good muscle expression. This spring he remains in good shape – he's still a tank. His calves have proven to be growthy and soft middled and yet they come easy with very moderate birthweights, just as his impressive set of EPDs predicted. We have retained a son for our own use that we are extremely excited about and both him and his sire will see some cows in breeding pastures this year.

**Mitchells Bootlegger 87G**

The Bootlegger 87G bull has really allowed us to raise the bar for the performance of our red Simmental heifers first calves. They are shaped right to come easy without being too small to perform later in life. His grand dam has a great bull calf in the sale this year. The females in Bootlegger 87G's pedigree are so extremely sound. They profile nicely and travel and keep well. 87G is in the top 1% of the breed for calving ease and has impressed us so much with this set of heifers calves he will very likely find his place back in the replacement pen once again come spring.

**SBSF Eastwood 22E**

This is one of the most moderate and easy to look at sires in the herd bull pen which we purchased for \$20,000. I'm sure he hasn't dropped an ounce of flesh since the day he got here, and that's pretty impressive in itself considering his depth and thickness. A very complete package that is eye appealing and to no surprise calved extremely well on heifers with EPD's in the 1st percentile for CE, BW and MCE. Springcreek Simmentals bought a semen package and used him on heifers and mature cows and the resulting progeny are fantastic. His last years sons in the Pursuit of Perfection sale brought as much as \$20,000, \$18,000 and \$16,000. We are calving his second set of heifers now, they are all well balanced, feminine, moderate young brood cows that all set up pretty udders with ample milk.

**MAVV Galen 48G**

One of my favourite herd sires in the mature bull pen. He has kept well, is a very good breeder, and passes along his massive hip, muscle expression and dark red, heavy hair to his progeny. Galen 48G is so impressive that one might take a second guess at his calving ease, but it is phenomenal as well, he is in the top 20% for the calving ease EPD. He is better than average for birthweight, top 10% for weaning weight and carcass weight, and top 15% for yearling weight EPDs. We will be putting him with as many cows as a pasture can handle this spring, and look forward to adding more of his offspring to the herd.

**Mitchells Venom 34G**

Venom 34G is a bull that we retained for our own use based on the merits of his beautiful uddered, sound and correct 10-year-old dam. As well as his sire Entrust 84E who calved well, had great growth and is an extremely sound, good-footed herd bull. We have used Venom 34G for two years now and he is an excellent breeder. His calves are the right cherry red colour and shape and we really admire the replacements he has added to our heifer pen.

# BLACK SIMMENTAL REFERENCE SIRE

**Erixon State of War 207F**

State of War 207F was the high selling black Simmental bull in Erixon Simmentals 2020 sale. We purchased him based on his phenomenal calving ease traits, curve bending growth and foot quality. I can't say that I ever remember having a herd sire whose calves consistently came with nearly a week early gestation. Never mind how much explosive growth they have after birth. The replacements in the pen certainly do not look like heifers first calves and we feel that the bulls on offer this year fit in perfectly as well. It makes a huge difference to your calf crop when you can count on first calvers to raise calves that fit right in with the rest.

**Circle G Explorer 40E**

A bull purchased based on his performance blended with great CE, BW and MCE numbers and his dam's quality and productivity. We have been very pleased with 40E's calves. They are thick made, well muscled and some of the heaviest steers come fall were sired by "Explorer." The udder quality and milk production of his females we have calved is absolutely ideal. We are very pleased with their phenotype and feel that they will mature to be a backbone in the Black Simmental division.

**Skors Capitan Morgan 195G**

Progeny of the Captain Morgan 195G herd sire have been very consistent. They are stout, heavy haired, very attractive fronted, strong topped and possess an eye appealing muscle pattern. For a bull that is so stout he calves very well, we would breed him to our more mature heifers comfortably. Circle G Simmentals purchased his dam, the second high selling red cow, from Skor Simmentals dispersal for \$13,000. 195G's second calf crop is on the ground now and they are just as exciting as the last. We really look forward to calving his daughters next year.

**PRL Gringo 66G**

Gringo 66G is an extremely smooth individual with so much substance. His calves' birthweights were moderate and came easy, as his top 10% calving ease and birthweight EPDs suggested. Coming from the Porters program this bull has built-in carcass merit and accuracy, ranks in the top 5% for marbling and the top 10 and 15% for carcass weight and ribeye area. His growth EPDs are also well above average. There isn't much you can fault this herd sire on and we feel that his first calf crop is a great testament to his quality.

**Muirhead's Time Out 263B**

"Time Out" as we call him is extremely consistent. His calving ease blended with performance has been second to none when it comes to the black Simmental program here. We have used him extensively over the years and not many bulls are as sound and trouble free throughout their life. It is no surprise that he is out of one of Muirhead's favourite cows and we understand why LaBette's and Circle 7 use a brother.

*Thank you to all of our past bidders and buyers for  
your continued support*

Welcome to the 15th Best Bet Bull Sale. Hard to realize it's been that many years. This idea of Ian's has developed into the 'must attend' bull sale of each spring. Crosby Cattle has enjoyed a great relationship with the Mitchell family over these years. It really has been an honor for us to participate in this event since its inception. With all that being said, Lois and I have dispersed our Angus cow herd, so this will be our last contribution to this great event. We are grateful for the support we have received over all these years and we have made some relationships that will last forever.

The Angus genetics that we compiled over the years will be continued by Melissa MacIsaac of Spruce Ridge Farm, and Luke and Amanda Muehlen of LA Ranch. We thank both of these young operations for having the confidence in our program and the future of the industry. We wish them great success.

The bulls have been vaccinated with Express 5 and Fermicon7/Somnugen and treated with pour-on Ivomec. Prior to the sale the bulls will be semen tested and evaluated for soundness. We do not sell any Angus bulls off the farm prior to the BEST BET BULL SALE.

We welcome you to stop by the farm before the sale to go through the bull pen and have a look at the sale bulls. If you would like more information on the bulls, give us a call.

The bulls will be at BC Livestock Co-op in Williams Lake for viewing on Thursday, Friday and Saturday before the sale. The sale will also be on [www.DLMS.ca](http://www.DLMS.ca) for bidding and viewing.

*Ron & Lois*

**Thank you to BC Livestock Co-op for helping make our sale a success.**

**We would also like to thank our friends and neighbors who are always there to help when needed.**

## Terms & Conditions

**Terms:**

The terms of the sale are cash or cheque, payable at par at the sale location unless satisfactory credit arrangements have been made prior to the sale. The right of property shall not pass until after full settlement has been made. All settlements must be made in Canadian funds with the sale clerks before any cattle will be released.

**Bidding:**

Each animal will sell to the highest bidder, the seller reserves the right to pass the bull.

**Disputes:**

Bidding will be reopened between the parties involved in dispute. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision on all disputes will be final.

**Announcements:**

All announcements made from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay close attention to such disclosures.

**Purchasers Risk:**

Each animal becomes the risk of the purchaser as soon as sold. We strongly recommend insuring your purchase for full value.

**Delivery :**

Free delivery to central points in BC.

**Health:**

All animals in the sale have met all necessary health requirements.

**Insurance:**

All bulls will be covered in the yards by Hartford Insurance; insurance will be available for long term coverage.

**Breeder's Guarantee:**

The animals in this sale are guaranteed per the breeder's guarantee of the breed association they are registered with. In the unlikely event that a bull proves to be a non-breeder he will be replaced with a bull of equal value. Should this not be possible, an adjustment will be made to reflect the value of the bull in question or a credit will be issued towards a future purchase. At no time will we be responsible for any costs exceeding the original purchase price and no guarantee is made that semen from any bull will freeze. This guarantee will not cover any situation where the animal has been subjected to mismanagement or physical injury and we will not guarantee any animal that is subjected to any hormonal or surgical reproduction techniques after the sale. Insurance is available sale day and we strongly recommend that you take advantage of this service. We will do our utmost to work with you to ensure your satisfaction should any problems arise.

**Rights and Obligations:**

The above terms and conditions of the sale shall constitute a contract between the buyer and seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.
