## Welcome to the 12th Annual Bull Sale!

Welcome to the 2022 edition of our Bonchuk Farms Annual Bull Sale. We always look forward to this time of the year. Getting ready for the sale is still a busy time but the decisions made last breeding season have been showing up with the fresh calves being born. Always exciting to see the new bloodlines selected for our program and what we can offer our customers. This is our time to reevaluate our own program and decide which new bloodline will be used in the next breeding season.

We have developed many long lasting friendships and truly treasure these relationships. We look forward to working with our great customers and new ranchers that might be looking for herd bulls. North American cow herd numbers are lower than they have been in years. This is an optimal time to invest in a new herd sire that will add dollars to your bottom line. We are passionate about what we do and look forward to helping you choose a herd sire that will add value to your program.

It is herd bull buying time – make your choices wisely and profitability will follow. We have an exciting group of bulls for your evaluation. The yearling bulls are our strongest pen yet and there is an exceptional group of two year olds! Herd bull selection is a major decision and producers should be as informed as possible. We welcome all calls and visits to help answer any and all questions you may have. The bulls are always available for viewing at the Farm anytime. They will be in Virden at the Heartland Livestock Yards on Sunday before the Sale. Give anyone of us a call if you have any questions or the T Bar C Staff – Chris, Shane or Ben. They have been through the bulls and will be happy to help. Mark Shologan and his staff at DLMS will be live broadcasting our event. We will have all lots on video so you can check them out on buyagro.com.

We hope you will join us in Virden on Tuesday, March 8, 2022 to evaluate our offering and share in our Bonchuk style of hospitality. Visitors are always welcome!

Where the coffee is always on...  
The beer is cold  
And the perogies are homemade!

Bonchuk Farms Bull Sale

## ..... From the desk at T Bar C ..... .....

Welcome to the 22nd Annual Bonchuk Farms Simmental Bull Sale on Tuesday March 8, 2022, at Heartland Livestock Sale Barn, Virden, Manitoba. For the past twenty-two years this sale has represented great family values, awesome hospitality, exciting cattle, and outstanding customer service. This year they offer 113 "Bonchuk Brand" sires for your evaluation... bred and developed to add pounds and profit into your bottom line.

The line-up includes both yearlings and two-year-olds ... red, black and Fleckvieh. The two's are later born virgin bulls that have been grass run throughout the summer. Bonchuk's always retain some bulls as spares for any customers who have bull problems ... their aim is to get your cows bred. These bulls will cover more cows in bigger pastures and not shrink down in breeding season.

The purebred bulls are rugged, hairy, and chunky, full of muscle and performance. The large cow base and the use of walking bulls has allowed them to offer a uniform yet diverse selection to choose from. These bulls are represented by the most current, predictable herd sires in the breed and the beef industry. Many of the purebreds come to you homo polled.

The large offering of Full Blood bulls, polled and horned, are sired by the proven Dealer and Rocky, in addition to the new sires Western Frontier and Polled Future. The fullbloods are rugged, beefy, and full of performance. One of the most important features to this powerful lineup is the strength and quality of their mothers... a cow herd built over decades of "cow sense with experience."

Feel free to stop by the ranch any time prior the sale, preview the bulls and their mothers. The bulls will be at the sale barn Sunday and Monday prior the sale. Do not hesitate to give any of the Bonchuk crew a call to discuss which bulls would suit your breeding intentions.

Plan to be with us for Bonchuk Farms 22nd Annual Bull Sale whether it be with us in person, online or on the phone. We have graded the entire offering so feel free to give any of the T Bar C Team a call and we will be pleased to assist you in a professional and confidential manner with your selections.

Here is a type of bull that will keep you in the beef business a long time! Liner certainly passed down his powerful deep barreled, round quarter, wide topped super smooth look down to 30J. He comes from a great hard working Ponderosa dam with a nice udder and terrific body shape to help her stand the test of time. 30J should have the ability to sire both heavy weighing steers and terrific replacement females as his cow family goes back to our influential E55 flush cow. In my opinion I think this bull would be amazing on Angus x cows to add some pounds to the scale come fall

BUTTS, GUTS and NUTS! An impeccable son from Red Desire that comes out of a model female. 111Y has an excellent production record and has never raised a throw away, every year she has a featured top-notch calf. 74J is a dark red hairy bull with a lot of length, thickness, and pure power. He boasts natural muscle, eye appeal and has big testicles. We pictured him on -40 day, and they still look huge in his picture!!!

Here is a bull you want in your heifer pen! This cherry red, low birth weight calving ease prospect we think is really something special. 77J has great length, rib shape and exceptional width of top. His dam 172G is a long spined big, bodied Revenue daughter that shows a lot of promise. A very strong cow family with dark red cattle many generations back.

There is a lot of bull here! Another great prime example of the stout, punchy style that Hitman injects his calves with. He comes out of 44D a moderate framed big volume, heavy milking cow who has proven she knows how to raise a damn good calf every single year. 78J is a bull that will add pounds, performance and predictability to your next year's calf crop.

If you have a lot of heifers to breed this spring 94J should definitely be on your radar. 94J has great length, style, depth, a nice straight topline and is structurally just so correct. His dam 89G is a Gibson's Finest daughter that has a perfect udder and immense volume. She worked very hard all summer and quickly bounced back after weaning, she's easily picked out among even the mature cows by her performance and do-ability. If you like eye appealing cattle and lots of sleep through calving, then 94J is the bull for you.

A Red Standard son with a splash of chrome. Comes out of a big framed, quality Sledge cow that passes on the blaze quite well. 116J will work well on a diverse group of females. He should work well to add frame and stretch to moderate females and still be ideal on large framed cows maintaining power and performance. Hopefully that money stripe will be added to all of his offspring.

A great heifer bull prospect here. This dark red moderate framed Kill Switch son is deep, thick, has great depth of quarter and a heavy hair coat. Comes from one of my favourite first calvers 50G, a very heavy milker with perfect udder quality and jaw dropping capacity. This cow family is exceptional with a long list of maternal forces in herd- I don't believe we've ever let a female leave the farm from this cow family. Buy with confidence, not much guesswork here.

Sometimes you birth a calf and you just know that they're gonna rock this shit. This is that bull . . . and he rocks it hard. 202J possesses a superabundant amount of muscle expression, depth, length of body, width of top and eye appeal; everything to make him a great herd sire. His dam 224F as a young cow has produced jaw droppers, she is really going to make a positive influence in the herd. She raised our first Affinity daughter we kept for ourselves who is easily topping our group of reds. Not much guesswork for this Red Desire son. Buy with confidence.

This Crocket son is the stoutest, widest topped and heavy muscled bull in the yearling pen with a very cool pedigree. 218J offers the complete package of power, performance, maternal legacy and predictability from generations of consistency. Our Black Crocket son made a big mark in our herd siring progeny with enormous capacity, performance and made model females. We just wish we could have used him longer. 200D is a faultless brood cow that's never missed. She has impeccable capacity, spring of rib, do-ability and eye appeal. Perfect udder, heavy milking and very structurally sound. With the combination of power and performance from Dealer and daunting maternal power going back to the legendary E55 cow family she has shown her ability to raise the best calf in the pen consistently. You can't go wrong on this yearling, he'll be an asset in any program.

A non-diluter Revenue son that has the length of a freight train. The Revenue progeny have been so consistent in all the years we've used him, raising big, long bodied, stylish with power. Always very predictable and make the real beefy cattle that we aim to raise. We purchased the dam 9Z from Lazy Bar B Simmentals and she has been a consistent producer.

Another Swagger son that has stood out for some time and has been admired for his eye appeal, do-ability, capacity, phenotype and pedigree. 216J has exceptional performance and is so typical of the Swagger progeny. His dam continues to work hard every year, she is a big volume, heavy milking female with an excellent udder. 216J will make a quality herd sire.

Sale Feature! Full Fleckvieh. An outstanding Silver Lake Dealer son that has many attributes to be a herd builder. He has incredible muscle mass, capacity, strong topline, a great temperament and tons of eye appeal with his dark red color and blaze face. The pedigree on this bull is as great as we can make it, going back to the Klyber 54L cow family that was certainly very productive for us. We flushed 54L with great success, we also flushed her daughter 181T and were fortunate enough to have several high sellers from her. 324H has an incredible phenotype, a tremendous cow family behind him, making him a powerful herd bull prospect for any breeding program.

Polled, Full Fleckvieh. A polled full fleck sired by Rocky and out of a foundation cow family that was purchased from Murray Farms. The MFI 46U cow was a powerful herd building female that raised some great progeny and left behind a legacy of herd building cattle. 155E is a great uddered, heavily pigmented female that we are liking the looks of. 336H has tremendous volume, smooth polled, and is ready to go to work.

Polled, Full Fleckvieh. The natural calf from our flush cow, 390H will be a bull that will add some frame, dark red color, and a unique pedigree. 78Z flushed really well for us and we have some highly anticipated progeny coming this calving season. This bull is a bit old school, but sometimes old school is good to fall back on!

A polled, full Fleckvieh masterpiece. We purchased the dam from Northern Light Simmentals in hopes to acquire a polled bull calf and what an exciting time it has been to watch him transform from a small baby calf into an unforgettable yearling. Since day 1 he has always stood out, arresting the attention of all who have seen him. A stellar makeup of power, length, depth, style, super quarter and has a top wide enough to seat the whole family for dinner. Battle Cry has certainly made a notable mark in the industry siring high selling progeny across the country. We couldn't be more happy with how 89G is showing such soaring potential! She is the "right kind" and has the capacity, udder quality, eye appeal and functionality to become a renowned female in our operation. 3J is one you better make sure you put a check mark beside.

Polled and full fleck! The darkest red bull in the sale. A low-birth-weight Guerrero son that was created to generate dependable calving ease. We purchased the mother Tannis 12G from Apple Cross Cattle in calf with this eye-catching prospect. We are so pleased with how Tannis is fitting in with the mature cows, heavy milking, smooth made and easy fleshing. 4J is a quiet minded, long spined and smooth made bull that is ready to go to work.

Full fleckvieh, double polled. Our very first born Western Frontier son and he sure has set the bar. Lots of pigment, length and has a top wide enough to seat the whole family at Christmas. 5J has been a jaw dropper since he popped out of his momma. Genetically built for power, predictability, and consistency. 161D is a dark red, deep bodied, heavy milking Silver Lake Dealer daughter that raises real beef cattle.

Another dark cherry red Western Frontier son that doesn't go unnoticed. If you're looking for a heavy pigmented bull to inject high milk and positive maternal characteristics, 68J has got some answers for you. Top 5% in milk. He will pass on his length, depth, big barrel and dark color onto his babies giving you a calf crop that is predictable and profitable.

It speaks for itself when you can use a bloodline for many years and never have the consistency of quality waiver. Silver Lake Dealer brings uniformity, stoutness, length and do-ability in all his progeny- both heifers and bulls. 128J is a wide hiped bull with tremendous depth, length and great color. Comes from a great Juggernaut female, we sold a full brother in last year's sale and he was an obvious pen starter.

# TERMS & CONDITIONS

---

## **TERMS**

The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. Announcements from the auction block will take precedence over the printed matter in the catalogue. Current exchange rates will be announced sale day. All monies are in Canadian funds.

## **CERTIFICATE OF REGISTRATION**

Each animal will carry papers issued by the Canadian Simmental Association. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

## **PEDIGREE ESTIMATES**

Pedigree Estimates (PE) are created on the projected mating of the animal's sire and dam based on averages of the two, creating estimated values that do not hold the same accuracy of actual EPDs issued from the association and should be used as such.

## **HEALTH**

All animals in the sale have met all necessary health requirements.

## **GUARANTEE**

Each animal becomes the purchaser's risk immediately after the animal is sold. All animals in this sale will be sold under the terms and guarantees set forth by the Canadian Simmental Association with regards to health, freedom from defects and from both reproductive and specific genetic unsoundness.

## **LIABILITIES**

All persons attend the sale at their own risk. The seller, facility owner and sale manager assume no liability, legal or otherwise, for any accidents that occur. It is understood that T Bar C Cattle Co. (2013) Ltd. is acting only as a medium between buyer and seller and is not responsible for any failure on the part of either party to live up to his obligations. Neither does T Bar C Cattle Co. (2013) Ltd. assume any financial obligations to collect or enforce collection of any monies between parties and any legal action that may, in exceptional cases, be taken must be between the buyer and the seller. T Bar C Cattle Co. (2013) Ltd. assumes no responsibility for any credit extended by the seller to the buyer. The buyer must look to the seller for fulfillment of all guarantees and representations made hereunder.

## **PHONE, MAIL, WIRE BIDS**

Bidders unable to attend the sale may phone, wire or mail their bids and instructions to the sale manager, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

## **INSURANCE**

We strongly recommend that insurance is purchased for full value.

## **ERRORS**

All announcements at sale time, written or oral, supersede any written material in the catalogue.

## **DELIVERY**

Shipping assistance will be given in making shipment after sale but sale management or seller assumes no risk. Bonchuk Farms will assist in arranging trucking to central points across Canada. All costs associated with shipping will be the responsibility of the new owner. Each animal becomes the risk of the purchaser as soon as sold.

## **HERD HEALTH**

All bred cattle received Express 5 before breeding and Total Herd has been on the Express program for over 10 years, making the ranch BVD-free. Bred heifers also received black leg vaccine before breeding. All pregnant cattle have their first shot of Scour-Bos vaccine and treated with Ivomec.

***Bonchuk Farms reserve the right to draw semen on any of the sale bulls for in herd use at the buyer's convenience.***
