Welcome

Welcome to the 20th annual Bull Rush sale! Can't believe this is the 20th already, It seems like yesterday we were planning our first one with co-founders Wild West Farms, R-Five Simmentals, Movald Ranches, and ourselves Stone Simmentals. Over the years some of the faces have changed with Wild West dispersing their purebred herd and Stout Brothers coming on board. This year you will notice a big change as R-Five Simmentals are taking a step back to make some extra time for the finer things in life. Jim and Desiree have been a strong contributor to the sale with bringing quality bulls and strengthened their genetics over the years for an excellent cow herd. We will truly miss them and wish Jim and Desiree well with their future endeavors.

20 years is quite a feat it just goes to show that our group of consignors are committed to our customers and the bulls are consistent and dependable, and over the last 20 years we have built a lot of trust and we look forward to servicing your bull needs for the next 20 years!

This years sale has some great offerings you can find fullbloods, reds, blacks and polled bulls. All of the consignors welcome you to their operations ahead of time to view the bulls if you wish. The bulls will be available for viewing the day before the sale in Rimbey. If you cannot make it sale day please talk to one of our trusted sale staff or consignors and they will be more than willing to assist you, or you may also bid online through DLMS.

We welcome you to come celebrate our 20th year with us on Feb 24! Hope to see you all at the sale!

Sincerely on behalf of the Bull Rush Group

Blaine Stone

Cameron and Mackenzie Stout

Cameron Cell - 403.963.1034

Mackenzie Cell - 403.913.9453

On behalf of Stout Bros., we would like to welcome you to the the 20th annual Bull and Female Sale. What a year! Seems to be a common saying the last couple of years. With that being said the outlook for agriculture is as bright as ever. With record high grain prices the past year and a big decline in the Canadian cow herd the stage is set to have both grain and cattle fetching high prices. The emphasis on pounds and maternal quality has never been greater with high quality replacement heifers commanding a premium sale after sale. With that being said we encourage you to stop by the farm to check out the bulls and their dams at the farm, to give yourself a glimpse into each bulls future. Weaning weights taken August 24th and Yearling Weights were done Dec 31st. As always our bulls have been slowly developed on the Country Junction Right Way beef ration pellet and fed free choice haylage. All the bulls have all been tested for diluter gene (if bred to black cows non dilutor will have no greys), homozygous polled (homozygous polled bulls will have no horned calves) and coat colour where applicable. DNA test results will be seen at the end of each footnote, if you have any questions about the DNA testing give us a call and we will go over it with you. The bulls and heifers will all be videoed and can be viewed at you convenience 2-3 weeks prior to the sale on DLMS, Cattlevids, or our Facebook page. If you have any questions about our offering feel free to give us a call, text or come see the cattle in person, we would love to hear from you. Hope to see you all February 24th in Rimbey!

Last year was our first set of Ballistics bulls to come to town and they had their fair share of admirers. One of which was a full brother to Harrison that sold to Darren and Alana Wright of Bentley. Their dam Cherry is a phenomenal cow that is a favorite for anyone that has seen her. Not only does she look the part she is setting up a pretty good track record, raising a bull for the sale each year she has been in production and she just laid down with her fourth. Harrison is a dark cherry red, big barreled bull that comes with that highly sought after polled head. A bull that grabs you attention from a far and deservedly so. Harrison is a bull we really admire and backed by one of our best cows, no guess work here the only thing left is to get him bought! Non Diluter

One of my favorites, if not my favorite bull in the pen. There isn't anything flashy about Cochise, maybe even on the ugly side of the spectrum but he is one hell of a bull. Moderate, heavy boned, pigment, dark feet, big ribbed, soggy and loose hided just how we like them. Cochise is his Bethany's second bull to hit the sale in just her second try. Last year her Hextor son was in the lead off of pair of bulls and was selected by our good friends Kenton and Katie Danielson at Caroline. If her first two bulls are any indication what she can produce this little cow is going to have a bright long future. Its herd bull time! Non Diluter

If you are looking for a performance herd sire, Tell and Orrin should be at the top of your list. The flush between Virginias Shooter and Yvette really clicked, producing top end males and females. Their full sister is the star of the heifer pen that has been turning heads all summer and fall. Yvette herself is a big tanky cow that at 11 years of age still possesses a fantastic udder and a good strong foot. Both Tell and Orrin have performed excellent throughout their development, weighing within a few pounds of each other all along the way. I know the birth weight might be a little larger on these

bulls but keep in mind they are both Embryo Transplants which often will add longer gestation and bigger birth weights. Now I'm not saying they are heifer bulls; they aren't and they weren't bred to be. They are bred to produce pounds and they will do that with excellence. A real good pair of ranch type bulls that will raise big weight steers and an awesome set of replacements, you may just want to sweep the ring when they come in! Non Diluters

Pedro is the first calf sired by our polled walking bull Epic. We tried to purchase Epic as a calf but came up a little short, a couple years later after seeing him mature and viewing his dam at Cherry Creek Simmentals we wrote the cheque. We anxiously await to get his daughter into production as they are going to be rippers. Pedro come with a little whiter than most are used to seeing this day in age with the fullblood cattle but when you see them you know they have to be good! Once again, a moderate bull with a ton of volume and polled to boot. You will drive the wheels off a pickup truck trying to find one like Pedro! Non Diluter

Here is a pair of Radioactive bulls from a flush we completed on our polled donor cow Xplore. We purchased Radioactive semen from Anchor D Pasture Treasures sale and felt it would work well on Xplore to produce polled calving ease options for our bull customers. It did just that, producing After Blast and Shockwave. After Blast may have not come polled but a bull we really like and is our pick of this year's calving ease bulls. Shockwave came homozygous polled but lacks the pigment his older brother was blessed with. If I was a betting man, I would bet he sires his fair share of goggled eyed calves, as both sides of the pedigree bleed pigmentation. Besides pigmentation and

horned status, they have many similarities, thick, heavily muscled, large scrotals and dispositions second to none. I truly don't believe their pictures due them justice, they were pictured in late November for our bull sale ads and with cold weather and full swing into calving we couldn't get an updated picture done. Come take a look sale day, they will be looking the part! Non Diluters, STBS 22J Homo Polled

In last year's footnotes I mentioned that you would hear about Radon's dam, Kananaskis 096F in the future, well here is her first calf and he's a good one. Kananaskis was purchased by our great partner Ghanim Cattle Company for \$38 000 in the Ferme Gagnon sale and has proven to be a great investment in short time. After Radon was born, she hit the donor pen and a flush was purchased from Valley Creek Simmentals in Australia. She was then bred back and we eagerly await her second calf to hit the ground. Radon is a heavily pigmented, dark blood red bull with a strong correct foot, that would excel your heifer pen or on your cows for added piece of mind. A pedigree that reads the who's who in the fleckvieh industry and backed by a great momma cow, step in early on Radon he will be worth every penny. Co Owned with Ghanim Cattle Co. Non Diluter

Over the last few breeding seasons, we have used Max Factor with great results. They come with moderate birth weights and have a ton of grow to them. Sunshine has been a standout from day one and has been a bull that has been picked out by everyone that has toured the bull pen. He demands your attention and has had that her bull look from a very young age, a true testament to a great herd sire. Not a lot I can say about Sunshine, I think his picture says it all. A true herd bull in the making that ranks right at the top we have raised! Non Diluter

Another good Max Factor bull mothered by an excellent cow. Yasmine, Superstition's dam is a no miss cow that we purchased from Swantewitt Simmentals as a heifer calf. She is as consistent as they come and Superstition will mark her 6th bull calf entering the sale ring. We just calved out his full sister and wow is she ever good. Easy doing, broody, excellent uddered and I will guarantee you will see her bull calf in the sale next year. You can expect these same great qualities from Superstition's calf crop. A very solid choice here that is sure to produce big dividends! Homo Polled, Non Diluter

The heavy weight of this year's bull pen, Lefty comes to you with you with added frame and length of spine that really pushes down the scale. Lefty is an ET calf out of a package of embryos we purchased from McIntosh Livestock are very pleased with the results. These WS Epic calves come with moderate birthweights and really took off when they hit the ground. Lefty started with a 92 pound birth weight and weaned August 24th at 880 and out performed his pen mates on daily gain weighing 1384 on December 31st. If you use EPDS as a selection tool, Lefty is sure to impress. He ranks in the top end of the breed for both calving ease and performance numbers and with the actual data to back him up, Lefty should rank high on your list. Homo Polled, Non Diluter

Another low birth weight, high performance ET calf that we think very highly of. Slinger has had that herd bull look from an early age and was the standout in the first calf heifer pen all spring and has continued his development throughout. His donor dam 63U is an impressive baldy female that is still in production at almost 14 years of age and her progeny are still in high demand. Slinger himself is a dark blood red, smooth shouldered bull with as much rib shape and thickness as any bull in the pen. We believe Slinger has a ton of potential and versatility to work on heifers or cows which ever you may choose. Another bull with tremendous numbers and growth curve potential. Slinger won't be hard to pick out sale day! Non Diluter

A good traditional coloured purebred out of Amber Jack. We continue to use Amber Jack in our AI program for his high-performance easy doing offspring. I've mentioned in prior years how well the Amber Jacks have performed on feed and Orbit is no exception, ranking right at the top end of the pen. Orbits dam Nora is a tidy uddered baldy female that has did an excellent job during her young career. Her first bull sold in last year's sale to the great operation of Cameron and Andrea Falt. Orbit came a little whiter then anticipated but with the demand of baldy cattle, you won't go wrong! Homo Polled, Non Diluter

For years Tumbleweeds sire Casino was a mainstay in our purebred and commercial herd. His performance was unmatched, consistently producing our heavy weight steers year after year. This will be the last Casino sired bull from us as he was sold last spring and now walks the pastures of Joe Cechs at Stauffer. At 7 years old his feet are still perfect and is as fluid in his movement as any bull I have seen. Tumbleweed follows these traits with a tremendous big foot and a bull that can really get out and cover ground. A very stylish, moderate, thick made, baldy bull that will cover a ton of cows. He will catch your eye sale day! Non Diluter

After touring Perkin Land and Cattle a couple years ago and seeing the daughters off Captain Blaze we knew we had to try to get semen on him to use in our herd. Daryl was kind enough to sell us 20 doses and we are sure glad he did! He calves extremely well on both heifers and cows and the calves come with a ton of vigor and style. If we were to take one on the show road, without a doubt, Herb would have been on the short list. He's very tough to find a fault in. Perfect feet and legs, good bone, sleek fronted, capacity and a hair coat that would make Grizzly Adams jealous. Here is bull that combines tremendous calving ease along with good performance. Put a check mark beside Herb! Homo Polled Hetro Black

The last of our ET calves and a direct son of the renowned Cobra. We purchased a package of these embryos from Outlaw Cattle company at the inaugural Cobra Event. We were hoping to get some heifers as the Cobra females can flat out produce but our loss and your gain. Python is a heavy haired big middled bull with as good as foot as any bull in the pen. Again, a very moderate birth weight with more than enough performance to bring a big set of steers in the fall. If I were you, I would keep all the replacement heifers you can, they will be wicked good with tremendous udders! Homo Polled Hetro Black

High Tide is a very well-balanced bull from Full Throttle and a good little cow that we purchased from Lone Stone farms that was our pick of the Red Angus females that year. She has a great udder and is very fertile. Every year she is one of the first to calve and has never missed a service to a bull or AI. We have retained a daughter in herd and her last year's son off the farm to the good people at Trenson Farms. Here is a free moving bull that will cover a few extra cows. A maternally driven bull that will be a great option for your young cows and give you some sleep easy nights.

If you're looking for a bonified heifer bull here he is! Small head, smooth shouldered and a modest 77 pound birth weight that is maybe a little inflated due to his length of spine. Hes as along as well rope! Mothered by a terrific first calving Parker daughter that is out of our strongest Red Angus cow family that cranks the good ones out year after year. The Great Grandam 26X has put a couple of breeder bulls into the herd of Jordon Livestock. Great cow family, heifer approved and quite as a kitten. Your heifers will thank you when Mud Duck steps off the trailer!

Stout Simmentals - 2 Pens of 3 Commercial Heifers

Once again, we will be offering 2 lots of three replacement heifers from the top of our keeper pen. These heifers were selected from top producing cows and our own Purebred Simmental and Red Angus sires. The heifers will be palpated by a vet for breeding soundness and come with the same breeding guarantee as our bulls do.

Welcome to the 20th Annual Bull Rush Simmental Bull sale. We thank you for your time as you peruse the catalog and look at planning your breeding programs for the upcoming years. This year our offering consists of some highly proven and sought after sire's sons, as well as some new and also exclusive to Movald Ranches genetics. There are several KHG Commander 50G sons on offer that are sure to impress. We have been doing more genetic testing on the bulls and the results of those tests are listed in each bulls section and you can also look more in depth with an online search at those results. If you have any questions regarding that or how the bulls may fit into your program don't hesitate to contact us. Drop by, call, email or text as we are always available, and we will help you with what it is that you require. All the best to everyone in this New Year.

RED EPIC 149J

CA-PG1372771 RT 149J 16/1/2021

A low birth weight bull that started life at only 84 pounds. He hit the ground running and has packed on the pounds ever since! A super good disposition with excellent scrotal development and out of a Lad daughter that we only have a few of, as we lost that Lad bull in a bull scrap. 149 J has been so great to work with and he has impressed us since birth with all his aspects of development to this point. It will be exciting to see what he can put on the ground in the years to come. Tested homo polled.

Another good son of Epic to consider. This bulls half sister out of the same dam was the very first heifer to calve here in 2022. Fertility runs deep in this cow line going back to the 64 T cow that produced until later into 2021 at the age of 14. We had to sell down some cow numbers to get through this winter, so those 14 year old cows just had to go. She still had good solid feet and another year or two in her I bet. I don't see why this Epic son won't follow right along in his grand dams hoof prints. Homo Polled Non Diluter tested.

A more rugged black blaze faced bull with a mid to larger frame on him. He possess more bone and has had some really good gains. He would work well if he was put together with some straight bred angus cows to mate him too. That cross would give you the best of both worlds and you may retain an identifiable stripe on those offspring. These Proclamation calves are turning out to be more productive than they first seemed they would be, and you cannot deny that they do get up and grow. Homo Polled Non Diluter.

Muscular would accurately describe this Epic son. His dam is out of a fullblood cow and a red purebred bull, so you will get a bit more vigor from a mating like that, and that also is something that you should notice in his calves. A nice disposition on him also, so that is truly a bonus when combined with all of his other production attributes. Take a good close look at him and I know that you will be impressed.

This young bull is following in line with his half brothers and is definitely keeping pace with what we have noticed the Epic calves to develop like. His dam is out of one of our old homo polled heifer bulls, so look for this fella to throw that polled gene into your herd. There is also a fair amount of libido in this bulls ancestry, as this bulls maternal sire, that 28X heifer bull, would tend to his harem and keep them in a tight group.

Did this guy ever take off around the 9 month old mark. He has started to develop more middle to compliment his lengthy frame. A nice quiet Hotshot son that has an abundance of polled in his background not only from some fleckvieh lines on his dams side, but his sire is homo polled as well. The 163A daughters have been raising some of our most growthy calves so combined with the punch of his sire you should have that gain ability that helps to make us all more profitable.

An own son of the Proclamation bull that we have sampled. When first born the Proclamation offspring seemed smaller and it appeared that they would fall behind, but they certainly have developed into some of the higher growth curve cattle on the place here. This bull has a ton of hair and a real stretchiness to his frame. There is also a real constant above average milk EPD in his lines and he has a great profile of numbers all around. His API and TI put him in the first percentile. Check him out if you are looking for a black homo polled non diluter.

The Epic E152 offspring continue to live up to their sires numbers. Easier calving with a great growth curve attached. This son of Epic is tested homo polled, has a nice disposition and a good amount of hair. Combine that with his tidy polled head and it won't be hard to identify his calves. Look for just as useful males as well as females from this fella as he will give you both.

A good honest February born son of the Commander bull that is out of a dark red dam with a finer boned frame. There is a combination of older fleckvieh breeding on the dams side that contained a real decent amount of milk. This blended with the polled red breeding has created this mellow fellow that will be suited towards young cows or would also mate well if you had some larger framed more traditional style Simmental cows as he matures. Himself he has a mid sized frame.

Hairy and easy to manage would be the first thoughts that come to mind when you are to think of this bull. He has a lower birth weight and his dam is sired by our "Bob" bull. The Commander calves have been pretty quick to be birthed as he is very long animal himself. We continue to push for the calving ease as a bigger dead or slow to get going calf just doesn't fit what we are striving to do here. Vigorous calves that get up and grow are the type we all need to be breeding for as they are the kind that enable us to keep going and maximize profitability.

If you are looking for a performance black bull, take a good look here. This young fella is just a generation off, out of a Rolling JN cow we purchased many years ago, and his dam is also the dam to our 322A Boomtown bull that we used here for several years. They grew well, had excellent structure and were very useful types that you will see in a few of the pedigrees from our herd. 254J will put the pounds on his calves and you will have the benefit of the dilutor free gene that will let him be utilized on a wider variety of matings.

One of the thickest butted bulls in the pen, here is a direct son of the Western Force bull with a unique hair coat containing that black hair. This is his dams first calf and she bred right back to calve in the early group here as a second calver. She is much like her sires name indicates, she is a dreamboat of a young cow with a refined body structure and a quiet disposition. This is a heck of a herd sire prospect to consider for you with a bit of a unique pedigree as well. The 64 T cow down in the dams pedigree produced until this past fall and was still a solid producer. A really good and balanced EPD profile on this young bull with an API of 134 and a TI of over 78. Tested Homo Polled and Non Dilutor.

Catan comes to you from Milaya's 4H heifer, Cinnamon. Loads of rib and length. This first time mama sure put what she had into this guy. Throw in some calving ease on both sides, Catan will definitely leave you smiling all the way through calving season.

Jalapeno is a great little bull off a first calf heifer we purchased from Virginia Ranch. He is smooth muscled, well balanced, has a moderate birthweight, and has a good hair coat.

TERMS & CONDITIONS

TERMS: The terms of the sale are cash or cheque payable in Canadian Funds at par immediately following the sale. The right of ownership shall not pass until after settlement is made. All settlements must be made before any livestock will be released.

DELIVERY: Bulls will be wintered free of cost until April 1, 2022 providing the bulls going back to their farm are insured for all risks from the date of sale until purchaser obtains possession. After such date there will be a \$7.00 per head per day charge per bull. Assistance with delivery arrangements will be made available at cost.

FLECKVIEH STATUS: All bulls that are at least 5 generations Fleckvieh are considered Full Fleckvieh. Fleckvieh percentages are determined by each individual consignor to the best of their knowledge. It is recommended if further research is required, to check with the Simmental Association.

CERTIFICATE OF REGISTRY: After settlement has been made the buyer will be provided with the proper registration papers, duly transferred on the record of the Canadian Simmental Association. Further transfer to the herd books of other countries shall be at the buyers expense.

BREEDERS GUARANTEE: Standard terms set forth by the Canadian Simmental Association, with the exception where any animal is subject to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

ACCIDENTS: Although every precaution will be taken to protect the safety and comfort of buyers and public, neither the consignors, auctioneer, sales staff of facility assumes any responsibility in this matter and disclaims any liability, legal or otherwise, in the event of accident or loss of property.

FERTILITY & HEALTH: All bulls have been under a full herd health program. All bulls will be semen tested prior to the sale. In order to assist our customers better. Should you have any questions please give us a call.

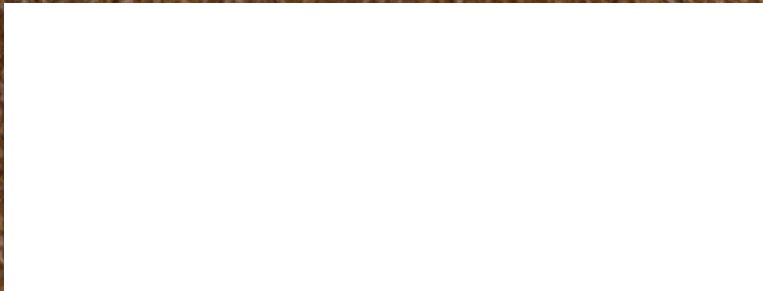

INSURANCE: Cattle are the property of the buyer as soon as the auctioneer declares them sold therefore buyers are urged to insure their animals. An insurance salesperson will be in attendance.
