16J is a lot like his sire with his natural thickness, big middled and right full of muscle. I picked his mother, 77F out of Larry and Cheryl Macnab's heifer pen. Her first calf is easy to find at the top of the replacement pen and now this bull calf is at the top of his pen.

18J is the thickest Ranger calf in the group. Like the other Ranger calves he is long, hairy and powerful. I think this is some maternal power here with Thunder Creek Density and Ranger.

21J is a little more moderate Ranger son but still has the great look like his brothers.

6J is the biggest framed heaviest weaning calf. His mother IE raised the highest weaning calf last year as well. Lots of frame and power here.

This Rocco bull is the only calving ease bull in the group. He is very eye appealing with the way he moves, his natural thickness and great hair coat

7J has caught my eye from an early age. He is a big middled easy fleshing calf that will sire those calves that will gain great out on the pasture.

**15J** \$4500 **DBRL RANGER 15J**

15J is a typical Ranger Calf. Big Framed, naturally thick, great hair coat and an extra rib long. His mother is one of my favourites. She is beautiful uddered, great footed and always raises a top end calf.
