

LIMOUSIN 2022 Production Sale

FEBRUARY 28, 2022 • 2:00 p.m.
At the Ranch - Flintoft, Saskatchewan

Welcome to our 2022 bull sale. Here at JYF we have continued to focus on raising the best Limousin cattle possible. We are firm in our commitment to improving the Limousin breed and keeping its place of adding muscle to the commercial cow herd.

We expect JYF Bulls to be sound and get the job done. We expect JYF bulls to have good hair coats that our commercial customers demand. We also expect JYF bulls to leave females that milk and can be retained in the herd to raise those elite $\frac{3}{4}$ blood calves.

This summer provided us many challenges. We were forced to send our bulls to a feedlot from July 1 to December 1st. We were fortunate to have Kevin Antworth and his staff at Red Coat Cattle Feeders take excellent care of our bulls. The bulls came back in the shape we like to see them. They weren't carrying extra condition and were grown out just the way we do for ultimate longevity. However, because the bulls were in the feedlot we were unable to collect yearling data on the fall born bulls.

We work hard on disposition, and ask you to pay special attention to our management ratings. These are based on our own experiences in an attempt to assure that you get the bull that will work in your program.

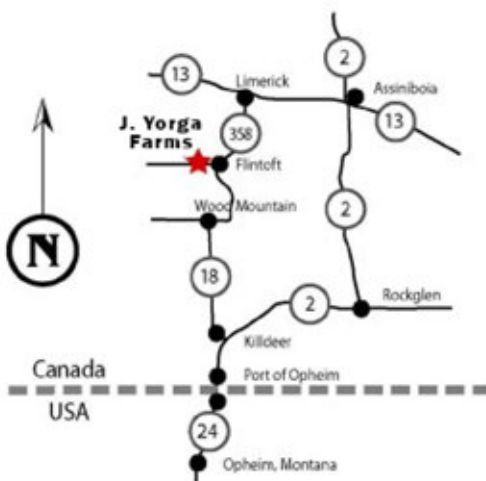

If we can be of any help in any way, please call JYF and we will do our best to fill your needs. Here's hoping 2022 will be far different from 2021 and calf prices double!

JYF Aged Bulls

Our bulls are not pushed to maximize yearling data. Instead, they are managed to grow out over winter; and this year were fed a mix of 2/3 clover grass and 1/3 greenfeed on return to the yard. We topped off with 12# of a 15% lentil based pellet. We try to get the bulls ready for multiple years in the breeding pasture.

We have made every effort to provide you, our customer, with the best bull for your money. We calve on the range, in April and May. This provides a 2 year old bull that will cover more cows and save you money. We also have a fall program where we calve from Sept 1 to Oct 15. These bulls are basically big January yearlings and provide another age option.

No bulls are sold before the sale so you're picking from the entire calf crop. Due to their age, these bulls have gone through extra rounds of culling to ensure that they are as problem free as possible.

The JYF aged bulls are designed with you in mind. It is extremely important to us that you get the best bull to meet your requirements. We will assist in any way we can, including at the auction. If you are not totally satisfied with your selection, you will not own him.

Management Rating

We have been chute scoring docility at weaning since the system came out. We have found it useful, but that it did not adequately describe a bull's demeanor at sale time.

Bulls change as they get older and their testosterone levels increase. We see differences when working them to measure Yearling data, as well as sale preparation activities like picturing and video. In an effort to better describe a bull's disposition before they find out what they are made for; we have come up with the JYF Management Rating. We have scored them multiple times, on our own and talked about the scores together. We assure you that we have taken every opportunity along the way to weed out a potential problem bull. This rating is simply another way to differentiate one bull from another.

1. Petable without halter breaking
2. Easily handled no matter the situation
3. Easy going. Very easily halter broke
4. Quieter than average, but slightly restless and may be stubborn during processing
5. Typical temperament. Manageable but nervous and impatient. Exits chute briskly
6. Restless and always moving away in the pen
7. Easily managed with other cattle, not so easily alone
8. Heads up with a big flight zone. Seems to be the first to run
9. May exhibit attack behavior when handled alone
10. Always very aggressive, pronounced attack behavior

Herd Health Program

Prior to breeding - All cows and bulls are vaccinated with modified-live vaccine for: IBR, BVD (types 1 & 2) PI3, BRSV.

Calves are vaccinated with modified-live vaccine for: IBR, BVD (types 1&2) PI3, BRSV, 8 way clostridial, haemophilus, pasturellia.

Bulls, cows and calves are treated for internal and external parasites.

Prior to weaning - All calves vaccinated (boostered) with modified-live vaccines for: IBR, BVD (types 1&2) PI3, BRSV, 8 way clostridial, haemophilus, pasturellia.

Bulls, cows and calves treated with pour-on parasite control.

Prior to Sale - All bulls are semen tested and given the first treatment of Fusogard.

All cows are tested for Johne's disease. We have a zero tolerance policy for positive tests. These animals and their offspring are removed from the breeding herd to insure the future health of your herd.

Heifer Bulls

Every year we are asked which bulls do you think will work on heifers? So this year we grouped four bulls that we feel have the ability to be used on replacements. The proof will be in the progeny but birth weight and EPDs predict success.

NOTES:

Terms & Conditions

Terms:

The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. Announcements from the auction block will take precedence over the printed matter in the catalogue. Current exchange rates will be announced sale day. All monies are in Canadian funds.

Certificate of Registration:

Each registered animal will carry papers issued by the Canadian Limousin Association, unless otherwise indicated. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

Pedigree Estimates:

Pedigree Estimates (PE) are created on the projected mating of the animal's sire and dam based on averages of the two, creating estimated values that do not hold the same accuracy of actual EPDs issued from the association and should be used as such.

Health:

All animals in the sale have met all necessary health requirements.

Phone, Mail, Wire Bids:

Bidders unable to attend the sale may phone, wire or mail their bids and instructions to the sale manager, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

Guarantee:

Each animal becomes the purchaser's risk immediately after the animal is sold. All animals in this sale will be sold under the terms and guarantees set forth by the Canadian Limousin Association with regard to health, freedom from defects and from both reproductive and specific genetic unsoundness.

Delivery:

Assistance will be given in getting your purchases home. Each animal becomes the risk of the purchaser as soon as sold.

Insurance:

We strongly recommend that insurance is purchased for full value.

Errors:

All announcements at sale time, written or oral, supercede any written material in the catalogue.

Load out:

No load out of cattle will be allowed until the conclusion of the sale.
