Delivery

- For bulls returning to the Ranch we suggest that the bulls be insured. Each animal becomes the responsibility of the buyer as soon as sold
- Deliveries will start around April 1, at our convenience.
- Bulls will be delivered free of charge to central points across the western provinces. We do our best to deliver your bull to your yard.
- Bulls traveling to the eastern provinces and for export will have trucking arranged at cost; unless other arrangements are made.

USA & Mexico Export

We at Leewood Ranch will arrange for all tests and paper work required to export these bulls to their new owners. It usually takes several weeks to get these tests completed and results back. Transportation will also be arranged at cost. We usually use Knill H S to send bulls to the USA and Mexico.

Bull selection Assistance

Purchasing breeding stock is a major part of raising livestock. Photos and videos are great tools, but don't always tell the whole truth. If there are any questions on sires, dams, CE, WW, milk, etc please don't hesitate to give us a call. We can help narrow your search or point you to a bull that suits your needs.

Sight Unseen Purchases

If you need a bull but don't have the time to come to the sale we can help. Leewood Ranch is a family run operation. We are the guys that do the foot work in our operation from the feeding to the breeding. Call ahead of the sale and we can discuss what you need or want in your next herd sire. We will select a bull that will fit your operation, at your price point. The saying with us is "We rather keep our buyers happy than look for new ones each year."

You can also place orders with the sale staff or bid online. You can bid online at DLMS.ca. Videos of the Leewood Ranch bulls will be on Cattlevides.ca, a few weeks prior to the sale. If there are any questions contact Colt Arnold.

Leewood Ranch Guarantee

All bulls are guaranteed to be satisfactory breeders in accordance with the Simmental association guidelines. We stand behind our product, should a problem occur please contact us and we will make it right. A replacement bull (of equal quality), a credit or reimbursement will be given at our discretion. Any physical injury or mismanagement of the bull(s), will void any reimbursement.

Leewood Bull Insurance

We are offering bull protection insurance. Bulls are covered for injury & death while they are at the ranch.

Rate: 4% of purchase price. This covers the bull (s) from sale date to delivery.

In the case of injury or death you will receive 100% of your bull purchase price back, less salvage. We will also have spare bulls to use if needed.

Bull-Breeding Soundness

All bulls will be semen tested before the sale. Bulls are tested for Sperm motility, morphology and are also subjected to a physical exam. They are checked for any scrotal, penis and other physical problems that would affect their ability to breed. Any bulls failing these tests will not be at the sale. Any semen deferred bulls have been tested and have been deemed by the vet to mostly likely pass a semen test at a later date. These bulls usually fail, due to age or weather problems.

Health

All bulls will be vet checked, scrotal measured, weighed and semen tested. All sale cattle are on a full health program. Any questions on feeding or exact health protocols please contact Leewood Ranch.

Polled Testing

A select number of bulls will be Homo Polled tested.

Homo polled = no horns on any Calves

Hetero polled = 50% polled calves on horned cows

Colour Testing

Some black bulls will be tested for colour expression. Homo black bulls will not sire any red calves. The fullbloods and a select few red bulls will be diluter tested. Bulls testing diluter free can be crossed with black cows and will not give you any grey calves.

Semen Reserve

We reserve the right to draw semen for in herd use on any bull in the sale offering. Semen will be at our expense and buyer's convenience.

Epd's

Epd's are basically a Mathematical estimation of a animals genetic value. They are not always right but they can help in choosing your breeding stock. Below is a list of the epd's and what they stand for.

Abbrev. Description Units

In Loving Memory Of

Howard Arnold

*Passed Away
Friday, January 14, 2022
Viking Health Centre
At the age of 62 years*

*Howard is forever loved and remembered by his
Loving Wife of 44 years Debbie Arnold of Mannville*

*Children Jill (Craig) Campbell of Calgary
Crystal (Warren) Swanson of Vermilion
Dusti (Shawn) McLaughlin of Mannville
Colt (Shannon) Arnold of Mannville*

*Grandchildren Harper Campbell, Saige and Kasen Swanson,
Mason, Kiefer and London McLaughlin,
Cole, Laramie-Lynn and Coy Arnold
as well as numerous nieces and nephews*

*He was predeceased by his
Parents Lawrence and Maryann Arnold*

*In keeping with Howard's wishes
cremation has taken place and a
Celebration of Life will be
held at a later date*

*Donations in memory of Howard may be
made to the Viking Health Foundation,
Stollery Children's Hospital or
Canadian Cancer Society/Leukemia*

Creech's Crematorium Ltd.
780-853-6343 or 780-853-5100

As some know, and most didn't, Howard had been fighting cancer for the last 3 plus years. He continued to work on the farm until he could hardly walk into the house. Dad was a true cowboy, and lived that cowboy life until the end. Even when he could hardly move, he'd find the strength to climb in a truck or tractor to help do the work on the ranch. He will be greatly missed by family and friends.

He was a pig head, stubborn man that was sometimes hard to work with, but he was always trying to provide for his family and was the hardest working man any of us knew. He's touched more lives than many of us family members had ever known. We were blessed with many visits, phone calls, texts, and messages coming in support of our family. Many friends new and old sharing stories on how much Howard meant to them. He was one of a kind and even in his last days, he was telling me he wanted the family to continue the ranch for the next generation. One of his biggest loves was cattle and all his family and grandkids. I know seeing his grandchildren ride horses and family gatherings warmed his stone heart.

The Arnold Family would like to Thank everyone for their kind words and help in these past months.

LEEWOODRANCH@HOTMAIL.COM

Welcome from Leewood Ranch

Welcome to the 6th Leewood Ranch Bull & Female sale. The sale has taken on a different look compared to past years. We usually sell a 100 or more replacement heifers in the sale but just like most, feed was tight for us. So we decided to sell the replacement heifers privately in the fall, giving past customer's first chance to pick. Big thanks to Westman Farms, Darcy Sen, Arnold Sen and LA Ranch for their purchase of the heifers. We will also be doing a video sale this year. With less animals being in the sale we will have lots of space to display the bulls better and make it a lot easier on us. The bull pen was culled harder than ever and we are very proud of the quality from top to bottom. The power of this bull group is hard to beat. There are many of the top AI sires represented in the pen. Our Black bulls are led by a couple of LFE McDavid sons that have been standouts all summer. Again we have some blaze faced LHVS Edward sons that have sold very well in past years, with our high seller last year Leewood BS Blazin being a Edward son. The Fullblood group is led by several Anchor D Viper sons that will be easy to find sale day. The first sons out of our new herd sire and former high seller out of Transcon Bull Spectrum sale Virginia Getzlaf will make an appearance. Our purebred red bulls are the most diverse group, with several different sires represented. TNT Bootlegger, Max Factor, MRL Red Force, HSF High Roller, TNT 90Proof and Red Summit are some of the sires you'll find in this group.

We hope to see past, present and future customers MARCH 5 at the ranch!

Little More about Leewood Ranch

I always get questions about our operation, so I thought with all these lock downs and restrictions I'd give a little more reading material. For 2022 we will be calving 450 head of Simmental cows with a few Angus cows sneaking around. We have approximately 250 purebred cows and 200 commercial cows that we run as one group. The herd is bred for early January calving and we calve everything together. We use AI heavily and 85 to 90% of our cows are AI'd before being put with herd bulls. We also implant 60 to 80 embryos per year. Embryos are sourced from many of the top herds in the industry, along with embryos from our own donor dams. Our cows run on private pasture and community pastures in large groups.

These Getzlaf sons out of our donor Leewood FF Foxy Roxy 40E have really impressed us. All very similar in their make up with loads of hip and length. We always want our cattle to be thick and these guys are that. Their phenotype is hard to fault and they are back by some of the top cow families. Roxy was out of a pack of embryos I bought from Sibelle Ferme. Out of those embryos we got Leewood FF Josey and Roxy. Josey was our high seller in 2018 to MGM Enterprises and we have used him through AI. Roxy's dam is FGAF ADRIA 126P who is the dam of the great ALLM Colossal 25U. These bulls are high performance bulls with some great 205 day weights coming off some bone dry pastures.

DOUBLE BAR D XANADOO 25Z
COLTS RED N DREAMY 2Z

- dam is a smaller, heavy milking cow with a son going to Mannville Colony in 2021 and a son going to Jason McEroy in 2020
- younger bull that is really easy doing with a nice small head. This cow family always seems to bring down birth weights.
- Dam goes back to the Great D bar C Misty cow
- Sired by Buggy that has many daughters inherd. Last year for Buggy sons.

- A flashy black goggled bull out of Skors PO
- Built just like sire. Low set bull with lots of thickness and good hair coat
- Dam is also the granddam of LR 35J
- Skors Black Joker on the bottom. Joker daughter are great uddered and milk very well

SKORS PO

It is a pleasure working with the great people from Leewood Ranch. They are some of the most progressive Simmental breeders utilizing an extensive AI and embryo transfer program.

The cowherd utilizes a customized mineral program that is balanced to their differing requirements and feed sources throughout the year. Organic minerals are used to ensure proper immune function and overall health, which supports proper bull calf development from a young age. The bulls are developed on grass with their

moms. After weaning, they are transitioned to a forage-based TMR. The TMR is formulated to maximize gut health and forage utilization. Multiple protein sources and the correct starch levels allow for proper lean muscle growth. Leewood Ranch uses a total nutrition program on their entire operation, ensuring optimal performance of their cattle.

If you have any questions about the bull's nutrition program, please feel free to call. Good luck on sale day!
