The brand of
CONSISTENCY AND CONFIDENCE

*Pictured here is the 2021 \$161,000 high selling bull to
Black Gold Simmentals and Canadian Sires*

FROM THE DESK AT T BAR C... WELCOME FROM R PLUS...

The true mark of success for any seedstock operation is garnered through customers and fellow breeders experiencing growth and achievement through implementing their product within their respective programs. The R+ tattoo has set the standard for this hallmark. Through no means of luck or accident, this operation has become a household name around the globe for producing superior Simmental cattle. Marlin is a genuine stockman, and his critical eye for cattle has propelled the R+ brand to what we know it as today. You will not need to reach far into your memory to recall the herd bull material that has gone through this ring in years past. But we are here to tell you, in no uncertain terms, that this pen separates the men from the boys. Leading the 2022 charge are the \$150,000 Yuma's, who are the definition of phenomenal to see in the flesh. Amongst many other great sons in this years offering, the Lot 1 herd bull will command you stop and stare. This bull is a herd sire in the making, and is presenting all the necessary credentials to make as big of a mark as anything ever raised south of Estevan. A continued mainstay around the ranch with many great sons on offer is Yuma's sire, 5015. The Stratton bred cattle are not only bringing in new blood, but that added look and softness that all cattlemen crave. And perhaps the most interesting are the set of cattle that Venom has sired. A past \$50,000 bull who now calls McMillen Ranching home, he is one of the hottest red bulls in the breed. And last, but certainly not being outdone is the outcross Uppercut bull, offering up as much genetic potential as any, and not to mention the sire of a \$30,000 heifer this past Summer. Please note that this offering includes many calving ease bulls, which have been very popular coming into the Spring.

The two year old pen continues to be a feature, with this year being no exception. There are many options for cattlemen that are desiring longevity, thickness, and phenotype. The female pick outlined at the back of the book continues to gather attention, as Marlin resists selling any of his females off the ranch. Study the history of this pick, and find that the high seller from the Meadow Acres dispersal wore an R+ tattoo. An accessory shared with the lead donor at KT Ranches. What a way to fast track any program. You can rest assured that before an R+ bull is offered to you, it has had to pass a strict culling process. This large cowherd consists of 550 girls that are managed in large groups and have to make it on their own. In addition to their productiveness, they have the genetic merit and numbers to further back them.

Join us in Estevan for a superior set of cattle at R Plus. As always, please don't hesitate to contact any of us at T Bar if assistance is needed. Marlin is always available to provide guidance as well. He is a true student of the Simmental community, and has done a superb job being class President for the past two years on the board. See you at R+,
Ben Wright

2021 proved to be a challenging year for many but hasn't slowed us down at R Plus. We are proud to be back for our 22nd year and to still be the brand of consistency and confidence. This years offering is solid from top to bottom and we're confident that they will add value to your program

Since 1992 and more since 2000 we've been able to influence an adopt our cow herd of 550 through the use of carcass data, intense genetic research, EPD profiles and visual appraisal to create a balanced animal which is exemplary to the industry.

We strongly believe that our customers are number one at R Plus. Our goal through new genetics strength and positioning is that we develop animals that will produce profit for you and your operation.

Lucille and myself are grateful for everyone who has been with us over the past 21 years. We have developed strong relationships with clients, created some amazing memories and continue to appreciate everyone who has helped us achieve success every year.

We look forward to seeing you on the 6th of March.

Sincerely,
Marlin and Lucille LeBlanc

BULL DEVELOPMENT:

The bulls were weaned by September 20, coming off native grass pastures with no creep. Bulls are on a chelated mineral, full vaccination and health program. Their development begins with a TMR ration of ground hay, corn based pellets and water. Mid November corn silage is introduced into the ration and the bulls remain on this total balanced ration until delivery to your ranch. The TMR (total mixed ration) means that every bite the bull takes is the same as the last, ensuring no overloading as other feeding programs may allow. The bulls are not creep fed nor full fed, they are developed.

DELIVERY:

Free delivery to your gate at a mutual convenience.

SIGHT UNSEEN PROGRAM:

We offer a site unseen program for buyers who are unable to attend the sale. We have an excellent and very qualified sales staff. We invite you to call anyone of them or myself. All Sight Unseen Purchases are 100% Guaranteed!

REPRODUCTION EVALUATION:

All bulls will be semen tested and breeding evaluated by Carmen Langevin of Flying C Vet Clinic.

R+ PHILOSOPHY

The breeding of Simmental cattle has been a passion and dream of ours since the 70's. We made a move in 1991 to change our Simmental cattle into a moderate framed animal that survived well in our climate. The solid colored red and black cattle fit the bill: the performance and fertility of the Simmental cattle could not be compromised, so we began looking for genetics that would support our beliefs.

Present day, our beliefs haven't changed and we believe the cattle back this up.

We are raising cattle that survive and breed in short native grass pastures, with hay being their main ration; cattle that have fertility bred into them, as most of our bulls will be under a year of age at sale time and will have passed a fertility test and scrotal measurement that in the past has averaged around 38 cm. Hair coats are very important to us. Straight heavy haired cattle tend to be easier doing, happier cattle at R Plus. As we live in a short grass area, we have to have cows with large spring of rib. We believe that the rib eye measurement indicates this to us. Structure and conformation have to be closely monitored in our program as a large area of pastures are located in heavy rock conditions. Our cattle must have the ability to walk in these conditions.

As our operation is usually a two man show, the cow's ability to have a calf, that calf's vigor and the mothering ability of the cow are all things that are very important to us.

We do not believe that overfeeding bulls and females is necessary. Longevity is something that is needed in all cattle and overfeeding only helps to shorten their life span and affects their fertility. Our rations are developed to grow and allow cattle to mature at an optimal rate without causing any complications to that animal.

We have bred Simmental Cattle for over four decades, solid red and black colored cattle for over three decades. The multi generation of the red and black genetics will make your calf crop predictable in color. By using these solid colored genetics we have eliminated sunburnt udders, weak eyed cattle and created a trouble free animal.
