CATALOGUE ORDER IS SALE ORDER

Development & Delivery

We will continue to develop your newly purchased herd sire(s) for you at no cost. All we ask is that you insure your purchase for the duration that he is being developed. The bulls staying until spring will be semen checked and delivered to you in April/May or as loads develop for your area. For anyone wanting to develop their own bulls, a rebate of \$250 per bull will be subtracted from the purchase price. This applies to any bulls taken sale day or delivered within seven days of the sale.

Semen Testing

Each bull in the sale has been palpated, scrotal measured and vet inspected twice prior to sale. Once in the spring prior to going to grass and once again just before cataloging. None of the bulls have been semen tested. Before delivery in the spring, we will semen test and guarantee every bull to pass and be fit for breeding. We highly recommend that if your turn out date is mid-summer, to have your bulls semen checked within 30 days of turn out. Any bulls that are picked up or delivered within 7 days of the sale will need to be semen checked by the purchaser. A replacement bull or credit will be issued for bulls incapable of settling cows. The credit can be used at any sale, on any class of cattle or breed. At no point shall the compensation be greater than the purchase price.

Online Bidding

Watch and bid on-line at DLMS.ca, (Mark Shologan, 780-699-5082) If you're planning to bid on-line, please feel free to contact the sale staff or Darren as we are pleased to help select a bull(s) that will fit into your program. It is our utmost priority to ensure you secure the correct bull for the system and role you plan to use him in.

Moose Creek

2-YEAR-OLD BULL SALE

1:30 PM • WEDNESDAY, FEBRUARY 2, 2022

at Moose Creek Red Angus

3 MILES SOUTH & 1 MILE EAST OF KISBEY, SASKATCHEWAN

Welcome to the 2022 Edition of the Moose Creek 2-Year-Old Bull Sale. We are pleased to offer this group of Red Angus, Charolais and Red SimmAngus bulls for your appraisal on February 2nd.

I'm writing this as the sun is setting on 2021. Unfortunately, it hasn't been the best year for a large group of farmers and ranchers in Western Canada. Instead of dwelling on the negatives of the last 12 months, I am hoping to expand on the positives. So many blessings to be thankful for...

I am thankful, along with many others, to have a white Christmas. The snow and fall moisture is a start for a favourable spring with optimism of runoff and green grass... The calf market was strong despite the record feed costs. An even bigger grain crop in 2022 causing prices to soften could yield a mighty aggressive fall run... Blemished calves sold under immense pressure this fall, guiding us to tidy up our herds and only keep the valuable cows that put calves in the top sort. As feed was short, the value of easy-keeping, hands-off cattle was evident; keeping an eye on efficiency is paramount.

By every report published, we are at the bottom of the cattle cycle. To me this year is eerily similar to 2012. The drought of 2021 mirrored the flood of 2011 in many ways. Grain markets were extremely aggressive in 2012 leading to record returns per acre for most cereals and oilseeds. But, in just 2 short years after, the cattle market was rolling, seeing the best years many could remember. This is what I believe we are in store for.

Today beef consumption is the highest in history; the price of retail beef is also the highest ever. Consumers are eating our product and paying the most they ever have. As we grow the herd, and shrink the slaughter numbers, the short of the beef market will again favour the grassroots. Cow-calf producers will hold the cards. Processors will be short product, consumers conditioned to the price and margin shifting down the chain. This will be the time to be cow-heavy, to take advantage of this opportunity.

So my advice to you: retain as many heifers as possible. Even if that means selling a few older cows you planned to keep. Don't skimp on your bulls; these guys will be siring the volume of calves selling in 2024, 2025 and 2026 – the height of the market. Remember the important lessons learned in hard times; try to keep as much diesel and iron away from your cows. These are two things that drastically change your bottom line. Have fun and enjoy the ride. We'll look back, laugh at the adversity that made us stronger and count our many blessings.

Thanks for your time. Please don't hesitate to contact me or any of our capable sale staff. This is an offering you won't want to miss.

EPDS

not high on the list for COMMERCIAL BULL BUYERS

By Barb Glen, Cattle Call News

Though they contain valuable information, EPDs are among many factors that go into decisions about sires.

It's impossible to say how many commercial cow-calf producers consider the expected progeny differences (EPD) statistics of bulls they plan to buy.

Dr. John Basarab, beef research scientist with Alberta Agriculture, suspects that it isn't very many. He thinks EPD data is a few levels down on the list of bull-buying considerations.

First on that list is a bull that fits the herd's management and environment.

Then it's breed selection and desired characteristics.

Next is consideration of the breeding objective, whether to raise replacement heifers and expand the herd, or raise calves for the beef market. Maybe both.

After that, reputation of the breeder comes into play; whether that breeder has similar management style or whether bulls purchased from that person in the past performed well in the buyer's herd.

Then, and maybe only then, EPDs enter the equation.

"Some very astute cow-calf managers will look at a variety of EPDs, everywhere from calving ease to birth weight to weaning weight to yearling rate, even to dry matter intake and RFI, residual feed intake," said Basarab. He estimated about 85 percent of commercial cattle producers use purebred bulls, for which EPD data is available. But when those bulls are used in a commercial herd, which may have a variety of crossbreds, EPD data is less reliable in terms of outcome.

"The EPD has been trained on a purebred population, so that's fine. The genetic effect should still be there. But when I take it to an unknown crossbred cow, the predictability is down."

The results of breeding an Angus bull to a mostly Angus cow are highly predictable, said Basarab in giving an example. Results from that same bull, used in a herd of crossbred Hereford, Angus and Simmental cows, are much harder to predict. "The resulting offspring, their performance is going to be less than predictable from the EPD," he said. "The next thing is, hybrid vigour comes in there and messes things up."

An Angus bull bred to a Hereford-Simmental crossbred cow will provide a big hybrid vigour boost, especially in fertility traits. EPDs won't account for that. Unpredictable results like these, and other surprises, might be why relatively few commercial cattle producers rely on EPDs.

"Over the years, cattle producers observe this and maybe some of the more skeptical ones go, 'EPDs don't work.'

"Well, they work, but in a variable cross breeding program they may be less predictable, or there needs to be more variables coming into play before you can actually predict the performance of the offspring."

The result is that cow-calf producers rely more heavily on what they know, what they've observed over the years and what they've learned from other experienced cattle people, said Basarab.

"We would hope that our EPDs would become more useful for commercial cattle producers and of course those are some of the things we're working on."

And although the quality of the Canadian cow herd has improved over the years, he said it has been relatively slow, especially compared to the dairy industry where genomic technology has been embraced.

“The EPD has been trained on a purebred population, so that’s fine. The genetic effect should still be there. But when I take it to an unknown crossbred cow, the predictability is down.”

Red Angus

Our Red Angus program is one of the oldest and most respected in Canada. We've adapted to the needs of the industry; breeding, developing and marketing responsibly raised 2-year-old bulls. We practice what the market preaches - calving ease, respectable performance, maternal bred bulls whose daughters won't eat you out of house and home. No resources have been spared when trying to advance our cowherd, the walking sires are household names across the industry. However, most importantly, 7 decades of strict Red Angus breeding reputation is on the line every time we offer a herd sire for sale.

Temperament.... It's important to you.... it's important to us!

This is a common question and justifiably so. These 2-year-olds aren't yearlings. They act differently; they react differently and have a different level of comfort with people. Twice daily the sale bulls are walked through on foot while they are on feed. This happens as yearlings and then again as 2-year-old sale bulls. During the summer, they are handled on foot, quad, worked with dogs and exposed to barb and electric fence.

Many of the bulls are quiet enough to put your hands on them in the corral. Likely 85% of the sale bulls can be touched or are within arm's length in the corral. Each bull gets separated individually, placed in a confinement pen with 3 - 4 people and videoed. With all of the testing, weighing, handling, picturing and videoing, rest assured that no "bad" bulls are in the offering.

However, that doesn't mean that any of these fellows can't give us grief at some point. We do our absolute best to mitigate this from happening but bulls react differently to every situation. Know that we will look after you if this does occur.

Red Angus

Reference Sires

RED HOWE CLEARWATER 21G 1862967

High selling sire group last year and I fully expect them to take a run at it again in 2021. Calving ease with enough performance to use in both fields. Owned with Ben & Carol Tams

RED W SUNRISE AUTHENTIC 796E 2016194

Power, performance from a no-bull-shit operation. He was raised ranchy and honest, my kind of program. Owned with Spring Creek Colony

RED KENRAY STAUNCH 52E 1986488

A little under-utilized the first couple seasons but he's had a big field this past summer and will be an important herd sire moving forward.

RED MOOSE CREEK MILLET 106E 1996156

Son of Sam Steel (2014 High Seller) and a beautiful Ribeye daughter out of Olympian's sister. Royally bred.

RED FLYING K GALAXY 57B 1810131

The last group of sons ever. Sired our highest selling bull ever this spring. Damn good, versatile ranch bull.

RED MOOSE CREEK CLOONEY 20D 1940709

Calving ease, maternal, style. The story is just being written about how good he'll be.

RED TER-RON BOULDER 75E 1976843

Moderation, soundness with a beautiful mother.

RED SSS TACTIC 651D 1905596

SSS all time high seller. Drove all night to get to the sale to buy him. Glad we could negotiate a semen interest in him after the dust settled.

RED SSS HIGH ROLLER 440F 2056196

Maternal, calving ease. Hope is this line will follow in Gangster's footsteps.

RED U-2 AUTHENTIC 139A 1739691

Proven, well received genetics.

RED SVR RINGER 48F 2059314

Dark, perfect footed lead off bull from SVR. Lots of calving ease

Charolais

For 15 years, we have been breeding and developing Charolais cattle. Our love affair with them started in the 80's as our customers would use Red Angus bulls on their white cows and heifers to produce the "Gold" standard in the feeder market, the buckskins. Throughout the years, we have expanded and ruthlessly culled our white herd to produce a Charolais cow that takes no more feed, management or care than our Angus herd. She must be trouble free, birth a healthy, vigorous calf that weans heavy with no creep. With the addition of the heart of Wood River's cow base, we've never been more confident in our direction.

THIS IS A VIDEO SALE

No bulls will physically enter the sale barn. A video of each bull will be playing at the time of the sale. Viewing of the bulls can take place anytime prior to sale day. Give yourself time sale morning to evaluate the offering prior to sale time. The experience of choosing your bull in the ring changes drastically at a video sale.

Charolais Reference Sires

SPARROWS BUCCANEER 742E MC735489

Possibly the best footed Charolais bull on the planet. No bullshit.

SPARROWS LATIGO 436B MC360325

Typical Sparrow bull. Hairy, sound full of high maternal, extra growth genetics.

CEDARLEA HOMELAND 90E MC722527

Born & bred in the short grass country. Comes from the terrific outfit of Deobald's.

SOS HARVESTER 61C MC364809

After the record shattering Springside dispersal, who doesn't want some SOS in their herd?

JWX FROZEN 205F MC755605

Big time performance. Little birth but lots of vigor and scale squeaking pay weight.

Red SimmAngus

The growth of our Red SimmAngus offering is a product of demand and luck. The base of our Red SimmAngus program is from two elite Red Angus herds we were fortunate to purchase. To develop superior Red SimmAngus stock, we knew we needed to start with an elite base. The foundation for our Red SimmAngus offering is as strong as any in the nation. They have been the reason for our success marketing more than 400 home raised, F1 bred females the last couple years. Their breeding strength is undeniable.

Red SimmAngus Reference Sires

MAF HORIZON

Horizon leaves a stout, hairy look about his sons. An impressive bull in the flesh, he combines the best of Meadow Acres and Labatte genetics.

RENDEZVOUS 125Y

We said goodbye to the old range boss at 9 years of age and 2850 lbs, he was as active and sound as the day we purchased him. Can't imagine the number of daughters we've sold throughout the years, it would be in the hundreds.

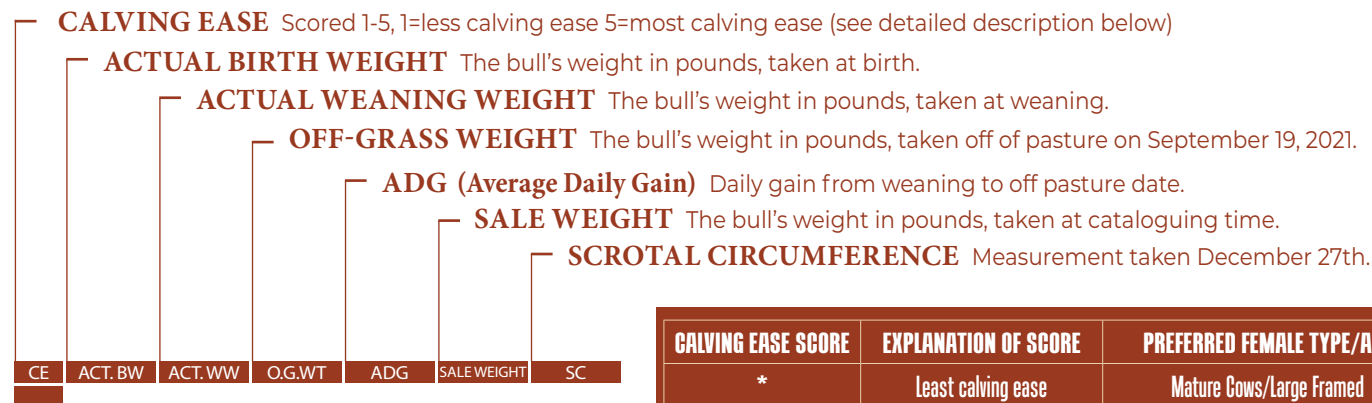

R PLUS REDGE 8018U

Cornerstone genetics from the disciplined and maternal R+ herd.

GLOSSARY

DETAILING TERMS USED IN THE CATALOGUE

The data we supply in the catalogue is actual, relevant numbers to help you make important selection and breeding decisions. These numbers include actual performance data taken at the stages of development that are critical to commercial operations: birth, weaning, and coming off of summer pasture. Current weights offer additional comparison tools.

CALVING EASE SCORE	EXPLANATION OF SCORE	PREFERRED FEMALE TYPE/AGE
*	Least calving ease	Mature Cows/Large Framed
**	Minimal difficulty expected	Cows/2nd calvers
***	No difficulty expected	Well developed heifers under supervision
****	Tremendous calving ease	Heifers of all sizes in minimal supervision
*****	Exceptional calving ease	All classes with no supervision

EPD'S

A MESSAGE FROM DARREN ABOUT the decision to not publish EPD's in the sale catalogue. It was a choice we struggled with as I believe that EPD's give one more set of information to use to choose your herdsire. The reason, mainly, is due to the inconsistency in the methodology that is being used by our Canadian Angus Association. Until the process is explained to us and we fully understand it, I do not have confidence that I can relay that data to our customers. Until then, we will not be publishing them. However, the bulls have them and if you are interested, please contact me prior to sale day and I can print off their numbers for you.

TERMS & CONDITIONS

CONDITIONS & GUARANTEES: All entries sell with a responsible breeder's guarantee of satisfaction. In the unlikely event of any dispute whatsoever, regular terms & conditions shall apply in accordance with the Canadian Angus Association Code of Ethics.

ALL CATTLE ARE SOLD subject to tests as required for export under Regulations of the Health of Animals Branch, Department of Agriculture for Canada. Export health chart and brokerage charges are the responsibility of the purchaser.

TERMS OF PAYMENT: Cash or cheque payable to the clerk of sale on sale day. U.S. Funds will be accepted at the current Rate of Exchange on sale day.

INSURANCE: Ownership risk to purchaser commences when auctioneer's hammer falls. Full mortality insurance is available sale day. Cattle returning to Moose

Creek Red Angus after the sale must be insured.

HOLDING & SHIPPING: Approximately one week is required for export transfers and other documents to be processed. Export animals will be held at the Sale location at no charge and under excellent care. Joint export shipping arrangements to obtain minimal shipping cost will gladly be made if instructions to that effect are provided to Clerk of Sale at time of settlements.

TRUCKING: Free delivery will be available for any bulls selling for \$3,500 or more. Bulls selling for less will be delivered at cost, except if multiple lots are purchased, delivery is free. Delivery will begin mid April, anyone requiring their bull for May turnout will have them delivered in April. Most deliveries will be to your yard, however some may be to central locations due to size and time. If the truck is headed past your yard, expect your bull to be on it. Anyone taking advantage of the

delivery option must insure their bull, no exceptions.

HAUL YOUR OWN: Bring your trailer sale day and receive a \$250 discount per bull.

OWNERS: Reserve the right to withhold from export shipment animals for whom Buyer or Buyer's agent have not made arrangements for payment in full, or other satisfactory arrangements, prior to time of export departure.

ALL PERSONS who attend the sale do so at their own risk, and the owners and sale staff assume no liability, legal or otherwise, for property loss or for any accidents that may occur.

VOLUME PURCHASES Any buyer purchasing three or more bulls of any breed will receive 5% off of the purchase price total. This can be used with the "haul your own" discount.
