SASKATOON LIVESTOCK SALES

Saskatoon, Saskatchewan | 1:00 PM

70+ coming
two year old bulls

welcome

TO OUR 2022 BULL SALE

On behalf of my family, I would like to welcome everyone to our 2022 Annual Bull Sale.

It seems each year when I sit down to write this message, there has been interesting situations that we can look back upon. The 2021 season tested everyone with the weather. Fortunately, late season rains came that alleviated some of the pressure. Leading up to preparation of our bulls has been a challenge from a fairly open fall to some of the most bone chilling temperatures we have experienced in recent years.

We are excited to present to you our 2022 lineup. The major focus of our program is to feature walking sires that offer a combination of the most beneficial traits. We have some new sires represented in our group. We have to continue to stress the importance of keeping our birth weights at an acceptable level. We have searched for sires that can calve easy, with low birth while maintaining top performance values. Our Limousin bull whose first progeny are represented is Fernando. We have used him on heifers and cows with great success. Lots of hair, tremendous foot and leg. In our Black Angus the young sire, EPIC 8023B has proven everything we hoped he would achieve. He produces small robust calves that perform at the top of the charts for growth with an abundance of frame and length. Our sires Northside 7865 and Payweight 6458 continue to breed their consistency. Our Red sire, Common Sense, we believe is one of our best "finds" in a herd sire. His dark cherry color, display of muscle and length in a truly impressive package. His best attribute is his foot design and hoof depth.

The cattle industry continues to be strong and we are excited to be a part of it. We thank those who have purchased and supported our program in the past and look forward to working with you in the future.

As in our past sales, for those who cannot take their purchases home as sale time, we will return the bulls to our farm. We have been able to deliver many of the bulls to their new homes when time and availability permits. For purchases that are going longer distances, we will keep the bulls until the necessary arrangements are made.

If you require more information on any of the bulls, please contact us or any of the sales staff, as they will have viewed the bulls at the farm beforehand. The bulls will be available for viewing at the farm up to February 21st and then at Saskatoon Livestock Sales for the three days prior to sale day.

Thank you,

Robbie

COVID SALE PROTOCOLS

Please keep up to date with the most current Covid protocols. We will have a live sale again at Saskatoon Livestock Sales.

VIEWING: For those that may be unable to attend sale day, we have all videos on DLMS.ca. The bulls will be available to view at the farm; and at Saskatoon Livestock Sales once the bulls arrive at the sale site.

SALE DAY: We will have a live sale again at Saskatoon Livestock Sales. For those not able to attend sale day, bidding is available on DLMS or through ourselves or the sale staff. As the Covid regulations may change for public gatherings, although things may appear to be coming less regulated, please contact us or the sale site if any questions arise.

AFTER SALE: As in the past those not taking their purchase on sale day, the bulls will return home and arrangements made for delivery.

INFORMATION: If you have questions or require more information that will help you with your decision to view or select from the offering please contact us. We can assist you in recommending a bull for your program. Any updates on the bulls or changes in government protocols will be posted on our sale page on our website and the DLMS Nortal Sale page.

SALE DAY PHONE... 306.382.8088

If you are unable to attend on sale day or would like to discuss anything about the bulls, give us a call or talk to any one of our sale staff.

All two-year-old bulls will have passed a satisfactory semen test prior to sale time and are fully guaranteed.

DELIVERY

We will assist with delivery where ever possible. The bulls may be returned to the farm until arrangements can be made. We highly recommend insurance be placed on any bulls returning to the farm.

If we deliver, it will be at our timing to co-ordinate. As we also farm a sizeable amount of grain land, please advise us as to when you begin your breeding so we may schedule an appropriate delivery time.

Red Homozygous Polled Impact continues to walk the pastures here at Nordal. He has matured into a solid breeding sire. He has produced numerous top sellers. Our goal with Impact was to add a solid structure to his progeny, and that he has accomplished. His sons and daughters are exceptional in their foot and leg design, plus length of body and balance throughout. Impact is a sire that produces progeny with top growth figures and attractive physical attributes. We have used him in all aspects of our purebred Limousin and commercial females. Impact continues to be a moderate birth weight bull in our herd. His calves continue to sit in the mid 80's to mid 90's birth range. Vigorous at birth with lots of growth.

Black Homozygous Polled Dark Horse is likely one of the most impressive made bulls we have used. His length, depth and easy going character were just some of the qualities we admired in him. Dark Horse saw limited use as a leg injury and the fact we did not collect a large amount of semen before we turned him out. Moderate calving, good length and disposition highlight his progeny.

LIMOUSIN TWO YEAR OLD BULLS

LOT 1: Hardpac 457H is an impressive Impact son. He displays an excellent foot and big structure in a moderate frame and smooth shoulder. Impact transmits a very correct made stature to all his progeny. Hardpac will come as one of the most complete packages of the offering. Here is a sire with proven characteristics to add his influence in any type of cowherd.

2019 was not kind to us in the breeding fields with bull injuries thus the age of this fellow. Here is an Alabama son that we have a lot of admiration for. His sire has the ability to produce offspring that are born with ease, solid growth numbers, top milking ability, and excellent scrotal on the sons. His dam continues to be one of our top producers each year. The individual presence of Harvard 77H will impress. He is clean fronted, deep sided with a tremendous amount of muscle shape and depth. Here is a young sire who's presence deserves to be utilized to a large extent. We plan to use Harvard extensively with our commercial and Limousin females. Retaining semen for in herd use.

101H is sired by the \$15,000 top seller from our 2020 sale. We selected his Red Angus dam to try for a female line of Lim Flex that excelled in marbling and ribeye. His dam is from one of the largest ribeye Red Angus sires we found Soo Line On Target. Here is the result, although we did not get the female we wished for he is a standout with muscle shape and correctness.

Epic 8023B was one of the top sellers in the Express 2019 Spring Sale. His physical and EPD numbers are intriguing. From a low birth weight 69 lb., WW 868 lbs., YW 1554 lbs. and ribeye of 17.2. His EPD's place him in the top 1% WW, YW, Carcass Weight, Mature Weight, top 2% Ribeye, Top 4% RADG, Top 10% Marbling, Top 7% Calving Ease, and Top 10% Milk. We have a large number of 8023B progeny born in 2020 and 2021. His numbers are real, he calves easy with low birth rates and they grow. His sons will come as the highest performance sire group. They have extra length and frame. 8023B is a unique combination of calving ease, growth, maternal and top carcass genetics.

Northside is a replica of his sire KG Solution. Northside has become one of our main "big pasture" herd sires. He has an exceptional foot and leg structure. We have used him extensively as a walking herd sire in some of our toughest pasture terrain. Northside is a short gestation sire with low birth weights on all his progeny. He holds a very balanced set of EPD's. We are now getting more of his daughters into production. They are impressive with an ideal udder structure and teat size. One of the most important features of his pedigree is the immortal Hinman donor HA Ever Lady 1575. His sons will work as heifer bulls while maintaining performance, plus improve udder qualities on replacement heifers.

Payweight 6458 has just been one of those all-around sires for us. He calves easy, progeny has good growth and performance in a moderate framed package. He adds depth, muscle and an outstanding disposition to all his progeny. He is unique with a Top 1% CD of +15, Top 4% BW -1.0, Top 15% YW +115, Top 1% Docility +32, Top 4% Marbling .90 Top 10% Heifer Pregnancy +13, Top 1% MCE +16, Top 1% Milk +40. His sons have been our top sellers in 2020 and 2021.

BLACK ANGUS TWO YEAR OLD BULLS

LOT 21: Presidential comes as one of the most impressive bulls of the group. His presence and physical stature make him a standout. His depth of body, coupled with length and an abundance of natural muscle is impressive. He stands on an outstanding foot with a long easy stride. This fellow's disposition makes him a pleasure to work with and handle. His pedigree is strong with President and the immortal 4136 dam. Presidential's dam is part of one of our most treasured cow families. 778B holds excellent characteristics for a model Angus cow. The influence of Free Wheeler and the highly maternal Crescent Creek Ideal sire have produced many of our top producing dams. Presidential will come as one of the true performance bulls with a large scrotal, great foot structure, an abundance of frame and thickness in a gentle package. A maternal brother was a top seller in 2020.

LOT 22: 203H will lead off an impressive set of sons of the EPIC 8023B sire. This group maintains a great deal of calving ease with top growth figures. 203H sets himself apart with his stature, length and depth. He is very smooth in his makeup throughout. The best part of him is his Image Maker dam. She is a true hard working model of an Angus cow. Sound udder, ample milk with a solid well make foot and leg. Adding to the history of this female is being a direct descendent of the legendary Crescent Creek Rosebud 115F. If you are looking for making top notch replacement females this young sire will be a top candidate.

will be available at sale time.

Tag Program Supporter

LOT 36: When sorting through the bulls, this Northside son will be easily found. His stature is flawless. Very well balanced, smooth shoulder, strong top, deep and thick, carrying ample volume in a tidy package. The best part of this fellow is his strength in his foot and leg structure. The Northside 7865 progeny are moderate in frame as 633H shows. The daughters of 7865 have a perfect udder design with ample milking ability.

Here is a heifer bull candidate. Moderate framed, smooth, well placed shoulder, complete with a 78 pound birth weight. Northside 7865 is a shorter gestation sire with excellent calving ease. One of our top picks for low birth calving ease to utilize on a large group of heifers.

BLACK ANGUS TWO YEAR OLD BULLS

LOT 47: Whether you analyze this fellow on paper or physically, he is impressive. He is extremely long sided and correct made with an excellent disposition (top 1%). His sire, Enhance, is one of the most widely used A.I. sires with a predictable reputation of producing highly valued offspring. 701H's dam was a past Touch of Class lead off Top Seller. On the numbers side he excels in every area. Low birth, strong individual performance, with a large scrotal. On the EPD's, his Angus GS places him in the top 15% on 14 traits. Here is a unique combination of low birth (+1.7); Top 2% YW 127; Top 1% docility (+31); carcass traits of marbling +15; Ribeye top 1%; Milk top 1% with a Beef Index in top 4%.

Common Sense came to us as the top seller from the Lazy MC 2019 Bull Sale. Several things impressed us, his natural dark cherry red coat, length and muscle shape, but most of all his perfect foot and heel design. He has proven to be a calving ease sire, with his sons and daughters having strong performance numbers in a moderate frame. With the strength of the females in his pedigree we anticipate his daughters coming into production this year to carry on the lineage traits of sound udder design and top milk values.

Common Sense has produced progeny that are born easy with an abundance of style as they mature. Here is another son with an excellent disposition that will work on heifers or cows.

WHAT ARE EPDs?

Expected progeny differences (EPDs) are genetic selection tools that provide producers a measure of an animal's genetic merit for traits that are economically relevant to their operation. Basically, EPDs are a measure of how an animal's progeny can be expected to perform, on average.

An animal's genetics will contribute in part to how it performs. A portion of that performance is also dictated by the environment provided to that animal. The environment includes weather, disease, feed, stress, handling, vaccination protocols, maternal environment, housing, and the animal group dynamics. The environment differs for each herd as geography and producer management plays a large role in environment. EPDs remove the environment from all traits measured and provide producers with an estimate of the genetics that contribute towards each trait.

EPDs are:

- A prediction of how an animal's progeny will perform
- A genetic selection tool
- Used to compare animals across different environments

Genomics are:

- Used to parent verify animals for guaranteed pedigrees
- Used to calculate EPDs for animals that don't have a phenotype for a particular trait
- Used to calculate more accurate EPDs, especially for younger animals
- Used to calculate EPDs for new and expensive to measure traits, like High Immune Response

HOW ARE EPDs CALCULATED?

EPDs describe how the progeny of an animal will perform for a specific trait. EPDs are calculated using pedigree information, individual performance information, progeny performance information, and genomic information.

The Canadian Angus Performance Program is based on whole herd reporting. Participants on the program are required to report complete cow herd inventory information (a calf or a late or cull code for each cow in your inventory), and a birth weight and weaning weight on every calf. Complete contemporary group information is vital for the calculation of accurate EPDs. In addition, accurate management group recording is vital for the calculation of accurate EPDs. Members should place all calves that were managed the same way, and given the same opportunity to develop the trait being reported in one management group. Any calves treated differently, for example, any calves fed extra or calves that were sick should be placed in separate management groups.

WHY IS EPD ACCURACY IMPORTANT?

EPDs should always be published with an estimate of accuracy. This informs producers of the amount of information available with which to calculate the EPD. P or P+ EPDs or estimates are low in accuracy. As more information becomes available, EPD accuracy will grow from 0 to 100%.

USING EPDs

EPDs are comparative numbers. This means that the easiest way to use EPDs is to compare a bull's EPDs to another bull's EPDs. For example:

Bull A has a Yearling Weight EPD = 150 lbs
Bull B has a Yearling Weight EPD = 100 lbs

On average Bull A's calves will weigh 50 lbs heavier than the average of Bull B's calves given the same cow herd and environment. Another way to use EPDs is to compare to the breed average. This is useful to producers who know the breed and what to expect in terms of performance from the breed. For example, the average calving ease for Canadian Angus genetics is very different from the average calving ease of other breeds. In Angus the average is a lot of calving ease!

UNDERSTANDING AND USING EPDs AND GENOMIC TECHNOLOGY

WHAT IS ANGUS GS?

Angus GS is a newer version of the Bovine 50K panel that we used to use. It's specifically designed for Angus genetics. It has all the same SNP markers that the 50K panel has on it, and more. There is a lot of value on genomic technology, specifically the Angus GS test.

Angus GS includes:

- SNP Parentage Verification
- Genetic condition test results are available for reduced fees than doing the test(s) individually
- Genomic percentile ranks
- GEEDs (more accurate genomically enhanced EPDs)

WHAT ROLE DOES GENOMICS, AND THE ANGUS GS PANEL PLAY?

Genomic technology has been used to make EPDs more accurate. The genomic data increases the accuracy with which we relate animals to each other, verifying pedigree information, and allowing us to apply phenotypes of related animals to non-phenotyped animals.

Genotyping animals has led to more accurate EPDs for younger animals. Below are the progeny equivalents that come from the Angus GS panel. This means that doing the Angus GS test on an animal gives you as much information as having 23 calves with birth weights recorded and as many as 12 calves tested for individual feed intake.

EPDs: are a universal way of describing the genetic potential of progeny from breeding stock

EPDs: are a genetic selection tool that can help producers reach a breeding selection goal for their herd

EPDs: can help you maintain the traits that you want to keep in your herd

EPDs: can help you avoid traits that you might not wish to use on your cow herd and introduce into your herd

EPDs: are a great way to describe the high quality Canadian Angus genetics that you raise to your customers

EPDs: are the only fair way to compare breeding stock across herds and different environments

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease	26	Claw	10
Birth Weight	23	Fertility	17
Weaning Weight	27	MILK	36
Yearling Weight	23	Mature Weight	15
