MITCHELL CATTLE CO

Welcome to our 16th Annual Best Bet Bull Sale!

It is always interesting to sit down to write this introduction and reminisce a little about the influences and events of the past year that have shaped our direction in this business. We are halfway through calving a 100 first calf heifers and have only helped one, quite different than in the early seventies when we were starting with the first AI genetics. We find it good practice to keep more females than we need calve them and keep the strongest in the purebred program. Our range environment here is such that females that we bring in don't have much success in adapting, leading us to keeping all our own females. I had a bit of a chuckle in the fall, there had been quite a bit of discussion around cattle living in the "real world", that the cows had to be tough to do well on the three or four sections of stubble. I had just been hunting for strays thirty miles from home at 5000 feet elevation and I was thinking that everybody's real world is slightly different. The cattle here walk from home, they do a 40-70 mile circuit before they return to the ranch in the fall, not an ideal place to showcase cattle but an ideal place to test cattle to work in those conditions. Every cow is special to our program, but no cow is special enough for a free ride, they must produce a calf every year. We take pride in producing bulls that are grown, without creep feed and pampering, in the conditions that they are expected to work in.

We believe we have another set of very good bulls this year, they have been doing very well on feed, we feed a total mixed ration with high roughage to develop them in a healthy way. There are large groups of each set of bulls to chose from. We have invested a great deal of time and energy in sourcing top genetics for carcass and maternal traits to improve our cattle. We believe that walking herd sires is a valuable component to determining soundness and capability.

We have been selling bulls for nearly fifty years, but it seems like such a short time ago that we started with our own sale. This is the 16th sale now, from the beginning we have had tremendous sale partners that made for such a productive smooth organization of the sale. We are already missing our long time sale partners Ron and Lois Crosby, our thanks for 15 wonderful sales together.

As in the past, we will look after delivering bulls to you, either in your yard or at a convenient spot close to you.

Our Thanks to BC Livestock; the crew always does a fantastic job preparing the yards and looking after all of our needs in Williams Lake.

If you cannot make it to the sale or would like a little more time and information, the bulls will all be available for viewing at home until March 29th, all day on the 31st in Williams Lake, the coffee is always on. If you wish to have someone do the bidding for you, contact us or the sales staff at BC Livestock. They are familiar with the bulls and would be more than happy to assist you with your sight unseen purchase. Again, we will be having the bulls available for online bidding with DLMS, their system is user friendly and they are always very professional.

It is our pleasure to extend our greetings and invitation to join us for our sale on April the 1st.

See you all at the Lake,

Ian and Anja

We start the catalog out this year with a strong group of Eastwood 22E sons. 62K is moderate framed but with good muscle expression and a big square hip. He carries great length and is attractive fronted. His dam was shown by Thompson alongside his granddam 171Y. The Convoy daughters are starting to have some age to them now, but they have been a productive set of cows, with the dams of Lots 6 and 13 being sired the same way.

This was a great cross the first time around so we matched up Sidney 36F and Eastwood once again. 112K is deep, strong topped and soft made, backed by an extremely productive cow family. Sidney 36F has brought a bull calf to the sale every year and is a sister to the granddam of Lot 29. Both females go back to Boda 196X and Reality 4P, who had a big impact here. Check out the EPD's as 112K is well above average in eleven EPD categories.

120K is easy to admire for his deep cherry red colour and blaze face. But even without the chrome and colour, he's an excellent calf. He combines maternal strength on both sides of his pedigree and is backed by very good EPDs – above average in 12 of 13 categories. His dam, Playgirl 121A, is also the granddam of Lot 7.

EPDS	CE	BW	WW	YW	MILK	MCE	MWWT
	16.9	-2.1	59	88.8	28.1	10.5	57.6

A definite calving ease prospect here. We used Eastwood 22E in our heifer pen for many years with great success, and 5143C always has bright, moderate birthweight calves as well. 5143C is out of the dam of Lot 5, but we couldn't register her as she is sired by an Angus bull and too low percentage. She is the dam of many outstanding females in our herd, and 226K should sire many more females just like them.

Our heaviest weaning bull calf at 1025 pounds off the range. He is nothing short of impressive. Early maturing, full on power bull that comes with a 94 pound birthweight. His dam isn't too big, she milks well and has always calved first cycle, and will have another good calf next fall no doubt. We were always sad we didn't have DNA on file for her sire, as this is the kind that is functional and you want more of.

The cattle industry pays by the pound. If you're looking to add some to your calf crop look no further. Top 1% for weaning weight, yearling weight, and carcass weight EPDs. Top 2% in three more categories, and you don't have to give up calving ease or maternal calving ease which is in the top 20% of the breed. The numbers are adding up right with this one.

We used to hesitate to throw some fleck genetics back into the mix as we all remember the ones that could be hard calving. The Elite 8G herd sire has more than exceeded our expectations. Calves are born bright and easily, then they take off from there. 82K has nice skull shape, is smooth and deep sided and boasts nice cherry red colouring.

Lot 38 speaks for himself. One has to appreciate the hip shape and volume, lots of strength through his top. This is the last Dillenger 116D son that will sell and he is a great one. 116D was always sound, good tempered and athletic. His daughters have beautiful, long tops, and udders that will last. Every one moves well on her feet and legs and is the right type for our conditions. Crossing Dillenger with one of our favourite angus females happened somewhat unintentionally. 125D ingested a plant which attacks the organs and causes photosensitivity – we didn't really think she would survive. Instead she bred back to calve first cycle, brought in a 900 pound bull calf off the range and is still here.

114K could go anywhere and I believe anyone would be happy to have him. Use him in the heifer pen with great success or to moderate the birthweights of mature cows and make some superior replacements. He is blaze faced, as is his dam, and comes from a curve bender cow family with many maternal greats. RYM 138S was bred to calve on time when we sold her last fall, she had excellent longevity and produced many good calves over the years. She is the foundation of one of the best uddered maternal lines here. Garth Cutler of Circle G Simmentals purchased a Timeout son out of the same cow family. We purchased the grand sire of 114K, Explorer 40E, from Garth. 40E is out of the highly maternal Zeola 204Z cow. 204Z and her daughter had two excellent bulls in Garth's sale this year who were well received. Pair those genetics with the State of War sired 207F bull and you will have great success. We are thoroughly impressed by calves vigor, the mothering ability and udder quality of his daughters, as well as the foot structure.

Talk about depth. We admire this bull for many things including his strong top, good head shape, and his muscling and thickness throughout. Sometimes we find that the big barreled ones aren't quite athletic enough for our country, that isn't the case here. He is well above average in 12 out of 13 EPD categories. This is one we could've easily kept, he goes back to RYM 138S just like Lot 44.

Lot 50 is the 8th bull calf that RYM 143Z has put through our sale. She is without a doubt one of the most productive cows here. One that keeps her condition, raises a good calf, calves on time and has a faultless udder even at 11 years of age. 227K is super long bodied and still has the dimension and shape you want.

This bull is out of a very good cow who has produced well over the years. We purchased her sire based on his excellent carcass traits and the daughters have certainly left their mark. Two twin sisters of 266K are some of the sweetest three year olds here. RYM 5H in particular is one you could make a mold of – she is a model young cow.

I tend to like the cows who don't look like they milk hard, but they must, because their calves wean heavy. RYM 331F is one of those cows. This bull has a lot of length and a good top. He is well above average in 12 of 13 EPD categories. Judging by his birth to weaning weight spread I would say there is some accuracy there.

It wasn't frost that got this one's tail, but the wolves caught up to him on the way home. We didn't have any luck treating him and it soon fell off. Fortunately, one doesn't need a tail to be a good bull! 178K comes to you with a moderate birthweight out of a bright and feminine little cow whose calves have gone to either the bull or replacement pen every year. 178K ranks in the top 2% for calving ease and birthweight and top 4% for maternal calving ease. He is well muscled and deep quartered with a nice head.

Another good one going back to the old favourite Laika 72N. When going through these pedigrees and writing footnotes it becomes very evident which cow families get it right over and over again. 218K is heavy haired, soft sided and has ample substance. Lots of thickness through his loin and down his quarter. His dam is 11, still sound and productive – she has calved again first cycle.

177K is a non-registered Angus bull. He comes from a very good cow family, his dam is a maternal sib to a high selling bull from two years ago that sold for \$8000. His Sire 65H is one that we retained, he has very good birth to weaning curve bending numbers like his sire Utah. With a 74 pound birth weight he is suitable for heifers but has lots of jam for cows.

This is a darn good cow bull! Very few Angus three-year-olds here or anywhere will bring a calf off the range at nearly 900 pounds. He fits with the full on Simmental bulls and hasn't quit, weighing 1360 before his first birthday.

The youngest angus bull in the sale, 343K is extremely stylish and smooth. He looks like he should work well on heifers, but his numbers put him as a cow bull. He has plenty of performance as he will only be 12 and a half months old sale day.

Vet's Message

Mitchell Cattle Co. has invested in the health of their herd of cattle for many years through a comprehensive herd health strategy. Currently all breeding females and bulls receive an annual vaccination prior to the breeding season to protect against all the important reproductive viruses and bacteria including IBR, Type I and II BVD and Leptospirosis. All calves are vaccinated at branding to provide protection against the important viruses and bacteria causing respiratory and clostridial diseases. Currently calves receive a modified live vaccine against IBR, Type I and II BVD, BRSV, and PI3, as well as a modified live bacterin against shipping fever and a killed bacterin against Histophilus somnus, Blackleg and other clostridial diseases. At weaning all bull and heifer calves receive a booster with the same vaccines and bacterins used at branding. In late fall, all cows, bulls and weaned calves are treated with a topical endectocide to control internal and external parasites.

All bulls in the sale have passed a thorough breeding soundness exam to evaluate scrotal size and shape, semen motility and morphology, and structural soundness. Through my long standing veterinary relationship with Mitchell Cattle Co., I also know that you can rest assured that each bull is out of a sound, solid, productive cow. Ian and Anja rigorously select their herd for fertility, sound udders, correct feet and legs, and temperament. These cows go to the mountain with their calf each year and come back in the fall for pregnancy testing. Open and late cows, or cows not meeting Mitchell Cattle Co strict criteria, are culled – no excuses, no exceptions.

As the consulting veterinarian I am very proud to work with Mitchell Cattle Co. If there are any questions regarding the health management program at Mitchell Cattle Co. please contact me.

Respectfully,
 Jason R. McGillivray, D.V.M.

RED SIMMENTAL REFERENCE SIRES

SBSF **Eastwood 22E**

This is a moderate and complete herd bull which we purchased for \$20,000. I'm sure he hasn't dropped an ounce of flesh since the day he got here, and that's impressive in itself considering his depth and thickness. A very complete package that is eye appealing and to no surprise calved extremely well on heifers with EPD's in the 1st percentile for CE, BW and MCE. Springcreek Simmentals bought a semen package and used him on heifers and mature cows and the resulting progeny are fantastic. His sons in the Pursuit of Perfection 2021 sale brought as much as \$20,000, \$18,000 and \$16,000. Daughters of Eastwood 22E sold for as much as \$20,000 and \$16,000 in Springcreek's dispersal. We are calving the third set of 22E heifers now. They are all well balanced, moderate young brood cows that are producing very well. Eastwood improves udders, calving ease and maternal traits regardless of what he is bred to.

\$16,000 daughter of Eastwood 22E

SKORS **Kill Switch 148G**

Kill Switch 148G was selected out of Skor Simmentals final bull sale following their dispersal and was the second high seller at \$17,000. He is a big barreled, moderate framed herd sire with good muscle expression. This spring he remains in good shape – he's still a tank. His calves have proven to be growthy and soft middled, and yet they come easy with very moderate birthweights, just as his impressive set of EPDs predicted. He is above average in every single EPD category. We retained a son for our own use that has calved very well. We are excited to see if his calves perform as well as his sires.

Circle G **Handprint 4H**

We sourced Handprint 4H from Circle G knowing that we can always count on the maternal strength of Garth's program. 4H is in the top 1 and 2% for weaning weight, yearling weight, ribeye area and terminal index. There is some truth and accuracy to this as well, his sons in the bull pen weaned at over 880 pounds on average. This herd sire also calves well with vigorous, strong calves. Anyone looking to add weight and substance to their calf crop should start here. All the other positive traits that come with this sire are just a bonus.

RED SIMMENTAL REFERENCE SIRES

CHERRY CREEK **Elite 8G**

When viewing Elite 8G we were immediately drawn to his performance record and herd bull presence. Once we had seen his dam and sister, we knew the maternal quality would benefit our program as well. We wanted to incorporate some more power without sacrificing calving traits. The 8G calves are born easily and they are bright and thrifty. They have adequate growth, nice skull shape, lots of length, and most are cherry red.

Mitchell's **Sochi 41H**

Often the bulls we retain for ourselves end up working the best. We know they will thrive in our conditions, and are aware of how much consistency a pedigree truly has. There were no surprises when calves from this young sire hit the ground with moderate birthweights. Each bull calf from this group displays the attractive phenotype of their sire and grew acceptably. We couldn't have hoped for much better off of all two-year-old dams.

Mitchell's **Venom 34G**

Venom 34G is a bull that we retained for our own use based on the merits of his beautiful uddered, sound and correct 11-year-old dam. As well as his sire Entrust 84E who calved well, had great growth and is an extremely sound, good-footed herd bull. 34G is an excellent breeder, he has added frame and performance as well as some very good replacements to the heifer pen.

BLACK SIMMENTAL REFERENCE SIRES

Circle G **Explorer 40E**

A bull purchased from Circle G based on his performance blended with great CE, BW and MCE numbers, and his dam's quality and productivity. The Zeola 204Z cow had another excellent son in Garth's sale this year and that is just the type of longevity and production we want to replicate. We have been very pleased with 40E's calves. They are thick made, well muscled and some of the heaviest steers come fall were sired by "Explorer." The foot structure, udder quality and milk production of his daughters is absolutely ideal. We are very pleased with their phenotype and feel that they will mature to be a backbone in the Black Simmental division.

Erixon **State of War 207F**

State of War 207F was the high selling black Simmental bull in Erixon Simmentals 2020 sale. We purchased him based on his phenomenal calving ease traits, curve bending growth and foot quality. I can't say that I ever remember having a herd sire whose calves consistently came with nearly a week early gestation. Never mind how much explosive growth they have after birth. The replacements in the pen certainly do not look like heifers' calves. It makes a huge difference to your calf crop when you can count on first calvers to raise calves that fit right in with the rest. Daughters of 207F have developed well suspended, tidy udders. They are long topped and good footed, feminine, very good mothers and their calves display great vigour.

Skors **Captain Morgan 195G**

Progeny of the Captain Morgan 195G herd sire have been very consistent. They are stout, heavy haired, very attractive fronted, strong topped and possess an eye appealing muscle pattern. For a bull that is so stout he calves very well, we would breed him to our more mature heifers comfortably. Circle G Simmentals purchased his dam, the second high selling red cow, from Skor Simmentals dispersal for \$13,000. 195G is one we just can't stop using, each set of calves is just as exciting as the last. His daughters have ample milk, very consistent frame size and are keeping condition well.

BLACK SIMMENTAL REFERENCE SIRES

MRL **Batman** 34H

A major growth bull purchased for \$20,000 from McMillen Ranching. He has big square feet, great length and we love the performance that his progeny display. There were very few that we didn't keep either as replacements or bull calves and that is where the real return on investment lies here. Pounds equal dollars in this industry. 34H has produced a group of bulls that will sire heavy calves come fall.

More's **Hitch Hiker** 2H

After the success we've had with the first State of War son we quickly purchased another. There is so much that 056C has to offer in this industry. Foot and leg structure, the ability to get out and cover ground, ease of calving and explosive growth. We are already finding that 056C is being crossed on cows with some of the worst maternal and calving ease traits, immediately throwing consistency out the window. With MEM 2H we found CE, BW, MCE and API were all positive on both sides of his pedigree, which is the kind of consistency and predictability we want to see.

RED ANGUS REFERENCE SIRES

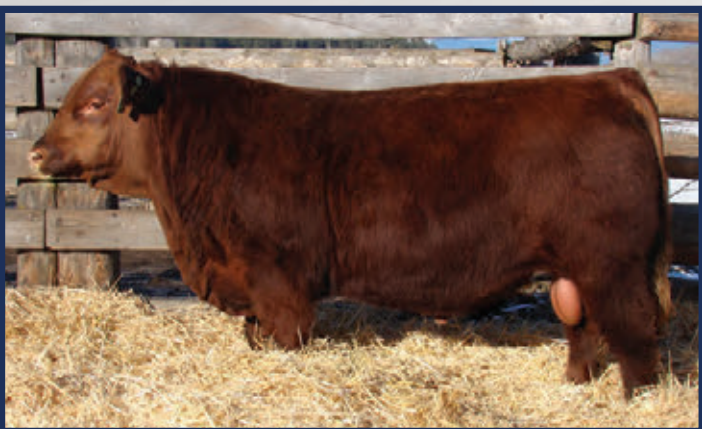

Red W Sunrise **Tycoon**658H

Tycoon 658H was purchased for \$17,000 from W Sunrise. He is a soft made calving ease bull with loads of natural thickness and shape. Dark red, neat little head, and he moves well on excellent feet. 658H has great EPD's across the board. We used him on both heifers and cows with great results. His sons blend calving ease and growth seamlessly.

Red RSL **Utah** 835F

The "Utah" herd sire was chosen for his excellent curve-bender performance. He was born at just 62 pounds and yet his two-year-old dam had him weighing 800 pounds come weaning. Utah has been an absolute dream for calving ease. He is king of the heifer pen but saw a lot of cows as well. It is a no brainer when calves come consistently lighter and grow so well. His daughters are already proving themselves in our herd – take the dam of Lot 66 as a prime example.

Red Mitchell's **Utah** 65H

We retained this young herd sire with great anticipation for his first calf crop. After scouring through some breeders pens on the prairies, we decided the most solid made bull was in our own pen. 65H has dark feet with a ton of heel, he moves very well and performed impressively. His sire, Utah, insured that the EPD's, calving ease and growth would all be good. As for his dam, she did very well to produce a bull of this caliber on her first try. All of these consistent production traits lead to a uniform calf crop born with ease, replacements who will have increased milk and will yield more pounds of calf come pay day. We have high hopes for the solid daughters this bull will leave us, they are already some of the best in the heifer pen.

NOTES...

Thank you

Thank you to all our past bidders and buyers for your continued support!

Terms & Conditions

Terms:

The terms of the sale are cash or cheque, payable at par at the sale location unless satisfactory credit arrangements have been made prior to the sale. The right of property shall not pass until after full settlement has been made. All settlements must be made in Canadian funds with the sale clerks before any cattle will be released.

Bidding:

Each animal will sell to the highest bidder, the seller reserves the right to pass the bull.

Disputes:

Bidding will be reopened between the parties involved in dispute. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision on all disputes will be final.

Announcements:

All announcements made from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay close attention to such disclosures.

Purchasers Risk:

Each animal becomes the risk of the purchaser as soon as sold. We strongly recommend insuring your purchase for full value.

Delivery :

Free delivery to central points in BC.

Health:

All animals in the sale have met all necessary health requirements.

Insurance:

All bulls will be covered in the yards by Hartford Insurance; insurance will be available for long term coverage.

Breeder's Guarantee:

The animals in this sale are guaranteed per the breeder's guarantee of the breed association they are registered with. In the unlikely event that a bull proves to be a non-breeder he will be replaced with a bull of equal value. Should this not be possible, an adjustment will be made to reflect the value of the bull in question or a credit will be issued towards a future purchase. At no time will we be responsible for any costs exceeding the original purchase price and no guarantee is made that semen from any bull will freeze. This guarantee will not cover any situation where the animal has been subjected to mismanagement or physical injury and we will not guarantee any animal that is subjected to any hormonal or surgical reproduction techniques after the sale. Insurance is available sale day and we strongly recommend that you take advantage of this service. We will do our utmost to work with you to ensure your satisfaction should any problems arise.

Rights and Obligations:

The above terms and conditions of the sale shall constitute a contract between the buyer and seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.
