Welcome

Welcome to the 21st Annual BullRush Simmental Bull sale. 2002 marked the inaugural edition of this sale. At that time, a group of farms with a common interest banded together to initiate a bull sale with quality animals that they were proud to present to the public. 21 years later, the bulls have more depth than ever and have evolved to suit the needs of today's modern cowherds and producers developing expectations. In this years offering from the progressive BullRush group, you will find a variety of bulls that will suit many different operations. Horned, polled, fullblood, red and black are all situated throughout this catalog for you to review. One thing that is common when you are assessing the different animals is the quality that exists here. You will travel far and wide to find a group of bulls that will compare to the array that will be displayed here in Rimbey on the 23rd. The bulls will be penned for viewing on Feb 22nd and if you wish to view them prior to that, be sure to contact the consignor and see them on farm. If you cannot make it to the sale and are interested in an animal, be sure to contact one of the trusted sales staff or consignors and they will facilitate your interests. You also have the option to utilize online bidding through DLMS.

Look forward to seeing you on Feb 23rd at the Agrim In Rimbey. Come join in and enjoy the hospitality that has become a tradition for so many.

On behalf of the BullRush Simmental Group

Duane Movald

*Bulls may viewed at each consigners farms prior to
Feb 21, and Available for viewing at the
Rimbey Agrim Center starting Feb 22.*

Cameron and Mackenzie Stout

Cameron Cell - 403.963.1034

Mackenzie Cell - 403.913.9453

On behalf of Stout Bros., we would like to welcome you to the the 21st annual Bull and Female Sale. Another year and another decline in the Canadian cow herd has come and gone. Looking forward this can only mean good things right? What better time to step in and incorporate new genetics to raise your bottom dollar. With that being said we encourage you to stop by the farm to check out the bulls and their dams at the farm, to give yourself a glimpse into each bulls future. Weaning weights taken August 24th and Yearling Weights were done Dec 31st. As always our bulls have been slowly developed on the Country Junction Right Way beef ration pellet and fed free choice haylage. All the bulls have all been tested for Dilutor gene (if bred to black cows non dilutor will have no greys) , homozygous polled (homozygous polled bulls will have no horned calves) and coat colour where applicable. DNA test results will be seen at the end of each footnote, if you have any questions about the DNA testing give us a call and we will go over it with you. The bulls and heifers will all be videoed and can be viewed at you convenience prior to the sale on DLMS, Cattlevids, or our Facebook page. If you have any questions about our offering feel free to give us a call, text or come see the cattle in person, we would love to hear from you. Hope to see you all February 23th in Rimbey!

This year Ramsay gets the honors of leading our string of bulls and for good reason. Maybe the deepest bodied fullblood we have ever raised. Ramsay has had the look from an early age and just keeps getting better. Pictured here at the end of November you can see why he has us excited. His sire Shazam is a bull that did a great drop for Anchor D in his first calf crop. After seeing his set of sons in the bull pen we knew we had to get a semen package on him. Too further indorse Ramsay, he comes from a cow family that is no stranger to putting feature sons through the sale. I few years ago Ramsays grandam hit it out of the park raising our lead off and high selling bull to Willcooke Simmentals at Caroline. Unfortunately, Ramsay's dam came up open this fall after raising this brute, she was a gorgeous little cow with as good as udder as any cow on the place. Guess work is done here, step up on a good one! Co-Owned with Ghanim Cattle Co. Dilutor carrier

The second of the Shazam bulls and this one comes with the automatic dehorner. Winterfell comes from a good old cow we purchased from the Bloder family at Blushrose Simmentals many years ago. She has been a great little cow for us but has suffered some extremely bad luck losing three different top end bulls which was no fault of her own. Her last bull to sell was a feature in our group selling to John and Bobbi Sever who always find the good ones. Winterfell is a moderate framed, tremendous footed, long spined bull that really pushes the scale down for his frame. Virtually solid red with white bands on his ankles and spot on his shoulder, Winterfell will do a terrific job siring marketable offspring and take all the horns off in the process. Viserys is an ET calf from Sugar Ray and the well-known donor Virginia Treasure, now residing in Iowa at Stanley Martins. Stanley was kind enough to allow us to purchase embryos on the sire of our choice and we thought Sugar Ray would complement her well. When Viserys hit the ground, we were quite excited, polled, thick and short marked just how we like them. As he has matured, he has developed into a solid herd sire prospect with a round stout hip, great length, strong feet and a beautiful dark liver red. Viserys is a great polled option with a very reasonable birthweight for someone looking to add a top end bull with an impeccable pedigree into their herd! Non Dilutor

A big framed ET bull here that goes back to some older Simmental genetics from Smith Simmentals. Tywin is a smooth made Molson son raised by a first calving recip. Maybe a little bit too much power for a first calver but she did a very good job weaning him off at 858 pounds. Tywin is a little later maturing which is common for Molson progeny and he is finally coming into his own. Big feet, good bone work, added frame, Tywin is a bull that would excel in a British based herd to give you a little more jam and maternal as I feel his females will be exceptional. A solid bull that won't cost a fortune don't get caught sleeping. Non dilutor

It's tough to find these yellow Simmental bulls now a days and when you do, they are usually the good ones. This is the case with Lannister. A couple years ago we sold a couple flushmates in the sale and they were two of our high selling bulls going to Dead Horse Creek and John and Bobbi Sever. We were hoping to get some heifers from this mating but that didn't work so we purchased another set of embryos from Gagnons. Once again, we didn't get our heifer. Our loss and your gain, Lannister is as complete as any bull in the pen and will sire those sought-after buckskin steer that are in high demand. His steers will be good but his heifers will be even better. Keep all the daughters, as his donor dam is one of the best in the breed! Dilutor

We have always admired the Stuey progeny over the years and he has become a household name in the Simmental industry. He consistently sires structurally correct, hairy, loose made cattle with tremendous daughters. We started Aing select fullblood heifers to him for his versatility and we have been very pleased. Theon was born at a modest 83 pounds and has done very well throughout. Mothered by a viper daughter with a great udder and loads of milk. For those shopping for a maternally bred bull, looking to produce those top end fullblood replacements, take a long hard look at Theon! Non Dilutor

Jon Snow has had us excited since the day he was born, the good ones usually have the look from day one, this was the case with Jon Snow. His sire Legend, has gained popularity over the years as his females consistently rise to the top and are known for their production records. With Legend semen consistently bringing around \$800 dollars, we are pretty picky on what females get bred to him. I think this tells you how highly we think of Jon Snows dam, Ruby Ann. Jon Snow is moderate framed, great coloured, sound calving ease prospect that has generations of female makers in his pedigree. If you're looking for a highly maternal heifer bull, Jon Snow has all the credentials! Non Dilutor

Standout is another tried, tested and true Ai sire that has been held relatively exclusive that we have been incorporating into our herd. His consistency across a wide variety of cows has been remarkable. Starks dam is a young Open Range daughter that has a bright future here. She recently produced a \$13 000 bred for us this fall to Chittick family Farms. Dark red, hairy, long, deep and strong footed are words that come to mind when describing Stark. Like his sire, Stark will work on a wide variety of cows with great results. A very versatile bull that I think has a bright future. Non Dilutor

If I was to buy any bull in our string it would be Mormont. Not only does he put it all together but more importantly he comes from probably our best cow we have ever owned, Sunflower. She was a perfect 8 for 8 on her calving record putting heifers at the very top of the pen and features in the bull sale. She was slated for the donor pen this spring but unfortunately, she stifled herself this summer and we lost her this winter. Mormont did it on his own from mid-July reflecting his weaning weight but caught right back up with the pack on feed. Hairy, big barreled, strong footed and the highly sought-after money stripe, Mormont is the real deal and will be worth every penny and more. Id break the budget on this one! Non-Dilutor

This year's heavy weight title belongs to Sandor. Mothered by a tremendous Max Factor first calver that did everything we asked and more. Not too often your heavy weight bull is from a first calver. Sandors sire, Red Summit is a bull we purchased semen on after seeing many top end progeny in other herds. He combines an element of calving ease without sacrificing performance along with very good EPD profile. We believe Sandor will follow in his footsteps. Turn him out with your cows and sleep easing knowing they will hit the ground and push the scales down in the fall. Put a couple extra check marks on Sandor! Homo polled, Non Dilutor

Old Deb does it again, Oberyn will mark her 5th consecutive calf walking through the sale ring. Shes a bigger framed cow that packs some punch and really works well with these calving ease bulls. Prime Beef is an AI sire we have been using more and more. He sires small birth weights, dark coats and they perform really well. In all honesty I'm always surprised when Oberyn steps on the scale, he looks like he might give up a few pounds to some of the bigger bulls but holds his own very well. Strong footed and athletic, Oberyn is a bull that can really get out and move and will cover a ton of cows. A good honest bull that will be a great investment. Non Dilutor

The stud of the bull pen and a true curve bender! With a short gestation of 274 days, Drogo was born at 76 pounds and took right off weaning at 892 at the end of August and continued on to be the second heaviest bull at yearling weights. On the bottom side of the pedigree there is multiple generations of short gestation cattle a trait that is highly heritable, as well Captain Blaze another short gestation bull that we have used very successfully on heifers. His calves come very easily with a ton of hair and as you can see with Drogo they really grow. We feel Drogo will be a bomb proof heifer bull as well as have the ability to reduce birth weights on cows and not give up any performance. This is a big-time herd bull that ranks right at the top of any black we have ever sold! Homo polled, Hetro Black

If you use EPDs as a selection tool Samwell is your bull. Hes in the top end of the breed for both calving ease and performance metrics. We fell EPDs are an important selection tool but more important you have to see the numbers in the real world. Samwell has done just that, born at 86 pounds and never looking back weaning August 24th at 922 pounds. Pretty impressive considering he was raised by a first calving recip. Samwell was an embryo we purchased from Mader Ranches out of there famed Opal cow and Walks This Way, a bull that sired the \$280 000 Walk The Line last fall. Samwell combines a proven pedigree, calving ease and performance, a winning combination to get the job done! Homo polled, Homo black

Brocket is a bull I really admire, nothing flashy just straight goods. He isn't the biggest in the pen as he isn't bred to be but probably the easiest fleshing in our entire offering. Brocket comes by it naturally as he is mothered by one of our top black cows, a Shadow daughter, Taylor. She is always in ideal condition no matter what time of the year and one we are happy to show off to visitors. Brocket may be a little bit of a sale sleeper as he is a little over powered by his black counterparts but for dollars invested, I think will pay the biggest dividend. A bull we feel you can confidently use in your heifer pen without hesitation. Don't get caught sleeping sale day, let Brocket 99 rock your heifer pen! Homo polled, Hetro black.

Due to our small angus numbers it's not very often we sell a black angus bull. In fact, Baratheon will be the first angus bull we have offered with a straight black pedigree! We purchased these embryos last spring from Bova Tech in attempt to get a female from the great Sky High herd sire. We have heard nothing but good in regards to Sky High females, combine that with his mom 530'15 coming from the legendary Tilda cow family we were hoping for a cornerstone female. Well, the result may have not been a female we desired, we are sure happy to offer Baratheon. From the day he was born he's always been an eye catcher and destined for the bull sale. If you are looking for great maternal values with added horse power be sure to look up Baratheon sale day.

Beric is a bull that continues to develop into an impressive herd sire. He's a bull that has changed more than any other bull since weaning and shows no signs of slowing down. In all honesty he wasn't on my radar till mid-November when he finally started to showcase his true potential. Beric is a wide topped; stout hipped, well-muscled bull that carries himself fluently on a good solid foot. His dam Leah has been a mainstay in our herd raising top end progeny year after year whichever way she is mated. Beric would be a great addition to an Exotic herd for anyone looking to inject some Hybrid Vigor into their calf crop or an Angus based herd looking to add some extra performance that everyone is looking for.

Stout Simmentals - 2 Pens of 3 Commercial Heifers

Once again, we will be offering 2 lots of three replacement heifers from the top of our keeper pen. These heifers were selected from top producing cows and our own herd bulls and multiple being from Ai. The heifers will be palpated by a vet for breeding soundness and come with the same breeding guarantee as our bulls do.

Welcome all to the 21st Annual Bull Rush Simmental Bull Sale. Thanks for taking some time to look through the catalog. As we all look ahead towards our upcoming calf crops, it gives us the opportunity to reflect on the directions we are moving and the changes we may wish to make to get us there. This year within our offering you will find a variety of bulls that can fit into many different programs. We have worked hard to make each new calf crop be more efficient than the last in a never ending pursuit to improve traits and functionality of the cattle. If you are focused on the numbers behind a specific animal, we do offer mostly above average EPD's and have moved that forward along with API's that are over the 100 index. When you are contemplating any new additions to your bull battery that can be a great tool to utilize to get you where you wish to go. Feel free to stop by and view the bulls on farm and if you have any questions about a particular animal or animals, call text or email us. We are always available to help you. Thanks in advance for your interest.

Where to start when it comes to describing this homo polled sensation. He hit the ground and has never looked back. A super disposition and very structurally correct with a ton of eye appeal. Nice scrotal development and an overall herd bull presence to him. There are many years of polled breeding on his dams side, and she traces back to one of our oldest polled cows from 1980. If you are interested in the Roosevelt bloodline take a real good look at RT 73 K. He could be the basis of a new line for your program. He ticks off so many boxes and it can be hard to find these kind.

If you are in the market for a black bull with extra length, look no further. This February born bull has impressed us since birth with his stature and disposition. His maternal grand sire is the great Black Joker that was known for the milkability that he added to his daughters. He is genetically tested for color so you will have benefit of knowing what you are getting before his first calf crop hits the ground. Not only eye appeal here but many generations of predictable and reliable genetics.

MVRN Pol Roosevelt 20 K has displayed herd bull attributes since he was a young calf. He seems to have a large drive and an early libido that does not always exist. He travels very well on his mid to upper sized frame, posses a full and deeper red hair coat and has been a dream to work with. His dam has growthy calves that start life in that low 90 lb birth weight range and take right off. He is an above average type of bull with a solid collection of productive traits bred into him.

RT 60 K (2022 Version) has a bit more frame than some of his pen mates. His dam is a direct daughter of our RT 104 Y herd bull we ran for several years. He was a homo polled sire that produced some real decent offspring. Combine that lineage with the homo polled Commander sire and you have some phenomenal gaining cattle with excellent dispositions that will come out polled. This young bull has a blaze on his face so if you are looking to add some more traditional Simmental coloring to your calves, this fella should do the trick.

Out of yet another good producing RT 104 Y daughter and the Commander bull that we purchased from Westgold Farms. KHG Nancy 625D is the dam to the Commander bull, and she is the epitome of a feminine bovine. A beautiful tidy udder with well placed teats and structurally built to last. When we visually saw her up close and personally, we knew we had to try and get a son from her to add to the depth of our own breeding program. Her track record in the birth weight department is super good, with lower birth weights that get out and grow. RT 90 K has a small white strip down his skull and a bit of coloring underneath as well.

A very high degree of calving ease is found throughout the RT 113 K pedigree. His dam has produced our current and main heifer bull and she is due to calve in early 2023 once again to a calving ease sire. Fertility and maternal traits galore flow through this homo polled young bull. We stack many generations of consistency into the heifer bull lines to help solidify the results that are needed when mating these fellers to first calf heifers. Look to him to give you what you require in this department that will make your program profitable with more live calves to market.

More calving ease than his numbers may suggest, this bulls maternal dam and grand dam had very light birth weights (low 60 lb range) and yet have produced quite respectable growth into their offspring. RT 142 K has a fairly dark red hair coat and is tested homo polled. He has a nipped tip on his one ear as his dam was mothering him on one cold and breezy morning! That will not deter him in any way from doing his job and when you see him in person you will come to appreciate his stature and all that he will send down the genetic chain to benefit the next generation. He also has a white snip on his homo polled head.

If you research pedigrees and like some of the old fleckvieh bloodlines, look back at the pedigree here and you will find Anchor T Paragon 1X on the dams side. He has a decent calving ease number with a balanced set of traits that hold true even 17 years after his birth. The cows in the RT 276 K pedigree all have great feet and hoof structure with the polled gene being incorporated many years back. Combine all the history on the dams side with the breeding to Roosevelt, and you have the best of the old and new to move you forward into this upcoming and profitable cycle the beef industry is about to embark on.

TERMS & CONDITIONS

TERMS: The terms of the sale are cash or cheque payable in Canadian Funds at par immediately following the sale. The right of ownership shall not pass until after settlement is made. All settlements must be made before any livestock will be released.

DELIVERY: Bulls will be wintered free of cost until April 1, 2023 providing the bulls going back to their farm are insured for all risks from the date of sale until purchaser obtains possession. After such date there will be a \$7.00 per head per day charge per bull. Assistance with delivery arrangements will be made available at cost.

FLECKVIEH STATUS: All bulls that are at least 5 generations Fleckvieh are considered Full Fleckvieh. Fleckvieh percentages are determined by each individual consignor to the best of their knowledge. It is recommended if further research is required, to check with the Simmental Association.

CERTIFICATE OF REGISTRY: After settlement has been made the buyer will be provided with the proper registration papers, duly transferred on the record of the Canadian Simmental Association. Further transfer to the herd books of other countries shall be at the buyers expense.

BREEDERS GUARANTEE: Standard terms set forth by the Canadian Simmental Association, with the exception where any animal is subject to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

ACCIDENTS: Although every precaution will be taken to protect the safety and comfort of buyers and public, neither the consignors, auctioneer, sales staff of facility assumes any responsibility in this matter and disclaims any liability, legal or otherwise, in the event of accident or loss of property.

FERTILITY & HEALTH: All bulls have been under a full herd health program. All bulls will be semen tested prior to the sale. In order to assist our customers better. Should you have any questions please give us a call.

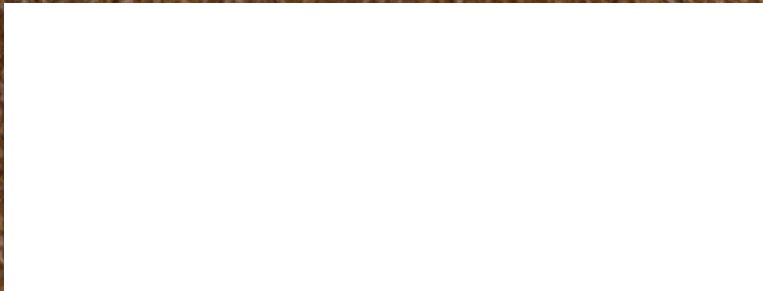

INSURANCE: Cattle are the property of the buyer as soon as the auctioneer declares them sold therefore buyers are urged to insure their animals. An insurance salesperson will be in attendance.
