PRIVATE TREATY
BULL SALE
EDAM, SK

PRESENTED BY STUART CATTLE STATION

BRANDING THE BEST

Private Treaty Bull Sale

Welcome to our 2023 bull pen offering and thank you for your ongoing interest and support. When we look back on the past year, we were fortunate to experience a more normal growing season, a healthy family and a return to "normal". Here is hoping that cattle futures hold true and we have our time in the sun going forward

The bull pen is developing well and we look forward to showing you the offering. Some new AI sires were sampled, plus we purchased some new herdsires whose progeny is found in the following pages. More proven herd bulls are still represented as well, the Frank and Admiral sons continue to impress. Our search for functional, naturally muscled, sound footed and maternally driven genetics never seems to end.

We try to run a low input cow herd and let the cows make the decisions on who stays and who goes. The weaning weights represent what the cows were able to produce on 2022 grass conditions with no creep feed. Ideal grass conditions this summer showed us what these cows are capable of. Weaning weights were up. The calves were weaned the first week of October, pail fed for 6 weeks then transitioned to a oat silage, hay, grain blend at the end of November. Concentrate levels haven't exceeded 6 lbs/day and went for the feeding period. When you follow these bulls around in the summer, you quickly understand they need to be athletes.

The cow herd is shrinking. As a result, we have culled relentlessly on temperament, performance, scrotal, udders, feet and any other excuse we can invent. There is tremendous opportunity in this business going forward, but we are dealing with today numbers and recognize that. We started the spring with close to 100 bull calves. This is what made the cut.

We look forward to visiting with you and going over your 2023 breeding decisions. If you can't make it to the ranch, feel free to call or text. It seems like we are selling more and more bulls sight unseen as we are all living busy lives. We will give our honest opinion on every bull on offer.

We stand behind the bulls 100%. If you're not happy, we're not either.

Please see this as your invitation to stop in. We always appreciate the visit and any discussions on this crazy industry that we are in. We hope to see you soon.

- This calf is on pace to be Frank's best son to date
- A man amongst boys in the pen especially when you consider his birthdate
- He resembles his sire in so many ways
- Full sister is proving herself already with a full brother working commercially
- Maternally his dam sports a 108 weaning ratio on sons, 107 on daughters
- He is worth the drive, this is quite a calf

Admiral is delivering on our plan since we purchased him 4 years ago. While we are in the bull business, we saw him as being an easy fleshing, udder improving female maker. His first milking daughters proved that. There are both power and calving ease sons available in the pen. He is an ideal cross for exotic females, adding base, fleshing ability and udder improvement.

BW average on sons - 79 lbs. BW average on daughters - 80 lbs

Decepticon is a unique genetic package that has delivered on his first calf crop. His sons are loose hided, thick haired with some extra style. We originally purchased him to add some performance to maternally bred females. He kept birth weight in check while still improving growth. The heifer calves offer a similar pattern. Decepticon will be seeing heavier use this spring, we like the stamp he is putting on his progeny.

The best herdbull that we have had the pleasure to own. Touring the bull pen you will understand why. The stamp he puts on his sons is incredible. Lower profile yet heavy performing, great foot, early maturing and every one of them seems to have a presence in the pen. On the female side, I can say he is an udder improver with his daughters all having that wedge look and a great foot. He has run with 50+ females every summer and he gains weight while doing it. Help yourself to a large sire group of sons that are easy to find in the pen.

BW average on sons - 90 lbs. BW average on heifers - 86 lbs.

Governer has been used as a maternally driven calving ease sire with consistent results. We've never touched a calf from him, yet they still grow quickly and show added style in the pen. His sons are some of the best haired calves I've seen. We unfortunately lost Governer this past summer so an opportunity to buy a son is getting limited.
