CRAIG ANGUS

On behalf of everyone at Craig Angus, we welcome you to the 26th Top Cut Bull Sale.

We are consigning what I feel is the strongest and most even set of bulls that we have ever brought to town. I seem to say that every year, but that tells me that our program is working. That is what we are all trying to do. We are achieving this with our careful sire selection and a strong culling program. By the sale day, the bulls have been culled 5 times. I believe if a bull is not good enough for me to use on my cows, then he can not be used on your herd.

The bulls have been developed slowly. The first winter they are fed a tmr ration to achieve a gain of 2.25 - 2.75 pounds per day. Then go to grass from the first part of May until October; when they are brought home and feed in a 20 acre pasture with room to roam.

The bulls have received their first two shots of the footrot vaccine and will just require their annual booster. This year they have been semen tested by Grasslands Animal Health Services.

If you have any questions, feel free to call or if you have time, stop by. The bulls will be here until March 22

Best regards,

Jason & Tanya Craig

Jim & Shirley Craig

FORBES ANGUS

Welcome to our 26th edition of the Top Cut Bull Sale. 2017 was a challenging year in most areas including ours. Stretching pasture and feed stacks was an unfortunate part of management in most operations. Cattle that can adapt and thrive are what we strive for. In this last year the importance of being able to adjust in our climate determined profitability. Wet, muddy, hot, lush, cold and of course dry all challenge the genetics we breed into our programs. Those that can maintain production, adapt from lush to hard grass, and tolerate our extremes stand out.

My offering this year is a maternally based bunch with some very strong performance types mixed in. I have always put a great deal of importance on temperament, functionality, and longevity. If your constantly culling its hard to build and maintain your herds. My bulls for the sale are rugged ranch ready two year olds. Not raised in a confined corral or pampered with mountains of straw; they are prepared in a large pasture, and allowed to roam . There conditioning is solid and natural. These bulls are raised to be athletic, adaptable, and durable.

Please note:

I run a complete herd health program.

My goal is to sell functional, healthy cattle.

Any bulls returning to the ranch I ask that they are insured and you are able to accommodate them by mid April.

The bulls will be in the stockyards the day before the sale for the best time to view.

If you have any questions please feel free to get in touch with me.

Colin Forbes

SIRE - WIWA CREEK LEAD CHANGE 85'14

2018 brings the introduction of Lead Change. When I purchased this sire I was impressed with his stretch and muscle development. His strong physical traits combined with a balanced EPD panel made him stand out for me. He is an athletic sire that covers the whole field and maintains a workable temperament.

A large offering of 64A this year, it is exciting to see the impact of this herd sire. His depth, spring of rib and ability to maintain condition are the physical traits that stand out for me. His pedigree is very strong maternally and for calving ease. His female offspring will be the replacement kind.

To All Our New and Repeat Customers
 Who Supported us in 2017!

Directions to ranch: 4 miles south of Piapot and 1½ miles west

There are many tools at one's disposal in selecting your next breeding genetics: performance data, EPD's, genetic testing, carcass data, but for myself nothing beats the process of culling. In a world of efficiency, I focus on cattle that will walk soundly the duration of their lives, milk and breed without any maintenance. This leads to fewer cull cows, requiring fewer heifer calves retained, maximizing calf production.

When the structure, udder quality, and fertility is taken care of: I breed for length of body, eye appealing angus character, including an angus head which promotes calving ease, and naturally developing muscle definition. I don't expect my bulls to develop on a duck's breakfast (a drink of water and a look around) but they should muscle up and carry weight with a reasonable amount of food intake.

Beef cattle have been compared to pork and poultry, but one aspect will always vary, our environment. It changes what type of cattle work where and on what inputs. Our cattle are raised on ranch conditions and developed slowly to ensure longevity. We solely make our living raising cattle, commercial and purebred, and our cattle work for us because we need them to. And I believe they can work for you too.

Visits before the sale to view the bulls, cows, and herdsires are very welcome. Our website has pictures of the cows and herdsires. If you have any questions please contact us at:

We had high hopes when we purchased 'Stoney', and he's exceeded all of them. His heifers are flat out amazing, the bull calves are the most consistent that we've raised. If you're looking for thick, hairy cattle to add spring of rib, and stick some meat on while doing it with moderate birth weights then Stoney sons are the bulls you need. It is amazing how these bulls weigh up with their thickness and length. They are angus cattle through and through

One of the most attractive bulls in the group, sporting a perfect angus head, he's well put together. With an extremely thick made Density cow to back him up he is truly hard to fault. This bull should work on heifers.

This bull is closely related to 94D and they're like two peas in the pod. If you're looking for two bulls to turn out together, these are the ones. This bull may also work on heifers, but would be best on cows. If you examine the pedigrees, his grandmother is the same cow that raised Colin's Wiwa Creek Lead Change herdsire.

We seriously considered keeping 68D. His consensus damn is a thick, hairy, well made cow, one of our favorites. He weaned over 800 lbs after 207 days. He's a well-made bull with a little extra thickness. Despite his birth weight I would breed cows with this bull, his grandmother has some birth weight to her.

This bull really puts it together well. He's got a strong dam that produced another great bull for next year. Every day he matures I like him more and more. I expect him to really throw eye appeal into his calves. He should work on heifers; his mother is from a bull that successfully bred heifers for years.

Another of the top weaning bulls, he's got a little more length and a little more thickness than his Stoney brothers. When I clipped him, he barely squeezed down the shoot. 55Z is a fantastic cow. Study this one well. He has a lot of offer.

87D's twin. 4 is a thick smaller framed bull that should be able to service heifers his entire life with trouble free calving. **Red Carrier.**

AgriStability is Changing

What You Need To Know

- The Reference Margin Limit (RML) for the 2018 program year has been adjusted to 70%
- The new RML will ensure producers from all sectors will have improved access to support under the program regardless of their cost structure
- The RML will continue to target assistance to significant income losses threatening the viability of producers' farms and that are beyond their capacity to manage.

Contact your trusted Stark & Marsh representative to discuss how these changes may make you an eligible candidate for the AgriStability program

Homegrown SUCCESS

We'd be happy to help: www.starkmarsh.com Phone: (306) 773-7285 Email: inquiry@starkmarsh.com

Probably the most well balanced of the Lucky Seven sons. This bull is long as a freight train with tremendous neck extension, and his sires perfect foot and leg structure along with an awesome dam that was my pick from the MJT dispersal. I believe he'll sire consistent quality in his calves as he has a full brother for next year that I'm seriously considering keeping.

One of the most powerful Lucky Sevens bulls: with a lot of length, a big top and a deep haunch. If you need some extra performance in your cowherd this bull can get it done.

Recommended for heifers. The natural successor of 78Z's in the sale. He's thick, good footed, and looks just like his sire. Off a nice heifer I purchased from Wes. Lots of low birth weight breeding here I expect he will provide trouble free heifer calving for many years like his sire did for us.

I really like this bull. He gets the extra performance over his brothers from his mother and thus should only be used on cows, but he will do a good job adding thickness and length to his progeny. He's also considered Canadian bred if that matters to you.

This bull really brings it together. Probably better built than his sire even. I'm really impressed with how this bull has developed. Make sure you take a look at him sale day. He may work on heifers, probably better for cows, but if you needed him to, could service your heifers with minimal trouble.

This bull has grown up well. He's long, thick and full of meat. His dam raised lead off bulls in her prime.

HAWKEYE RANCHING COMPANY LTD.

We would like to take this opportunity to welcome everyone to the sale. This past year has been a very trying one for many of our friends, customers, and community members. It was a year that hopefully brings us all closer together and allows us to focus on the things that matter most.

With that being said we are very proud of the set of bulls that we will be bringing to town. Due to dry conditions they were weaned a bit earlier but their moms sure did an excellent job because they sure pushed the scales down. If you would like to discuss any of our consignments or better yet come see them ahead of time please feel free to contact us at any time. Remember we stand behind our cattle so buy with confidence.

Leif, Melissa, Emma, Kolt & Manni Brost

This guy's pedigree is loaded. He was a high selling \$180,000.00 Resource son out of Density's sister. He definitely transmits his tremendous muscle and performance to his offspring. His dam has produced \$1.7 million of progeny including numerous herd sires. He was unfortunately struck by lightning and there is very limited semen in Canada so don't miss out on sons of this powerhouse.

REF - SAV RENOWN 3439

One of the most popular and most sought-after herd sires in the breed. His calves really impress me with their depth and easy doing fleshing ability. They are also very docile. He is out of the legendary 4136 cow that has produced \$8.5 million in progeny sales with Renown being one of the best. If you are serious about the beef business have a look at these sons.

LOT 83 - HE 3439 REVOLUTION 107E

An absolute tank of a bull out of an outstanding cow, Maternal brothers have been some of my high sellers in the past and this guy is bound to be there too. His dam has 27 recorded progeny with lots more to hit the ground this spring. Brothers have sold to Dot Bar Dot, Masers, and Wedricks, as well as numerous brothers have been used in our own herd including Quantified. A top maternal sister will be entering our donor pen this spring.

Renown really stamps his calves with length, good hair and that deep soggy look. This guys mother is a maternal sister to lots 76-80 and a full sister to the Convoy bull working at BJ Cattle Co. She is a hard working cow that weans off a very high percentage of her body weight every year. This guy also has a low birth weight.

One of the most popular and most consistent sires there has been in the last couple of years. He sires cattle with good muscle, depth of rib and length. The progeny are also very docile and have a good solid foot under them. You can also breed him a lot of different ways with his outcross pedigree.

NOTES

A series of horizontal lines for writing notes, separated by a decorative line with stars.

TERMS OF SALE: The terms of the sale are cash or cheque, made payable in Canadian funds immediately after the sale. The right of ownership shall not pass from seller to buyer until settlement is made. As soon as the animal is sold it becomes the responsibility of the purchaser.

BREEDING GUARANTEE: All cattle are sound and sell with a responsible breeder guarantee of satisfaction. In the event any bull 14 months of age or over fails to prove a breeder after being used on cows known to be breeders, within six months of the sale date, may be returned to the seller at the buyers expense. The seller reserves the privilege of trying to prove that animal a breeder. Full settlement and satisfaction of all claims is the option of the seller (whether return of the purchase price or replacement of the animal with one of equal value.) Any animal returned must be free of disease and in good health.

CATTLE INSPECTION: All carry permanent identity tags corresponding to the sale lot numbers. All shall be available for inspection prior to the sale.

ANNOUNCEMENTS: All announcements from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay close attention to any announcements.

DISPUTES: In the case of disputes bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The Auctioneer's decision in such matters is final.

LIABILITIES: All people who attend the sale do so at their own risk. The owners, Management and Sale Staff assume no liability, legal or otherwise, for property loss or any accidents that may occur on or about the premises.

CERTIFICATE OF REGISTRY: A certificate of registry duly transferred will be Furnished to the buyer by the breeder for each registered animal after settlement has been made.
