## WELCOME FROM DOUBLE KL SIMMENTALS

Welcome, on behalf of myself, Kathy and our families. We appreciate your interest in our winter breeding herd dispersal.

Both Kathy and I struggled with the decision to sell these cattle — they are our number 1 enjoyment. We have both been involved in the cattle industry all our lives. There is never a lack of conversation around our table or deck about breeding cattle between ourselves, fellow cattlemen, friends, and family. In order to slow down and have time to enjoy our 10 grandchildren (with 3 more on the way) something had to give. We started to sell some of our grass calvers last year but ended up breeding another 140 heifers! From winter calving to grass calving, seeding, spraying, haying, silaging cereals, combining and then chopping corn and hauling bales we found there weren't any free days! So, we decided to free some time in the winter months.

Hayden and Anna purchased another ranch a couple of years back. With their own cow herd, a European Approved feedlot and irrigation pivots we felt we shouldn't put anymore on their plates with these winter calvers. Dalton and James are busy with their families and successful careers.

My niece Jenna who did our pictures says people keep asking who are these people selling these cows? I guess that just proves we have gotten old. So as a bit of background, I spent many years in the purebred Simmental industry showing at all the major shows in Canada and have a tote of banners in the basement. We were one of the early promoters of black and red Simmental cattle. Some of the very first black and red Simmental shown successfully at Agribition were bred and shown by me. But that wasn't as meaningful to me as feeding cattle to slaughter and marketing them.

I have always backgrounded or fed our commercial calves out. It drove the type of cattle we were raising and the decisions we made in our breeding program. We started using black and red Simmental and Angus cattle — the feedlot always driving the direction we took. It is the true "END" value of any breeding program. We received carcass data back on individual animals for the last 8-10 years. We have graduated to almost 100% AAA and prime carcasses in the last 3 years (Industry average is 73% AAA). This breeding herd we are offering is the result of our quest to produce those carcasses. We bred these cows to raise bulls. This enabled us to use 20 brothers/year and produce the consistency in our commercial cowherd. We built this breeding herd not to sell breeding stock but to raise the kind of bulls we needed for our commercial herd. This Angus/Simmental breeding herd is producing the marbling we sought on 500 mother cows here and at Hayden and Anna's. Besides the carcass traits, the maternal strength of our commercial cows in their mothering and milking ability originates from these cow families we are offering.

High end beef is as good as it gets! We know consumers will pay if the quality is there — In all honesty we producers are the ones that have the ability and control to produce superior cattle. For us this is always the most rewarding aspect of all.

# FROM THE DESK AT T BAR C

Welcome to Double KL Simmentals Complete Herd Dispersal, on Monday, December 11, 2023, at Heartland Livestock Center, Yorkton, Saskatchewan. The folks at Double KL offer a lineup of eighty pairs and twenty-five bred heifers both Simmental and Sim/Angus.

Ken and the KL gang always selected the "cowman's kind" and concentrated on the development of predictable cow families using walking bulls. The herd is rich in proven genetics that are predictable in both maternal and performance traits. These deep bodied females are full of milk, complete with soundness and fertility. The calves at foot are report cards on the ability and predictability of their mothers. The LFE RS Lewis 3102G, an own son of Cobra and Northern View Resort 105X, an own son of S A V Resource are two sires who have left their mark on the program...producing the kind you will never have enough of...the kind with performance and tons of hair.

For those looking for some front pasture features and those building a cow herd, this dispersal offers unlimited opportunities. Although there is always a hint of sadness when a fellow breeder disperses it opens the door to unlimited selection of a proven cow herd that has been built over the years. Whether you are looking for a proven foundation dam, her bred daughter or a fancy heifer calf, the diverse lineup of performance genetics awaits you suitable for all types of programs and all types of budgets. For those of you who are planning your 2024 bull battery, December 11th will be a great day to come to town and go through the rugged set of bull calves at side of their mothers... get your bull buying done and save a little tax by doing so.

The KL Simmental date needs to be circled on your calendar... its worth the trip whether in person, online or on the telephone. Do not hesitate to give me or any of the T Bar Team a call, we will be pleased to assist with your purchases in a professional and confidential matter.

### BULL CALVES WINTERING AND SEMEN TEST

#### Terms:

50% due sale day with a post-dated cheque for the balance dated April 1, 2024

A wintering program is available on all bull purchases.

All bulls must be insured.

Herd bulls and long yearling bulls will be semen tested prior to the sale

All 2023 bull calves that are wintered will be semen tested prior to pickup and are guaranteed to pass a semen test.

A wintering fee of \$500 per bull which includes semen testing is payable at the time of sale.

Bulls sold for \$5000 or more receive free wintering.

2023 bull calves taken at the time of the sale will sell with no further guarantee.

All bulls must be picked up by April 30, 2024.

Terms OAC on females

# THE 222 family

LOT 2 AND 2A

Probably one of the best foundation cows we incorporated into our herd. She is an EXT granddaughter and a sister to KKLP 176A. We were part of a synchronize program with the University AI'ing 400 heifers/year while trying different AI techniques I had 100 EXT daughters at one time. This was one of the reasons we stopped tagging calves at birth in the hills. They were MOTHERS – maternal monsters. 222A and 176A were selected for excellent docility. I always say if it comes from the 222 cow line, you want it! We have incorporated Simm and Angus back and forth in this family and they are all awesome cattle – go any direction you want. We kept and used every offspring from this family except a bull we let Scott and Trina Watson buy and a heifer that Colton Lazurko showed for 2 years as a 4-H heifer.

# THE 285 family

We purchased our "Stubby" cow (BLCC 285B) from Bonchuk's looking to add the Stubby influence – huge rib, massive capacity and easy fleshing. She preg tested late so she will join our grass calvers but you can see her influence in her daughters below. They are easy to find in our herd. Her Game Face son walks the hills here.

LOT 10

# THE 134 family

134A was one of the first females we purchased from Bonchuk Farms. A power cow sired by Sledge. We used her Sheriff son for years and he left some great females. We don't use a lot of red bulls but he was too good not to and he left some black daughters that are some of my favorites. Her offspring have a lot of strength.

LFE GAME FACE 338F

"Tank" as she is known in our herd is a very special cow – on the Simmental side one of our most influential cows. Her best accomplishments were KKLP 158Z (Dream On) and KKLP 158F (Lock and Load). Dream On was one of the best female producing bulls we used and we have used 20 of his sons in our commercial herd. 158F is following everything 158Z has done. His daughters are honest. Last fall we opened our bull pen for the first time. Scott and Trina Watson took 13 bulls – 8 were 158F sons. While she produced great bulls we have only had 2 heifers from her. We purchased "Tank" from Highway 5. She is out of a Black Joker female and was one of their best cow families. "Tank" is 13 and getting grey but she preg tested right up at the front of the herd. We debated about bringing her to the sale but with her age decided to let her stay home.

# THE 219 family

We purchased this Broker female out of a Stubby cow from Bonchuk Farms. The Broker pedigree is very popular in the Simmental world. Like many good ones their worth becomes more evident as years pass. Front pasture female and daughters. This family cranks out both bulls and heifers – definitely building blocks for the future. Super calm disposition. Her and her Alliance daughter are Kathy's favorites.

THE 25 family

Another foundation cow known for her sons. 222A, 176A, 23Z 25Z and 609B were the picks of our 400 commercial cows. They were all may borns, bred to calve in February. They can walk with the best – common sense genetics and the most honest cows you can ask for. If we started all over it would be done in exactly the same way.

289C is a 3C Macho – bred for the money stripe! She is actually a ¾ Simmental cow. She locks in blazes – very powerful producer of both sons and daughters.

LOT 44A

One of our top Dream On cow family – soggy, soft, easy doing cattle. They don't get more honest than this cow family. They are lifers! We are using a SVS Dynasty son and he will start his own dynasty! We promised the Piller sons that the first one to produce a grandchild could have their pick of the heifer calves. When Hayden and Anna told us they were pregnant they ran to the heifer pen and picked a 303B daughter that we call Emmett after my first grandson. He will have a great start in the cattle business with this cow family!

BLCC 44A – KOP Ponderosa power cow family. She is the mother to the Circuit Breaker bull we used. She is a horned female but when you find a cow like this you buy her – horned or not! I stopped bidding on her at Boychuk's sale thinking that was a lot of money for a horned bred. After the sale I told Kathy that I wouldn't sleep without owning her. Delight Simmentals bought her so I approached Gordon and asked if he wanted to make some easy money. Long story short I bought her from Gordon and have never regretted it once.

LOT 54 AND 54A

THE 44

family

The 624 cow family has extraordinary muscle. 624B is sired by a Dark Knight son (LFE 826X). I bought him as the number 3 bull in the ring – he could have easily started the sale in my mind but he was hetro-polled. He got injured here fighting; I always wish I would have collected semen on him; I would still be using him today. Best Simm cows in the valley for years were sired by him. 624B was pulled in as a heifer calf from the valley and possesses and transmits the most natural muscle of any cow on the place. Every daughter and son inherit this trait. I would say this is the number one cow family for yield. This cow family will produce cattle that yield grade #1 and improve any finished cattle. Take a look at her son. And he is not alone – every son she has raised has looked the same. One would think this family would sacrifice maternal because of the muscle. Not true. The mother cows have high fertility and milk.

LOT 59A

Great cow family – low set and high volume. Very docile. 93D is sired by an Eye of the Storm son we purchased. He didn't blood type so she is not registered. She ranks pretty high with us. This put the upgrading a generation behind but the quality is right where it needs to be.

# THE 8516 family

We purchased this female from Lee and Dave as a power cow and she did not disappoint. She actually goes back to KKLP 412D who I sold at the Agribition sale to Brian Bouchard in 1994. 412D has 46 direct descendants in the Simmental herd book and makes the top 10 list. One of 8516G best progeny is the game face two-year-old 29J. But she is late – 4 months plus at sale date. As a heifer we saw her bred in April then nothing all summer. She calved in early June so we assumed she slipped her calf and rebred. It's a good blaze bull but too young for the sale. We struggled with whether to put 29J in the sale but some strong breeders and consultants suggested we keep her open and sell her for donor purposes. We put her in the sale calving late so everyone knows there is nothing held back.

The mother to 935G was purchased from Bonchuk's – a good purchase! The mother was killed in the pasture and 935G was orphaned. 935G is a Dealer Western combo. She is very productive and fits right in to our herd on body type and easy keeping and she certainly passes this on.

I talked Hayden into selling this calf – he is pretty special and clearly represents our upgrading process to the ninth degree – carcass and maternal. The Georgina cow is a Network that I purchased from Lewis Farms to start Hayden with a donor type Angus cow. She only raises daughters and her daughters have mostly daughters! Hayden probably has 25 head that go back to Georgina to complement his own breeding herd.

His mother is our "Tank" cow (see 158 cow family). Sired by Lock and Load. He is a beef bull! He is about as honest as any bull I have ever used. Sometimes you get lucky and time only proves it. The birth weights never fluctuate — perfect for grass calving. The daughters are exceptional females and make good honest cows. Once we saw what this bull could do we, we used him hard. The bull and heifer pens were full of his progeny. His feeder cattle have upped the bar. I can honestly say he outbred his pedigree.

A Riddler/Cobra combination we added to increase performance carcass yield. We know we have marbling grading targets so the next thing was to increase yield and performance in our finished cattle. We were looking for older proven genetics. This combo ranks top 1% for weaning and yearling weights, top 25% for marbling and top 20% for carcass and ribeye in the breed. He ranks in the top 2% of the Simmental breed for terminal index. I am not a numbers guy as the proof lies in our slaughter returns but starting with 2 bulls ranked this high in the Simmental breed seemed like a good start.

I own the walking rights on this bull and am selling 100% of it. The semen rights are owned by Bouchard Livestock International. Lewis farms has semen collected for in herd use.

LOT 74

## WELCOME FROM JUNIORS CATTLE CO.

At this time we would like to welcome everyone to the Double KL Simmental Dispersal. Twenty years ago I sold my cow herd of Simmental cows and at that time I said I was going to own some purebreds again some time.

I have been friends with Ken for 25 years and Cindy and I were blessed when he gave me the opportunity to have cows at the Piller ranch.

At this time, Cindy and I would like to thank Ken and Kathy for everything they did in looking after the cattle at the highest level possible. Ken and I spent a lot of time over the years discussing cattle and I am proud to say I learnt a lot from this man.

We are very proud of the cattle on offer in this sale and feel they will work for the new owner. Come early introduce yourself view the cattle have lunch and enjoy the sale. Feel free to call me anytime on the whole set of cattle up for offer. Thank you and look forward to seeing you sale day.

Proven older genetics – Cobra ranks very high in carcass traits. No nonsense, quality cattle with sons and daughters still leading the Simmental industry. He fits our targets very well. He calves consistently in the 80-90 lb birth weight with unreal vigour in the calves and added a little more punch. Top proven genetics – no gambling here on what his sons and daughters will do in their new herds.

GENEX

Raising profitable cattle and aligning with markets is a tool we have found necessary to stay profitable. You need to be rewarded for raising top end cattle. We believe our genetics are on the right path. Without individual carcass data to direct our breeding decisions we couldn't achieve this.

Beretta Farms has played a very important role in our breeding and marketing decisions. We choose the European, natural market they offered. They market multiple brands worldwide. Without the use of implants to build muscle and lean yield, and rumensin for feed efficiency, it has forced us to build our genetics to raise cattle with natural muscling and fleshing, feeding and grading ability to be able to compete in a tough business.

When we started this business more than 30 years ago, all of our animals were raised on our 800 acre home farm in King City, ON. Having expanded our network to include other family ranches across the country that we know and trust, the Pillier family is a perfect example of a like minded family with the same core values - raising and marketing animals in a Natural way. Our beef is all branded the same way. Raised without the use of antibiotics, hormones or steroids. Cattle with genetics that allow them to naturally muscle and marble well on grain is imperative and KP Simmentals are a perfect example. In the 6+ years of supplying cattle in our Natural EU program, we have always prioritized KP Simmentals due to the great health in the feedlot, high grading scores and superb genetics. By owning our own plant, the carcass data we readily have available has allowed us to verify beyond just our word, that the genetics are the real deal. We are fortunate enough to be a fully integrated, family operated business that works closely with ranchers to raise cattle for a market that pays a premium and feels good doing so. If you are interested in the program or marketing your cattle with us, please reach out to our Cattle Team.

EVEN HELP AT BRANDING

# TERMS AND CONDITIONS

The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance, unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. Current exchange rates will be announced sale day. All monies are in Canadian funds.

## BIDDING:

Each animal will sell to the highest bidder... no by-bidding will be permitted.

## DISPUTES:

Bidding will be reopened between the parties involved in dispute. If no further bidding is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision on all disputes will be final.

## ANNOUNCEMENTS:

All announcements made from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay close attention to such disclosures.

## BREEDER'S GUARANTEE:

As this is a dispersal sale, all cattle sell with no further guarantee. Any known defects will be announced before the cattle are sold.

## CERTIFICATE OF REGISTRATION:

Each animal will carry papers issued by the Canadian Speckle Park Association unless otherwise specified. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

## HEALTH:

All animals in the sale have met all necessary health requirements, cow herd is on a full herd health program.

## INSURANCE:

Will be available sale day. We strongly recommend that insurance is purchased for full value.

## LIABILITIES:

All persons attend the sale at their own risk. The seller, facility owner and sale manager assume no liability legal or otherwise, for any accidents that occur. It is understood that T Bar C Cattle Co. (2013) Ltd. is acting only as a medium between buyer and seller and is not responsible for any failure on the part of either party to live up to his obligations. T Bar C Cattle Co. (2013) Ltd. does not assume any financial obligations to collect or enforce collection of any monies between parties and any legal action that may in exceptional cases be taken must be between the buyer and the seller. T Bar C Cattle Co. (2013) Ltd. assumes no responsibility for any credit extended by the seller to the buyer. The buyer must look to the seller for fulfillment of all guarantees and representations made hereunder.

## RIGHTS & OBLIGATIONS:

The above terms and conditions of the sale shall constitute a contract between the buyer and seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

## PHONE, WIRE, MAIL BIDS:

Bidders unable to attend the sale may phone, wire or mail their bids and instructions to the sale manager, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

## DELIVERY:

We will assist in arranging transportation wherever possible. Each animal becomes the risk of the purchaser as soon as sold.

## ERRORS:

All announcements at sale time, written or oral, supersede any written material in the catalogue.
