28 years! 6 generations! 3 breeds! 1 Family run operation!

It is both an honor and a privilege to be your herd bull source! As we approach the 2026 bull sale season, it goes without saying that we are here because of the continued support of you, our customers. We would like to extend a token of gratitude for your continued loyal support and confidence in our breeding program. Each year we are extremely humbled and could not be prouder to see our prefix flourish in herds across Canada. Being a family run operation, we take significant pride in our cattle and every year we set the bar to breed the type of cattle that will be sustainable in the beef industry, while focusing on the productivity and profitability for the cattlemen who sell quality pounds for a living. Here at Richmond Ranch, it has been our unwavering belief in the strength of cow-families, and we have emphasized on having only elite females retained in the herd. Our disciplined breeding program has focused on structure, soundness, udder quality, performance, and maternal production. Our cowherd has a very strict 45-day breeding cycle, and we are proud of the fact that over 85% will calve within the first cycle. We believe this is important to ensure high fertility remains within not only our herd but passes into yours as well. You can be certain that behind this stout set of bulls is a very impressive, hardworking, and productive set of females. The cattle business has been our way of life for 6 generations now, and with the addition of each generation brings growth and changes. Though one constant here on the Ranch will always remain the same, the cows do the work. We have built our operation on the ground level basics of a hardy functional cowherd.

As we present what we feel is one of our strongest bullpens yet, we will continue with our Breeding Protection Plan to help ensure your investment is protected. Furthermore, your cows are bred. Understanding the importance of your investment in a herd bull along with the expectations that come with that, we would like to assist you in any way we can to make your selection easier. Stop by at any time for a visit, the coffee pot is always on, and there is nothing we love more than talking about cattle and touring through bull pens.

We hope that you will mark your calendars and join us, Sale Day.

Sincerely,
The Richmond Family

Richmond Ranch Breeding Protection Plan

Our goal is to help ensure your cows get bred and your investment is protected. We still encourage that the best defence you can buy is a backup bull. However, we understand this is not always an option for everyone and have designed our Breeding Protection Plan to better serve our valued customers.

Option 1. 10% on the purchase price.

This Plan will give you **protection for the breeding season up until Sept 1st**, against injury or death with either a replacement bull a credit for a future bull sale, or a combination of the two.

If you require a backup bull, there will be a potential charge up to \$1000 (unless you keep this bull as your replacement.)

Option 2. 15% on the purchase price.

This Plan will give you **1 year protection** against injury or death with either a replacement bull, a credit for a future bull sale, or a combination of the two. There will be no additional charge if a backup bull is needed.

If you should have any problem with your bull – Make Richmond Ranch your first call.
Jim or Stephanie at 403-323-8433 or 403-323-7269.

Under our Breeding Protection Plan your bull is protected from injury, sickness, accident, structural breakdown, or death. The Breeding Protection Plan will not protect from any injury or death due to malicious, wilful intentional acts of mistreatment. Richmond Ranch will do our best to resolve any issue with honesty and integrity to keep you a satisfied and repeat customer. Richmond Ranch retains the right to request photos, a vet report or Postmortem. Please feel free to give us a call anytime to discuss this Breeding Protection Plan.

Richmond Docility Rating or DOC:

This docility rating has been established to help you determine the temperament and manageability of the bulls. We as breeders strive to hold our livestock to a high standard and that includes docility. In our program, we do not tolerate any problem animals and feel you should not either. No one knows these cattle better than us and throughout the calendar year these bulls have been sorted, processed, handled numerous times, and are strictly culled to remove any behavioural problems. Below is an index defining the different categories we have decided upon. **These are simply our ratings and cannot be compared to other breeders or numbering systems.**

The individual ratings have been formed after each bull has been handled alone.

1 = Pets – These cattle are exactly that, pets. They can be scratched in the pen and always handled with ease.

2 = Calm – These cattle are very quiet, easy to handle when isolated. They do not frighten when you are working them, they are easily approached but you cannot get close enough in the pen to scratch them.

3 = Average – These cattle are calm in the group; you can walk through them without disruption. When sorting these cattle, they are easy to stop and hold, but can get uneasy and impatient when worked alone.

4 = Restless – these cattle are the ones at the back of the group in the pen; they do not disrupt the rest of the pen; they are manageable in a group but become agitated and nervous when isolated or worked alone.

5 = Nervous – these cattle are constantly moving away from you in the pen, can disrupt the group, and needs to be managed with a buddy. These cattle are hard to stop when sorting and become easily agitated if alone.

6 = Heads Up – even in a group these cattle have a big flight zone. They will be the first to run away, should be handled with a buddy and cannot be stopped or isolated when sorting in an alley. These cattle can become aggressive and are culled from our herd.

Producing Cattle that GAIN on GRASS.

Gain on Grass was June 10th – Oct 29th. **These bulls gained 2.39 lbs/day on grass.**
Average Daily Gain was from Oct 29th to Jan 1st. **These 66 bulls averaged 2.96 lbs/day.**

The purebred cattle here at Richmond Ranch are raised ranch style and calved out the way you calve, so the cattle will excel in ranch conditions. These do it themselves ranch cows stay out on native grass until late fall when the calves are weaned off. The calves are wintered in a 20-acre pen on a combination of quality forages ensiled to get them through the winter and back on Grass. This program is designed to develop cattle for longevity and success in any program. We have always selected cattle that thrive on grass, selecting powerful herd sires that stick to the basics of beef, thick and naturally fleshing. This past June 10th we took a weight on our sale bulls just before we sent them to grass. They were weighed October 29th for an end of grass weight before returning to the field where they were supplemented as grass was becoming dormant. The Bulls came back to the yard Nov 24th for the winter to get ready for the sale.

We calculated their Gain on Grass from the June 10th weight and the October 29th weight. Over the 141 days on grass the whole pen averaged 2.39 lbs. per day – (The Cheapest gain we can get!) We have entered this data on each sale lot under “GOG” Gain on Grass.

We calculated their Average Daily Gain from October 29th to their Jan 1st weight. Over the 60 days the whole pen averaged 2.96 lbs. /day. We have entered this data on each lot under “ADG” Average Daily Gain.

When pounds and profits matter, choose your next herd bull from quality genetics.

Cattle Nutrition: At Richmond Ranch our goal is to develop the cattle for longevity and succeSS in any program. The bulls are fed a growing ration of corn and barley silage, chopped hay/straw, and a Bullseye supplement at 0.75%. This system allows us to grow the bulls to seek the performance while maintaining their natural muscle shape. Our goal is to not only have bulls looking good for sale day, but most importantly, looking great while working in your pasture during breeding.

Thursday Feb 13th, 2025 plan to head to the ranch for an outstanding set of bulls. Jim and I spent a little time this summer checking some cereal crops as the swathers were deciding what to knock down for silage, west of Richmond Ranch. Up and down temperatures leading into a hot July made it difficult to decide when to chop certain forages this summer. Looking over the forage results at Richmond Ranch, like most years, forage quality was very strong. From there, we were able to help develop a complete ration to develop these bulls on farm. Their bull feeding program is built to maximize forage utilization and gut health; they are developed on grass with their moms and then moved onto a balanced TMR that promotes lean muscle. These bulls are challenged with a foraged based TMR to help them develop to their genetic potential. Organic minerals are used to ensure proper immune function and overall health. The Richmond's management uses a total nutrition program on their operation, ensuring optimal cattle performance. If you have any questions about the nutrition of the sale bulls, please feel free to call. Best of luck on sale day!

Doug Roxburgh, Beef Consultant

Vaccination Programs: All livestock are on the Express Verified Program. The calves are vaccinated and bolstered with Pyramid FP5 + Prespense SQ and with Fermicon 7/Somnugen. All breeding females are given an annual shot of Express FP5 VL5 prior to breeding, and a Scour Guard shot prior to Calving. The sale bred heifers have had their initial shot and are due for their booster on Mar 1.

Parasite Control: throughout the season includes CyLence, Safe Guard, Clean up 2, as well as Solmectin. **ALL sale bulls received a magnet this fall.**

Semen Testing: All bulls have been tested, measured and palpated through the Stettler Veterinary Clinic by Veterinarian Dr. Jackie Dobinson.

If you're reading this, you are likely considering this great offering of bulls and females and everything that they will bring to your herd. Quality herd sires offer the fastest way to impact genetic potential in your herd. From a veterinary perspective, we often encourage producers to know the health of the animal they are bringing in to ensure that it's going to be a good fit. Richmonds due diligence is spot on. The vaccination and health program at Richmond Ranch is the gold standard of veterinary recommendations. From a reproduction standpoint, everything in this sale is reproductively sound with a veterinary breeding soundness examination and their own responsible breeder guarantee. Health is directly linked to production and production is directly linked to dollars. Years of experience here and sound practices make up the quality you'll see flipping through these pages. We are proud to work with Richmond Ranch and congratulate them on another great offering!

*Sincerely, Jackie Dobinson, DVM
Stettler Veterinary Clinic PH (403)742-3338*

Genomically Enhanced EPDs or GEPDs

Genomically enhanced EPDs (GEPDs) are important because they utilize genomic test results in addition to pedigree, performance, and progeny data for increased reliability of an animal's EPD. Genomic testing is one more tool for breeders to use to predict the future performance of animals more accurately. This is not a replacement for performance data recording. Genomic, test results are used to enhance predictability of current selection tools, to achieve more accuracy on EPDs for younger animals, and to characterize genetics for traits that are difficult or expensive to measure, such as feed efficiency, carcass traits in breeding stock or maternal traits in bulls. The main benefit of genomically enhanced EPDs is the increase in accuracy.

EPD's are subject to change. They can be found on each breed association page.

Yearly Calendar of Events @ the Ranch

- January ~ Jan 1 weights on sale bulls – Ivomec – Lot tags & CCIA tags. / Semen Test Sale bulls.
Bring home cows off native pasture start on feed. / Scour Boss the cow herd.
- February ~ Bull Sale February 13th 2025
- March ~ Organize bull delivery.
- April ~ Calving (April 5- May 25)
- May ~ Calving is wrapping up and we are starting to move pairs out to grass in their breeding groups.
Vaccinate Calves going to grass: Bovilis Nasalgen 3 PMH and Fermicon7/Somnugen.
Vaccinate cows breed back: Express FP 5 VL5
Weigh and scrotal bulls going to Grass. We do a deep cut and ensure only the top bulls remain.
- June ~ Paperwork ... Register all baby calves / Transfer all sale bulls.
- July ~ Breeding – Bulls get turned out around July 1st. / Put Cylence on breeding bulls.
- August ~ Bulls pulled Aug 15th (45 day breeding season)
Process the calves: Brand / Tattoo.
Vaccinate calves: Pyramid FP 5 + Presponse SQ and bolster the Femicon 7/Somnugen.
Take DNA for parent verification, homo polled testing and Genomically enhanced EPD's.
- September ~ As the fall frost and grass quality drop – weigh sale bulls for their weight off grass apply cylence and return to pasture with supplemental feed.
- October ~ Preg test Bred Heifers.
Pairs moved to find better grazing; silage stubble, breeding pasture with regrowth or native grass.
- November Start feeding Pairs out on pasture to teach the calves to eat.
Sale bulls are weighed – Safeguard – Clean up II - Magnets inserted.
- December ~ Wean / weigh /Use Clean up II and safeguard all calves.
Vaccinate calves. : Bolster the Pyramid FP 5 + Presponse SQ and bolster Femicon 7/Somnugen.
Preg test cows, Ivomec and move back to native pasture.
When winter hits bring sale bulls in from feeding pasture to winter pen, weigh.
Bull Sale Prep – Bulls clipped / pictured / videoed. / Build/Mail Catlogue.

Richmond Ranch Breeding Protection Plan

Our goal is to help ensure your cows get bred and your investment is protected. We still encourage that the best defence you can buy is a backup bull. However, we understand this is not always an option for everyone and have designed our Breeding Protection Plan to better serve our valued customers.

Option 1. 10% on the purchase price.

This Plan will give you **protection for the breeding season up until Sept 1st**, against injury or death with either a replacement bull a credit for a future bull sale, or a combination of the two. If you require a backup bull, there will be a potential charge up to \$1000 (unless you keep this bull as your replacement.)

Option 2. 15% on the purchase price.

This Plan will give you **1 year protection** against injury or death with either a replacement bull, a credit for a future bull sale, or a combination of the two. There will be no additional charge if a backup bull is needed.

If you should have any problem with your bull – Make Richmond Ranch your first call.

Jim or Stephanie at 403-323-8433 or 403-368-2103.

Under our Breeding Protection Plan your bull is protected from injury, sickness, accident, structural breakdown, or death. The Breeding Protection Plan will not protect from any injury or death due to malicious, wilful intentional acts of mistreatment. Richmond Ranch will do our best to resolve any issue with honesty and integrity to keep you a satisfied and repeat customer. Richmond Ranch retains the right to request photos, a vet report or Postmortem. Please feel free to give us a call anytime to discuss this Breeding Protection Plan.

FEMALE DIVISION

Offering Elite Purebred & Commercial Bred Heifers

Wondering what to do with your heifer calves this fall?
Ask us about our customer buy back program.
We are looking to purchase heifer calves sired by Richmond Ranch Bulls.
Talk to Tiffany for more information.

**Planning on purchasing a bred heifer?
Richmond Ranch is interested in buying back the bull calves.
Talk to Jim for more information.**

**These Bred Heifers were all pasture exposed.
Angus Heifers ~ June 27th - August 30th.
Limousin Heifers ~ June 23rd to August 30th.
These heifers have been preg checked safe, and dated by our Veterinarian.**

GRAND DAM

All breeding females receive an annual shot of Express FP5 VL5 prior to breeding, and a Scour Guard shot prior to Calving. These heifers had their initial shot and are due for their booster on March 1st.

These Bred Heifers were all pasture exposed. These heifers have been preg checked safe and dated by our Veterinarian. Angus: June 27th - August 30th. ~ Limousin: June 23rd to August 30th.

These bulls have been hand selected based on the strength of the Mother Cow, and what we feel are exceptional calving ease traits.

97 Commercial Heifers

Kevin Gallaway (403) 575-1244

These Bred Heifers are brought to you by longtime cattleman and great friend of ours,
Kevin Gallaway & Family.

We are very honoured to have this set of commercial heifers at our bull sale.
Do not miss this opportunity to add these replacement heifers into your herd. You will
not be disappointed with the future these twelve heifers hold.

These 12 Limousin influenced bred heifers were all exposed to Limousin Bulls.
Breeding Pasture Exposure July 1st - Aug 15th. Due to start Calving April 10th.
Avg Weight 1175 lbs on January 1st.

**We hope you have enjoyed looking through the
2025 Richmond Ranch Bull Sale Offering!**

**Please do not hesitate to reach out should you have any questions.
We understand the importance of investing in the right herd bull,
and we would like to assist you in any way we can to make your
selection easier.**

**We hope that you will mark your calendars Thursday February
13th, 1pm, and join us, Sale Day! Come early and join us for lunch!**

Jim 403-323-8433

Stephanie 403-323-7269

Tiffany 403-740-3748

Stop in anytime to view the bulls!

TERMS & CONDITIONS

Guarantee: Every lot is sold fully guaranteed. Every bull will be semen tested. We produce a quality product; therefore, we stand behind that product 100%. All bulls will sell under the normal breeder guarantee recommended by the Canadian Limousin Association and the Canadian Angus Association – printed on the back of your receipt. Richmond Ranch is never responsible for more than the value of the sale price of the bull(s) or female(s).

Terms of the Sale: Cash or cheque at par, payable to Richmond Ranch LTD at the clerks' desk Sale Day. U.S. funds will be accepted at current rate of exchange. No release will be given until settlement has been made. Please talk to us prior to the sale to make further arrangements. Should any purchaser fail to settle for their purchase; Richmond Ranch reserves the right to resell the animal to their best advantage either publicly or privately, without further notice.

Disputes: In the case of any disputes, the Auctioneer will open the bid between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

Announcements: Any announcements from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

Breeding Protection Plan: Ownership to the purchaser commences when the Auctioneer's hammer falls. Each animal becomes the risk of the purchaser as soon as sold. Livestock Breeding Protection Plan will be available by adding to your invoice at the clerk's desk.

Accidents: Those who attend the Sale do so at their own risk. Neither Richmond Ranch, sales staff, or the auctioneer assumes any responsibility in the matter, and disclaims any legal or otherwise in the event of an injury, accident, or loss of or damage to property or person.

Delivery Options: We encourage you to discuss arrangements prior to the sale. Bulls will be delivered free of charge to central points in Western Canada (Alberta & Saskatchewan) at Richmond Ranch's convenience and at owner's risk. For cattle going to Eastern Canada or the US, we will arrange trucking at minimal cost to the buyer. If this delivery time is not convenient for the buyer, the bull(s) or female(s) will be kept free of charge and the buyer can pick-up the bull(s) at their convenience. Richmond Ranch recommends that all bulls left on site are to be enrolled in the Breeding Protection Plan or Insured.

Transfer of Paper: The registration papers will be transferred to the new owner upon receiving payment in full.

Semen Collection: Richmond Ranch reserves the right to collect in-herd use semen on any bull in the sale. This will occur at the expense of Richmond Ranch and at the buyer's convenience.

Sight Unseen Purchase Plan: If you are unable to attend sale day, we would be more than happy to assist you in your sale selection. Please feel free to contact any member of the Richmond Family or any of the sales staff. Every effort will be made to get you the right bull or bulls, at the right price to make you a repeat customer.

Homozygous Polled Testing was completed at NeoGen. Richmond Ranch does not guarantee the results.

EPD's are available upon request. They can be found on each respective breed association website.

By attending the Richmond Ranch Bull & Female Sale, you are granting permission for your picture to be used for promotional and advertising purposes related solely to the Richmond Ranch Bull Sale.

Longevity ~ Quality ~ Integrity
