Ultrasound Information:

We have been ultrasounding our bulls for years as I feel it is a very good tool to give you a look a what's under the hide. Feedlot performance and superior carcass traits is what has been driving the premiums paid for Char-Cross calves in the marketplace and I feel that it is important that we keep it there.

Marbling: this is a marbling score showing % of intermuscular fat. A - 3-3.9, AA - 4-4.9, AAA - 5-7.9

Backfat: this is mm of back fat between the 12th and 13th rib

Ribeye Area: This is the size of the ribeye in square inches

Lean meat yield (LMY): this is the % of lean meat on a carcass. The yield grade is determined from LMY

The ultrasound measurements are not adjusted to age but is actual data from the day it was taken. The bulls were scanned the beginning of April, so the age ranged from just over a year down to 10.5 months. So older bulls will have an advantage.
