MITCHELL CATTLE CO

From all of us at Mitchell Cattle we welcome you to our 18th Annual Best Bet Bull Sale!

From all of us at Mitchell Cattle we welcome you to our 18th Annual Best Bet Bull Sale!

It is hard to say that it hasn't been another very good year in the cattle business. Looking back on my notes from last year I had thought the prices were near peaking, but we moved some big bulls to town today and 2400 lb bulls brought \$2.60 per pound - \$6300 each, I didn't think I would ever see that day. It is good to see everyone getting paid well in return for their hard work.

With calving season winding down for us and gearing up for our bull sale it gives us a moment to reflect on the 50 plus years in the bull business and a moment to assess our direction and the sires that we are using. We source bulls from across the country searching for functional cattle from productive cow families. We have been "fine tuning" our cowherd to concentrate on soundness, productivity and carcass merit for our meat program. On the maternal side we find it very important to pay attention to udder quality, maternal calving ease and longevity. They are not here because of how highly promoted they are or for what we have paid for them. The bulls are raised in conditions that they will be expected to work in, they travel a very long circuit from May until October up to 50 km from home and 5500 feet in elevation. We will not see many of them for months at a time, the calves grow on forage and mothers' milk, not creep feed. None of the animals here have had their feet trimmed.

We are very happy with our bull pen this year, we believe that this is the most consistent, sound pen of bulls that we have raised. There are many large sire groups if you are looking to put together an even set of bulls or to assess sire productivity and consistency. There are many calving ease oriented angus heifer bulls, the largest group of red Simmentals that we have raised and the black bulls are strong from end to end, The bulls are not "over finished" – we save that for the meat program – they are fit and ready to go to breed cows. The bulls are a month younger than most other sales and have been on feed from the end of October as opposed to the end of August, all the bulls are grown on a TMR ration to ensure their longevity and soundness.

Everyone is involved here, Thompson and Anja have been doing night shifts for calving and Leanna processes calves through the barn, tagging and weighing. I am thankful Leanna has taken on most of the catalogue; she knows every cow and is without sentimental attachment when choosing which ones stay or go. She carries on our thoughts that every cow must take a calf to the range, every year, no exceptions, no free passes.

We are thankful and very much appreciate all our customers and believe that it is extremely important to stand behind our bulls, if there is a problem we appreciate being the first to know. 80% of our bulls sell to repeat customers.

As in the past, we will look after delivering bulls to you, either in your yard or at a convenient spot close to you.

Our thanks to BC Livestock; the crew always does a fantastic job preparing the yards and looking after all our needs in Williams Lake.

If you cannot make it to the sale or would like a little more time and information, the bulls will all be available for viewing at home until April the 2nd, and all day on the 4th in Williams Lake; the coffee is always on. If you wish to have someone do the bidding for you, contact us or the sales staff at BC Livestock. They are familiar with the bulls and would be more than happy to assist you with your sight unseen purchase. Again, we will be having the bulls available for online bidding with DLMS, their system is user friendly, and they are always very professional.

It is our pleasure to extend our greetings and invitation to join us for our sale on April the 5th.

See you all at the Lake,

Ian and Anja, Leanna and Thompson

Homozygous Polled, Non-Dilutor.

If you can bet on anything, you can bet on Polka 46G, bringing in a tank of a bull calf each fall. 46G and her mother, the dam of Lot 19, come from one of our highest producing cow families tracing back to Boda 196X. 196X herself has had multiple sons sell through the sale and still has 3 direct daughters producing in the herd. Boda 196X daughters and granddaughters have had leadoff bulls in our catalog for years, raising lots 1 and 2 in 2024, lot 4 in 2023, lot 1 in 2022, lot 2 in 2021... they just don't miss. 60M was the second-heaviest bull at weaning, lots of performance here.

Homozygous Polled, Non-Dilutor.

The only red bull in the sale whose lineage goes back to Bling 36Z. Bling's own calf, as well as her daughters' and granddaughters' bull calves sell as follows: Lot 57, 41, 46, 52 and 63. What makes Lot 2 even more special, is that his dam is a "Horizon" sired by the Dillenger 116D bull. Top-of-the-line maternal calving ease on the bottom side of this pedigree, not to mention the Dillenger daughters' production records, extremely sound feet and legs, and udder quality.

Homozygous Polled by pedigree.

Moderate birthweights from the dam's side of the pedigree, we absolutely love the mother of this bull. Her dam sent a very good 3/4 brother to DK Land & Cattle of Lampman, SK. 211M is masculine, big hiped, full of meat and solid any which way you view him. There is no questioning the udder quality that will result from this bull. 211M's maternal sister has calved first-cycle and she is a phenotypic copy of their beautiful dam, so much so that we've fondly nicknamed them "Copy & Paste".

Both bulls are Homozygous Polled by pedigree.

Where do I start with lots 4 & 5... their dam is one I hold in extremely high ranking in our cowherd. She's my ideal "Dillenger 116D" sired female who's correct and sound on her feet and legs, big bodied, nice fronted and straight topped. Her dam is red pedigree royalty around here, sired by Power Play 102Y and mothered by the dam of Lot 36. Further back we have Reality 6P – the matriarch behind "Back to Reality 77J"'s pedigree, and many, many more – there was a time when I tallied all the females linked back to Reality 6P, the number is outstanding. These bulls are absolutely guaranteed to clean up and perfect udders – will not add milk. They are dark cherry red and have so much muscle and mass, clean herd bull heads, tons of hair. Stellar growth EPDs, 225M ranked #3 of 61 in his contemporary group at weaning and #2 of 28 for yearling weight. Both are above average in 10/13 EPD categories.

Hetero Polled, Non-Dilutor.

Lot 6 is just incredibly useful. He was born bright and thrifty, perfect shape, nice blaze face and dark red coat colour and really bloomed from there. His dam is very hard-working as most of the Eastwood 22E daughters are. He ranked #4 of 61 at weaning, a testament to his dam's milking ability. He is "in the green" for 11/13 EPD categories. 261M's granddam is a Dillenger 116D daughter with a stellar udder; I rank the Dillenger females as some of our very best, especially in terms of production and structural integrity.

Hetero Polled, Non-Dilutor.

One can't go wrong with a cow of Crosby 137W lineage. Good calving ease here being in the top 15% for CE and MCE. 270M is above average in 10/13 EPD categories. He profiles well, having great length of body and a straight top. Very correct in his lines, 270M would sire an excellent pen of steers. Daughters would have very high udder quality, as we've appreciated for many generations back through his pedigree.

RYM 78K Maternal Brother

REF

REF MAVV **Galen** 48G
 Purebred Simmental PG1290640 MJIS 48G 19/1/2019

This bull has been a fantastic breeder, covering groups of 40 plus cows each year we use him. This bull is dark red, full of meat and muscle, long as a freight train and with very correct feet. The only issue we have with him is that he is now too wide to make it down the long chute for semen testing! The ten sons we have catalogued are very much a tribute to Galen's potency as a sire, just as the last set was, and the one before that. The females retained in the herd are good uddered, sound, easy fleshing and massive ribbed. I think we will see a big influx in bull calves mothered by those cherry red, young brood cows.

RYM 159G **Dam**

RYM 66K **Maternal Sister**

RYM 21M **Son of 66K**

RYM 180L **Full Brother**

Homozygous Polled by Pedigree.

We used the full brother, RYM 180L, to this lot on some of our replacements last year and he bred extremely well, with 18 calves born first cycle. He has also calved like an absolute dream, with all calves born unassisted so far! Lot 8 is above average for both calving ease and growth traits, with very good carcass numbers as well. He is mothered by a sweet Horizon female, a Dillenger 116D daughter, and I have absolutely no complaints about these cows other than that I wished we had more of them. The udder quality and soundness across the board is very good, they calve extremely well regardless of what you breed them to and they far out-produce themselves – always bringing home solid calves in the fall. Lot 8 is sure to sire calves that come easy and grow up quick, as well as make for some nice replacement females. He is dark cherry red, has a herd bull skull shape, he's full of muscle, heavy haired, long as a freight train, has a great top and big hip; nothing about this bull that I don't like.

SBSF **Eastwood** 22E

Purebred Simmental PG1217181 SBSF 22E 19/1/2017

The thing about having a herd bull reach 8 years of age is you learn an awful lot about his progeny in that time. The fact that this 8-year-old bull still has excellent feet, and sires broody, balanced, hard-working daughters justifies us using him just one more time! Pretty fortunate with this herd bull is all we can say. Eastwood improves calving ease and maternal traits regardless of what he is bred to. He is moderate and complete, and to no surprise calved extremely well used on heifers with EPD's in the 1st percentile for CE, BW and MCE. Springcreek Simmentals bought a semen package and used him on heifers and mature cows and the resulting progeny are fantastic. His sons in the Pursuit of Perfection 2021 sale brought as much as \$20,000, \$18,000 and \$16,000. Daughters of Eastwood 22E sold for as much as \$20,000 and \$16,000 in Springcreek's dispersal.

Homozygous Polled, Non-Dilutor.

We talked about this cow family with lot 11 and in summary, they've been very good to us. The number of bull calves that have been brought in by these females is truly impressive and they don't owe us a dime. Revello 75F has never missed, with a 5/5 production record. We retained her first bull to use on heifers, were very pleased with the results, and she brought a bull calf to town every other year except last – as we retained that one for our own use as well. There's no doubt in our minds 49M will calve easy and produce thick, heavy-made steers come fall.

This bull is in the top 1 and 2% of the breed for calving ease, birthweight and maternal calving ease for a reason. His pedigree combines two of our most fault free calving ease sires – Dillenger 116D and Eastwood 22E. The two herd bulls also happened to sire some outstanding females in terms of production, their daughters consistently out-produce themselves and are the type of cows whose calves are always fat and happy!

Apparently, we were selecting for scrotal development when we crossed "Revelstock" Lad 12C and Eastwood 22E, as this bull already measured 45.5cm at less than a year of age. We also lined up excellent calving ease traits with this bull who ranks above average in 10/13 EPD categories, and top 3% or better for CE, BW, and MCE. We wouldn't hesitate to use this bull in our heifer pen, yet he still boasts enough length and muscle shape to use on cows. His full brother this year was 83 pounds – consistent low birthweight.

We bred the dam of this bull, 157B, the same way numerous times and we've never been disappointed. Perhaps the best of them all is the full sister, Sahara 203J. She raised an absolute tank of a Galen 48C heifer calf, and the pair was exceptional all fall. Very consistent maternal production here, as well as stellar calving ease numbers.

RYM 203J Full Sister

Lot 15

Lot 16

Homozygous Polled, Non-Dilutor.
 The last bull calf out of Leanna's ten-year-old show cow. This bull will increase milk and udder quality. He's got a real herd bull presence, with a nice top, big sloping hip shape, masculine front third and keen head. We would have readily used him on our heifers, he should calve very well. He is above average for 11/13 EPD categories. Seeing as this bull's sire and dam have made it to 8 and 10 years of age, both with excellent feet, I'd say the stay-ability EPD is accurate at top 1%.

RYM 335C Dam

Lot 17

Homozygous Polled, Non-Dilutor.
 264M ranks very near the top on my short-list of pen favourites. He takes the cake for being big ribbed, cherry red, attractive fronted and with strong top and hip shape. His dam is still very sound uddered and has always raised good ones. There's no end to eye appeal here, backed by moderate birthweight, well above average ranking in his WW and YW contemporary groups, and stellar calving ease numbers. He will without a doubt catch your eye come sale day.

REF**CIRCLE G Handprint 4H**

Purebred Simmental PG1336661 KAG 4H 3/1/2020

We sourced Handprint 4H from Circle G knowing that this is one of the few breeders who don't creep feed - a weaning weight means so much more when this is the case. 4H is in the top 1% for weaning weight, yearling weight, ribeye area and terminal index. He also maintains great calving ease and maternal numbers across the board. This herd sire calves well with vigorous, bright, strong calves. Anyone looking to add weight and substance to their calf crop should start here. All the other positive traits that come with this sire are just a bonus.

If I had a group of commercial cows this would be a top contestant. 50M ticks a lot of boxes in terms of his performance. His young dam is starting her career off strong with all offspring retained so far. She raised one of my very favourite first-calvers, 50L, who I really need to get a picture of. Sangria 202J is very typical of the Galen 48G females, cherry red, sound uddered, long topped and big ribbed. Her dam is also the dam of Lot 9.

Lot 19 is another bull in the sale tracing back to Boda 196X. While it's typical to see lots of daughters and half-sibs in programs with donor cows, we don't do any embryo work, making the cows that show up in numerous pedigrees in our catalog proven and impressive in a category of their own. The dam of Lot 19 is also the granddam of Lot 1. She crossed very well with Handprint 4H: doubling up on growth, moderating her frame a touch and adding even more softness and fleshing ability - this pedigree stacks a ton of maternal calving ease to boot. A full sibling to Zepepe 208D topped the sale back in 2016. It's very rewarding when the new and exciting genetics from ten years ago still hold their ground today; sound and productive as ever.

95M was an easy pick in the spring. This blaze faced, big middled, power bull has always looked the part. He also takes the cake for being the heaviest bull to go in the pen at weaning time. This bull's pedigree contains maternal greats like Rebel 33Y and Sonica 213W; and Handprint 4H is a great cross on this cow family.

Rebel 33Y Mat. Great Granddam

We count on the 4H sire to moderate birthweights and yet his growth numbers are phenomenal. The first year we used him his bull calves were the heaviest-weaning sire group, and the same is true this time around. His bull calves averaged 918 pounds off the mountain. We'd expect powerhouse bulls or steer calves to result from 95M, and sound, solid uddered, tanky brood cows too.

When you find "Revelstock" Lad 12C and Handprint 4H together in a pedigree you know there will be curve bending performance to follow. Revelstock himself has had over 50 recorded progeny here and he is still well above average for calving ease, and maternal calving ease while also boasting top 10% and top 3% EPDs for weaning and yearling weight. Handprint 4H is the same story - above average for calving ease and maternal calving ease but also in the top percentile for both WWT and YWT. The numbers came to fruition as 118M boasts a fairly moderate 90-pound birthweight, weaned at over 900 pounds, and was gaining 5 pounds per day at the time of catalog completion.

Moderate birthweight is expected from both Handprint 4H and Lad 207F, and this bull went on to wean at nearly 900 pounds, putting him first in his contemporary group. His EPDs are excellent being in the green for 11/13 traits, top 20% or better for calving ease, weaning and yearling weight, maternal calving ease, maternal weaning weight, carcass weight, ribeye area, all purpose and terminal index. His dam is extremely hard-working, good uddered and if you're in the market for a bull that'll sire calves that come easy, get up and grow, this is the one.

REF

MAF Mr 172J

Purebred Simmental 1362608 MAF 172J 26/1/2021

We acquired the most sought-after Velocity x Mackfrid flush calf on offer in Meadow Acres dispersal and are very happy with the results. 172J displays a ton of power in his calves, with very attractive head shape and phenotype. They show promising performance early on, big round muscle and hip shape, as well as great hair and style. The calves are easily some of the thrickest babies at calving time, being quick to get up and go. 172J is backed by Mackfrid 27F and all her successes as a donor as well, the females should be of high quality!

 There are times when I wish a bull had been born female so we could've retained the genetic combination. We didn't get a huge crop of MAF 172J calves the first time around (due to no fault of his own as he's an excellent breeder) but the first daughter that has calved first cycle is a "Revelstock" 12C x MAF 172J and I'd like more! The daughters of this bull will be big ribbed brood cows with extremely good maternal calving ease. One would expect offspring to be born easily and perform consistently.

 Lot 30's dam did an excellent job bringing him in off the range at 850 pounds and this is something we've come to expect from the Elite 8G daughters. As for 90M's sire, we kept nearly every calf out of the Kingston 104K bull; they started out moderate at birth, but you'd never know they were heifers' calves come fall. 104K progeny are early maturing and their performance is backed by phenomenal EPDs – just check out Potent 90M's and see for yourself!

Dream Gal 838F **Granddam**

REF**RED MITCHELL'S Parks 6J**

Red Angus CSA Reg#: PCANAR2198676 RYM 6J 23/1/2021

Without a doubt one of the most sleep-easy heifer bulls we have used in a long time. We haven't assisted a single angus heifer bred to him; these calves are born easy, bright, and full of vigour! While Parks 6J is phenomenal for calving ease, he still maintains an impressive frame and has matured well. His dam is a long-bodied female with big sweeping rib shape; a very correct and pretty cow all around.

Destined for the heifer pen. On Trend 3M is out of a cherry red first-calver who unfortunately got split from 3M at some point on the range, hence the weaning weight. This bull goes back to another "Horizon" cow - these females are easily some of the best producing, easiest calving cows we have, and their sire, Dillenger 116D, was incredibly sound and stayed here many years. Going back further in the pedigree we have Binky 222D, a bigtime performance cow who sent a son to Triple T Diamond Simmentals in Manitoba. A full sister to that bull raised her first calf last year and she is a beauty! Tidy, angular fronted and big bodied. 3M is backed by many generations of solid females.

Hetero Polled, Non-Dilutor.

Here's a perfect sleep-easy heifer pen candidate. His dam is a super uddered, big sweeping rib type female of Thompson's that is exactly what we expect of the Bootlegger 87G females. 222M is in the top 1% of the breed for calving ease, birthweight, maternal calving ease, and top 4% for marbling EPDs. Being another true hybrid, you can expect some added vigour and longevity, he's also one of the most docile bulls in the pen.

Hetero Polled, Non-Dilutor.

Lot 36 is mothered by 14 year old cow 227Y, who is an own daughter of Reality 6P. 6P is a bigtime matriarch of our cowherd who has countless daughters and granddaughters still producing here. Lots 4 and 5 both go back to 227Y and 6P. We purchased the herd sire MAF 188J out of the Meadow Acres dispersal on the merits of his 2yo "Launch" dam weaning a calf weighing 844 pounds, her uber-feminine type, and perfect udder. Lot 36 has great growth and maternal calving ease EPDs, and is top 15% for stay-ability, as he should be.

Rhea 21G **Paternal Granddam**

Homozygous Polled, Non-Dilutor.

A homozygous polled son of our fullblood herd sire Elite 8G. It wasn't expected, but we could've easily used 8G on heifers, he has sired incredibly bright, moderate birthweight calves that exhibit stellar growth. The "Elite" 8G sired females we have producing in our herd now are so good we've continued to use the bull even though we'd sworn we wouldn't continue to use a bull that was hetero polled. Lot 37 is well above average in 12/13 EPD categories, a pen full of heavy muscled steers sired by him would be exceptional.

Homozygous Polled.

We used Bootlegger 87G in our heifer pen for years with fantastic success, regardless of birthweight, these are cattle that are shaped to calve easily. His dam is also a hybrid sired by calving-ease phenom Utah 835F, who not only had small calves at birth but proved to be a true curve-bending performance sire. Lot 38 is extremely useful in type, is very smooth-made and has great length throughout.

Homozygous Polled, Non-Dilutor.

There's quite a few daughters and granddaughters of Convoy 136X with sons in the sale, highlighting their productivity. Not only that, but the dam of this lot is the first calf of the dam of Lot 36. It's no wonder the stay-ability EPD of Lot 39 is in the top 2% of the breed when his dam and granddam are still raising very saleable bulls at 12 and 14 years of age.

REF**MRL Marlboro Man 1K**

Purebred Simmental BPG1389715 MRL 1K 1/1/2022

This is a herd sire that deserves some recognition. To start off, he's a phenomenal breeder, and saw over 40 cows this year. His calves come easily and have some of the best performance in the pen. We tested our luck breeding him to a group of powerful heifers and the results are fantastic. Some of my favourite calves out of two-year-olds; they had the right shape at birth, moderate birthweights and, as expected, have grown like weeds. Marlboro Man or "M&M" as we call him, has stellar EPDs being well above average in 12/13 categories. These numbers have rung true in his calves, we are so impressed and hope to use him heavily again this year.

40M is notorious for lounging along the feed alley all day and he's one you can't help but have a second look at on the way by. He shares his dams' perfect blaze face, he is deep sided, long spined, smooth and is just a bull that profiles well every time you see him. His 2yo sister is neat; she's a correct, nice uddered, pear-shaped first calver and she shares the same eye appeal as this lot 40 bull. Lot 40's dam calved right at the beginning of first cycle again this year, and has an awesome Burnout 336L bull calf at side.

If we weren't fully stocked up on the genetics that back this bull he would not be offered for sale. This is the best of our black Simmental breeding program, crossed up and come full circle and it's pretty rewarding to see in the flesh. This bull is docile, boasts exceptional calving ease, and is currently gaining and weighing near the top of the pen. He is one of six in the catalog with Bling 36Z in their pedigree, and he gets his handsome white dash on his face from her.

Lot 41

Lot 42

Homozygous Polled, Homozygous Black by pedigree.

This is the bull that was number one on Leanna's short list. EPDs well above average in 11/13 categories, 186M ranked #9 of over 60 in his contemporary group at weaning. He combines some of our most prevalent genetics from the powerhouse brood cow Score 207W, bull builder "Revelstock" Lad 12C, growth sire Riddler, to curve-bender State of War 056C. 186M is full of muscle, has a strong top, huge barrel, a true herd bull head, and carries it all well on a big correct foot. His dam has calved first cycle once again with a full sibling who looks outstanding as well.

Lot 43

Homozygous Polled by pedigree, Homozygous Black by pedigree.

The dam of Lot 43 is a favourite around here, as is her full sister. Both females had calves sired by Marlboro Man this year, and I have to say that the genetic full sister to Lot 43 is pretty stellar. Their granddam goes back to Tobasco through our Warrior 33W herd sire, a bull that made his mark here by way of highly fertile, structurally fault free females that were the "herd bull maker" type. This bull is above average or "in the green" for every EPD trait. His yearling weight adjusts to 1500 pounds, ranking him 1st in his contemporary group. Both female and male calves off this bull will be of great value. Females will become some of the best in the cowherd, very typical of the "Zeola" cows that I speak so highly of in many other footnotes in this catalog. With the combined calving ease and top performance, one can expect a high number of unassisted calves that get up and grow. Lot 43 will sire a heavy pen of steers too, no doubt.

SPRINGCREEK **Redemption** 44J

Purebred Simmental BPG1342011 MBJ 44J 15/1/2021

Never did we think that this big volume, well-muscled herd bull would turn into our heifer pen specialist. But we have since mated and calved out all our black heifers to him which worked impeccably well. His first set of daughters also calved this year, and the udder quality is extremely strong, they are compact, pear shaped, sweet tempered young brood cows. 44J's EPD profile is second to none; he is sound, very docile, and easy fleshing. We retained a son out of this bull to carry his genetics further in our program.

Homozygous Polled by pedigree, Homozygous Black by pedigree.

A bull meant for the replacement heifer pen that you'll want to retain all the females out of. Top 20% of the breed or better for CE, BW, weaning and yearling weight, maternal calving ease and more. We kept more Redemption 44J daughters this fall than we did out of any other sires. On top of that, Zeola 45K has a picture-perfect udder, she is uber-feminine, correct on her feet and legs, with enough substance to be a solid brood cow. She calved first cycle again this year and her "Marlboro Man" calf at side is going to be one heck of a bull come fall.

Homozygous Polled, Homozygous Black.

Excellent calving ease and growth combined in an eye appealing, solid muscled, long bodied bull. We used herd sire Redemption 44J with great success on all our black Simmental heifers, and yet his calves aren't lacking any performance. Proclamation 71M ranked in the top 8 of over 60 in his contemporary group at weaning. His great-granddam is a cow we sold to Ed & Ange Pawloff in her later years, and she sure could bring in a heavy-weight calf; that production and milking-ability has carried down to Zeola 206H.

CIRCLE G **Instinct** 33J
 Purebred Simmental BPG1373179 KAG 33J 13/1/2021

Another good herd sire purchased from Circle G Simmentals based on the merit of Garth Cutler's very impressive cowherd. Instinct has already been proven to add sound foot structure, bone, and body mass, along with that sought after money-stripe white face. After viewing the dam of Instinct 33J we were sure his daughters would become favourites with beautiful udders – now that we have calved the first set, we can confirm that notion. They are nice tempered females, certainly have great udder quality and I think they're going to be stellar bull producers in the future.

Homozygous Polled, Homozygous Black.
 81M is very characteristic of his sire – thick from his forerib to his hip, with a keen herd-bull head. He has a moderate birthweight, backed by EPDs in the top 10% for calving ease, birthweight and maternal calving ease; a full brother born this year weighed just 74 pounds. His 10-year-old dam still has a very sound, well-attached udder and she consistently calves in the first cycle. She is also a sister to none other than Bling 36Z. There is no questioning the fertility, longevity and solid track record of this cow family. Just take a peak at the footnotes of Lot 57 to see what I mean.

RYM 98E

RYM 212B

Mat. Brothers to RYM 36Z, dam of Lot 57, and RYM 255C, dam of lot 56

Lot 57

Heterozygous Polled, Homozygous Black.

I've always had a liking for this bull. I took a picture of him the day he was born because he already had shape to his top, was pitch black, had tons of hair, and was bright as a button! The other reason being that he is out of an old favourite: Bling 36Z. There are six other bulls catalogued who trace back to Bling 36Z, one lot who's out of a sister to her dam, one who's directly out of a sister, and one out of the daughter of said 'sister'. We really can't give all the credit to Bling though – her dam was the one who started it all – Dream 40T. 40T was the result of a flush sired by none other than CNS Dream On. She had many sisters whose bull calves were the highlight of our black Simmental program for years. Bling nearly never gives us male calves, and while we don't complain at her annual additions to the replacement heifer pen, this lot is a special offering. We wouldn't hesitate to use him on our heifers, his EPDs rank him well above average in most categories.

158M has been one of the heaviest bulls in the pen at all stages of growth. He boasts tons of length, muscle and eye appeal while maintaining excellent calving ease numbers and a well-balanced EPD profile. His maternal sister is a stellar first-calver who's fault-free in her lines, with a neat little head and tidy udder. This isn't his dams first bull through the sale either, for a little cow she's produced very well for us.

Homozygous Polled by pedigree.

There is only one black Angus female who resides here, a nice bodied cow who Leanna had the opportunity to win thanks to the Speller family who donates a female annually to the local show. 130D has produced well, she's brought bull calves to the sale before, and this is one with exceptional performance. A true hybrid, the cross-bred advantage is strong here as 232M ranked near the top of his contemporary group at weaning, and currently still weighs up well amongst the rest of the pen.

This bull is coming on really well for a march calf. His dam is a daughter of Lot 56, who's a sister to the dam of Lot 57, Bling 36Z. While I won't go on about Bling as I've talked about her in about ten other footnotes, I will talk about the consistent low birth weights of 9289G. This is a cow that was born at 48 pounds herself, and whose mother had a 74-pound Hannibal bull calf this year. Low birth and great longevity is very expected of this maternal line.

When a yearling bull goes out on the range and manages to settle multiple cows it's a testament to his sound structure, travelling ability, and breeding ability – to keep and DNA sire verify 2 bull calves from Bing 58K means he likely settled a fair number more than just those; we're excited to use him on a larger selection of cows in a breeding pasture this year. His dam and full siblings have great merit, selling as the leadoff group in Springcreek's dispersal. Lot 62 is yet another bull who goes back to Sonica 213W, as do lots 9, 18, and 20.

Homozygous Polled, Heterozygous Black.

The only black bull in the offering whose pedigree is backed by the matron Reality 6P. Lots 4, 5 and 36 carry on her bloodline as well. Just to confuse things – we name our cowherd based off of their sire, and if you take a look at this pedigree you'll see a second "Reality" cow – Reality 257R. You will find Reality 257R as the matriarch behind not only this bull but Lots 25, 53 and 60 as well. How's that for lining up some cow power. For an end of march calf Lot 64 is performing near the top of the pen, ranking #2 of 60 at weaning and going on to gain nearly 4 pounds per day, putting him at an adjusted yearling weight of 1428. Keep in mind this bull will be barely 12 months old come sale day, there's no doubt in my mind he would've highlighted the front-end black set of bulls had he been the same age.

Easy-doing and big-bodied with moderate frame. There won't be any surprises with Lot 77 as these traits are strong on both sides of the pedigree. The Mama Mia females have excellent longevity and great feet with lots of heel. They're some of my favourite that have stood the test of time, they belong in our rugged country, keep easy and travel well.

Another bull tracing back to the 'elite' dam Eye Syc 28D. Eye Spy boasts an average performance ratio of 114 on 4 calves. She has been without a doubt the best curve-bending producer for us, and we've retained many daughters. 165M is near the best in the breed for calving ease, birthweight, maternal calving ease and milk EPDs. He is very well suited for heifers.

Rumbler 33B is the dam who gave us the calving ease specialist: herd sire Park 65E. You'll find her influence throughout the Angus pedigrees in this catalog. Expect Lot 79 to be very similar to his brother, 65E, in terms of calving ease and birthweight. His EPDs also predict him to be a perfect heifer pen candidate with top 15% or better numbers for CE, BW and maternal calving ease.

The dam of Lot 80 has multiple daughters retained in the herd, one of which calved first last year and raised a dandy heifer calf who made the keeper pen. Rumbler 248E is a very appealing, big bodied, highly rated female in terms of her udder quality and soundness. One can expect great longevity from this cross. Lot 80 himself is very smooth, balanced and will sire critters that keep easily.

REF

RED MITCHELL'S **Parks** 6J
 Red Angus CAA Reg#: 2198676 RYM 6J 23/1/2021

Without a doubt one of the most sleep-easy heifer bulls we have used in a long time. We haven't assisted a single angus heifer bred to him; these calves are born easy, bright, and full of vigour! While Parks 6J is phenomenal for calving ease, he still maintains an impressive frame and has matured well. His dam is a long-bodied female with big sweeping rib shape; a very correct and pretty cow all around.

Around here if an angus heifer raises a calf over 700lbs on the range it's a darn good first go! I really appreciate the balance, smooth muscle and eye appeal this calf has. One can only hope that all the Tycoon 658H females produce this way! Coonie 38K is out of a solid, sound 10-year-old cow, and she has multiple sisters retained in the herd as well. All of these RYM 6J sired lots are excellent heifer bull options.

I really admire this bull for how strong and smooth he comes off the shoulder and into his forerib. He stems from some pretty stellar females. His dam has calved once again at the very front end of first cycle, as has his granddam. His granddam, Ms Parker 248G, is a cherry red, structurally fault-free cow who boasts excellent feet and udder quality. Lot 82 is yet another heifer bull option.

The dam of this bull is gearing up to be a herd favourite. Her mother, Dee-tour 7D, has been designated an 'elite' dam for years. She raised our herd sire Driver 27G, has 7 recorded progeny and multiple daughters in our herd. Going back even further – her dam, Make My Day 5N, had 12 recorded progeny. This cow family has excellent longevity and udder quality; they're moderate but high-output cows, offering a wealth of maternal strength. 46M will calve well used on heifers, he's in the top 10th percentile for calving ease, birthweight, and maternal calving ease.

53M boasts a very balanced EPD profile, staying well above average for calving ease, birthweight and maternal calving ease traits. His dam is another Utah 65H daughter, and we feel those females have a bright future here. We kept the highest percentage of their calves out of all the Angus first-calvers. Lot 84 is an excellent heifer-safe option.

VET'S MESSAGE

Mitchell Cattle Co. has invested in the health of their herd of cattle for many years through a comprehensive herd health strategy. Currently all breeding females and bulls receive an annual vaccination prior to the breeding season to protect against all the important reproductive viruses and bacteria including IBR, Type I and II BVD and Leptospirosis. All calves are vaccinated at branding to provide protection against the important viruses and bacteria causing respiratory and clostridial diseases. Currently calves receive a modified live vaccine against IBR, Type I and II BVD, BRSV, and PI3, as well as a modified live bacterin against shipping fever and a killed bacterin against *Histophilus somnus*, Blackleg and other clostridial diseases. At weaning all bull and heifer calves receive a booster with the same vaccines and bacterins used at branding. In late fall, all cows, bulls, and weaned calves are treated with a topical endectocide to control internal and external parasites.

All bulls in the sale have passed a thorough breeding soundness exam to evaluate scrotal size and shape, semen motility and morphology, and structural soundness. Through my long-standing veterinary relationship with Mitchell Cattle Co., I also know that you can rest assured that each bull is out of a sound, solid, productive cow. Ian and Anja rigorously select their herd for fertility, sound udders, correct feet and legs, and temperament. These cows go to the mountain with their calf each year and come back in the fall for pregnancy testing. Open and late cows, or cows not meeting Mitchell Cattle Co strict criteria, are culled – no excuses, no exceptions.

As the consulting veterinarian I am very proud to work with Mitchell Cattle Co. If there are any questions regarding the health management program at Mitchell Cattle Co. please contact me.

Respectfully,

Jason R. McGillivray, D.V.M.

Kamloops Large Animal Veterinary Clinic, Ltd.

Ph. 250-374-1486

TERMS & CONDITIONS

Terms:

The terms of the sale are cash or cheque, payable at par at the sale location unless satisfactory credit arrangements have been made prior to the sale. The right of property shall not pass until after full settlement has been made. All settlements must be made in Canadian funds with the sale clerks before any cattle will be released.

Bidding:

Each animal will sell to the highest bidder, the seller reserves the right to pass the bull.

Disputes:

Bidding will be reopened between the parties involved in dispute. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision on all disputes will be final.

Announcements:

All announcements made from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay close attention to such disclosures.

Purchasers Risk:

Each animal becomes the risk of the purchaser as soon as sold. We strongly recommend insuring your purchase for full value.

Delivery :

Free delivery to central points in BC.

Health:

All animals in the sale have met all necessary health requirements.

Insurance:

All bulls will be covered in the yards by Hartford Insurance; insurance will be available for long term coverage.

Breeder's Guarantee:

The animals in this sale are guaranteed per the breeder's guarantee of the breed association they are registered with. In the unlikely event that a bull proves to be a non-breeder he will be replaced with a bull of equal value. Should this not be possible, an adjustment will be made to reflect the value of the bull in question or a credit will be issued towards a future purchase. At no time will we be responsible for any costs exceeding the original purchase price and no guarantee is made that semen from any bull will freeze. This guarantee will not cover any situation where the animal has been subjected to mismanagement or physical injury and we will not guarantee any animal that is subjected to any hormonal or surgical reproduction techniques after the sale. Insurance is available sale day and we strongly recommend that you take advantage of this service. We will do our utmost to work with you to ensure your satisfaction should any problems arise.

Rights and Obligations:

The above terms and conditions of the sale shall constitute a contract between the buyer and seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

Thank you to BC Livestock Co-op for helping make our sale a success.

We would also like to thank our friends and neighbors who are always there to help when needed.
